The Economics of selected vegetable crop production in Alberta

by G.N. Chaudhary. Edmonton : Alberta Agriculture, Economic Services Division, Production Economics Branch, 1990. iv, 27 p.
MICROLOG 91-00072 1 fiche

This report provides information on production costs and returns for fresh (cabbage, carrots, corn) and processing (beans and corn) vegetables, based on 1988 data obtained from 23 producers through a questionnaire. Data were also obtained for rutabagas, onions, and processing peas but as the number of participants for these crops was small, no averages were developed.

An Ecosystem approach to the monitoring of PCBs in pristine lakes in Ontario

by C.D. Metcalfe. Toronto : Environment Ontario, Research and Technology Branch, 1990. iii, 92 p. : ill. Bibliogr. ISBN 0-7729-6899-3
MICROLOG 91-02857 2 fiche

Programs for the monitoring of contaminant levels in sport fish indicate that moderately elevated levels of PCBs and some organochlorine insecticides are found in fish

within inland lakes in central Ontario. This 3-year study was designed to determine the sources of PCB contamination in 5 relatively pristine inland lakes, as well as 2 lakes with known point-sources of PCB contamination for comparison. Throughout 1986 and 1987 samples of water, suspended sediment, bottom sediment, zooplankton, benthos, forage fish and sport fish were collected from each lake for analysis of PCB residues. The results of the study are summarized in this report, divided into papers on the relationship between atmospheric deposition and the concentration of 19 PCB congeners in 5 inland lakes; a comparison of PCB congener distributions in 2 contaminated lakes; and temporal trends and distribution of PCBs in Lake Clear.

Eden Valley local integrated resource plan

Edmonton : Alberta Forestry, Lands and Wildlife, 1991. vi, 25 p. : maps. ISBN 0-86499-619-5
MICROLOG 91-05941 1 fiche

The Eden Valley planning area is a 186.43 sq km tract of low foothills west of the village of Longview in southwestern Alberta. Domestic livestock grazing is the main resource use, although hunting, fishing and camping are also available. This plan provides direction for the management and use of public resources in the planning area and a framework for developing and assessing future actions by provincial government agencies and the private sector. A resource management strategy is suggested for access, fisheries, wildlife, historical resources, mineral resources, range use, recreational and tourism use, timber resources, and water and watershed resources. A glossary is included.

Educational change in Indonesia : a case study of three innovations

by S. Shaeffer. Ottawa : International Development Research Centre, 1990. 112 p. Bibliogr. (Manuscript report ; 270e)
MICROLOG 91-01421 2 fiche (Available on fiche only)

This paper identifies ways in which the process of educational change can more frequently succeed. It analyzes over fifteen years of such change in Indonesia, the third largest nation in the developing world, by examining three major innovations: the Development School Project, Project PAMONG, and the so-called 'Cianjur' or Student Active Learning Project. An assessment of how and why each of these innovations began, developed, and 'succeeded' or 'failed' leads to conclusions about both the changing nature of educational reform in Indonesia and the factors which influence the outcomes--anticipated or otherwise--of the change process.

Educational leadership in Alberta

by C. Montgomerie, F. Peters and K. Ward. Edmonton : Alberta Consortium for the Development of Leadership in Education ; University of Alberta, Dept. of Educational Administration, 1991. xi, 111 p. Bibliogr. Summary (4 p.) laid in. ISBN 0-88664-765-4
MICROLOG 91-04337 2 fiche

This study details its findings on educational leadership in this summary report. The study began with a comprehensive review of the educational literature in this area, followed by a questionnaire which was distributed to all Alberta school superintendents, while in the final phase data was gathered through interviews with selected and identified educational leaders in the province. The study identified issues which were of specific interest to educational leaders, and more specifically addressed the needs of educational leaders in terms of programs and courses which are being offered, and what should be offered.

The Effect of a price adjustment system on the quality of emulsified and liquid asphalts

by C.D. Pearson and D.F. Lynch. Toronto : Ministry of Transportation, Materials Information, Engineering Materials Office, 1990. 12 p. (Materials information report ; MI-142) ISBN 0-7729-8037-3
MICROLOG 91-02247 1 fiche

Prior to 1989, the Ontario Ministry of Transportation supplied bituminous spraying materials (both liquid asphalts and emulsified asphalts) on all contracts. The Ministry had previously attempted to divest itself of this arrangement but the contractors were reluctant to accept the responsibility for the supply. One of their major concerns was that the quality of the materials was generally poor and historically a large number of samples failed the specified tests. The Ministry therefore agreed to address the product quality problem prior to any introduction of contractor supply and in 1985 introduced a price adjustment system based on test results. This paper presents background to the development of the system, an outline of the procedure and the effect the system has had on material quality.

Effect of an air cleaner on thoron progeny

by J. Bigu and E. Edwardson. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1991. iii, 25 p. Bibliogr. (Report ; MRL 91-065(TR))
MICROLOG 91-06270 1 fiche

There are a wide variety of airborne radionuclides in living and working environments which at sufficiently elevated concentrations can pose a potential health hazard. This paper describes a device which operates through air filtration, electrostatic deposition, and turbulent air mixing to reduce the concentration levels of radon-220 progeny in air. The device was tested in a walk-in radon/thoron test facility for its effect on radon-220 progeny potential alpha energy concentration, radon-220 progeny plate-out on large surfaces, radon-220 progeny unattached fractions, and total aerosol concentration and aerosol size distribution. Experiments were conducted at low and medium aerosol concentrations. The device was operated with the fan on and the filter removed; the fan on, the filter in place, but no electric field applied; fan on and electrified filter in place; and fan on, with filter but no electric field and with electric field, for several speeds. In addition, the alpha-particle activity corresponding to airborne lead-212 and bismuth-212 was monitored throughout the tests using a pancake-type beta-particle probe.

Effect of boron on precipitation and recrystallization kinetics in hot deformation of titanium-niobium microalloyed steels : final report

by M. Djahazi...et al. Montreal : McGill University, 1990. 103 p. : ill. Bibliogr. CANMET contract: OST84-00179.
MICROLOG 91-04723 2 fiche

Investigation to determine the effects of boron addition on the kinetics of austenite recrystallization and carbonitride precipitation in relation to the design of microalloying composition and thermomechanical processing (controlled rolling) of titanium-niobium steels for high strength and toughness applications. Four low carbon bainitic steels were compression tested under interrupted and continuous loading conditions. These materials were made from a base steel containing 0.026 percent C, to which were added one or both of 0.055 percent Nb and/or 30 ppm of B. The recrystallization kinetics of the hot worked austenite were determined for prestrains of 0.12, 0.25 and 0.50 in temperatures from 900C-1100C. Carbon extraction replicas were prepared and particle tracking autoradiography was employed to provide experimental evidence regarding the state of solution of the boron during deformation or cooling and subsequent holding. A physical model was prepared to explain the observations.

Effect of coal dewatering and coal use on the water quality of the East Poplar River, Saskatchewan : a literature review

by K.D. Collerson...et al. Ottawa : Environment Canada, Inland Waters Directorate, Water Quality Branch, 1991. viii, 58 p. : ill., maps. Bibliogr. (Scientific series ; no. 177) French ed. (L'Effet de l'eau...) : 91-03727/1. ISBN 0-662-18511-0
MICROLOG 91-03728 1 fiche

The Poplar River basin in south-central Saskatchewan straddles the Canada-US boundary above rich and exploitable lignite coal beds. This report is a literature review of the environmental behaviour and radiochemistry of uranium and thorium and their radionuclide decay products, principally members of the U-238 decay series and He-4, in lignite and ground water from the Poplar River basin. A review of the trace element chemistry of ground water, lignite, and ash waste is also given. Emphasis is placed on trace elements that are potentially toxic in the environment. The chemical evolution of ground waters, especially dewatering ground water liberated during the mining process, is also discussed. An assessment is made of the bioavailability, toxicity, and potential ecological impacts of these contaminants in the East Poplar River and Girard Creek. As both of these streams flow into the Cookson Reservoir, the quality of water flowing from this reservoir into the Poplar and Missouri rivers is also considered.

Effect of ground-grid changes on control-cable voltages at Bruce NGS B

by S.M. Harvey and E.P. Dick. Toronto : Ontario Hydro, Research Division, 1990. 15 p. : ill. (Report ; no. 90-141-K)
MICROLOG 91-00802 1 fiche

On August 4th and October 15th, 1989, while thunderstorms were in progress, numerous electrical and instrumentation faults appeared on units 0 and 5 of Bruce Nuclear Generating Station B, resulting in the temporary unavailability of critical standby generators, unwarranted station service transfers, and fuse blowing on DC supply wiring. An investigation appeared to implicate the control and annunciation cables running between the powerhouse and standby generators SG5 and SG6 located between the intake and outflow channels at the south end of the station. It was hypothesized that the installation of additional, appropriately placed, bonding conductors to the station ground mat could alleviate the problem. This report describes some field tests performed to determine the effect of adding additional bonding conductors on the ground potential difference and on the voltages and currents appearing on a selected cable.

Effect of run timing on the exploitation by anglers of Atlantic salmon in the Miramichi River

by R.G. Randall, J.A. Wright and P.R. Pickard. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1991. viii, 46 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1790) ISSN 0706-6457
MICROLOG 91-03993 1 fiche

This report estimates the exploitation rate of salmon by anglers in the Miramichi River, comparing exploitation rates of early and late run salmon; examines the feasibility of estimating spawning escapement from angling catch data; and identifies the tagging and research requirements if mark-recapture data from anglers are going to be used to estimate spawning escapement in the river in the future. Adult salmon were tagged during their upstream migration at Millbank annually from 1966-75 and from 1985-87. Tags returned by anglers were documented as to capture date, location and tag number. A subsample of anglers were asked to report their catch by major tributary and total catches were then estimated from the subsamples. The angling data has been available since 1969; angling catches for 1966-69 were estimated.

by G.I. Christison, N.F. Cymbaluk and H.H. Nicholson. Regina : Saskatchewan Agriculture Development Fund, 1990. 29 p. : ill. Bibliogr. Retitled: Feed intake of growing bulls during severe winters. ISSN 0829-9455
MICROLOG 91-01719 1 fiche

Eight years of data from the Saskatchewan bull test station were analyzed to establish the effects of daily and monthly climatic values during winter on the voluntary intake and performance of well fed growing bulls. Starting in the fall, young Angus, Charolais, Hereford and Simmental bulls were on test for 140 days in drylot pens with bedded, open-front sheds and windbreak fences. They were weighed at 28 day intervals. The diet contained 50% cereal silage and 50% concentrate with a calculated digestible energy content of 3.06 Mcal/kg dry matter (68% TDN). There was considerable year to year variations in weather.

Effect of the crisis in the Newfoundland fishery on women who work in the industry

Andy Rowe Consulting Economists. St. John's : Women's Policy Office, 1991. 56 p. Bibliogr. ISBN 0-920769-73-X
MICROLOG 91-06777 1 fiche

This report determines how many women in the province work in the fishing industry. It also provides an overview of the sources of impacts on the fishery, and the nature of the effects that these might have on women working in the industry. It also uses case study information to assess the effects of these impacts on women. Finally, it includes a summary, presents recommendations, and identifies areas where additional study would be useful.

The Effect of treated acid mine drainage on stream macroinvertebrates and periphytic algae : an in situ mesocosm experiment

by J.S. Richardson and C.J. Perrin. Victoria : British Columbia Acid Mine Drainage Task

Force, 1990. vi, 55 p. : ill. Bibliogr. MICROLOG 91-00485 1 fiche

A stream 'mesocosm' was used to support an experiment designed to examine the effect of additions of treated acid mine drainage (AMD) on the composition and abundance of periphytic algae and aquatic invertebrates downstream of AMD discharge from the Equity mine site. An apparatus consisting of 10 flow-through troughs, suitable for invertebrate and periphytic algal colonization and growth was installed and tested at the site. After 3 weeks of running stream water without AMD through all troughs to allow colonization by stream invertebrates, additions of treated AMD at an operational dilution rate of 10% to 5 randomly allocated troughs was started and continued for 3 additional weeks. Water, algal, and insect (drift, adult emergence, and benthos) samples were collected from the 5 treated and 5 untreated troughs during and at the end of the 6-week experiment for examination of the effects of the AMD addition on indices of invertebrate abundance and algal growth.

Effect of variety and moisture level at harvesting on the proximate composition of field corn for dairy silage III : final report

Saskatchewan Corn Committee. Regina : Saskatchewan Agriculture Development Fund, 1988. 18 p. ISBN 0829-6455
MICROLOG 91-05712 1 fiche

Project to determine the proximate composition of 10 varieties of field corn harvested for silage at three different stages of maturity. One hundred and twenty experimental plots of corn were grown in Outlook, Sask. in the summer of 1988. The plots contained 10 varieties to be harvested at three moisture levels in four replications. Varieties were randomly assigned within the 10 plot units and level of moisture at harvesting randomly assigned. Samples were collected when it was estimated that the designated moisture level had been reached. Samples were analyzed for crude protein, calcium, potassium, acid detergent fiber and neutral detergent fiber.

The Effect of welding parameters on hydrogen distribution in pipeline welds : final report

conducted under the auspices of Metals Technology Laboratory. Georgetown, Ont. : Gravelle Associates Inc., 1990. 70 p. : ill. Bibliogr. CANMET contract: 99206-01-SQ. MICROLOG 91-00748 1 fiche

There is considerable interest in identifying and quantifying the effects of welding procedure parameters and steel composition factors on the risk of cracking in pipeline girth welds. Of particular interest in Canada is the effect of low ambient temperatures that may be experienced during winter construction. Although low ambient temperatures are generally assumed to increase the risk of cracking, there has been little work to quantify the effects and to suggest how welding procedures should be modified for winter conditions. This work was undertaken to calculate the effects of changes in welding parameters on the thermal cycle and the diffusion of hydrogen for a typical pipeline girth weld. A simple analytical method and the finite element method were used.

The Effectiveness of Canadian supplementary cementing materials in reducing alkali-aggregate reactivity : final report

by H. Chen and R.W. Suderman. Canada Cement Lafarge Ltd., 1990. xv, 245 p. : ill. Bibliogr. CANMET contract: OSQ83-00215. MICROLOG 91-04708 3 fiche

Eight fly ashes, 3 slags, 2 condensed silica fumes, 2 natural pozzolans, 3 natural aggregates, and 3 normal Portland cements were tested for their chemical, mineralogical and physical characteristics. Mortar and concrete prisms were prepared from these mostly Canadian materials to investigate the effectiveness of each supplementary cementing material in reducing alkali-silica and alkali-carbonate expansions. For those rated as good inhibitors of the expansions, their optimum cement replacement levels were also established.

Effectiveness of fences and underpasses on the Trans-Canada Highway and their impact on ungulate populations project

by J.G. Woods. Ottawa : Environment Canada, Parks Service, 1990. vii, 103 p. : ill., maps. CSI 22266.207. MICROLOG 91-04530 2 fiche

From 1983-87, a 26.1 km segment of the Trans-Canada Highway was twinned from the East Gate of Banff National Park to 1.6 km west of the Sunshine exchange. Before twinning, this highway had a record of frequent collisions between vehicles and wildlife. As part of the twinning, underpasses were built, along with fencing. This report presents the result of research on the use of similar mitigation methods to other highway projects of similar scope. The report describes the area and the movement of wildlife within it; the effectiveness of the fence and the underpasses; and the implications for other projects.

The Effectiveness of forest fire-fighting foams

by E. Stechishen. Chalk River, Ont. : Forestry Canada, Petawawa National Forestry Institute, 1991. 3 p. : ill. (PNFI technical reports ; 11) ISSN 1180-2618 ISBN 0-662-18604-4 MICROLOG 91-04147 1 fiche

Suppression of forest fires is dependent on breaking at least one of the links in the fire triangle, that is isolating one of air, fuel or heat from the other two. Water has traditionally been used to attain this goal, as well as fire retardants. The use of a foaming agent enhances water's suppressant activities. This technical note describes how the foam affects each side of the fire triangle, then presents laboratory test fire results which determined the relative superiority of foam over water.

Effectiveness of ice-vest cooling in prolonging work tolerance time during heavy exercise in the heat for personnel wearing Canadian Forces chemical defence ensembles

by B. Bain. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1991. 11 p. Bibliogr. (DCIEM publication ; 91-06) MICROLOG 91-04010 1 fiche

With the deployment of Canadian Forces personnel to the Middle East, the effects of heat stress on performance is a major concern. The threat of chemical warfare, which requires working in chemical defense protective clothing, exacerbates environmental heat stress by hindering the evaporation of sweat. This report describes the effectiveness of a portable, ice-pack cooling vest (Steelevest) in prolonging work tolerance time while wearing chemical defence clothing in heat (33C dry bulb, 33 percent relative humidity or 25C WBGT). Six male volunteers participated in one hour exercise sessions consisting of treadmill walking and lifting until they were unable to continue or they reached a physiological endpoint (rectal temperature of 39C, heart rate exceeding 95 percent of maximum for two consecutive minutes or visible loss of motor control or nausea).

The Effectiveness of low-cost continuous ventilation systems

Caneta Research Inc. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1990. 16 p. : ill. Bibliogr. MICROLOG 91-04474 1 fiche

CSA standard F326(1) describes requirements for mechanical ventilation systems that provide adequate indoor air quality control in single family residences. Builders usually meet these requirements by installing heat recovery ventilators (HRVs), a high first-cost approach, leaving the common perception that meeting the requirements of F326 is expensive. This study investigated some lower cost alternatives to providing adequate indoor air quality control, particularly for the lower cost housing market. The need includes houses with and without forced-air distribution systems and with and without natural draft combustion appliances.

The Effects of alternate-row interplanting of five species on black walnut growth

by F.W. Von Althen. Sault Ste. Marie, Ont. : Forestry Canada, Ontario Region, Great Lakes Forestry Centre, 1990. 14 p. : ill. Bibliogr. (Information report ; O-X-409) ISSN

0832-7122 ISBN 0-662-17824-6 MICROLOG 91-00184 1 fiche

High timber value and the potential for income from nut production make walnut a preferred species for the afforestation of former farmland in southern Ontario. Black walnut only grows well on the best agricultural lands. One possible method of improving the fertility of former farmland for black walnut afforestation is through the interplanting of walnut seedlings with nitrogen-fixing tree or shrub species. To determine the effects of interplanting black walnut with black locust, autumn olive, white pine, European alder and bur oak on the survival and the height and diameter increments of black walnut in southern Ontario, a plantation was established in 1980 on former farmland of marginal site quality near Parkhill, Middlesex County, Ontario. This report presents the 10-year results.

The Effects of climate and climate change on the economy of Alberta

by T.O. Goos. Ottawa : Environment Canada, Atmospheric Environment Service, 1989. 9, 10 p. (Climate change digest ; CCD 89-05) This report contributes to State of Environment Reporting. Bilingual (Les Effets du climat et du...). ISSN 0835-3980 ISBN 0-662-57028-6 MICROLOG 91-06190 1 fiche

This report presents the results of a study into the link between climate change and the economy of the Province of Alberta, particularly the impacts of the 1988 temperature anomaly in the province, using actual economic for the same year. Eleven stations with temperature and precipitation records from January 1978-December 1987 were used to provide representative coverage of the climatic regions and economic areas of the province. The results of three GCMs were extracted to obtain monthly values at seven locations in Alberta for the expected deviation from normal of temperature and precipitation under a 2 x CO2 scenario. These datasets were then interpolated to provide values representative of the 15 census divisions in Alberta. Direct visual comparison and statistical analysis of the calendar year climate data sets with the GCM model output was conducted. The data were then re-analyzed to consider impact over an agricultural year (November to October).

Effects of climatic change on world industry, trade and investment : a discussion paper

by D. Ireland. Ottawa : Institute for Research on Public Policy, Environment and Sustainable Development Program, 1989. xii, 45 p. Bibliogr. Background document presented for a workshop at the World Conference on the Changing Atmosphere. MICROLOG 91-00614 1 fiche

This paper addresses the following questions and issues: What are the probable consequences of atmospheric change for world aggregate production and income and for per capita disposable income? How will the patterns and distribution of industry, trade, and investment be affected? Which sectors of economic activity are likely to be most influenced? Which continents, country groups, and countries are expected to be most affected? How are financial markets and investors likely to respond to changes in the climate? To what extent will world populations and human settlements be affected, and what are the economic consequences of these demographic impacts? How will research and development be influenced? What will be the effects on transportation routes, infrastructure, and economics? And what limitation and adaptation strategies are available for adoption in order to mitigate the economic consequences

of climatic change?

Effects of cutting method and seedbed treatment on black spruce regeneration in Manitoba

by V.S. Kolabinski. Edmonton : Canadian Forestry Service, Northern Forestry Centre, 1991. vi, 21 p. : ill. Bibliogr. (Information report ; NOR-X-316) ISSN 0704-7673 ISBN 0-662-18123-9
MICROLOG 91-03945 1 fiche

A study was initiated in 1955 in the Duck Mountain Park in western Manitoba to investigate various methods of laying out cut blocks in upland black spruce stands for inducing regeneration and to assess the effects of logging on residual stands. An examination after 5 years indicated that stand manipulation was ineffective. A seedbed treatment trial was then carried out by bulldozer, blading portions of the cutovers to induce better stocking and the treatment was again assessed after 5 years. In the summer of 1985, these cutovers were resurveyed to assess stocking and growth of the reproduction as well as the condition of the unharvested residual stands. This report presents the remeasurement results.

The Effects of demographic structure on expenditure patterns in Canada

by W.L. Marr and D.J. McCready. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1989. x, 81 p. Bibliogr. (Discussion paper ; 89.A1) CSI 99545.211.
MICROLOG 91-01539 1 fiche

Immigration to Canada, the age structure, and changes in family structure of the Canadian population, are all changing the fabric of Canadian society. These changes have a potential impact on the Canadian economy since differences exist in sources of incomes, expenditure patterns, and savings patterns depending on individual demographic characteristics. This document investigates these differences for their impact in micro terms. It focuses on the relation of income, consumption, and savings patterns to demographics. It includes population data and projections. It also examines micro consumption data and demography, and provides an analysis of household demographic structure and consumer expenditure. Finally, it discusses policy issues and presents conclusions.

The Effects of nitrogen/phosphorus ratios on the prediction of chlorophyll in phosphorus-limited lakes in central Ontario : report

by P.J. Dillon, R.A. Reid and L.A. Molot. Toronto : Ministry of the Environment, Water Resources Branch, Limnology Section, 1991. ix, 57 p. Bibliogr. ISBN 0-7729-7776-3
MICROLOG 91-03284 1 fiche

A concerted effort has been made during the past two decades to predict the trophic status of lakes based on the response of lakes to total phosphorus (TP) loading and concentration using steady state models. Two noteworthy models are those that predict chlorophyll *a* as a function of TP concentration in P-limited lakes and those that predict TP concentration as a function of annual TP load and flushing characteristics. TN/TP is included as a second parameter because it is recognized that nitrogen is an important factor controlling standing crop in N-limited lakes and that the ratio is an indication of N- or P-limitation. This report presents a statistical analysis of the relationship between chlorophyll *a* and TP in 15 P-limited lakes in central Ontario sampled from 1976-87. The role of TN/TP as a factor controlling chlorophyll is addressed as well as the effect of annual variation on regression goodness of fit.

Effects of suppressant chemicals mixing and temperature on the dissolution of potash core materials

by F.R. Samadi...et al. Regina : Saskatchewan Potash Producers Association, 1990. 172 p. : ill. Bibliogr. Contractor: Central Canada Potash. CANMET contract: 89211-01-SQ.
MICROLOG 91-01022 2 fiche

Groundwater seepage into underground potash mines dissolves ions from the adjacent solid materials through which it flows. To help prevent this, chemical suppressants are injected into underground brines to make the fluid saturated or even supersaturated with the solid formation of the mine. This report examines the dissolution rate of 3 different core particles in mine groundwater, then tests the best suppressant chemicals (KCl, CaCl₂, Na₂SO₄ and methanol) for their effectiveness in reducing core dissolution. The weight loss of the particles in brine and brine suppressant was measured and the form of the rate reaction was investigated. Similar experiments were carried out at 15C, 35C and 45C and mixing rates of 170, 260 and 350 RPM. Brine was also pumped past a vertical core face and the brine contents were measured over time. The core was treated with brine plus a suppressant as well. Concentrations of the ions present in the solution were measured over time and pictures of the core were taken after each experiment. The Harvie and Weare computer model at 25C was tested for predicting precipitation effects at high ion concentrations in pure component system and brine samples.

Effects of time of planting of Engelmann spruce in the Lillooet Forest District, British Columbia

by R. Scagel. Victoria : Forest Resource Development Agreement, 1990. vi, 35 p. : ill. Bibliogr. (FRDA report ; 162) ISSN 0835-0752 ISBN 0-7726-1317-6
MICROLOG 91-06868 1 fiche

In the late 1970s logging extended to higher elevations where little was known of the edaphic and climatic conditions. Because of late snowmelt, summer or fall planting had to be considered. The initial experience with fall planting of Engelmann spruce at high elevations in the Lillooet Forest District resulted in variable plantation performance. This project was initiated to investigate the inconsistency in plantation performance in the Lillooet Forest District; to examine the reliability of summer, fall, and spring planting of Engelmann spruce over a variety of high elevation sites; and to describe the climate of high elevation reforestation sites. Five freshly logged sites were chosen in the Hurley River drainage, south of Goldbridge, representing a range of elevational, edaphic, and site preparation conditions. All sites were broadcast

slashburned and each site was edaphically uniform. The preferred planting on each site was Englemann spruce. Seedling mortality and performance were examined annually.

L'objectif principal de cette étude est de déterminer s'il y a une relation entre les vents et les débarquements commerciaux de morues pour une échelle spatiale plus grande que celle définie lors des travaux de Rose et Leggett. Pour ce faire, l'étude se penche sur le matériel et les méthodes utilisés, et présente les résultats obtenus.

Les Effets du climat et du changement climatique sur l'économie de l'Alberta

par T.O. Goos. Ottawa : Environnement
Canada, Service de l'environnement
atmosphérique, 1989. 10, 9 p. (Sommaire
du changement climatique ; SCC 89-05) Le
présente publication s'inscrit dans le cadre
des rapports sur l'état de l'environnement.
Bilingue (The Effects of climate and...). ISSN
0835-3980 ISBN 0-662-57028-6
MICROLOG 91-06190 1 fiche

En l'espace d'un an, dans quatre grandes déclarations internationales, on a affirmé que le changement de l'atmosphère et, en particulier, le réchauffement du climat, constituait un important problème environnemental nécessitant une action politique. Cette publication renferme le résumé des résultats d'une étude sur le lien qui existe entre le changement climatique et l'économie de la Province de l'Alberta. Cette

étude a été menée en vertu d'un contrat par Acres International Ltd. pour le Centre climatologique canadien.

Effets du traitement des arbres ornementaux au diazinon (BASUDIN) et à l'acéphate (ORTHENE) sur la merle d'Amérique *Turdus migratorius* en milieu urbain : rapport final

Montréal : G.R.E.B.E. inc., 1990. viii, 45 p. Bibliogr. En tête du titre: *Service canadien de la faune*.
MICROLOG 91-07152 1 fiche

Les objectifs de cette étude sont de vérifier si l'acéphate et le diazinon, deux insecticides utilisés en milieu urbain pour la protection des arbres ornementaux, ont des effets létaux ou sublétaux sur l'avifaune. L'effet de ces produits est vérifié sur les comportements de nourrissage et de couvaison ainsi que sur la productivité du merle d'Amérique. Une centaine de nids de cette espèce ont été divisés en trois groupes, à savoir, un groupe témoin, un groupe traité à l'acéphate et finalement, un groupe traité au diazinon. Ce document présente le rapport final de l'étude.

Efficacy test on blackfly larvicide (BTH) : a new application method for problem areas of the Saskatchewan River : final report

research designed and conducted, and report prepared by D.M. Lehmkuhl ; co-investigator Lloyd Saul. Regina : Saskatchewan Agriculture Development Fund, 1990. 27 p. : ill. ISSN 0829-9455
MICROLOG 91-01722 1 fiche

In the 60 km of South Saskatchewan River between St. Louis and the river forks, major blackfly outbreaks are a frequent occurrence in late summer. River treatment methods against blackfly larvae which have been used in the past failed to give satisfactory results in mid-to late summer, because of low water levels and heavy weed growth. This report presents

the results of spraying BHT using a boat.

Efficiency improvement in fluorescent lamps by isotopic tailoring of mercury

by F.E. Bartoszek. Toronto : Ontario Hydro, Research Division, 1990. 11 p. Bibliogr. (Report ; no. 90-151-K)
MICROLOG 91-00789 1 fiche

Lighting uses about 19 per cent (or 22.8 TWh/a) of the electricity generated by Ontario Hydro. Recent research indicates that isotopically tailoring the mercury used in fluorescent tubes can improve the light output by approximately 5 per cent, which has the potential to save approximately 85 MW or 21 million dollars of electricity per year. This report discusses methods to perform the isotope separation and makes recommendations for further work.

Efficiency improvements in industrial electric resistance furnaces

by I.S. Balbaa. Toronto : Ontario Hydro, Research Division, 1990. ii, 37 p. : ill. Bibliogr. (Report ; no. 90-013-K)
MICROLOG 91-00803 1 fiche

This study was initiated to examine the potential for efficiency improvements in industrial electric resistance furnaces, among the most common electric heating technologies used in industrial applications. The study analyzed the important factors affecting furnace efficiency, including heat production, heat control, heat transfer, heat absorption and heat losses. The analysis was followed by a description of the types of furnaces used and possible applications for each type. Discussions with furnace and insulation manufacturers provided valuable information on different aspects of electrical resistance furnaces, including present technology, recent advances, economic assessments, user's concerns and requests, areas in which potential improvements could be most effective and possible R&D projects. The data were collected and analyzed to identify areas and methods for potential improvements and to recommend R&D projects.

Electrochromic materials and devices for switchable window applications

University of Moncton. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. vi, 153 p. : ill. Bibliogr. *CANMET contract: 23283-8-6052-01-SZ*. ISBN 0-662-18035-6
MICROLOG 91-01238 2 fiche

Switchable windows (SW) or smart windows are those in which light transmission through the window can be controlled by a switch. The SWs being developed now are primarily based on electrochromic materials, or materials that change colour upon application of a low electric field. Liquid crystals are also used and large area blinds are presently produced commercially by a few companies. This report focuses on the intrinsic properties of the components of the SW and the tools that are used for their studies, as well as the performance of all-solid-state devices fabricated in laboratories. The report describes electrochromic materials and devices; structure and composition studies; water absorption

behaviour of WO3 thin films; determination of the optical constants; properties of the electrochromic (WO₃) layer; inorganic ion conductors; ion conducting and ion storage layers and the prototype electrochromic system.

Electromagnetic interference of a large vertical axis wind turbine

by C. Gavin. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. iv, 44 p. : ill., maps. Bibliogr. CANMET contract: 62SS.23283-7-6067. ISBN 0-662-17814-9
MICROLOG 91-01257 1 fiche

Interference to broadcast television reception caused by wind turbines is one of the few possible negative effects of installing and operating wind turbines near inhabited areas where television reception is obtained using conventional TV antennas. This report describes a qualitative investigation of the effect on nearby television reception of a large vertical axis wind turbine at the Atlantic Wind Test Site. The investigation was limited to visual observation of the effects on quality of video signal reception near the subject machine. Observations were made from a receiver located at positions around the machine. A portable antenna, receiver and recording package was used to enable quick relocation of the measurement apparatus to selected observation positions.

Embryo cryogenics : executive summary

by R.J. Maplettoft. Regina : Saskatchewan Agriculture Development Fund, 1990. 33 p. Bibliogr. ISSN 0829-9455
MICROLOG 91-01760 1 fiche

The transfer of bovine embryos from superovulated donor animals to surrogate others has become a reliable method to rapidly propagate valuable genetics. Until recently, the embryo transfer procedure had been limited to the transfer of fresh embryos, therefore a reliable technique to freeze embryos for long-term storage and transportation over long distances has many advantages. This report presents the results of a 4-year study to improve the utilization of embryo transfer by cattle breeders; improve pregnancy rates following transfer of frozen thawed bovine embryos; investigate the various factors affecting embryo survival after freezing; explain the basic physical, biochemical and physiological properties of the embryo, its membranes, cryoprotectants and their interactions; and improve Canada's competitive advantage in the exportation of genetic material.

Embryo transfer technology in game farm animals : final report

Marimba Farm Inc. Regina : Saskatchewan Agriculture Development Fund, 1990. 4 p. ISSN 0829-9455
MICROLOG 91-01759 1 fiche

Report of a 6-month attempt to train a small group of bison cows to accept regular handling and to collect embryos from the females and transfer them to domestic cattle. A superovulation program was developed for the bison, based on available information for the domestic cow and limited information and experience on previous bison programs. A single injection of a high dose of Follitropin together with a low dose of pregnant mare serum gonadotrophin (PMSG) was used. Trials in September and October 1989 involved the use of PMSG together with a monoclonal antibody designed to overcome the undesirable prolonged effects of the PMSG. Information was collected on palpation finding, hormonal changes, estrus behaviour in both the natural cycle and the superovulated cycle, synchronization techniques and embryo collection techniques.

L'Emergence du transport informel dans l'espace économique de Shanghai

par L. Perrier et C. Comtois. Montréal : Université de Montréal, Centre de recherche sur les transports, 1991. 26 p. Bibliogr. (Publication : no. 795)
MICROLOG 91-06709 1 fiche

Cette analyse est effectuée dans le cadre d'une région d'étude bien définie soit celle du bas delta du Changjiang, en Chine. Premièrement, on détermine ce qu'est le transport informel dans son ensemble. Deuxièmement, les multiples fonctions de ce secteur des transports sont ensuite reconnues. Troisièmement, on analyse l'impact du transport informel tant sur le plan économique et géographique, que relationnel. Cette démarche permet de mieux distinguer les différences entre les secteurs formel et informel des transports. Enfin, certaines stratégies de développement touchant le secteur informel des transports, et agissant dans l'espace économique de Shanghai, sont présentées.

Emergency preparedness planning : a planner's handbook for emergency preparedness

by L. Laughy. Vancouver, B.C. : University of British Columbia, Centre for Human Settlements, 1990. 44 p. Bibliogr. ISBN 0-88865-361-1
MICROLOG 91-00555 1 fiche (Available on fiche only)

This handbook for emergency planners incorporates a community participation approach. It is written for a medium-sized community where one person may assume more than one role or function. It is meant to be a source of ideas for establishing an emergency planning program at the community level, based on working with the community rather than for the community. The emergency planner is both a catalyst and coordinator who works with the emergency planning committee and its various sub-committees to ensure that a community is prepared.

Emergency preparedness planning : hazard management planning in British Columbia : issues and challenges : a discussion paper

Peter Anderson...et al. ; prepared under the sponsorship of the Forum for Planning Action. Vancouver, B.C. : University of British Columbia, Centre for Human Settlements, 1990. 32 p. Bibliogr. ISBN 0-88865-359-X
MICROLOG 91-00556 1 fiche (Available on fiche only)

This paper explores the need for a more coordinated and comprehensive approach to hazard management planning in British Columbia. It describes the kinds of disasters that are likely to take place in the Lower Mainland, and presents a synopsis of the City of Vancouver's Emergency Plan. It also highlights emergency communications, and outlines the following four phase approach to

hazard management planning: community preparedness, alert and warning, immediate post-impact, and reconstruction and renewal.

The Emerging photovoltaic industry : an analysis of literature on international markets and trends

Peat Marwick Consulting Group. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1989. 21 p. Bibliogr. CANMET contract: M91-7-52-1989E. ISBN 0-662-17139-X
MICROLOG 91-01343 1 fiche

Today, at least 500 companies in the world are engaged in some activity related to photovoltaic (PV) research, manufacturing, system integration and marketing. This report presents a brief review of the relevant and recent literature technology and price on the international PV market; market developments and size; and public sector policy. Since the bulk of the literature reviewed originated in the U.S. (most non-U.S. literature is either unavailable or not in English), the trends reported primarily reflect the thinking of U.S. specialists on the worldwide PV markets.

Emission impact of current and possible future Canadian fuels on heavy duty diesel engines

prepared for Efficiency and Alternative Energy Technology Branch, Energy Mines and Resources Canada ; and Petroleum Association for the Conservation of the Canadian Environment, Esso Petroleum Canada ; by ORTECH International. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. 160 p. : ill. CANMET contract: 23216-7-0013. ISBN 0-662-18099-2
MICROLOG 91-01247 2 fiche

Two heavy-duty diesel engines (DDC series 60 and Cummins NTCC 400) were transient emission tested using 6 different diesel fuels to determine and characterize the emissions for U.S. E.P.A. 1991 and 1994 heavy-duty emission standards being considered for Canadian legislation; to characterize the impact of fuel properties (percent of S, and of aromatics and 90 percent PT) on diesel engine gaseous and particulate emissions; and to correlate the results with those of the U.S. VE-1 program covering a wider range of fuel properties. The DDC engine is equipped with Detroit diesel electronic control and represented the newest technology, while the Cummins NTCC 400 is an older design using mechanical variable timing to meet 1988 California emission standards. The 6 diesel fuels represent a range of current and possible future Canadian fuels.

Employment in the service economy : a research report

by G. Betcherman...et al. Ottawa : Economic Council of Canada, 1991. ix, 206 p. : ill. French ed. (*Tertiarisation et polarisation...*) : 91-04045/3. CSI 22215.226. ISBN 0-660-13825-5
MICROLOG 91-04047 3 fiche

This report is concerned with the nature of the service economy. It looks at conceptual issues associated with services, the factors which have traditionally distinguished service activity from the production of goods, and how innovations in technology and industrial organization are altering these orthodox distinctions. It focuses on explanations for the rapid expansions of the service sector, and documents the shift from goods to services. It also examines the issue of nonstandard employment in Canada, and focuses on the skill content of jobs. In addition, it addresses the relationship between human capital and employment outcomes, and Canada's capacity for developing human resources. It reports the results of a major Economic Council study of income distribution trends. Finally, it presents conclusions and policy implications.

Empowering through communication : women's experiences with participatory communication in development processes

by P.R. Alcalá. Ottawa : International Development Research Centre, 1990. 55 p. Bibliogr. (Manuscript report ; 278e). MICROLOG 91-04060 1 fiche (Available on fiche only)

Participatory communication (PC) refers to the active involvement of community or target groups in manipulating media to produce their own messages and to engage in critical reception. These communicative activities represent new possibilities to meet the learning needs and social struggles of women and their communities. This paper suggests a characterization of PC processes with women and examines their outcomes and limitations, particularly in relation to the developing countries. The paper describes types of PC, women's experiences and involvements, limitations and constraints, and risks and pitfalls.

This report incorporates the impact of a number of changes which will occur in the next 20 years. Topics covered include: an overview of the projected use of energy and energy requirements; assumptions of future pipeline construction, world oil prices, economic conditions, goods and services tax and energy efficiency; projections of prices, requirements, supply and exports of electricity, natural gas, oil and other fuels; sectoral requirements of commercial, residential, industrial and transportation; to improve energy efficiency; and to reduce the environmental impacts of energy use and shift to cleaner fuels. A glossary is included.

Energy-related carbon dioxide emissions in Alberta, 1988-2005

Edmonton : Dept. of Energy, Energy Efficiency Branch, 1990. 38 p. : ill.
MICROLOG 91-01364 1 fiche

Inventory of energy-related carbon dioxide (CO₂) emissions from Alberta from 1988-2005. The inventory includes CO₂ emissions generated mainly from energy-related fuel use and combustion, but also from energy production activities, electric generation, energy transmission, and all energy end-use sectors. Not included are CO₂ emissions from wood and from municipal solid waste, since both would have decomposed naturally, releasing CO₂. The base year is 1988 and emissions growth is forecasted to 2005 using Energy Resource Conservation Board data.

L'Enfance maltraitée -- Rév.

par M. Baker. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 23 p. Bibliogr. (Bulletin d'actualité ; 82-17F) *L'éd. anglaise (Child abuse) sur la même fiche.* ISBN 0-660-93018-8
MICROLOG 91-01930 1 fiche

Une simple fessée ne cause généralement pas de lésions graves, mais au Canada, il existe un nombre appréciable d'enfants qui ont été grièvement blessés ou même qui sont morts par suite de la brutalité de leurs parents ou de leurs tuteurs. Ce document examine la question en se penchant particulièrement sur les points suivants: le droit des enfants; le dépistage précoce des enfants maltraités; la définition; l'envergure du problème; le rôle du gouvernement fédéral; l'obligation de déclarer les cas d'enfants maltraités; et, les registres centraux.

Enfants du Canada, enfants du monde : document du Canada pour le Sommet mondial pour les enfants

Ottawa : Santé et bien-être social Canada, 1990. 93 p. : ill. *L'éd. anglaise (Children of Canada...)* : 91-01971/1. *CSI 21112.214F.* ISBN 0-662-96315-6
MICROLOG 91-01970 2 fiche

Aux fins du Sommet mondial pour les enfants, les pays participants ont été invités à préparer un document national qui évalue la situation des enfants et qui décrit, en termes généraux, les programmes et les politiques destinés à assurer le mieux-être des enfants. Ce document présente la perspective du gouvernement canadien en ce qui concerne la situation des enfants canadiens. Il se penche essentiellement sur les points suivants: l'amélioration de la qualité de la vie des enfants au Canada; le soin et l'épanouissement des enfants; les droits des enfants; la santé; l'éducation; la sécurité économique; les soins, le soutien et la protection; l'immigration des enfants; et, l'aide internationale du Canada à l'enfance.

Enfants victimes d'abus sexuel : lignes directrices destinées travailleurs communautaires : rapport du groupe de travail fédéral

Ottawa : Direction générale des services et de la promotion de la santé, Direction des services de la santé, 1989. 133 p. *L'éd. anglaise (Child sexual...)* : 91-00599/2. ISBN 0-662-95610-9
MICROLOG 91-00600 2 fiche

Le groupe de travail était chargé d'élaborer des lignes directrices nationales à l'intention des travailleurs en santé communautaire qui oeuvrent auprès des enfants victimes d'abus sexuel, notamment les professionnels, les para-professionnels et les bénévoles. Les lignes directrices nationales qui ont été élaborées dans ce document s'inscrivent dans le cadre d'une démarche intégrée, l'accent étant mis principalement sur l'élaboration de lignes directrices à l'intention des travailleurs communautaires qui oeuvrent auprès des enfants victimes d'abus sexuel. Le document donne la liste des participants, la cadre théorique, la ligne directrice sur la prévention, le dépistage et la déclaration des cas d'abus sexuel à l'égard d'un enfant, l'enquête et l'évaluation, le traitement et le soutien, la coordination et la collaboration au moyen d'une approche multidisciplinaire, et la formation communautaire.

Enhancement and application of PV systems simulation package, phase III

by Electronic Devices Technology Group, Ortech International ; and TdS Dixon Inc. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. vi, 64 p. : ill. Bibliogr. CANMET contract: 66SS.23283-7-6130. ISBN 0-662-18107-7
MICROLOG 91-01234 1 fiche

Remote northern Canadian sites are prime candidates for the widespread application of solar photovoltaic(PV)-diesel hybrid generation with battery back-up systems if capital costs can be reduced and system reliability and life improved. This report describes the work carried out to extend and optimize the capabilities of WATSUN-PV, a simulation program for stand alone low power PV systems. The report determined the effect of different system control strategies on system

performance and battery life; and developed and implemented a PV-diesel model and a battery aging model for inclusion in WATSUN-PV for stand alone PV systems.

Enhancement of sulphur capture in circulating fluidized bed combustion : final report

by P. Salib. Fredericton : Research and Productivity Council, 1990. v, 114 p. : ill. Bibliogr. CANMET contract: 23440-99189-01-SQ.
MICROLOG 91-06129 2 fiche

Preliminary assessment of the applicability of humidification and waste activation to circulating fluidized bed combustors and an evaluation of the effectiveness of hydrated lime. The report describes test work carried out with minimum modification to the Research and Productivity Council's existing test facility, which includes a combustor, a primary cyclone and a standpipe for solid circulation, a flue gas cooling section, secondary cyclone and a baghouse. Alternatives for the enhancement of sulphur capture examined included injection of reactivated (hydrated) bed material, use of hydrated lime, combustor humidification and cool side humidification. This report presents the results.

Enhancing reliability of distribution lines through engineering assessment of strength and galloping

by D.G. Havard and A.H. Jubb. Toronto : Ontario Hydro, Research Division, 1990. ii, 19 p. : ill. Bibliogr. (Report ; no. 90-101-K)
MICROLOG 91-02123 1 fiche

A 44 kV line to Kincardine, in the Georgian Bay Region, has had a history of unsatisfactory reliability leading to complaints from the local municipality. An independent engineering assessment of the line was carried out involving an evaluation of weather conditions, the strength of the poles and the conductor clearances. The line contains single and double circuit wood crossarm construction and

some double circuit armless construction. Previous field experience of galloping of distribution lines with and without control devices was reviewed and related to the parameters of the line. Specific recommendations for additional guying and for application of galloping controls are included. The degree to which the recommendations were applied by the Region and the effect of the changes on the line's reliability are discussed.

Enquête concernant l'utilisation de logiciels de formation par les grandes entreprises oeuvrant au Québec : rapport

par Denis Rhéaume et Christian Grégoire ; appuyée par la Chambre de commerce du Québec. Laval, Québec : Ministère des communications, Centre canadien de recherche sur l'informatisation du travail, Direction de la recherche organisationnelle, 1990. 59 p. ISBN 0-662-96354-7
MICROLOG 91-01998 1 fiche

Ce rapport rend compte d'une enquête réalisée au printemps 1990 auprès des grandes entreprises oeuvrant au Québec concernant leur attitude face à l'utilisation de logiciels de formation pour le perfectionnement et le recyclage de leur main-d'oeuvre. Il est organisé comme suit. Les sections 1 et 2 présentent respectivement le contexte et les objectifs du projet ainsi que la méthodologie retenue. La section 3 fait le point sur les caractéristiques des répondants et des entreprises ayant participé à l'étude. Les résultats sont présentés à la section 4, où une quinzaine d'aspects spécifiques sont considérés. Enfin, une conclusion rappelle les faits saillants de l'étude et présente une perspective de développement pour l'industrie locale du logiciel de formation.

Ensiling salmon mortalities : suggested guidelines for B.C. salmon farmers

by B. Carswell, J.C. Willow and J. Ekkert. Victoria : Ministry of Agriculture and Fisheries, Aquaculture and Commercial Fisheries Branch, 1990. 50 p. : ill. Bibliogr. (Aquaculture industry development report : no. 9-3)
MICROLOG 91-01174 1 fiche

Salmon mortalities, or morts, are incurred as part of normal fish farming production, but their disposal has become a pressing concern as traditional methods of disposal, such as mort pits and landfills, are no longer options in many locations. The process of ensilage is a viable and practical solution for effective

handling and storage of salmon mortalities and the silage is a versatile product which can be converted to fish fertilizer, used in composting operations or used as a feed component for land farm animals. This report describes the process of ensilage, acid types and application, safety measures, selection of materials, storage containers, and odour maskers. A recipe for ensiling and the costs of the process are also included.

Entraide et associations

sous la direction de Marie-Marthe T. Brault et de Lise Saint-Jean. Québec : Institut québécois de recherche sur la culture, 1990. 282 p. : ill. Bibliogr. (Questions de culture ; 16)

ISSN 0229-6829 ISBN 2-89224-134-0
MICROLOG 91-02970 3 fiche

Afin de présenter les diverses avenues empruntées dans cet ouvrage, ce document propose un itinéraire en deux étapes. La première avenue, ancrée dans le présent, se divise elle-même en deux parties. Le phénomène vécu que des auteurs témoignent de leur propre expérience de l'entraide tandis que des chercheurs s'étant intéressés à des groupes spécifiques soumettent leurs analyses du phénomène. Pour sa part, la deuxième étape, ouverte sur l'avenir, apporte les réflexions et les interrogations que l'entraide suscite quand on observe la dynamique sociale sous-jacente à la réalité décrite dans la première partie.

Entrepreneurs en éducation : la réponse du Canada au défi international du développement des ressources humaines

par D. Simpson et C. Sissons. Ottawa : Centre de recherches pour le développement international, 1989. x, 116 p. Bibliogr. (Etude technique ; 62f) ISBN 0-88936-528-8
MICROLOG 91-03255 2 fiche (Available on fiche only)

Ce rapport porte sur les nouveaux défis et les possibilités nouvelles du monde en pleine évolution du développement international des ressources humaines (DRH). Il met en lumière l'évolution des besoins en matière de développement des ressources humaines et examine des mécanismes d'adaptation que pourraient adopter les organismes du secteur privé et du secteur public au Canada. Il examine particulièrement la demande internationale de DRH; les effets des forces du marché et des profits sur le DRH à l'échelle internationale; les stratégies et structures des organismes publics et privés; la création de centres canadiens d'excellence; les services d'appoint spécialisés pouvant améliorer les activités de DRH; l'entrepreneuriat au service du financement; et le rôle des réseaux dans le développement de la capacité internationale de DRH.

Enumeration and biological data from the upstream migration of Arctic charr *Salvelinus alpinus* (L.), in the Cambridge Bay area, Northwest Territories, 1979-83

by D.K. McGowan. Winnipeg : Dept. of Fisheries and Oceans, Central and Arctic Region, 1990. iv, 27 p. : ill., maps. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 811) This is the 49th data report from the Central and Arctic Region, Winnipeg. ISSN 0706-6465
MICROLOG 91-01183 1 fiche

In 1978 a stock identification and assessment program was initiated in the Cambridge Bay area. A weir, or counting fence, was used to enumerate the upstream migration of Arctic charr in 4 commercially fished rivers. This report presents a summary of the number of charr counted, tagged and live sampled, the biological data collected and the timing of the migrations. Biological data collected include length, weight, age and maturity characteristics from a stratified sample.

Environmental backgrounder : environmental planning issues and concerns in the City of Toronto, part 1

Toronto : Toronto Planning and Development Dept., 1990. vi, 114 p. : ill. Bibliogr. On cover: Cityplan '91, 9.
MICROLOG 91-02243 2 fiche

This report is one of two complementary background documents produced as part of the 1991 review of the Central Area Official Plan. Part 1 provides a synopsis of the environmental concerns and issues that are relevant within the urban setting of Toronto. The document explains the nature, cause and significance of the environmental concepts, concerns, and issues that are relevant to people in the City of Toronto. Issues and concerns relating to the quality and quantity of land, air and water resources are identified and the global significance of local issues and the local significance of global issues are clarified. The role, scope and extent to which environmental planning has dealt with these issues is discussed, as well as the extent to which the public expectations of appropriate actions have been met, particularly at the City level.

Environmental excise taxes : options for British Columbia

by M. Stone. Victoria : Ministry of Environment, Environmental Protection Division, 1990. viii, 165 p. : ill. Bibliogr.
MICROLOG 91-03035 2 fiche

Recently, governments have begun turning to the use of economic instruments as a means of pollution control and revenue generation. Included in the list of potential economic instruments are waste discharge fees, transferable discharge permits, deposit systems, and environmental excise taxes. The potential application of the latter economic instrument, environmental excise taxes, to B.C.'s environmental management problems is the focus of this paper. The report reviews the use of excise taxes as a tool for use in the field of environmental management, and attempts to identify specific environmental problems in British Columbia to which excise taxes could potentially be applied.

The Environmental impact of peat combustion in woodstoves and particulate fuel burners

by C. LeMay and G. O'Connor. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1989. v, 44 p. : ill. CANMET contract: 23216-8-6093-01-SZ. ISBN 0-662-16982-4
MICROLOG 91-01217 1 fiche

In many homes on the southern Avalon Peninsula in Newfoundland, peat replaces wood as an alternative fuel for space heating needs. While recent technology has produced stoves that burn wood with increasingly lower emissions, it is not known if this also obtains for peat burned in these stoves. This study identifies methods of reducing the environmental impacts of burning peat by identifying the solid-fuel-burning appliances which minimize particulate emissions from peat fuel; identifying those appliances which burn peat with relatively high efficiency; quantifying the effects of fuel moisture content on appliance efficiency and emissions; and quantifying the effect of fuel type. Tests were conducted on a Chaleureux non-baffled, a Lakewood baffled, and a Kent high-tech wood stove and a TP2000 50 kW stoker, a Swebo 65 kW pre-heater and the Volcanic Glow pellet stove.

Environmental monitoring report for the Point Lepreau, N.B. Nuclear Generating Station, 1987, 1988

by K.M. Ellis, R.W.P. Nelson and J.N. Smith. Dartmouth, N.S. : Bedford Institute of Oceanography, 1990. v, 91 p. : ill., maps. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 128) ISSN 0711-6774
MICROLOG 91-00328 2 fiche

The Point Lepreau environmental monitoring program was established in 1978 to assess the impact of the operation of the CANDU 600 nuclear reactor built at Point Lepreau on the shores of the Bay of Fundy. It was designed to supply a broad understanding of the processes which affect the radioactivity released from the station into the surrounding environment. The sampling program includes the collection of samples from the air, water,

and soil as well as the measurement of key oceanographic parameters to identify transport pathways and determine fluxes of radionuclides along specific pathways. This report covers data from 1987 and 1988 and compares it to that collected in pre-operational activities to assess the environmental implications of the operation of nuclear reactors in coastal regions and to determine various parameters associated with the long-term transport of radionuclides.

Environmental problems : market-based solutions

by M.G. Wrobel. Ottawa : Library of Parliament, Research Branch, 1990. 24, 28 p. Bibliogr. (Background paper ; BP-228E) French ed. (*L'Environnement : solutions...*) on the same fiche. ISBN 0-660-13650-3
MICROLOG 91-01130 1 fiche

Governments' traditional method of dealing with pollution-related problems has been to employ command and control (CAC) types of regulations, whereby firms and individuals are told the amount of pollutants they can emit, the type of technology to use, the goods they may produce, the production processes to employ, etc. An alternative to CAC regulation is one based upon market-related principles, a method which economists believe to be more efficient while delivering the same level of environmental cleanliness at a lower cost. This report describes the concept of market-based solutions; the distribution of marketable emissions; and objections and responses to this concept. Studies of both hypothetical and actual uses of the concept are included, taken from international cases.

Environmentally significant areas in the Fredericton Planning Region of New Brunswick

Fredericton : Dept. of the Environment, Environmental Planning and Sciences Branch, 1990. 96 p. : maps. Bibliogr. (Information report ; no. 190-01) *Fold. maps not filmed.*
MICROLOG 91-03025 2 fiche

This report identifies and provides background information about environmentally significant areas in the Fredericton planning region of N.B. Eight categories of significant areas were selected, each of which is recorded on a description sheet listing its location, size, area description, susceptibility to human impact, and category. Data was obtained from published and unpublished sources, and from interviews with fish and wildlife biologists, naturalists, botanists, and ornithologists familiar with the resources in the region.

L'Environnement : solutions fondées sur les lois du marché

par M.G. Wrobel. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 28, 24 p. Bibliogr. (Etude générale ; BP-228F) *L'éd. anglaise (Environmental problems...) sur la même fiche.* ISBN 0-660-93005-6
MICROLOG 91-01130 1 fiche

En avril 1987, la Commission mondiale sur l'environnement et le développement, qui était présidée par Gro Harlem Brundtland de Norvège, publia son rapport sous le titre 'Notre avenir à tous'. Les auteurs y réclamaient l'intégration des considérations environnementales dans la pensée et la planification économiques de l'industrie et des gouvernements. Au lieu de voir la protection de l'environnement comme un substitut de la croissance et du développement économiques, ils y soutenaient qu'environnement et économie sont tous deux inextricablement liés et que de bonnes politiques environnementales signifient de bonnes politiques économiques. Ce document se penche sur la question en examinant particulièrement les solutions fondées sur les lois du marché et les études traitant des systèmes fondés sur les lois du marché.

Enzyme use in barley rations for poultry

Regina : Saskatchewan Agriculture Development Fund, 1990. 43 p. Bibliogr. ISSN 0829-9455
MICROLOG 91-02570 1 fiche

This research investigated whether enzyme supplementation of barley diets for poultry produces substantial improvements in the traditional feeding value of barley. The research involved all aspects of this subject: enzyme production, theoretical nutrition, and large-scale feeding trials with the co-operation of the local poultry industry.

Ergonomics of tree planting

by E. Banister, D. Robinson and D. Trites. Victoria : Forest Resource Development Agreement, 1990. vi, 18 p. : ill. Bibliogr. (FRDA report ; 127) ISSN 0835-0752 ISBN 0-7726-1164-5
MICROLOG 91-00034 1 fiche

Responses of tree planters to an extensive health questionnaire administered several times throughout a planting season were correlated with objective measures of health status and fitness. These measures included continuous heart rate records measured during work; and pre- and post-work measures of serum enzyme activity, plasma norepinephrine and epinephrine concentrations, and blood cholinesterase activity (also measured serially). Video monitoring of work patterns of experienced and inexperienced workers complimented the physiological and biochemical measures.

Escapement enumeration of salmon passing through the Stamp Falls Fishway on the Somass River system, 1986 through 1989

by S.R. Heizer. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, South Coast Division, 1991. ix, 55 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2067) ISSN 0706-6473 MICROLOG 91-03711 1 fiche

In 1984, a key streams program was initiated to monitor BC chinook salmon stocks. Key streams were chosen for extensive study based on the existence of a hatchery to supply juvenile chinook salmon for coded wire tagging; accessibility for field sampling; feasibility of fence operations; geographic locations to other key streams so that different areas of the coast would be represented; and the presence of a relatively large chinook salmon escapement. The Somass River drainage, specifically the Stamp River, was selected as a key stream and a study was begun in 1984 to estimate escapement of chinook salmon to the Somass River system. This report documents salmon spawning escapements passing through the Stamp Falls fishway from 1986-89. The estimates were made by video in 1986 and 1987, by a combination of video and visual in 1988, and by visual alone in 1989. Mark incidence and sex composition data were taken as well.

Essai de performance des oxydes mixtes pour la conversion du gaz naturel : activation du méthane : rapport final

par R. Breault...et al. Varennes, Québec : Institut de recherche d'Hydro-Québec, 1989. xii, 160 p. : ill. Bibliogr. CANMET contract: 79071-01-SQ MICROLOG 91-00731 2 fiche

Ce travail fut réalisé à l'Institut de recherche d'Hydro-Québec dans le cadre du Programme de Conversion de l'Energie à Frais Partagés sous l'égide du Ministère de l'Energie, des Mines et Ressources avec la participation financière de Gaz Métropolitain Inc. Ce projet de recherche s'inscrit dans une démarche visant à la valorisation du gaz naturel. Il porte sur l'évaluation des performances des différents catalyseurs formés d'oxydes mixtes partiellement réductibles, lorsque ceux-ci sont utilisés pour la synthèse d'éthane et/ou d'éthylène à partir du méthane, principal constituant du gaz naturel. Cette étude a permis de mettre en évidence une activité et une sélectivité en éthane et éthylène très intéressantes de certains catalyseurs et tout particulièrement du catalyseur formés d'oxydes

de lithium, de plomb et de praséodyme.

Estimated costs and returns for rainbow trout production in the Thompson-Okanagan region, 1990

Victoria : Ministry of Agriculture and Fisheries, Aquaculture and Commercial Fisheries Branch, 1990. iv, 28 p. (Aquaculture industry development report ; no. 90-5) CSI 37100.200. ISSN 1183-0352 ISBN 0-7718-8991-7 MICROLOG 91-02321 1 fiche

This study describes a hypothetical 'best estimate' rainbow trout grow-out facility which operates as adjunct to an existing traditional agriculture farm located in the Thompson-Okanagan region. The study is intended to provide the farmer with an example for calculating costs and returns of producing trout, and serve as a trout farm business analysis and planning reference. Two scenarios are described, using pumped water sources and an artesian well. The impact of alternative prices for both scenarios is described. In addition to water supply and alternative prices, factors such as stock survival and feed conversion are included.

Estimation of the economic costs and consequences of implementing the proposed revision to Regulation 308 : final report

James F. Hickling Management Consultants Ltd. Toronto : Ministry of the Environment, Policy and Planning Branch, 1990. 131 p. ISBN 0-7729-7366-0. MICROLOG 91-00047 2 fiche

In November of 1987, the Ontario Ministry of the Environment published a Green Paper which proposed numerous revisions to Regulation 308 of the Environmental Protection Act. Two studies were commissioned by the Ministry to aid interested parties and its own organization to evaluate the proposed regulatory changes. The first studied the estimation of additional costs which would be incurred by

government and industry if the proposed regulatory changes were made; and the second studied the estimation of the economic costs and consequences of implementing the proposed revisions to regulation 308. This report presents the results of the analysis of the economic impacts at the industry, or microeconomic, level. The main purpose of this industry level analysis was to identify firms or categories of firms which would be likely to experience the greatest financial difficulties in complying with the proposed revisions.

Estimation of total chinook mortality associated with seine fishing in Johnstone Strait, Sabine Channel, and Juan de Fuca Strait during 1987

by D.A. Nagtegaal, P.J. Starr and B. Riddell. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1990. iv, 91 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2062) ISSN 0706-6473. MICROLOG 91-01684 1 fiche

In 1985 a treaty concerning management of Pacific salmon between the governments of the U.S. and Canada was instituted, one commitment of which was the recording of all sources of mortalities for chinook, including landed catches and non-accounted mortalities during fishing. Since the inception of biological catch sampling programs in the late 1960s, it has been hypothesized that the total catch of chinook in seine fisheries is under-reported, particularly for small chinook (under 5 lb. round weight). In 1987, a study was conducted in the Johnstone Strait, Sabine Channel, and Juan de Fuca sockeye seine fishery to assess total chinook mortality. Data was collected for catch per seine set for each salmon species and for 3 size categories of chinook, the number and location of sets made by vessels per day, and the total number of vessels per day active in the fishery. Calculation of total catch involved extrapolating the estimated mean catch per set over all sets made and incorporated the Monte-Carlo bootstrap technique to determine the variance about the mean catch estimate.

Ethnicity and the labour force : a discussion paper

by W.E. Kalbach. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1987. 12 p. Bibliogr. (Discussion paper ; 87.A7) MICROLOG 91-01500 1 fiche

The characteristics of those in the labour force and their work-related activities can provide information on the nature of society's socioeconomic structure and the manner of its functioning. This paper provides this information. It focuses specifically on the following issues: the immigrant component of the labour force in perspective; the ethnic composition of the foreign-born labour force; ethnic differences in occupational distributions; ethnic prejudice, discrimination, and social distance; methodological problems in demonstrating the salience of ethnicity; implications of ethnic persistence for social mobility; and reducing ethnic group differences. • CA LA SA

Etiquette et alphabet : un regard sur la question des politiques d'alphabétisation et la personne qui présente un handicap intellectuel

North York, Ont. : Institut G. Allan Roeher, 1991. iv, 148 p. Bibliogr. ISBN 0-920121-47-0 MICROLOG 91-05293 2 fiche (Available on fiche only)

Les faibles niveaux d'alphabétisation chez les adultes constituent un problème. C'est pourquoi ce document examine différentes façons d'aborder la définition de l'alphabétisation et considère la pertinence de ces approches lorsqu'il s'agit d'adultes qui présentent un handicap intellectuel. Il s'arrête aux questions que soulève la mesure des niveaux d'alphabétisation chez les adultes qui présentent un handicap intellectuel et donne une idée du niveau d'alphabétisation chez ces personnes; et

jetée de la lumière sur la portée du problème de l'analphabétisme. C'est dans le cadre d'une reconnaissance croissante de la portée et de l'envergure du problème des faibles niveaux d'alphabétisation que le document se penche sur les relations entre l'alphabétisation, l'apprentissage et le handicap intellectuel. Finalement, il résume les conclusions de cette étude et fait des recommandations sur la façon d'élaborer des politiques et de dispenser l'enseignement de la lecture et de l'écriture.

Etre jeune et parent-oui, mais

Québec : Gouvernement du Québec, Conseil permanent de la jeunesse ; Conseil des affaires sociales ; Conseil de la famille, 1990. 26 p. Bibliogr. ISBN 2-550-21186-3
MICROLOG 91-01708 1 fiche

Les préoccupations des jeunes à l'égard du fait d'être ou de devenir parents ainsi que les obstacles qu'ils rencontrent dans la concrétisation de leur désir sont très mal connus. Cette situation s'explique en partie par le fait qu'ils se sont peu exprimés publiquement sur ces questions qui les touchent pourtant directement. Cet avis découle des propos recueillis pendant un forum portant sur la question. Il vise à rendre compte du point de vue des jeunes, à mieux faire connaître leurs valeurs, leurs besoins ainsi que les solutions qu'ils privilégient pour résoudre les difficultés rencontrées pour devenir des parents et assumer ensuite leur condition parentale.

Etude auprès des visiteurs du parc national Forillon, saison estivale 1990

présentée à la Section politiques et recherche, Service des parcs, Région du Québec, Environnement Canada. S.I. : L'Ecart-type inc., 1991. 2 v. : ill. Contients: Vol. 1 : Rapport -- vol. 2 : Annexes. CSI 21140.204.
MICROLOG 91-04406 3 fiche

Ce rapport de recherche se base sur la compilation des résultats obtenus par le biais de deux questionnaires d'enquête, soit: un questionnaire auprès des visiteurs non-résidents administré par le biais d'entrevues en face à face, directement sur le site et un questionnaire téléphonique s'adressant aux visiteurs-résidents des secteurs de Cap-aux-Os et de Cap-des-Rosiers. L'étude permet d'estimer la fréquentation mensuelle du parc pour la période estivale 1990, exprimée en entrées, en visites et en jours-visites. Elle fournit également un algorithme permettant au Service canadien des parcs d'estimer la fréquentation

mensuelle au cours des prochaines années.

Etude hydro-sédimentologique de la réouverture de la lagune du Havre aux Basques, Iles-de-la-Madeleine

par Y. Ouellet, Y. Ropars et Y. Vigneault. Québec : Ministère des pêches et des océans, Direction de la gestion des pêches et de l'habitat, Division de la gestion de l'habitat du poisson, 1990. xii, 62 p. : ill., cartes géogr. Bibliogr. (Rapport technique canadien des sciences halieutiques et aquatiques ; no 1766) ISSN 0706-6570
MICROLOG 91-04232 1 fiche

Ce rapport présente une étude hydro-sédimentologique dans le cadre du projet de la réouverture de la lagune de Havre aux Basques. On y discute principalement des conditions de stabilité de l'ouverture de la passe sous l'influence des principaux paramètres qui entrent en jeu. Ces paramètres sont principalement la marée et le transport littoral des sédiments sous l'action des vagues. Après une étude des variations des niveaux à l'extérieur et à l'intérieur de la lagune, et ce, avant et après réouverture, une estimation est faite sur le taux de mélange des eaux entre la baie de Plaisance et la lagune du Havre aux Basques. Dans le but de servir au dimensionnement des ouvrages et d'évaluer la capacité de transport littoral, le climat des vagues a été reconstitué à l'aide d'un modèle numérique faisant appel aux données de vent de la station de Cap-aux-Meules. Par la suite, des solutions d'aménagement sont proposées sur la base des données disponibles présentement. Enfin, des recommandations sont faites en ce qui concerne la suite de ce projet.

Etude nationale sur les programmes de français de base : rapport synthèse

par R. LeBlanc. Ottawa : Association canadienne des professeurs de langues secondes, 1990. 121 p. Bibliogr. L'éd. anglaise (*National Core French...*) : 91-03566/2. ISBN 0-921238-06-1
MICROLOG 91-03565 2 fiche (Available on fiche only)

Le double objectif de cette étude est de définir les quatre syllabi proposés par Stern dans son projet de syllabus multidimensionnel et d'en examiner l'applicabilité dans les classes de français de base au Canada. Les textes présentent des contenus et des réflexions susceptibles d'aider à la fois l'enseignant et l'apprenant dans la tâche encore et toujours difficile et méconnue d'enseigner et d'apprendre une langue seconde. De plus, le document porte sur le curriculum multidimensionnel; le syllabus langue; le syllabus communicationnel/expérientiel; le syllabus culture; le syllabus formation langagière générale; la pédagogie intégrative; l'évaluation; la formation; et, les remarques générales.

Etude pédologique du comté de Verchères, Québec, vol. 1 : description et interprétation des unités cartographiques

par L. Lamontagne et M.C. Nolin. Ottawa : Agriculture Canada, Direction générale de la recherche, 1990. xi, 313 p. : cartes géogr. Bibliogr. (Centre de recherches sur les terres contribution ; no 87-92) Cartes géogr. plantées non filmées. ISBN 0-662-95873-X
MICROLOG 91-05479 4 fiche

Cette étude pédologique constitue le deuxième inventaire des sols du comté de Verchères. Elle est accompagnée d'une carte des sols. Elle vise essentiellement à déterminer l'aptitude et la productivité des sols pour la grande

culture, la paissance et l'affouragement. Elle donne également des renseignements sur le type et le coût d'assainissement des sols de la région. Ayant cinq chapitres différents, l'étude donne une description de la géographie humaine (localisation, superficie, population et agriculture) et de la géographie physique (physiographie, géologie, dépôts de surface, climat et végétation) de l'aire à l'étude. Elle énonce quelques concepts et définitions de la pédologie moderne et commente le déroulement de la méthode de prospection et d'analyse des sols, présente les caractéristiques générales des unités cartographiques et quelques recommandations concernant leur aménagement et leur conservation; donne l'interprétation des données pédologiques; présente 14 tableaux d'estimation des descripteurs physiques ainsi qu'une classification des sols pour l'ingénieur; et, fournit un lexique afin d'expliquer certains termes techniques.

Etude pédologique du comté de Verchères, Québec, vol. 2 : description et classification des séries de sols

par L. Lamontagne et M.C. Nolin. Ottawa : Agriculture Canada, Direction générale de la recherche, 1990. vi, 135 p. Bibliogr. (Centre de recherches sur les terres contribution ; no 87-92) ISBN 0-662-95874-8
MICROLOG 91-05484 2 fiche

Les sols du comté de Verchères ont été différenciés selon leur position physiographique, leur granulométrie, l'épaisseur des matériaux sur lesquels ils se sont développés, leur classe de drainage et leur développement. Ce volume présente les descriptions morphologiques ainsi que les analyses chimiques et physiques de profils échantillonnés pour représenter les principaux taxons (séries et variantes de séries de sols) identifiés dans le comté de Verchères. Le volume expose également les facteurs responsables de la formation des sols, fournit une description générale de la morphologie et de la genèse des sols, donne une explication sommaire du système taxonomique utilisé pour la classification des taxons et une corrélation des sols identifiés dans cette étude avec ceux des comtés limitrophes ou des études antérieures. Y est également inclut une légende des sols de façon à pouvoir identifier les facteurs et les critères de stratification utilisés dans cette étude.

Etude portant sur la satisfaction des employeurs face aux services du Ministère de l'enseignement supérieur et de la formation et des collèges communautaires : rapport final

Baseline Market Research. Fredericton : Ministère de l'enseignement supérieur et de la formation, Services de planification, 1990. 82 p. L'éd. anglaise (*A Study of employer satisfaction...*) : 91-02801/2. CSI 46153.204F.
MICROLOG 91-02802 1 fiche

Document présentant un rapport résumant les recherches menées récemment pour le compte des Services de planification du ministère de l'Enseignement supérieur et de la Formation du Nouveau-Brunswick. L'étude évalue le niveau de satisfaction des employeurs néo-brunswickois face aux diplômés des collèges communautaires du Nouveau-Brunswick et par rapport aux services de formation par contrat et par apprentissage offerts par le ministère. L'étude a aussi recueilli des données sur l'utilisation globale des programmes de formation par les employeurs et sur leurs points de vue quant aux besoins futurs en formation. Finalement, on offre une vue d'ensemble de la documentation de base, des objectifs qui ont guidé le projet, de la méthodologie utilisée et des résultats de la recherche. Le rapport se termine par des recommandations à étudier.

Task Force on Europe 1992 (Canada). Working Group on Standards Testing and Certification. Ottawa : External Affairs and International Trade Canada, 1991. ii, 38 p. MICROLOG 91-05264 1 fiche

Under the auspices of the Federal Government Task Force on Europe 1992, the Working Group on Standards Testing and Certification is charged with assessing, for Canadian business interests, the implications of the European Community's (EC's) policy on technical standards. The report is based on comments from the Interdepartmental Committee on Standards Policy and reports about EC policy developments from the Canadian mission to the EC in Brussels and from other Canadian missions in Europe. Supplementary information was obtained from representatives of Canadian industry, officials from the EC Commission, and representatives of European and international organizations. This report describes the EC policy on standards, the measures taken to move from policy to practice, EC policy and Canadian trade interests, and trade implications for specific Canadian industries.

Evaluation du programme fédéral des coopératives d'habitation : rapport provisoire

Ottawa : Société canadienne d'hypothèques et de logement, Division de l'évaluation de programme, 1990. 356 p. *L'éd. anglaise (Evaluation of the federal...): 91-00187/4.*
MICROLOG 91-00188 4 fiche

L'évaluation du programme des coopératives d'habitation porte uniquement sur les trois versions du programme fédéral unilatéral qui ont existé depuis 1973 et dont le but était de financer la production de coopératives d'habitation. Ce document examine de près la conception et l'application de cette nouvelle version. Il porte aussi sur d'autres programmes fédéraux utilisés de concert avec le programme des coopératives d'habitation et faisant partie intégrante du programme fédéral des coopératives d'habitation, soit le financement pour la préparation de projets, le supplément de loyer et le financement de groupes de ressources communautaires.

Evaluation of 48-hour weaning and/or Syncro-Mate-B or Estrumate hormone treatments in controlled breeding of beef cows : final report

Regina : Saskatchewan Agriculture Development Fund, 1990. 23 p. : ill. ISSN 0829-9455
MICROLOG 91-01765 1 fiche

Cow-calf operators often have an extended calving season, resulting from some cows failing to show estrus within a reasonable period of

time after calving the previous year. At weaning time, there is a wide weight range of calves resulting in reduced selling prices to the producer. Research in the U.S. has shown that Syncro-Mate-B and weaning the calf from the cow 48 hours prior to breeding can affect the time of onset of cyclicity. This report presents the results of a 3-year study to evaluate different methods of causing cows to cycle earlier in the breeding season. Cows were either treated as controls, or hormonally with Estrumate or Syncro-Mate-B. Half of the calves in each group were weaned for 48 hours prior to the start of the breeding season.

Evaluation of a simplified ridge modelling method

prepared by G. Comfort, R. Abdelnour ; for Transportation Development Centre, Policy and Coordination Group, Transport Canada. Kanata, Ont. : Fleet Technology Limited, 1990. 2 v. : ill. Bibliogr. Contents: Vol. 1 : Main report -- vol. 2 : Appendices.
MICROLOG 91-02502 4 fiche

Phase II of a two-phase study performed to establish a method to evaluate icebreaking ship performance in first year ice ridges. The first phase evaluated the accuracy of current ridge modelling techniques and investigated preferred techniques for modelling ridges in the ice basin. This second phase established a method to test a ship through a first year ice ridge without stopping, termed single-pass ramming. Tests were conducted using refrigerated, EGAD-doped, model ice, a 19.1:1 scale model of the USCGC Polar Star and a 22.5:1 scale model of the MV Kigoriak. A simple computer program was written to predict icebreaker resistance and performance in ridges up to the vessel's limiting ridge capability. The computer program was run for a number of cases to predict the size of the limiting ridge for the Polar Star and the MV Kigoriak.

An Evaluation of adaptive management and minimal sampling as techniques for optimizing rainbow trout stocking rates

by E.A. Parkinson. Victoria : Ministry of Environment, Recreational Fisheries Branch, 1990. i, 14 p. : ill. Bibliogr. (Fisheries management report ; no. 96) ISSN 0705-5390 ISBN 0-7726-1165-3
MICROLOG 91-03883 1 fiche

The rainbow trout fishery in the small lakes of southern BC requires a better data collection system to improve both the conceptual models and the lake specific data collection system. Parkinson et al. (1988) proposed a data collection system called SLIM for small rainbow trout lakes which involved the collection of a minimal amount of catch per unit effort, fish size, fish age and growth rate data from angler interviews and effort data from aerial counts. This paper evaluates the effectiveness of this system in assessing the result of a plus or minus 40 percent change in stocking rate change on Allyn and Kentucky Lakes in southern BC.

Evaluation of backrubber insecticides for black fly control : final report

by P.G. Mason and P.M. Kusters. Regina : Saskatchewan Agriculture Development Fund, 1991. ii, 21 p. : ill. Bibliogr. MICROLOG 91-05711 1 fiche

Black flies, primarily *Simulium luggeri*, are a major pest of livestock in northeast Saskatchewan, causing losses of weight and milk production, delayed conception, cattle deaths, and increases in stress-related diseases and injuries. This report presents the results of a study, over two consecutive black fly seasons, of the effectiveness of unregistered insecticides, applied by backrubber, in protecting pastured beef cattle from black fly attack. Cattle were treated with Ectiban, Bovitect, Atroban Delice and Liquiduster. The number and species of black flies in the vicinity of protected vs. unprotected cattle were compared and efficiency data were collected for use in a submission to register the insecticides for black fly control.

Evaluation of Baycrest Centre's caring for the caregivers demonstration project : final report

Data gathered by A.R.A. Consultants Ltd. Toronto : Ministry of Community and Social Services, 1990. 2 v. Bibliogr. Contents: Vol. 1 : Report -- vol. 2 : Research protocol and measures. CSI 55104.203. MICROLOG 91-03971 3 fiche

Baycrest centre for Geriatric Care comprises five facilities that together provide a wide range of services to the elderly. In response to the increase in numbers of elderly individuals who remain in the community under the care of family members, and the concomitant problems and stresses faced by caregivers, the Centre developed a demonstration project geared toward the needs of caregivers. This demonstration project was designed to provide relatives of the elderly with counselling support, information, and access to appropriate community services. This evaluation of the Centre determines whether the project was successful in meeting its stated objectives; and determines the potential transferability of the service model to other settings.

Evaluation of bonding agents for use in repairing concrete structures

by J.J. Deans and J.A. Sato. Toronto : Ontario Hydro, Research Division, 1991. ii, 77 p. : ill. Bibliogr. (Report ; no. 90-48-K) MICROLOG 91-07172 1 fiche

One of the main difficulties in repairing concrete is achieving a sufficient bond between the old and new concrete so as to resist drying shrinkage and later movement caused by wetting and drying and/or heating and

cooling. Based on a literature review and information from suppliers, seven epoxies and three cement-based products, as well as control concrete and neat cement grout for comparison, were selected and tested for compressive strength, modulus of rupture, thermal coefficient of expansion, viscosity, and tack, open and hard times. Composite specimens to simulate concrete to concrete repairs were tested at various ages to determine bond and shear strength for different applications and curing conditions. Freeze-thaw resistance of the composite specimens was also assessed.

Evaluation of fuel loading densities and methods on wood stove emission rates

by R. Curkeet. Middleton, WI : Warnock Hersey International, 1990. ii, 86 p. : ill. CANMET contract: 23216-8-9058/045SZ. MICROLOG 91-01582 1 fiche

Four wood stoves certified by the U.S. Environmental Protection Agency (EPA) 1990 Phase II requirements were tested to determine the effects of various fuel loading densities and configurations on emissions performance. The tests conducted and reported on here were designed to compare the performance of 4 different stove designs with 4 different fuel loading procedures. In addition, the data from the original EPA certification tests of each stove were obtained. The catalytic units tested had similar firebox sizes but varied in their air control systems with one being thermostatically controlled by a bimetal spring and the other

having a fixed manual control. The non-catalytic units included one with a relatively large firebox and one with a relatively small firebox.

Evaluation of lathyrus (grass pea) under moisture limiting conditions : final report

by A.E. Slinkard, C. Campbell and A. Vandenberg. Regina : Saskatchewan Pulse Crop Development Branch ; Agriculture Development Fund, 1991. 29 p. MICROLOG 91-05713 1 fiche

Lathyrus sativus or grass pea, is a drought tolerant large seeded legume that is well adapted to dryland temperate climates like that of Saskatchewan. The use of this crop for feed and food is limited because it contains the neurotoxin B-N-oxalylamino-L-alanine (BOAA). A 3-year study was conducted to determine the effect of moisture addition by irrigation on BOAA concentration in the seed of the grass pea in light textured soil.

Evaluation of liquid organic materials for securing nuts on transmission tower anchor bolts

by J.A. Sato and J.J. Deans. Toronto : Ontario Hydro, Research Division, 1990. i, 19 p. : ill. (Report ; no. 90-109-K) MICROLOG 91-00791 1 fiche

Four organic materials were evaluated for possible use in the assembly of transmission tower anchor bolts. These materials are being considered to secure the anchor bolt nuts, so as to prevent or limit unauthorized persons from removing them. The materials were evaluated by determining the breaking and prevailing torques developed when they were applied to various anchor bolt assemblies. Important test variables were the diameter of anchor bolt used, the ambient temperature during application and curing of the materials, and the amount of pretorque initially applied when tightening each nut.

Evaluation of microwave reactivated carbon

by K.E. Haque...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1990. i, 29 p. : ill. Bibliogr. (Report ; MSL 90-119(IR)) MICROLOG 91-03594 1 fiche

Since carbon can be heated with microwaves at temperatures above 1000C, this indicated the potential for reactivation of carbon in pulp (CIP) spent carbon with microwaves. Preliminary test data confirmed that this process had a sound technological potential but its economic viability against the current thermal reactivation process was yet to be studied. Since Ontario Hydro is adequately equipped for conducting carbon reactivation tests, a two-part program was initiated. The program included contract work by Ontario Hydro on the microwave reactivation of CIP carbon and the economics involved, as well as complete characterization and technical evaluation of the reactivated carbon by CANMET. This report represents CANMET's characterization procedures and evaluation data of the carbons microwave reactivated by Ontario Hydro.

Evaluation of morphological and physiological response variables of four-year old black spruce seedlings to perennial competition

by D.M. Morris. Thunder Bay, Ont. : Ministry of Natural Resources, Northwestern Ontario Forest Technology Development Unit, 1988. iii, 16 p. Bibliogr. (Technical report ; no. 22) MICROLOG 91-00052 1 fiche

This paper evaluates the sensitivity of various response variables to changing competition levels to provide insight into the complexities of competition dynamics occurring in young plantations. The data used were collected in 1987 from six 4-year-old black spruce plantations located in the north central region of Ontario. Three of the plantations were established with bare-root stock, the other 3 were established with over-wintered container (paper pot) stock.

FO ON PR SC

Evaluation of morphological attributes as response variables to perennial competition for 4-year-old black spruce and jack pine seedlings

by D.M. Morris, G.B. MacDonald and K.M. McClain. Ottawa : National Research Council Canada, 1990. 9 p. : ill. Bibliogr. In Canadian Journal of Forest Research : vol. 20, no. 11, 1990. MICROLOG 91-06808 1 fiche

The sensitivity of seedling morphological attributes to changing competition levels was evaluated on 4-year-old black spruce and jack pine seedlings to determine the most appropriate response variables to be used in the assessment of early plantation performance. A total of 720 seedlings (360 per species) were sampled between 1987 and 1989, covering a range of stock types, soil textures, and competition levels. A competition index, derived from hemispherical photographs, provided an estimate of incident radiation received by each sampled seedling. Seedling stem volume at time of planting was used as a covariate in the regression analyses. Stratification by plantation was done to account for variations in site quality.

An Evaluation of mound formation by the Bracke Moulder in interior British Columbia

by B.J. Sutherland. Sault Ste. Marie, Ont. : Forestry Canada, Great Lakes Forestry Centre, 1989. 19 p. : ill. Bibliogr. (Information report ; O-X-399) ISSN 0832-7122 ISBN 0-662-16596-9 MICROLOG 91-00532 1 fiche

The Bracke moulder is a towed implement developed in Sweden to collect mineral soil and release it on the scarified patch or the upside-down turf from each patch. The implement was introduced to Canada in 1983 and in June of 1983, an operational trial was conducted in B.C. to assess the quality of mounds made on slopes. The study area is 60 km north of Prince George. Prior to harvesting, the stand was mainly white spruce with a minor component of lodgepole pine. The area was full-tree logged during the winter of 1979, and moderate-to-high slash loadings resulted. The bulk of slash remaining on the site consisted of large-diameter, overmature or unmerchantable tree species.

Evaluation of protein status of lactating dairy cows : technical/final report

Regina : Saskatchewan Agriculture, Agriculture Development Fund, 1987. 21 p. ISSN 0829-9455 MICROLOG 91-01766 1 fiche

Feed costs make up about 1/2 the cost of milk production, with protein being one of the most expensive nutrients. Protein which passes through the rumen of cattle and is digested and absorbed in the small intestine must be supplied to dairy cattle to meet their protein requirements. Only a limited number of feedstuffs have the required rumen bypass characteristics. Two of these feeds are corn gluten meal and distillers' dried grains, neither of which have been evaluated under Saskatchewan conditions. A high bypass protein concentrate was formulated containing approximately 10% of these two feeds and compared to a control ration in which the protein supplement was soybean meal and canola meal. The milk was analysed for protein and fat percentages, milk yield was measured, and body weight and food intake was monitored.

Evaluation of sonar ranging measurements of river water levels

by D.D. Andres and G.C. Cardinal. Edmonton : Alberta Research Council, 1989. v, 38 p. : ill.

(Open file report ; no. 1989-06)
MICROLOG 91-02469 1 fiche

Most common water level measurements are now taken with a variety of instruments, all of which have to have the float or probe in contact with the water. This restriction causes many difficulties during severe flood conditions or during freeze-up or breakup. Significant advances in the development of sonar ranging devices have been made with the introduction of the auto-focusing camera, making it possible to use sonar ranging as an alternative method of measuring water levels. This report describes the characteristics of a sonar ranging system developed by the Alberta Research Council to measure water levels on large rivers. The system is composed of the sonar transceiver unit, which uses the Polaroid environmental ultrasonic transducer, the Texas Instruments sonar ranging module, and the sonar control unit, which was designed to control the system and interact with a pulse counting data logger in one variation and with an analog data logger in another.

Evaluation of stand vulnerability to spruce budworm attack using GIS

by G.M. Wickware and R.A. Sims. Thunder Bay, Ont. : Ministry of Natural Resources, Northwestern Ontario Forest Technology Development Unit, 1990. iii, 8 p. : ill. Bibliogr. (NWOFSTDU miscellaneous report ; no. 59)
MICROLOG 91-05685 1 fiche

This paper describes a project in which a geographic information systems approach was used to study a 100 sq km forest area in northwestern Ontario supporting extensive mixedwood stands with a high proportional cover of balsam fir that had been heavily attacked by spruce budworm during the last 10 years. A modelling approach, using factors such as present forest composition, stand age, soil moisture regime, soil texture and

interpreted balsam fir components in the overstorey, was applied to help determine future site and stand vulnerability to budworm attacks. Some implications and advantages of this approach are discussed. Sources included a variety of information databases including, NWO FEC vegetation and soil types (V-types and S-types). Photo interpretation and mapping techniques developed during the study for the V- and S-types are also described.

An Evaluation of the coal resources of the Ardley coal zone, to a depth of 400 m, in the Alberta plains area, vol. 1

by R.J.H. Richardson...et al. Edmonton : Alberta Research Council, Alberta Geological Survey, 1988. iii, 96 p. : maps. Bibliogr. (Open file report ; no. 1988-02)
MICROLOG 91-02460 2 fiche

This report is the product of a coal evaluation program conducted from 1979 to 1986 to evaluate the coal resources of the plains region of Alberta south of Township 64, from the near-surface to depths of about 400 m, and to develop an understanding of the sedimentologic and stratigraphic controls on the distribution and geometry of the coal seams. The Ardley coal zone is one of the most important coal zones of the plains region and is currently being strip-mined for use in electrical power plants. This report describes a comprehensive regional assessment made of the geological character of coals in the zone, based on data collected from geophysical logs of wells in 474 townships. In addition, core was examined from wells drilled in the Alix area.

An Evaluation of the coal resources of the Horseshoe Canyon Formation and laterally equivalent strata to a depth of 400 m, in the Alberta plains area

by P.J. McCabe...et al. Edmonton : Alberta Research Council, Geological Survey Dept., 1989. iii, 75 p. : ill., maps. Bibliogr. (Open file report ; no. 1989-07)
MICROLOG 91-02413 1 fiche

Result of a coal evaluation program conducted between 1979 and 1986 to evaluate the coal resources of the plains region of Alberta south of Township 64, from the near surface to depths of about 400 m, and to develop an understanding of the sedimentologic and stratigraphic controls on the distribution and geometry of the coal seams. This report describes the coal resources in the lower Horseshoe Canyon formation and its lateral equivalents, from the outcrop areas to between 100 km and 150 km west (down-dip) of the outcrop. A computer data set containing information from 812 petroleum wells and 108 coal exploration holes is used to generate a series of coal resource maps. In addition to using well logs, outcrop and core evaluations are incorporated into the study to develop an understanding of the depositional environments during the time of coal accumulation and to produce depositional models.

Evaluation of the Daly Field, Bakken Formation, southwestern Manitoba

by M. Arbez. Winnipeg : Manitoba Energy and Mines, Petroleum, 1988. i, 27 p. : ill., maps. Bibliogr. (Petroleum open file report ; POF 9-88)
MICROLOG 91-07155 1 fiche

The Bakken formation is a thin, relatively uniform clastic unit that lies between the red dolomitic siltstones and shales of the Upper Devonian Lyleton (Three Forks) formation and the carbonates of the Mississippian Lodgepole formation (Souris Valley Beds). Recent development in southwestern Manitoba has led to the discovery and subsequent development of several oil occurrences within the middle member of the Bakken formation. This report presents a petrophysical evaluation of the

Bakken sand, including a description of the methods used to evaluate the Bakken formation, as well as the results from these methods. Log analysis techniques were developed to obtain Bakken porosities and water saturations, while quick-look porosities were obtained directly from porosity logs.

An Evaluation of the ERP dispersion model using Darlington tracer study data

by S.C. Wright. Toronto : Ontario Hydro, Research Division, 1990. 42 p. : ill. Bibliogr. (Report ; no. 90-200-K)
MICROLOG 91-03161 1 fiche

In this study, site-boundary atmospheric dilution factors calculated by the atmospheric dispersion model used in the ERP (Emergency Response Planning) computer code were compared to data collected during the Darlington tracer study. The purpose of this comparison was to obtain estimates of model uncertainty under a variety of conditions. This report provides background on ERP, the ERP dispersion model and the Darlington tracer study. Model evaluation techniques are discussed briefly, and the results of the comparison of model calculations with the field data are presented and reviewed.

An Evaluation of the estimation of ice forces from the dynamic response of a massive bridge pier

prepared for Alberta Transportation ; by G. Van Der Vinne. Edmonton : Alberta Research Council, Resource Technologies Dept., 1988. vii, 68 p. : ill. Bibliogr. (Open file report ; no. 1988-11)
MICROLOG 91-02465 1 fiche

Although field measurement of ice forces against bridge structures in cold regions have been attempted since the late 1800s, the amount of data available is still quite small and of questionable quality. This report evaluates the effectiveness of a numerical model which calculates ice forces from measurements of bridge pier accelerations. The model uses a Fourier transform technique to solve the single-degree-of-freedom system which was used to describe a massive pier near Hondo, Alberta. Ice forces calculated by the model were compared with ice forces obtained from corresponding load cell measurements. The numerical model was tested using acceleration data developed from simple unit loads. Errors such as baseline drift and noise were added to this acceleration data to determine their effects on the recalculated unit loads. Data manipulation techniques, such as linear regression of the acceleration data, were applied to reduce the effects of these errors.

Evaluation of the federal co-operative housing programs : draft report

Ottawa : Canada Mortgage and Housing Corporation, Program Evaluation Division, 1990. 320 p. French ed. (Evaluation du programme fédéral...) : 91-00188/4.
MICROLOG 91-00187 4 fiche

The evaluation is restricted to the three unilateral federal programs which have been in existence since 1973 to assist financially in the development of co-operative housing. It provides data on the characteristics of co-operatives, residents and managers-coordinators of co-operatives, and federations and resource groups. It also assesses the various rationales for co-operative housing, and the extent to which program objectives have been achieved.

It examines the benefits of co-operative housing, and the financial environment surrounding co-operatives.

An Evaluation of the HSPICE/RADSPICE circuit simulation code system (U)

by G.T. Pepper and R.E. Stone. Ottawa : Defence Research Establishment Ottawa, 1990. ix, 22 p. Bibliogr. (Technical note ; no. 90-33)
MICROLOG 91-03506 1 fiche

The study of radiation effects in modern electronic devices is currently of military and commercial interest. Detailed research in this area requires either extensive experimentation involving actual radiation sources and semiconductor devices (extremely resource-intensive) or accurate numerical simulations to substitute for the experiments. Since the HSPICE/RADSPICE code system permits detailed numerical simulations of several types of radiation effects in modern electronic devices and circuits, it has been selected for use in preliminary investigations in this field. This report summarizes the capabilities of the RADSPICE code, providing a general description, including the range of applications and the ease of use, how to construct electronic circuit network listings, and the accuracy of results obtained.

An Evaluation of the low temperature performance of recycled hot mix

by K.K. Tam, P.E. Joseph and D.F. Lynch. Toronto : Ministry of Transportation, Materials Information, Engineering Materials Office, 1990. 26 p. : ill. Bibliogr. (Materials information report ; MI-141) ISBN 0-7729-8036-5
MICROLOG 91-06666 1 fiche

A hot mix recycling program was begun in 1979, based on recommendations presented by a task force set up to study the feasibility of using recycled hot mixes as a viable alternative for highway pavement rehabilitation projects. This created a need for an objective evaluation of recycled hot mix (RHM), both in the laboratory and in the field. An experimental

program was set up by carrying out a series of laboratory tests to evaluate the properties of RHM. This paper presents the findings on low temperature performance of RHM during the first few years of the program, particularly in regard to thermal cracking. The RHM was evaluated for limiting stiffness and fracture temperature.

Evaluation of the MARISAT satellite UHF wideband channel

by W.R. Seed. Ottawa : Defence Research Establishment Ottawa, 1990. ix, 30 p. : ill. (Technical note ; no. 90-25)
MICROLOG 91-03510 1 fiche

The Dept. of National Defence (DND) is making increasing use of satellite communications (SATCOM) to relay voice and data between land, sea and air resources, as well as for both domestic and NATO exercises. DND is currently considering leasing UHF transponder time on the MARISAT F-1 satellite. This report investigates the feasibility of using this transponder for the transmission of digital voice. An analytical evaluation of the link is performed for up to 10 users sharing the non-processing transponder's 500 kHz bandwidth. The terminal link carrier-power-to-noise-power-spectral-density ratio is evaluated for data rates of 2.4, 4.8 and 16 kbps, and for terminal Effective Isotropic Radiated Power (EIRP) levels from 17-30 dBW. Analyses are performed for cases in which all terminals transmit with the same EIRP and also for cases in which a single user is either 3 dB above or below the other users. A variety of loading schemes are considered to demonstrate the variation in user SNR degradation due to hardlimiting on-board the transponder.

Evaluation of the performance of attic radiant barriers

University of Alberta. Dept. of Mechanical Engineering. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1990. x, 80 p. : ill. Bibliogr. ISBN 0-88654-295-2
MICROLOG 91-01250 2 fiche

Attic radiant barriers have been used in southern climates to reduce summer cooling loads on a house by reducing heat gain through the ceiling. Recent suggestions for using such barriers in northern climates to reduce winter ceiling heat loss have led to considerable debate over their effectiveness in this situation. This project evaluated the thermal performance of attic radiant barriers for a heat loss situation, estimated the installation costs vs. energy savings, determined any effect that radiant barriers may have on ceiling moisture accumulation, and determined the increase in roofing material temperatures caused by radiant barriers installed under the top chord of roof trusses.

Evaluation of the performance of attic turbine ventilators

by J.D. Dale and M.Y. Ackerman. Edmonton : Alberta Municipal Affairs, Innovative Housing Grants Program, 1990. vii, 68 p. : ill. ISBN 0-88654-280-4
MICROLOG 91-00289 1 fiche

Attic turbine ventilators are increasingly used in residential applications to remove heated air from attic spaces during summer and to reduce the energy transfer between attic and living spaces. Concerns were expressed as to whether increasing attic ventilation rates could produce interior condensation at wall-ceiling intersections during periods of low ambient temperatures. A two-part study was undertaken, with the first part involving laboratory and wind tunnel experiments to calibrate flow measurement stations installed in the turbines and obtaining base line air speed vs flow relationships, and the second part involving the installation of a ventilator on an instrumented house at the Alberta Home Heating research facility and measuring attic ventilation rates and flow through the ventilator.

Evaluation of the transboundary TDS and boron water quality objectives for the Poplar River

by L.R. Linton, R.A. McDonald and H.R. Hamilton. Regina : Environment Canada, Conservation and Protection, Inland Waters Directorate, Western and Northern Region, Water Quality Branch, 1988. xii, 78 p. : ill. Bibliogr.
MICROLOG 91-00635 1 fiche

In the 1970s, Saskatchewan Power Corp. (SPC) constructed a water storage facility, a 600 MW coal-fired thermal-electric generating station and a new coal mine on the Poplar River near the International Boundary. This caused concern in the U.S. regarding potential transboundary effects relating to water quality and quantity. The International Joint Commission investigated the situation and recommended boron and total dissolved sediment (TDS) objectives. This report assesses the appropriateness of using flow-weighted objectives for the East Poplar International Station; reviews and documents the algorithm presently being used to calculate flow weighted concentrations and assess its suitability; assesses the significance and representivity of algorithm output; and evaluates present methods of reporting compliance.

The Evolution of the manufacturing component in the Ontario metal mining industry

by Alan G. Green, M. Ann Green ; in collaboration with Gerhard Anders. Kingston,

Ont. : Queen's University, Centre for Resource Studies, 1991. vii, 60 p. : ill. Bibliogr. (Working paper ; no. 46) ISSN 0226-7616 ISBN 0-88757-104-2
MICROLOG 91-06762 1 fiche (Available on fiche only)

As part of the general review of the Mining Act of Ontario, a detailed review was conducted of Section 104 of the Act, which ensured that metal and mineral products mined in the province would be refined before export. This study measures changes in the scope of metal production, using a detailed industry-by-industry review of the timing and nature of changes in degree of processing introduced; the growth and impact of the smelting and refining industry; and the results of a long-term investigation into the ratio of unit price to world metal price, with unit price defined as total value of Ontario production of a particular metal in all its forms, divided by total quantity produced, conducted on a metal-by-metal basis. The impact of GATT negotiations and the Free Trade Agreement on the Ontario metal mining sector were also investigated, carried out by interviewing specific metal producers.

Exact solution of a stochastic location problem by an integer L-shaped algorithm

by G. Laporte, F.V. Louveaux and L. Van hamme. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 20 p. Bibliogr. (Publication ; no. 716)
MICROLOG 91-00319 1 fiche

One widely studied problem in location theory is the uncapacitated facility location problem (UFLP), which consists of locating a number of facilities among a finite set of potential sites in order to minimize a linear combination of fixed facility costs and of variable production and transportation costs to customers. This paper addresses the problem of optimally determining the location and size of facilities given that future customer demand is uncertain. The problem is formulated as a stochastic integer linear program with first stage binary variables and second stage continuous variables. It is solved to optimality by means of an integer L-shaped method. Computational results are reported for problems involving up to 40 customers and 10 potential facility locations.

An Examination of radiation-induced bit-upset patterns in semiconductor memories

by T. Cousins and E.L. Karam. Ottawa : Defence Research Establishment Ottawa, 1990. xv, 36 p. : ill. Bibliogr. (Report ; no. 1038) MICROLOG 91-00883 1 fiche

The susceptibility of modern semiconductor memories to transient radiation effects on electronics has been well-documented for the entire gamut of battlefield, outer space and even ambient environments. Generally, these effects were observed by analyzing the performance of the memory as a whole because of the lack of the sophisticated hardware and software necessary to access bit-by-bit information on the irradiated memory. Recently the MOSAID MS2200 system, which provides real-time bit maps of memories before, during and after irradiation, was purchased. This report details some experimental work conducted to examine the bit-by-bit response of 3 particular memory types to electron linear accelerator and 60Co gamma-ray irradiation.

Examination of the ignitability characteristics of coal dust/air and methane/coal dust/air mixtures : final report

by P.R. Amyotte, M.J. Pegg and Y.H. Sun. Ottawa : Dept. of Energy, Mines and Resources, 1991. xi, 82 p. : ill. Bibliogr. CANMET contract: 99200-01-SS. MICROLOG 91-04685 1 fiche

An experimental investigation of coal dust explosions was conducted in a 26-L spherical chamber using channel samples of coal from the Prince and Phalen mines of the Cape Breton Development Corp. to investigate the ignitability characteristics of the coals alone and with admixed methane. Tests were also conducted to examine the relative effectiveness of various rock dusts (limestone, dolomite and magnesite) on the inerting of coal dust explosions. Two size fractions were produced for each of the Prince and Phalen coals. For each coal type, particle size, methane concentration (0% and 2%), and ignition energy (from 50 J to 10 kJ), tests were conducted at different coal dust concentrations to establish the lean flammability limit. For inerting requirements, tests were conducted for each rock dust with the smaller size fraction of Prince coal, a coal dust concentration of 0.5 kg/cu m, an ignition energy of 5 kJ, and no methane present. Rock dust concentrations ranged from 29% of the total solids mixture to the percentage required to suppress an explosion.

Exhaust emissions from heavy-duty vehicles

Sypher/Mueller International. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology ; S.I. : International Energy Agency, 1990. xi, 91 p. : ill. Bibliogr. (CANMET special publication ; SP91-1E) ISBN 0-662-18980-9 MICROLOG 91-06279 2 fiche

This paper presents a comparison of international emissions regulations, including test cycles employed, sampling and measurement techniques, and legislated limits on pollutants. The paper also presents an overview of the current work in progress on design, manufacture and testing of heavy-duty methanol engines for trucks and buses as well as a survey of the application of catalytic converters for exhaust emissions control on these engines. A review of progress in emissions control measures for diesel fuelled engines is included for comparison.

Experimental investigation of fatigue strength of lightweight concrete in sea water

by V. Ramakrishnan and S.K. Eagala.
Fredericton : University of New Brunswick, 1991. 98 p. : ill. CANMET contract: 99130-01-SS.
MICROLOG 91-04682 2 fiche

Lightweight concrete is a promising material in the construction industry, particularly in offshore structures and structures subjected to dynamic loading. This report presents the results of an extensive experimental investigation to study the flexural fatigue strength, endurance limit, and static flexural strength of lightweight concrete in sea water. The concrete beams were constructed at the University of NB. A total of 6 mixes were investigated and 120 beams, 20 in each group, were tested for flexural fatigue with load applied at 1/3 points and at a frequency of loading of 20 cycles per second (HZ). The beams which survived two million cycles of non-reversed fatigue loading were tested in static flexure to determine their residual strength (modulus of rupture).

Experiments on vegetation control with native pathogenic fungi in the southern interior of British Columbia

by R.E. Wall and S.F. Shamoun. Victoria : Forest Resource Development Agreement, 1990. v. 18 p. Bibliogr. (FRDA report ; 134) ISSN 0835-0752
MICROLOG 91-02955 1 fiche

The objectives of the study were: 1) to evaluate the relative efficacy of available biological controls for thimbleberry and associated hardwood species; 2) to measure the interactions among thimbleberry, overstory hardwoods, and conifer seedlings; 3) to evaluate the direct and indirect effects of

selected biological control agents on conifers and other non-target vegetation; and 4) to determine if these agents are viable options by themselves or in conjunction with other control methods. Fungi associated with diseases of forest weed species were tested for their mycoherbicide potential under greenhouse, growth chamber and field conditions. Several field treatments were applied, and subsequent changes to competing vegetation were measured in terms of foliar disease ratings and percent cover estimates.

An Expert system for water quality assessment of Ontario rivers

by T.E. Unny and W.C. Allison. Toronto : Environment Ontario, 1989. x, 173 p. : ill. Bibliogr. ISBN 0-7729-6048-8
MICROLOG 91-05101 2 fiche

WatQUAS 2.0 is an intelligent knowledge-based system for the assessment of water quality in Ontario rivers, using a comprehensive numerical analysis conducted on the historical water quality record of a river monitoring site. An expert interpretation of the water quality at the site is completed by using the results from the numerical analysis, a large knowledge base, and an inferential engine. Conclusions regarding the origin, seriousness and possible solutions to the water pollution problems are presented by WatQUAS 2.0. This report describes the development of the system, particularly the expansion of the knowledge base and the enhancement of the water quality assessment techniques.

Exploiting end-user computing technology -- Rev.

by T. Russell and M. Fick. Toronto : Ministry of Revenue, 1988. 61 p. : ill. Bibliogr. (Growth management studies ; 2) ISBN

0-7729-4923-9
MICROLOG 91-01495 1 fiche

In 1984 a series of studies was commissioned by ministries to form the basis of an information technology strategy for the Ontario government. The first study advanced a general methodology for ensuring that investment decisions are tightly integrated with a ministry's strategic business plans. This study focuses on the particular requirements of supporting a strategy involving diversified and accelerated investments in end-user computing technologies. The study is based on the Ministry of Revenue's experiences and approach to managing end-user computing technologies. It was originally published in 1985 and has been updated to take into account more recent experience in information technology. The study covers the need for such a strategy, the staff resource base, and the management of the infrastructure and data resource bases.

Les Exportations de services de gestion et de promotion immobilières : sur quoi repose l'avantage concurrentiel des firmes canadiennes?

par M. Polèse...et al. Halifax : Institut de recherches politiques, 1989. xxiv, 93 p. Bibliogr. ISBN 0-88645-093-4
MICROLOG 91-00593 2 fiche

Cette étude a pour objectif l'étude d'une série de cas particuliers et des questions statistiques et empiriques qui se posaient au cours de l'analyse du commerce dans certains secteurs de services. Les transports; les services financiers, l'informatique et les télécommunications, l'ingénierie, l'expansion et la gestion de l'immobilier ont été examinés afin d'identifier quels facteurs déterminants permettaient l'accès à une situation concurrentielle. Les analyses sont complétées par une révision des données préalablement disponibles en matière de commerce des services et d'investissements étrangers. Entre autres choses, on a essayé de déterminer les causes qui se trouvent à l'origine de cette situation et d'évaluer dans quelle mesure un tel avantage pouvait être maintenu.

MICROLOG 91-01330 1 fiche

Science and technology (S&T) have become new international currencies and the basis for industrial competitiveness and high standards of living. S&T relationships have been developed with Canada's major trading partners but they are relatively small on a world scale. Consequently, Canada needs to have access to the international pool of S&T to meet its domestic needs. This report describes the array of principal mechanisms and programs available to Canadian firms and research organizations to gain access to the international pool of S&T.

Extension de la phase expérimentale pour le programme de maîtrise en sciences comptables offert à l'Université du Québec à Montréal

avis à la Ministre de l'enseignement supérieur et de la science. Sainte-Foy, Québec : Conseil des universités, 1991. i, 4 (Avis ; no 90.11) ISSN 0709-3985 ISBN 2-550-22199-0
MICROLOG 91-06764 1 fiche

Après trois ans d'expérimentation, l'Université du Québec à Montréal a fait une analyse minutieuse des progrès accomplis pour respecter les demandes du Conseil. Elle en vient à la conclusion qu'il lui faudrait une plus longue période de temps pour remplir toutes les conditions fixées par le Conseil. Elle demande donc que la phase expérimentale du programme de maîtrise en sciences comptables soit prolongée de deux ans. Ce document porte sur l'identification du programme, l'état de la question, les motifs de cette prolongation, et les conclusions et les recommandations.

Extension of antimony reserves at the Lake George mine, York County, New Brunswick

by C. Morrissy. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1991. 2 v. : maps. (Open file report ; 91-6) Contents: Vol. 1 : Part I -- vol. 2 : Part II. Fold. maps not filmed. ISSN 0712-4562
MICROLOG 91-03578 2 fiche

This report presents the results of reconnaissance drilling to locate new quartz/antimony veins that may exist in the untested area south of the main producing vein at the Lake George mine in York County, NB. Drill holes were spotted in geologically favourable areas for host quartz-stibnite veins; the core from the drilling was logged; samples were split where necessary and the pulps from these samples were sent to assay labs for antimony and/or gold analysis. The drill hole collars were surveyed and the holes were troperi tested at various depths to verify their dips and azimuths. The survey and test information was then used to plot the hole projection on sections and plans with assay values.

The Extension of bacterial plugging to workover operations : final report

Microbios Ltd. Calgary, Alta. : The Corporation, 1991. 14 p. : ill. CANMET contract: 99300-01-SQ.
MICROLOG 91-04693 1 fiche

It is current oilfield practice to add very expensive polyionic cellulose (PAC) polymers to drilling fluid in very permeable rock zones to prevent fluid loss into these zones. This study was conducted to combine bacterial and carbonate particle plugging technologies to produce a very rapid, very tight, plug; to optimize the bacteria-carbonate plugging technology by the selection of fast-growing glycocalyx-producing bacterial strains and by

the development of an economical but effective nutrient package; and to determine the concentration of bleach (NaOCl) and the exposure times necessary to completely remove the bacterial component of the bacteria-carbonate plug.

Extension of the Mount Pleasant tin deposit, Charlotte County, New Brunswick, part I

LAC Minerals Limited. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1991. iv, 41 p. : ill. : maps. Bibliogr. (Open file report ; 91-4) *Fold. maps not filmed.* ISSN 0712-4562 MICROLOG 91-03094 1 fiche

The objective of this project was to evaluate the Mount Pleasant Mining Licence outside the well-explored North Zone and Fire Tower Zone for the presence of tin mineralization. An area east and north-east of the North Zone was selected based on the presence of radiometric and/or IP anomalies. Deep vertical diamond drilling was used to explore the area and collect core samples for analysis. The report describes the methodology, findings, and recommendations of this research.

The Extent and nature of seeded jack pine clumping following disturbance in northwestern Ontario

by L. Van Damme and K. McKee. Thunder Bay, Ont. : Ministry of Natural Resources, Northwestern Ontario Forest Technology Development Unit, 1990. iv, 42 p. : ill. Bibliogr. (Technical report ; no. 58) MICROLOG 91-02355 1 fiche

Exploratory investigation of clumping in juvenile jack pine, comparing the structure of artificially established stands with the structure of natural (fire established) stands. The report provides a definition of clumping of jack pine in units that can be readily recognized and measured in the field; a measure of the prevalence of the clumping condition and its relationship to stand origin and age; and a comparison of the growth and development of free growing to clumped trees. The study area included most of the commercial and accessible parts of the boreal forest region in Northwestern Ontario. Thirty-one stands, from 2-20 years old, were sampled, representing hand seeded with shelter cones, hand seeded with no shelter cones, Bracke spot seeding, scarification of slash, aerial seeding, and wildfire. The seeding methods were compared for total density, density of clumps, ratio of clumped seedlings to total seedlings and a measure of non-random spatial distribution.

Extent of carbonation in buildings in Toronto

John A. Bickley Associates Ltd. Ottawa : Canada Mortgage and Housing Corporation,

Policy Development and Research Sector, Research Division, 1990. 75 p. : ill. MICROLOG 91-06005 1 fiche

Carbonation occurs when concrete reacts with carbon dioxide from air or water and reduces the pH of the concrete to below 9.0. At this low pH, reinforcing steel may become corroded. Interviews were held with the Ontario Housing Corporation, the Toronto Metropolitan Housing Authority, Public Works Canada, the Ontario Ministry of Government Services and members of the Canadian Institute of Public Real Estate Companies. Twenty-eight buildings were eventually selected and tested with invasive but non-destructive procedures. A total of 348 concrete cores, each approximately 50 mm in diameter by 75 mm long were removed by diamond drilling and examined for splitting tensile strength, absorption and voids, chloride ion content, carbonation depth and lime content.

Extraction and characterization of crude oils from primary and enhanced recovery : final report

by C. Reichert, B.J. Fuhr and R.F. Alex. Edmonton : Alberta Research Council, Oil Sands and Hydrocarbon Recovery, 1990. 60 p. : ill. Bibliogr. *CANMET contract: 69029-01-SQ.* MICROLOG 91-00729 1 fiche

In the in situ combustion bitumen recovery operation, heat is used to promote the movement of the oil in the reservoir and chemical reactions and processes such as thermal cracking, low temperature oxidation, precipitation of asphaltene, vaporization, condensation and coke formation are expected to alter both the bitumen in the region of the combustion zone and the produced bitumen. This report gives the results of the characterization of produced oil samples from an in situ oxygen combustion process at Wolf Lake, Alberta which were physically and chemically characterized. The properties of these samples were compared to those of a core sample from the same field prior to initiation of the fire flood. A number of analytical techniques were applied to the whole oil samples and their distillation cuts and chromatographic fractions. The gas chromatography - mass spectrometry technique was a major analytical tool in the study.

Extraction of the growth regulator uniconazole (XE-1019) from silver maple wood

by G.P. Arron. Toronto : Ontario Hydro, Research Division, 1990. v, 21 p. : ill. Bibliogr. (Report ; no. 90-40-K) MICROLOG 91-04564 1 fiche

Growth regulators inhibit the growth of many plant species, making them useful for application

to trees under or beside distribution lines. A popular method of application is trunk injection. This study was designed to determine the proportion of uniconazole and metabolites in wood found close to the injection site in silver maple saplings harvested 0, 134 and 500 days after trunk injection. The availability of uniconazole in this wood was also determined by performing extractions with water and other solvents. Data is also presented on the effects of uniconazole on the growth of silver maple saplings in the third growing season post-injection and the translocation of uniconazole into the foliage of these saplings.

Fabrication of large concrete cylinders for determining resistance of concrete to ice abrasion and impact, final report : mix design concrete properties and preparation for specimen for abrasion testing

Montreal : Quality Control, Concrete Laboratory Ltd., 1990. 16 p. : ill. CANMET contract: 99208-01-SQ. MICROLOG 91-00370 1 fiche

This report covers the preparation of large size specimen shafts with 4' non-air entrained concrete mixtures proportioned to provide 15, 25, 35 and 45 MPa compressive strength at 28 days using local normal weight limestone and CSA type 10 cement. Each large size specimen is a cylinder 30 mm in diameter and 500 mm long with an 87 mm steel shaft in the central axis. For each strength, one specimen was cast with a smooth surface and one was cast with a rough surface. The concrete was tested for compressive strength and elastic modulus. The results of these tests are given, along with the characteristics of the fresh concrete.

Factors affecting jack pine cone and seed supply after harvesting in northwestern Ontario

by C. Bowling and G. Niznowski. Thunder Bay, Ont. : Ministry of Natural Resources, Northwestern Ontario Forest Technology Development Unit, 1991. v, 19 p. Bibliogr. (Technical report ; no. 63) MICROLOG 91-07060 1 fiche

Twenty-three cutovers formerly dominated by jack pine and harvested since 1985 were sampled in northwestern Ontario in 1989 for numbers and distribution of jack pine cones within 30 cm of ground level. Effects of stand age, harvesting season, harvesting method (full-tree vs. tree-length), and seedbed condition (with or without site preparation) were evaluated. An equation was developed to estimate two-year jack pine seedling densities from post-harvest numbers of jack pine cones. In addition, minimum stocking standards were compiled from published data to relate numbers of cones in cutovers to stocking of two-year-old jack pine seedlings.

Fair exchange : reforming trade remedy laws

edited by Michael J. Trebilcock and Robert C. York. Toronto : C.D. Howe Institute, 1990. viii, 303 p. Bibliogr. (Policy study ; no. 11) ISSN 0832-7912 ISBN 0-88806-267-2
MICROLOG 91-00933 4 fiche

Trade and investment increased dramatically in the 1980s as a result of innovations in information transfer and technology and the globalization of capital and many product markets. Because of these trends, mechanisms to resolve international trade disputes are becoming more judicial in nature, often including provision for third-party arbitration and adjudication. This desire for more legalistic ways to resolve trade disputes has also been influenced in many countries by the increasing role of market forces in the allocation of resources. The widespread use of trade remedy laws in the 1980s makes it clear that the current system of trade laws no longer serves a globalized economy. The contributors to this study assess critically the failings of the international trade law regime and offer some suggestions as to how the system can be reformed.

Fanshawe Lake : the need for water quality management in southern Ontario reservoirs

by H. Vandermeulen and A. Gemza. Toronto : Ministry of the Environment, Water Resources Branch, Limnology Section, 1991. v, 76 p. : ill. Bibliogr. ISBN 0-7729-8119-1
MICROLOG 91-05922 1 fiche

Southwestern Ontario has a number of reservoirs used for flood control and recreation. They could also be used for small scale hydroelectric power generation. However, this would have profound implications for water quality in the region's watersheds, since surface waters and then bottom waters, which are very bad in quality and are used to power the turbines, are released downstream. This report presents the results of upstream and downstream water quality sampling in Fanshawe Lake, as a representative lake, conducted from May to September in 1988 and 1989. Samples were analyzed for dissolved oxygen, nutrient loadings, phytoplankton and zooplankton, and temperature.

Farm businesses : the impact of high interest rates -- Rev.

by L.A. Christie. Ottawa : Library of Parliament, Research Branch, 1990. 23 p. Bibliogr. (Current issue review ; 82-11E) French ed. (Les Exploitations agricoles...) on the same fiche. ISBN 0-660-13662-7
MICROLOG 91-01990 1 fiche

This current issues paper reviews the evolution of the farm cash-flow interest-payment problem in Canada which has resulted in farm bankruptcies and other economic distress for Canadian farmers. The paper also investigates farmers' ability to cope with high interest rates, the outlook and long-term impact, the current state of affairs, and parliamentary action during the 1980s on this issue. The report concludes with a chronology and a bibliography.
AG CA CI CO SC

by L.A. Christie. Ottawa : Library of Parliament, Research Branch, 1990. 24 p. Bibliogr. (Current issue review ; 82-11E) French ed. (Les Exploitations agricoles et les taux...) on the same fiche. Revised September 14 1990. ISBN 0-660-13856-5
MICROLOG 91-04872 1 fiche

During recent years, high interest rates on farm credit have greatly affected the profitability and even the viability of farm enterprises, causing increased farm bankruptcies, foreclosures, and forced sales. This paper focuses on the evolution of the farm cash-flow interest-payment problem, the immediate impacts of high interest rates, the ability of farmers to cope with high interest rates, and the outlook

and long-term impacts.

Farm credit statistics, 1991

Farm Credit Corporation Canada. Ottawa : The Corporation, 1991. ii, 46 p. : ill. Bilingual (Statistiques du crédit agricole, 1991). CSI 22222.003.
MICROLOG 91-06439 1 fiche

This is the annual report of the Farm Credit Corporation, a Crown agency established in 1959 to provide loans to assist farmers in developing viable farm units. These loans may be used in buying farmland, erecting or modernizing farm buildings, purchasing livestock and equipment, refinancing debts, or for any other purpose which facilitates the efficient operation of the farm unit. An overview is given of the year's loans and of agricultural operations, including net and gross farm income, for the country. Other data are presented on lending activity, arrears and interest rates, characteristics of borrowers, and census tables of related interest.

Farm Improvement and Marketing Cooperatives Loans Act : Annual report 1988-89

Ottawa : Agriculture Canada, 1990. 16, 16 p. Bilingual. CSI 21100.003. ISBN 0-662-57516-4
MICROLOG 91-00824 1 fiche

The purpose of the Farm Improvement and Marketing Cooperative Loans Act is to facilitate the provision of intermediate-term and short-term credit to farmers and farmer-owned marketing cooperatives to improve farm assets and to strengthen production and financial stability. The Act authorizes the Minister of Agriculture to guarantee against loss, term loans made to farmers by chartered banks, Alberta Treasury branches and other lenders designated by the Minister. This report covers the 14 month period ending March 31, 1989. It includes a review of 1988-89 lending and tables show loans and claims paid, loans classified by province and lender, and by province, purpose and commodity: beef and hogs; dairy, grains and oilseeds; poultry; pulse crops; fruits and vegetables; and others.

Fast determination of radon progeny concentrations

by J. Bigu and E. Edwardson. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. v, 119 p. : ill. Bibliogr. (Report ; MRL 90-142(TR))
MICROLOG 91-02418 2 fiche

A technical evaluation of four Rn222 progeny measuring instruments (the Pylon WL-1000C, the MDA IWLM-811, the MIMIL IIM, and the EDA WLM-30) was conducted under laboratory controlled conditions and at several locations in an underground uranium mine. The laboratory evaluation consisted of a thorough study of the behaviour and performance of the instruments under a wide variety of environmental conditions, such as Rn222 gas concentration, Rn222 progeny concentration, temperature, relative humidity, aerosol concentration, and gamma-field exposure. The readings of the instruments were compared with the Thomas-Tsvoglou method, a widely accepted Rn222 progeny concentration measuring method. The instruments were rated according to accuracy, convenience of use, reliability, and ease of operation.

The Fate, persistence and biological impacts of deltamethrin applied directly to an agricultural pond system and the protection from deposit afforded by a 100 metre set-back

by W.R. Ernst...et al. Ottawa : Environment Canada, Conservation and Protection, Environmental Protection, Atlantic Region, 1989. vii, 57 p. : ill., maps. Bibliogr. (Surveillance report ; EPS-5-AR-89-1)
MICROLOG 91-00551 1 fiche

Deltamethrin is one of the most potent insecticides presently used. In Canada, it is used under the trade name Decis and is

registered for use on crops. Very few reports are available on the aquatic environmental dynamics of deltamethrin. This report presents the results of a study to show the persistence, fate and effects of deltamethrin sprayed aerially on 2 ponds in P.E.I. The study assessed the importance of volatilization from the surface microlayer in laboratory experiments and determined the concentrations of the 4 enantiomers which result from sunlight photosynthesis. The biological impact associated with direct deposit in a pond system was assessed by observing mortality in caged fish and invertebrates and quantifying colonization of artificial substrates by invertebrate species. The protection to pond ecosystems afforded by watercourse buffer zones was assessed by comparing deposit and biotic disruption in the oversprayed pond with that of a pond protected by a 100 metre buffer zone.

Feasibility and implementation of new housing finance ideas in Canada

by J.E. Pesando. Ottawa : Canada Mortgage and Housing Corporation, 1990. 22, 22 p. Bilingual (Nouvelles idées en matière...). Paper prepared as a background document for the Canadian Housing Finance Conference.
MICROLOG 91-06230 1 fiche

Two particularly difficult problems confront prospective homebuyers in the 1990s: sharply higher prices in many markets, which make minimum down payment requirements and carrying costs more onerous; and volatile interest rates, which force buyers to speculate on the future course of interest rates and which create the risk that buyers will face sharply higher interest rates on mortgage renewal dates. This paper reviews recent proposals designed to solve these and related problems, and thus to improve housing accessibility.

Feasibility of using satellite imagery in ADES

by J.A. Ostrowski and D.N.H. Horler ; for the Transportation Development Centre, Policy and Coordination Group, Transport Canada. Ottawa : Horler Information Inc., 1990. xii, 20 p.
MICROLOG 91-03667 1 fiche

Transport Canada is developing an Airspace Design Expert System (ADES) for designing instrument approach airways in a 3-D computer graphics environment. ADES requires a detailed digital elevation model (DEM) as part of its database, for which data from military sources are currently used. The availability of SPOT (système probatoire d'observation de la terre) stereo satellite imagery offers an alternative

data source and makes it possible to obtain accurate elevation data as well as land cover information. This project tested that concept, using a terrain database generated from stereo SPOT imagery in the National Capital Region. Horler Information's proprietary software system, HI-VIEW, was used for the DEM generation. The process required data preprocessing, stereo image matching, editing, formatting, transfer to ADES, and verification and testing within ADES. This report presents the feasibility evaluation of the test.

Feasibility study of applying multiplexing technology to intercity coaches, vol. I

by Jim Petersen and Ed Paryzek ; for Transportation Development Centre, Policy and Coordination Group, Transport Canada. Winnipeg : Manitoba Research Council, 1990. xxxviii, 137 p. : ill. Bibliogr.
MICROLOG 91-02511 2 fiche

Multiplexing is the transmission of multiple messages over a single channel, reducing the wiring in a vehicle by using wire more effectively. While multiplexing is being actively pursued by the automotive and trucking industries, it has not been considered on intercity coaches. This report investigates the technical and economic feasibility of applying multiplexing technology to intercity coaches, specifically a Motor Coach Industries 102C3 coach. The report evaluates the technological and economic benefits and defines an implementation plan for its orderly incorporation over the next 5 years. Current practices in the automotive and trucking industries are assessed, along with their refinement for the intercity coach industry. The report includes a technical assessment, system level design, and a cost/benefit analysis.

Federal revenues : changing trends and the quest for tax reform

by M.G. Wrobel. Ottawa : Library of Parliament, Research Branch, 1990. 15 p. Bibliogr. (Current issue review ; 90-3E) French ed. (*Les Recettes fédérales : les nouvelles...*) on the same fiche. ISBN 0-660-13645-7
MICROLOG 91-02120 1 fiche

This current issues paper examines the trends in federal revenues since the Carter Commission report of 1967. It discusses the quest for higher revenues in the early 1970s and the reform measures of that decade which later substantially reduced government revenues. It goes on to the present government's efforts at tax reform and deficit reduction measures. Several analytical issues related to taxation are also covered. A chronology and bibliography conclude the paper.

Federal revenues : changing trends and the quest for tax reform -- Rev.

by M.G. Wrobel. Ottawa : Library of Parliament, Research Branch, 1990. 16 p. Bibliogr. (Current issue review ; 90-3E) French ed. (*Les Recettes fédérales...*) on the same fiche. Revised 19 Oct. 1990. ISBN 0-660-13907-3
MICROLOG 91-06066 1 fiche

In 1970 federal revenues amounted to just over \$15,000 million, which represented less than 17.2 percent of GDP. Today the dollar amount of federal revenues is much higher, in excess of \$116,000 million, but as a percentage of GDP it has increased only slightly, to 17.75

percent. Yet in two decades much has happened to the amount of revenue that the federal government collects, the way in which it is collected, and our understanding of the economic consequences. This review examines the trends in federal revenues since the Carter Commission Report of 1967. It discusses the quest for higher revenues in the early 1970s and the reform measures of that decade, which later substantially reduced government revenues. It addresses the present government's deficit reduction measures, which have increased the level of taxes, and efforts at tax reform. It also considers several analytical issues related to taxation.

Federal water policy

Ottawa : Environment Canada, 1990. 43 p. MICROLOG 91-03732 1 fiche

The Federal Water Policy is a statement of the federal government's philosophy and goals for the nation's freshwater resources, and of the proposed ways of achieving them in cooperation with provincial governments. This document provides an overview of the policy, then presents details on the policy itself, the strategies for achievement of that policy, methods of applying it, and specific policy statements. These statements cover such topics as the management of toxic chemicals, water quality, ground water contamination, municipal water and sewer infrastructure, safe drinking water, wetlands preservation, hydroelectric development, navigation, native water rights, and Canada-US boundary management, among others.

MICROLOG 91-00628 1 fiche

The Federal Water Policy (FWP) is a statement of the federal government's philosophy and goals for the nation's freshwater resources and of the proposed ways of achieving them. This document provides background information on the FWP and the process followed by the

Interdepartmental Committee on Water in developing this report. A complete review of achievement under the 5 strategies (water pricing, science leadership, integrated planning, legislation and public awareness) which support the FWP follows, ending in a presentation of new directions to better support the Policy. The report also contains a detailed review of the various policy statements enunciated under the 25 policy concerns contained in the FWP. CA EV NR SC

Federal-Provincial Agreements for the Eastern Canada Acid Rain Program : Annual report 1989-90

Ottawa : Environment Canada, 1990. 15 p. CSI 22433.001. MICROLOG 91-06319 1 fiche

In response to the serious threat posed to much of eastern Canada by acidic deposition, the federal government and the government of the seven easternmost provinces agreed in 1985 to establish a program to reduce emissions of SO₂, the primary cause of acid rain, by 50 percent from 1980 baseline levels. The program was formalized in federal/provincial agreements signed in 1987 and 1988, and established specific targets and timetables for reducing emissions in each province. This first annual report presents a summary of progress to March 31, 1990, including a description of control measures and strategies, program implementation, provincial actions, federal activities, and highlights for 1989-90. Field evaluation of foundation drain response

CH2M Hill Engineering Ltd. Ottawa : Canada Mortgage and Housing Corporation, 1989. viii, 82 p. : ill. Bibliogr.
MICROLOG 91-06003 2 fiche

A study was carried out in Edmonton in 1989 to observe the response of foundation drains to rainfall events. Studies previously conducted in other areas indicated that foundation drains could contribute high flows to sewer systems as a result of rainfall, but no firm values for foundation drain contributions had been derived. In this study, 50-year return period storms were simulated on selected residential lots on which houses were equipped with a sump and pump. A 3-hour and an 8-hour storm were simulated for dry and wet antecedent conditions on each lot. Observed results were then compared with results predicted by a mathematical model.

Field evaluation of rout and seal crack treatment in flexible pavements

by P.E. Joseph. Toronto : Ministry of Transportation, Research and Development Branch, 1990. iii, 31 p. : ill. Bibliogr.
MICROLOG 91-01655 1 fiche

This report documents a 4-year study on the evaluation of rout and seal crack treatment for flexible pavements. The study includes the selection of 37 test sites across Ontario covering different climatic and environmental conditions. Each test site was divided into 5 sections, 750 m long with the control section in the middle. The performance of each individual test section was carefully monitored over the past 4 years through condition surveys, photographs, roughness measurements and cored samples. A 3-part analysis was carried out and the results are presented. The analysis investigates the effect of rout configuration on sealant bond failure, the influence of treatment on pavement distress manifestation, and the cost-effectiveness of this treatment for extended pavement life.

Field investigation of brick veneer/steel stud wall systems

Suter Keller Inc. Ottawa : Canada Mortgage and Housing Corporation, 1989. iv, 20 p. : ill.
MICROLOG 91-06004 1 fiche

Use of brick veneer-steel stud wall systems has preceded adequate formal scientific investigation into its long term serviceability and safety. This report presents the results of a national investigation, in which eight buildings in St. John's, Montreal, Toronto, and Calgary were selected. These locations were chosen to include three distinctly different climatic regions in the most populated areas of Canada. The investigation consisted of a visual examination of the brick veneer, a detailed inspection of the exterior wall system in a number of locations through inspection openings from the interior, and a thermographic survey. Samples of mortar and metal components such as studs, tracks and screws were removed for laboratory analysis. Based on the metallurgical assessment, remaining life predictions were made of the stud wall components and brick ties.

Field measurements of natural NOx emissions from soils, Egbert, Ontario, July-September, 1989

by C. Heaton...et al. Toronto : Ontario Hydro, Research Division, 1990. 56 p. : ill. Bibliogr. (Report ; no. 90-12-K)
MICROLOG 91-00805 1 fiche

Ontario Hydro emits NOx as a result of combustion of fossil fuels for electricity generation. These emissions may contribute to

regional episodes of high O3 concentration as observed frequently in Ontario during the summer of 1988. Rational decisions on the implementation of any emission controls require that the contributions of each source be defined and also that the effect of reducing emissions on ambient ozone levels be predicted. Measurements of natural nitric oxide and nitrogen dioxide emissions from soils were made at the Centre for Atmospheric Research Experiments, Egbert, Ontario from July to September, 1989. This report documents the results. The work represents part of a long-term program to define natural NOx sources both regionally and seasonally for southern Ontario as an input to modelling studies.

Field testing of a new strain of leafcutting bees : final report

by G.H. Rank. Regina : Saskatchewan Agriculture Development Fund, 1989. 23 p. : ill. Bibliogr. ISSN 0829-9455
MICROLOG 91-01725 1 fiche

A strain of univoltine leafcutting bees was imported from France in 1983 and field released near Saskatoon under quarantine conditions. By 1985, successive yearly increases resulted in sufficient bees to evaluate in comparative field tests with commercial Canadian bivoltine strains. Bivoltine and univoltine strains were reared in similar field locations for 3 years, with cross contamination prevented by plot isolation of at least 2 km. For each strain the average time to emergence was determined for each of fall incubation, initiated in September immediately after fall harvest of cells, winter incubation, initiated in December, and spring incubation, initiated in April. Population sizes varied from 200-2000 cells depending upon the year and time period being evaluated. Treatment means within sexes of the 2 different strains were compared by a one-way analysis of variance.

Field testing of a prototype vision system for rail profile measurement

by D. Leung. Toronto : Ministry of Transportation, Transportation Technology and Energy Branch, Rail and Advanced

Transportation Systems Office, 1991. iv, 48 p. : ill.
MICROLOG 91-02968 1 fiche

A prototype vision system for measuring rail profiles was tested on a section of the Toronto Transit Commission (TTC) subway system. The measurements made with the vision system were compared to those manually obtained by the TTC using a conventional profilometer. This report compares the vision-based and manual measurement data, presents findings and provides conclusions regarding the accuracy of the vision-based measurements. Recommendations are also made for future work.

Filter debris analysis : a concrete approach to wear diagnosis

by H.P. Dominique and A.J. McKenzie. Victoria : Defence Research Establishment Pacific, 1988. 27 p. : ill. Bibliogr. (DREP technical memorandum ; 88-20)
MICROLOG 91-00141 1 fiche

As a possible alternative to spectrometric and ferrographic methods in wear particle analysis, the diagnostic potential of debris trapped in oil filters from a variety of machinery lubricated with mineral and synthetic lubricants was investigated. The study devised suitable techniques for the efficient removal of debris from different types of filters; established representative wear thresholds for each type of machinery; and correlated observations and results with mechanical conditions so that filter debris analysis (FDA) could be established as a viable condition monitoring method.

Fire protection video, film and slide catalogue, 1991

Edmonton : Alberta Labour, 1991. x, 100 p. CSI 34110.006.

MICROLOG 91-05013 2 fiche

This collection was established to promote fire safety awareness and to increase public understanding of issues and concerns related to fire safety. Topics available include arson, fire chemistry, fire prevention (including burns, case studies and code enforcement), fire research and fire suppression. Information covers how to order, loan policy, and shipping. Each film description includes an abstract, showing time, film format and production date.

Fire separations : final draft

by A.T. Hansen ; for Canada Mortgage and Housing Corporation. Ottawa : A.T. Hansen Consulting Services, 1990. iii, 19 p. Bibliogr.

MICROLOG 91-07095 1 fiche

Fire separations are regulated by provincial and municipal building code agencies. This document is intended to be compatible with the

1990 edition of the National Building Code, covering the fire resistance of materials and fixtures commonly used, methods of stopping the fire, use of firewalls, separations for safe exiting, methods of determining fire resistance ratings, and the use of glass in fire separations. Sample calculations are also included.

Fireplace air requirements

by ORTECH International, Scanada Consultants Ltd., and Sheltair Scientific Ltd. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1989. 44 p. : ill. MICROLOG 91-02099 1 fiche

Research has shown that excessive house depressurization can cause the spillage of combustion products from fuel-burning appliances into the indoor air. Operating fireplaces (especially open masonry ones) can be major sources of air exhaust from houses, and can cause this excessive depressurization, as well as indoor air pollution. This project involved the investigation of factory-built fireplace air demands, pressure limits, and air supply strategies, as well as an effort to find ways to isolate house and fireplace air. Test burns were conducted on 5 factory-built fireplaces to establish their resistance to spillage under various room depressurizations, their chimney flow rates, and the flow rates in their specified fresh air intakes. Separate tests were carried out to determine the airtightness of the glass doors and fireboxes, and the flow characteristics of the air intakes and chimneys. Thermal characteristics of the fireplaces and chimneys were calculated from the data.

CA PL PS SC

Fireplace air supplies and glass doors : a literature and equipment search

by D. Fugler. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1987. 16 p. Bibliogr.

MICROLOG 91-06254 1 fiche

CMHC has been investigating residential combustion spillage, or the failure of chimneys to properly vent the products of combustion. Throughout this research, the open or non-airtight fireplace has been seen as a major problem. This paper describes a literature and equipment search which established how the glass doors and fresh air intakes are specified and designed to meet the objective of separating the house air from the air intake of the fireplace.

The Fish processing industry and the GATT ruling : report

British Columbia. Industrial Inquiry Commission, the Fish Processing Industry and the GATT Ruling. Victoria : The Commission, 1991. 44 p.
MICROLOG 91-04841 1 fiche

The Commission was established to inquire into issues left unresolved following a 16 day strike in the fish processing industry in the summer of 1989. The Commission considered the impact of the GATT ruling, if any, on the job security of the United Fishermen and Allied Workers Union members in the fishing industry in BC and on the economic viability and competitive position of the member companies of the Fish Processors Bargaining Association (FPBA) with the US fishing industry; and also considered all outstanding proposals of the Association and the Union which had not yet been dropped or agreed to during the bargaining process. The report gives a summary of events in the fishing industry leading to the establishment of the Commission, then discusses the general problems in salmon processing in BC and Alaska, the world demand/supply balance, BC salmon canning capability and economics, market price, employment in fish processing, and the American threat. Issues specifically related to the dispute include flexibility in work scheduling, compensation, pension fund disposition, the shoreworkers' benefit fund, and the FPBS wage proposal.

Fishing lodges and resorts in British Columbia : marketing and development initiatives

prepared by DPA Group Inc., and MacLaren Plansearch Corp. Victoria : Ministry of Tourism and Provincial Secretary, 1988. 194 p. On cover: Final report.
CSI 37117.203. ISBN 0-7726-0881-4
MICROLOG 91-02270 3 fiche

Sport fishing has been identified as a product area which offers potentially significant returns to B.C.'s economy through non-resident tourism expenditures as well as through a higher level of in-province vacation days spent by B.C. residents. This study provides an analysis of the tourism potential of the lodge/resort industry segment of the sport fishing area and develops recommendations regarding marketing and development initiatives. The focus is on provincial industry potential, although marketing and developmental initiatives resulting from regional variations are also addressed. Telephone interviews were conducted with all six roof accommodations, lodges and resorts offering sport fishing products, selected clients of these establishments, wholesalers of sport fishing packages, and representatives of the provincial government, the media, the private sector, and competing jurisdictions.

Flow dynamics of the Campbell River Estuary

by A.B. Ages and A.L. Woollard. Sidney, B.C. : Dept. of Fisheries and Oceans, Institute of Ocean Sciences, 1991. v, 97 p. : ill., maps. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 130) ISSN 0711-6774
MICROLOG 91-06727 2 fiche

Since it was first logged in 1900, the Campbell River estuary on the east coast of Vancouver Island has provided the forest industry with a large and protected basin for its activities. In addition, the seaward side of the Campbell River is the spawning grounds for large number of chinook salmon. The tides and currents in the area have been studied since 1984, when one of the logging companies enlarged its sorting area. This report describes the hydrodynamic aspects of the Campbell River study, including the interaction between river discharge and tides; the upstream limit of the salt wedge and its velocity of intrusion; the stability of the saline-freshwater interface; and the volume transport of salt and fresh water at sections representative of the two different flow regimes in the estuary. The volume transport was estimated by combining conventional one-dimensional tidal computations with observed salinity profiles over a variety of tidal heights at normal, controlled discharges.

Fluctuation of bacterial density in the Red River at Emerson during a 36 hour period, August 9-10, 1988

by V.T. Chacko and R.N. Woychuk. Winnipeg : Environment Canada, Conservation and Protection, Inland Waters Directorate, Western and Northern Region, Water Quality Branch, 1990. iii, 31 p. : ill. Bibliogr.
MICROLOG 91-05937 1 fiche

As part of an ongoing routine water quality monitoring program on the Red River at Emerson, total (TC) and fecal coliform (FC) measurements were begun in 1976. Monthly measurements were carried out at various times of the day, generally before noon during the first week of the month. Historical data show that the bacterial density fluctuated substantially, and recently have decreased. In order to evaluate the routinely collected data, and to review the apparent decrease, a study consisting of hourly sampling was undertaken. The study determined the diurnal fluctuation of TC, FC and fecal streptococcus (FS) that could be used in the assessment of the historical data and also the diurnal fluctuation of the routinely measured dissolved oxygen, temperature, pH, conductivity and turbidity and examined their relationship, if any, to the bacterial densities.

Fluorspar processing plant airborne dust study : dust dispersion and ventilation analysis using tracer gases

by M.G. Grenier...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. ii,

28 p. : ill. Bibliogr. (Report ; MRL 90-19(TR))
MICROLOG 91-04575 1 fiche

A dust survey was conducted in a fluorspar (CaF₂) milling and processing plant to assess the exposure of personnel to concentrations of total insoluble fluoride compounds and respirable quartz dust. Time-weighted-average (TWA) concentrations of quartz were measured with sampling pumps and total airborne fluoride concentrations were also obtained. Sampling stations in the process building were chosen primarily because of personnel location during a normal shift. In addition to TWA sampling, continuous respirable dust monitoring was conducted at the crushing station close to the south end of the building and at the north end where flotation and separation equipment were located. As well as conventional ventilation measurements, tracer gas releases were performed to analyze the direction and rate of spread of contaminants from various points in the building. These releases also allowed the determination of average air residence times and contaminants clearance times out of the plant. Exhaust fans located on the roof were also rated using these same releases.

**Forest harvesting and renewal
planning for the British Columbia
interior : an extension of the total-
chance concept**

by R.E. Breadon. Victoria : Forest Resource Development Agreement, 1990. xiv, 49 p. : fold. maps. Bibliogr. (FRDA report ; 139) (Handbook ; HB-09) Contractor: Forest Engineering Research Institute of Canada. ISSN 0835-0752 ISBN 0-662-18158-1
MICROLOG 91-01577 1 fiche

In 1983, a handbook was published which described the efforts of an imaginary forest company to create a timber-development plan for the fictitious Rainbow Creek drainage in B.C. Momentous changes have since occurred in B.C.'s Crown forest policies, in industrial forest management objectives and responsibilities, in public attitudes toward forests, and in the forests themselves. This new Rainbow Creek report extends the total-chance concept to include silviculture and all other resource programs affecting a forest. This report traces the planning for completion of the PASS 1 roads and harvesting operations; planning forest-renewal operations on the openings created during PASS 1; predicting the economic implications of these plans; finding the alternatives which test integrated harvesting and renewal operations; confirming that PASS 2 operations will be viable, and putting the perfected plan through the steps leading to official approval.

General guidelines for all forest management activities, covering access, timber harvesting and forest renewal; species guidelines for moose, woodland caribou, elk, white-tailed deer, furbearers, raptors, passerines and colonial nesting birds, waterfowl and upland game birds; and for implementation. A glossary is included. EV FO MS PR SC

Forest management in Alberta : response to the report of the Expert Review Panel

Alberta. Alberta Forestry, Lands and Wildlife. Edmonton : The Ministry, 1991. ii, 65 p. ISBN 0-86499-818-X MICROLOG 91-05873 1 fiche

In response to public concern over the management of Alberta's forests, a panel of experts in wildlife management and forestry was appointed in 1989 to consider the concerns and make recommendations to strengthen the forest management systems. The panel's response and recommendations were released in August 1990. This document provides a response to the key issues raised by the expert panel, identified as integration of timber and non-timber resource values; public involvement, a forest conservation strategy; planning; protected areas; timber management; reforestation and silviculture; information; inventory and research; and staffing, funding and departmental reorganization. Each of these issues is discussed, with the panel's position set out first, followed by the Department of Forestry, Lands and Wildlife's response. Detailed technical comments to each of the report's 133 recommendations are included as an appendix to the report. AL FO PR SC

MICROLOG 91-04822 1 fiche

This report briefly describes the changes and developments in forest management, and more specifically, Canadian government management, of Canada's forests. It presents an overview of forest management to the present; a description of the resource; subjects for inquiry and debate (die-back of various species in the east, annual allowable cut, additions of more forest service staff, implementation of a national forest strategy, harmonization of objectives for forest management and wildlife preservation); and current federal government activity in the area, including legislation and policy initiatives.

Forest pest conditions in the Maritimes in 1990

by L.P. Magasi. Fredericton : Forestry Canada - Maritimes Region, 1991. 68 p. : ill., maps. Bibliogr. (Information report ; M-X-178) CSI 22189.010. ISSN 0834-406X ISBN 0-662-18815-2
MICROLOG 91-05429 1 fiche

This report reviews the status of forest insects and diseases in the Maritimes region in 1990 and forecasts conditions for 1991, when appropriate. It describes pests and problems of

conifers, hardwoods, and high value areas, such as nurseries, seed orchards, plantations, and Christmas tree areas; summarizes control operations against spruce budworm, hemlock looper, and Sirococcus shoot blight; describes the various aspects of work dealing with changes in forest conditions; and describes forest insect monitoring systems, pheromones and light traps, both important tools in producing population changes. A list of reports and publications relating to forest pest conditions is included.

Forest protection program against hemlock looper in New Brunswick in 1990

by L. Hartling and N.E. Carter. Fredericton : Natural Resources and Energy, 1991. vi, 25 p. : ill., maps. Bibliogr. ISSN 1183-5893
MICROLOG 91-05677 1 fiche

A hemlock looper outbreak causing severe damage to balsam fir was detected in the summer of 1989 in the Christmas Mountains area in north-central NB, and was the first outbreak recorded for the province. An egg survey was conducted in the fall of 1989 to determine whether populations were high enough to warrant a protection program in 1990, using methods adapted from Newfoundland. Based on the results from the survey, an area was identified for treatment in 1990 to protect foliage and suppress populations of the insect. This report provides results of an operational assessment of the control program.

Forest regeneration in the ESSFa subzone : a problem analysis

by G. Butt. Victoria : Forest Resource Development Agreement, 1990. viii, 47 p. : ill. Bibliogr. (FRDA report ; 118) ISSN 0835-0752 ISBN 0-7726-1149-1
MICROLOG 91-00070 1 fiche

An historical analysis of forest regeneration in the ESSFa subzone in the Cranbrook and Invermere forest districts was carried out to determine the reasons for the excessive amount of not satisfactorily restocked (NSR) land, and to identify ecological and silvicultural problems affecting regeneration success. Information was gathered primarily from on-site inspections of 65 sampling sites on 46 openings created either by logging or wildfire between 1970 and 1979. At each sampling site, information was collected on all relevant site factors, as well as on competing vegetation and natural regeneration. Regeneration performance, including both conifer height and stocking, was also measured. This information was augmented by a reconstruction of the treatment history of each sampled site, using open files located in the relevant forest districts.

Forest soil temperature manual

by R.J. Stathers and D.L. Spittlehouse. Victoria : Forest Resource Development Agreement, 1990. vii, 47 p. : ill. Bibliogr. (FRDA report ; 130) ISSN 0835-0752 ISBN 0-7726-1183-1
MICROLOG 91-02347 1 fiche

Environmental conditions are important in determining the survival, growth and distribution of tree species, although information about the forest soil thermal regimes in B.C. is limited. This manual describes how silvicultural treatments can modify soil thermal regimes, emphasizing the need for improving soils for conifer seedlings growing in forest clearcuts. It also describes time and depth variations in the soil profile, physical factors which influence soil temperature, methods and instruments used to measure soil temperature, procedures for interpreting soil temperature measurements, and methods of classifying soil thermal regimes.

Forest tenures in Canada : a framework for policy analysis : a report

by D. Haley and M.K. Luckert. Ottawa : Forestry Canada, Economics Branch, 1990. vi, 104 p. Bibliogr. (Information report ; E-X-43) *French ed.* (Les Tenures forestières au...) : 91-00182/2. ISSN 0705-3282 ISBN 0-662-17807-6
MICROLOG 91-00183 2 fiche

Although the provinces face many common forest management problems and could learn much from each other's experiences with different policy and administrative arrangements for the management of Crown lands, a detailed comparison of forest tenures across the country has never been undertaken. This study provides a framework for policy analysis within which such comparisons can be made. The report addresses the concept of forest tenures as property rights and their role in a market economy; provides a comparison of the varied public forest tenure arrangements in the 10 provinces; and addresses the problems faced by provincial governments in designing forest tenure systems to effectively meet public resource management goals. The interactions among tenure characteristics are discussed and some of the trade-offs governments must consider in pursuing multiple resource management objectives are described.

Forests, timber, and trade : emerging Canadian and U.S. relations under the Free Trade Agreement

Orono, ME : University of Maine, Canadian-American Center, 1991. 45 p. : ill. Bibliogr. (Canadian-American public policy ; no. 4) ISSN 1047-1073 ISBN 0-89101-078-5
MICROLOG 91-01492 1 fiche (Available on fiche only)

Forest products are among the leading traditional resource-based economic contributors in both Canada and the U.S. The dependence of both countries on the U.S. market for wood products has created periods of tension and controversy, with the issues of protectionism and of changing structure and maturing markets of particular significance as the Canadian-U.S. Free Trade Agreement moves toward full implementation. This paper discusses issues in a global context, identifies the national responses to using the forest resource, and discusses public policies. Elements of forest sector policy discussed include consumption, adequacy of raw material supply, employment and income, contribution to the international balance of payments, and environmental values. Institutional differences are identified, as well as the globalization of forest product markets and the Free Trade Agreement, and the estimated effects of the Agreement.

A FORTRAN program for fitting selectivity curves to trawler data

by R.B. Millar and N.G. Cadigan. St. John's : Dept. of Fisheries and Oceans, Newfoundland Region, Science Branch, 1990. iii, 20 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1783) ISSN 0706-6457
MICROLOG 91-04664 1 fiche

Program TRAWL.FOR is appropriate for the analysis of data gathered from trawler, twin trawl, or alternate haul surveys, in which a small mesh codend (assumed to be non-selective) is fished in conjunction with a larger mesh codend. The analysis produces an

estimated selectivity curve for the experimental codend and an estimate of its fishing efficiency with respect to the control codend. This report gives a summary of the program and instructions for running it.

Fortress of Louisbourg National Historic Park : 1989 visitor surveys analysis

P.G. Whiting and Associates. Ottawa : Environment Canada, Canadian Parks Service, Atlantic Region, Policy Planning and Research Division, Socio-Economic Analysis, 1990. viii, 128 p. : ill. CSI 22266.205.
MICROLOG 91-00667 2 fiche

During the summer of 1989, a series of visitor surveys were carried out at the Park, located in Louisbourg, Nova Scotia on Cape Breton Island. The surveys had four objectives: to provide information and analysis related to the use of the Park which will be used in management planning, service planning, and marketing; to provide information and analysis pertaining specifically to use of Kennington Cove and Lighthouse Point; to determine levels of Park attendance and use in accordance with the new directive on attendance; and to allow estimation of the economic impact of visitor expenditures of the local economy. This report provides a summary analysis of the information collected by the surveys.

The Forts at Point Lévy

by Y. Desloges. Ottawa : Parks Canada, National Historic Parks and Sites Branch, 1990. 72 p. : ill., maps. Bibliogr. (Studies in archaeology, architecture and history) French ed. (Les Forts de la...) : 91-03733/1. ISSN 0821-1027. ISBN 0-660-13802-6
MICROLOG 91-03734 1 fiche

The forts at Point Lévy, across from Quebec City, bear witness to the transition from classic to modern military construction, when military engineers abandoned the continuous rampart in favour of 'detached forts'. These forts also illustrate the colonial past of Canada. Built just as the country was becoming independent, they exemplify the work of British strategists on the North American continent. This document describes the construction of these forts and thus tries to understand the ideas of their designers and builders. To accomplish this, it puts the building site in its political context, describes the working conditions of the military and civilian labourers, and outlines the repercussions of such an enterprise.

Les Forts de la pointe Lévy

par Y. Desloges. Ottawa : Environnement Canada, Service des parcs, Direction des lieux et des parcs historiques, 1991. 73 p. : ill., cartes géogr. Bibliogr. (Études en archéologie, architecture et histoire) L'éd. anglaise (The Forts at...) : 91-03734/1. ISSN 0821-1035. ISBN 0-660-93137-0
MICROLOG 91-03733 1 fiche

Les forts de la pointe de Lévy en face de Québec témoignent de la transition dans l'art militaire entre le classique et le moderne: les ingénieurs militaires délaissent le rempart continu pour les 'forts détachés'. Ces forts témoignent aussi du passé colonial du Canada: construits alors que le pays acquiert son autonomie, ils matérialisent l'oeuvre des stratèges britanniques sur le continent nord-américain. Les pages de ce document racontent la construction de ces forts et, ce faisant, tentent de cerner la pensée de leurs concepteurs et réalisateurs.

Fracture control for Arctic structures : a model for analyzing structural details : final report

Norske Veritas (Canada) Ltd. Calgary, Alta. : Norske Veritas, 1988. ii, 168 p. : ill. Bibliogr. *CANMET contract: 69150-01-SQ*.
MICROLOG 91-04793 2 fiche

The materials used for the construction of Arctic structures and vessels are exposed to low ambient temperatures, high local ice loads and intermediate to high strain rates. This report presents the results of adapting and applying modern system reliability methods to the uncertainties associated with the quantification of those steel characteristics which have critical effects on the performance of steel structures and vessels in the Arctic. Limit-state functions delineating safe and failure spaces were developed and used to compute the probabilities of critical modes of failure. The randomness of factors that have significant effect on steel performance, such as fracture toughness, strength and stress fields were incorporated into the analysis by appropriate probability distributions for the factors. The sensitivity of failure probability to variation and comparative reliability analysis performed for different steels.

Fraser River estuary monitoring : report on the 1989 Boundary Bay monitoring program

by L.G. Swain and D.G. Walton. Victoria : Fraser Port : The Province, 1990. x, 172 p. : ill. Bibliogr. ISBN 0-7726-1261-7

MICROLOG 91-06091 2 fiche

Boundary Bay, including its northeasterly extension of Mud Bay and its eastern section called Semiahmoo Bay, is located about 19 km south of the City of Vancouver. The water quality within the Bay may be influenced by both the Puget Sound water and by outflows from the Serpentine, Nicomekl, and Little Campbell Rivers. Areas surrounding most of the Bay are used for agriculture. Monitoring during 1989 was done to determine the quality of sediments, fish, and other biota in Boundary Bay, as well as to collect additional data for sediments from the Fraser River. The monitoring determined the levels of metals and organic contaminants in fish, sediments, and other biota of the Bay as well as the degree to which the values meet provisional water quality objectives. Ten sites were sampled for sediments, as well as one near the mouths of each of the rivers, and one from just upstream from each of the five pump stations. Samples were analyzed for metals, chlorinated phenols, PCBs, organochlorine pesticides, phthalate esters, polynuclear aromatic hydrocarbons, lipids, moisture, total, organic and inorganic carbon, particle size, and total volatile residue.

Free trade negotiations between Mexico, Canada and the United States : background and issues

by T. Thomas. Ottawa : Library of Parliament, Research Branch, 1990. 14 p. (Background paper : BP-234E) *French ed. (Le Libre-échange entre le... on the same fiche)*. ISBN 0-660-13908-1

MICROLOG 91-06061 1 fiche

The United States and Mexico appear ready to negotiate a free trade deal. Canada has decided it wants to join them and broaden the discussion to include a North American free trade arrangement. Because Canada has recently negotiated its own deal with the U.S., much of the general background to such a trade arrangement is familiar to Canadians. Accordingly, this paper focuses on Mexico and free trade, providing background on the Mexican economy and highlighting, from a Canadian perspective, the issues raised by a possible Mexican-Canadian-U.S. free trade area.

CA CI CO EX

Free trade with Mexico : what form should it take?

edited by Roderick Hill and Ronald J. Wonnacott. Toronto : C.D. Howe Institute, 1991. 24 p. (Commentary ; no. 28) ISSN 0824-8001 ISBN 0-8806-275-3

MICROLOG 91-02809 1 fiche

Freer trade in North America could take several forms: the creation of a trilateral free trade agreement between Canada, the United States, and Mexico, through extending the existing Canada-U.S. agreement to Mexico; the negotiation of a pair of bilateral agreements, one between Canada and Mexico, and another between the United States and Mexico; and a bilateral agreement between the United States and Mexico without any liberalization of trade between Canada and Mexico. This document presents wide-ranging discussion by a group of Canadian, U.S., and Mexican observers of trade policy which suggest that experts are divided as to the relative merits of these arrangements for the countries involved and for the global trading system generally.

From correlation to distributed contiguities : a family of AR-C-D autocorrelation processes

by U.C.H. Blum, D. Bolduc and M.J.I. Gaudry. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 25 p. Bibliogr. (Publication ; no. 734) (Cahier ; 9031) (Cahier ; 9019)
MICROLOG 91-01572 1 fiche

This paper defines a family of autoregressive, contiguous and distributed processes (AR-C-D) to analyze the dependencies among the realizations of a variable and similarly among the residual errors in a regression. These AR-C-D processes make extensive use of weighted power series of Boolean impact matrices to extract systematic information on these dependencies. The paper focuses on the R-Koyck and R-Almon first-order specifications. After describing the properties of the first process, the paper provides a numerical illustration where a production function is estimated based on cross-sectional data with errors assumed to be generated from an AR-C-D process. The paper then briefly discusses the applicability of the process to other problems such as time series models and to models in other fields than economics, as well as its possible use on specific variables in regression models.

From the Prairies with hope

[by] Jane L. Aberson ; edited by Robert E. VanderVennen ; introduction by Mark Bookelman. Regina : University of Regina, Canadian Plains Research Center, 1991. xxiv, 177 p. : ill. (Canadian plains studies ; 21) ISSN 0317-6290 ISBN 0-88977-064-6
MICROLOG 91-07116 3 fiche (Available on fiche only)

Jane Abernson's newspaper articles document the everyday life of a Dutch immigrant family farming on the prairies six miles from Dauphin, Manitoba, during the Depression. They were published in Dutch from 1929 to 1966. The articles contain a continuous record, except for the war years, of the settlement experience of an immigrant family for thirty years. At the age of eighty, the author translated into English a particular set of articles covering the years 1929-36. This document contains her letters from this period.

Fuel channel refilling : data analysis

by M. Shoukri and A. Abdul-Razzak. Ottawa : Atomic Energy Control Board, 1990. iv, 126 p. : ill. Bibliogr. (Research report ; INFO-0370)
MICROLOG 91-06285 2 fiche

Project to analyze in detail the experimental data on CANDU type feeder/channel refilling obtained using the Cold Water Injection Test facility; review the overall nature of the refilling experiments carried out using the RD-14 facility; and evaluate the two-fluid model code CATHENA in predicting the refilling characteristics of representative tests. Detailed analysis of the quenching and refilling front propagation throughout the loop was carried out and the overall characteristics were analyzed for initial and boundary conditions. A general overview of the RD-14 experimental program on channel refilling was also carried out.

Full scale pipe bending test, phase I : feasibility study (PERD) : final report

by U.H. Mohaupt. Ottawa : Canada Centre for Mineral and Energy Technology, Metals Technology Laboratories, 1990. 38 p. : ill. Contractor: MDT Engineering Ltd. CANMET contract: 09132-01-SQ.
MICROLOG 91-00750 1 fiche

The Beaufort gas project, scheduled for start-up in 1998 at the earliest, is expected to use a 914mm (36 inch) diameter pipeline which is to be located along the east side of the Mackenzie River. This pipeline will be exposed to severe frost heave conditions which need to be controlled to meet the allowable pipe strains. A testing facility located at the Welding Institute of Canada, Oakville, Ontario, may be used for this work. This report provides an assessment of the Institute's ability to perform the work, including the general requirements for the proposed program, possible refurbishment of the facilities, cost, timing, and a feasibility and cost estimate for upgrading.

Functional specifications for second-generation ice navigation system : final report

by Charles Gautier, Robert Gorman : for Transportation Development Centre, Policy and Coordination Group, Transport Canada. Ottawa : Canarc Shipping Company Limited, 1990. xvi, 161 p. : ill., maps. Bibliogr.
MICROLOG 91-03665 2 fiche

Canarc has recently completed the 5-year Shipboard Ice Navigation Support System (SINSS) program which developed an ice intelligence system on board the MV Arctic to enable the vessel to safely and efficiently navigate through heavy sea ice conditions. The SINSS program resulted in a first generation system of 3 independent systems (VIEWFAX, MARINE-VUE, STAR-VUE) operating at the limits of equipment capability. This report summarizes 5 years of research in ice navigation. It outlines the user requirements for navigation, describes the information sources that can be used to meet user requirements; describes the techniques and

methods to use to meet the operator requirements as defined; outlines the system hardware specifications for processing speed, data storage capacity, general architecture, and data quantity; sets a comparison basis by outlining the status of present SINSS technology; and evaluates the overall feasibility of the G-2 system.

Fundamental properties of tailings sludge from the hot water extraction of oil sands : final report

by S. Abboud...et al. Edmonton : Alberta Research Council, 1990. vi, 218 p. : ill. Bibliogr. CANMET contract: 79170-01-SQ.
MICROLOG 91-01563 3 fiche

Examination of some fundamental properties of a sludge to determine reasons for its stability. A number of studies, including particle size analysis, mineral analysis, rheology and long term settling, were carried out on the whole sludge. The solids portion of the sludge was also treated with a series of organic solvents to remove organics or modify the solid surfaces, and studies were carried out on both the residual solids and some of the extracts. This report is divided into 5 volumes, with vol. 1 focusing on some of the analyses of whole sludge and its parts; vol. 2 discussing the settling properties of whole sludge since settling is a basic criterion of sludge stability; vol. 3 discussing the results obtained using electrokinetic analysis; vol. 4 discussing the extraction and characterization of humic substances from oil sand solids from which the bitumen had been removed using toluene/iso-propyl alcohol solvent; and vol. 5 containing all of the settling experiments and providing a discussion of some of the experiments.

Further characterization of the precious metal potential of mineral deposits associated with Rocky Brook-Millstream Fault System, northern New Brunswick

by P.M. Dimmell and P.F. Duncan. Fredericton : Dept. of Natural Resources and Energy, Minerals and Energy Division, 1991. 115 p. : maps. (Open file report ; 90-9) Fold. maps not filmed. ISSN 1183-5508
MICROLOG 91-04132 2 fiche

Although much work has been done on this property and adjoining licences in the past, it has been mainly base metal and silver oriented with only minor emphasis placed on the gold potential. The discovery of the Elmtree gold deposit led to the gold potential of the property being tested. Linecutting of a large grid covering the Millstream and North American Rare Metals properties was carried out in January and February of 1987. Detailed soil sampling at 12.5 m, VLF-EM and magnetic surveys were conducted over the entire grid. Several geochemical anomalies were outlined, some of which were coincident with known zones of mineralization and extensions of the zones, while others appeared to represent new zones. The possible extensions of two known zones were defined by the gold geochemistry within the B2 soil horizon and tested by diamond drilling. This report details the drilling and analyses conducted.

Future of city industry study

Hemson Consulting Ltd. Toronto : Toronto Planning and Development Dept., 1991. 122 p. : ill. On cover: Cityplan '91, 22. CSI 89181.231. MICROLOG 91-04587 2 fiche

This report begins by examining the changing nature of the City's industrial market, including changes in building space requirements. It examines the key characteristics of today's industrial base and develops a typology of three categories of industrial firms to assess the future outlook for industrial employment. It also estimates potential supply based on a site-by-site analysis throughout the City of potential developable sites, and compares space supply and demand under each of the two theoretical scenarios. In addition, it reviews the implications of redesignating industrial land. Finally, it summarizes the study and comments on actions the City could take to promote a vital industrial base.

Gas chromatographic and mass spectrometric determination of some resin and fatty acids in pulp mill effluents as their pentafluorobenzyl ester derivatives

by H.-B. Lee, T.E. Peart and J.M. Carron.
Burlington, Ont. : Canada Centre for Inland Waters, National Water Research Institute, 1989. 25 p. : ill. Bibliogr. (NWRI contribution ; 89-125)
MICROLOG 91-01688 1 fiche

Resin acids derived from the bark of softwoods and, to a smaller extent, the unsaturated fatty acids also derived from woodmill effluents, have been identified as the major contributors to the toxicity of pulp mill effluents to fish. Standard analyses of resin and fatty acids are usually done by gas chromatography with flame ionization detection, a procedure which is not sufficiently sensitive for many environmental samples. This report describes a sensitive and selective gas chromatographic method for the determination of the more commonly found resins and fatty acids found in pulp mill effluents by the formation of their pentafluorobenzyl esters; discusses the gas chromatographic resolution of these derivatives on capillary columns of 3 different stationary phases; and presents the mass spectrometric data of the ester derivatives obtained under electron impact and negative ion chemical ionization modes. Application of this process to Canadian pulp mill effluents is also briefly described.

The Gas-bearing Devonian Manetoe Facies, Yukon and Northwest Territories

by D.W. Morrow, G.L. Cumming and K.L. Aulstead. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1990. 54 p. : ill., maps. Bibliogr. (Bulletin ; 400) ISBN 0-660-13722-4
MICROLOG 91-02965 1 fiche

The Manetoe Facies is an extremely widespread, white, sparry dolomite of diagenetic origin, developed in Devonian strata of northern Canada, north of 60N latitude. In the subsurface southeast of the Mackenzie Mountains, the Manetoe Facies contains 3 large gas fields. Recognition of the diagenetic character of the Manetoe Facies has led to a reappraisal of its origin, important both from the standpoint of petroleum exploration and because of the similarity of the facies to other megacrystalline, white, sparry dolomites, such as those associated with Mississippi Valley type lead-zinc deposits. This paper presents a more complete characterization, documentation and interpretation of the Manetoe Facies and its diagenetic minerals (such as quartz and clacite), and an interpretation of the origin of its hydrocarbons.

par J.-D. Fréchette. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 22 p. Bibliogr. (Bulletin d'actualité ; 89-7F) L'éd. anglaise (GATT : the eleventh hour...) sur la même fiche. Révisé le 24 octobre 1990. ISBN 0-660-93251-2
MICROLOG 91-06069 1 fiche

Bon an mal an, au Canada, les printemps voient éclore des débats sur les politiques agricoles. Ce document vise à permettre de mieux s'y retrouver dans la confusion actuelle relativement au GATT. Pour ce faire, ce document ne s'appuie strictement que sur les impacts économiques probables des décisions prises, en faisant abstraction des choix politiques qui ont pu les motiver. Le Canada a appliqué certaines règles du GATT, particulièrement l'article XI, d'une façon tout à fait légitime, afin de favoriser le développement et la croissance de certains secteurs agricoles et c'est principalement sur cette question que se penche ce document.

GATT : the eleventh hour for Article XI? -- Rev.

by J.-D. Fréchette. Ottawa : Library of Parliament, Research Branch, 1990. 18 p. Bibliogr. (Current issue review ; 89-7E) French ed. (Le GATT : la onzième...) on the same fiche. ISBN 0-660-13690-2
MICROLOG 91-02077 1 fiche

This current issues paper is intended to clarify the current situation with regard to article XI of the GATT on agricultural trade policies. It examines the probable economic impacts of the decisions made and disregards the political options that may have motivated them. GATT article XI is presented as the cornerstone of the domestic agricultural and trade policies of producing countries. A chronology and a bibliography conclude the paper.

by J.-D. Fréchette. Ottawa : Library of Parliament, Research Branch, 1990. 20 p. Bibliogr. (Current issue review ; 89-7E) French ed. (Le GATT : la onzième...) on the same fiche. Revised 24 Oct. 1990. ISBN 0-660-13901-4
MICROLOG 91-06069 1 fiche

In Canada, every spring sees new debates on agricultural policies. Since global trade has monopolized discussion on these policies all over the world for the past few months, it is not surprising to note that it has also sparked controversy on the Canadian agricultural scene. This document clarifies the current situation. Based strictly on the probable economic impacts of the decisions made, it presents the GATT Article XI as the cornerstone of the domestic agricultural and trade policies of producing countries.

**Gene banking for Pacific salmon :
technology assessment and
applications in British Columbia**

MTL Biotech Ltd. Victoria : Ministry of Agriculture and Fisheries, Aquaculture and Commercial Fisheries Branch, 1990. ii, 8 p. Bibliogr. (Aquaculture industry development report : no. 90-8) ISSN 1183-0352 ISBN 0-7718-9024-9
MICROLOG 91-04237 1 fiche

Collection and banking of sperm of Pacific salmon species will facilitate important management objectives in salmon culture in BC, including genetic improvement of broodstock, conservation of untapped and endangered genetic variability, hybridization between on year/off year runs, fertilization when sperm and eggs are available at different times, and transport of sperm free of time constraints. This report describes the techniques of cryobiology and cryopreservation and their specific applications in BC; the principles and state of the art; and the present technology for salmonid milk. The criteria for a practical cryopreservation technique, and the problems needing solutions, are discussed, and a summary given of the particular difficulties for salmonids.

**A General descent framework for
the monotone variational inequality
problem**

by J.H. Wu, M. Florian and P. Marcotte.
Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. 26 p. Bibliogr. (Publication : no. 723) (Publication : no. 755)
MICROLOG 91-02095 1 fiche

This paper presents a general optimization formulation for the variational inequality program VIP. Based on the formulation, a general descent framework is developed for the general equivalent optimization formulation and proof of its convergence is given. It is then shown that the symmetrical Newton method and Quasi-Newton methods, the linear Jacobi method, and the projection method, as well as others, are various realizations of this general algorithmic framework. In addition, it is shown that a variant of the descent method, where each subproblem is only solved approximately, is globally convergent under certain conditions.

**General review statement of an
environmental impact assessment of
a proposal by NBIF Forest Products
Inc. to construct and operate a solid
waste disposal landfill at Dalhousie
Junction, New Brunswick**

Fredericton : Dept. of the Environment, 1991. 4, 4 p. Bilingual (Déclaration de révision générale d'une...)
MICROLOG 91-06199 1 fiche

NBIF Forest Products Inc. currently disposes of its wood fibre and bark refuse, refuse boiler ash, and clarifier sludge at the Dalhousie mill site. Since the disposal site is reaching capacity, the company investigated the development of a new site in an area south of the Town of Dalhousie, east of Dalhousie Junction. This general review statement summarizes the results of an environmental impact assessment (EIA) of the proposal. The review evaluated the adequacy of the EIA in addressing the environmental and socioeconomic issues identified. The review covers the site

selection methodology; significant issues such as construction activities; operation impacts; accidental events; and site closure.

**Generation and evolution of acidic
pore waters at the Waite Amulet
tailings : final report**

by E.K. Yanful, L. St-Arnaud and R. Prairie.
Pointe Claire, Que. : Noranda Research, 1990. xiii, 202 p. : ill. Bibliogr. CANMET contract: 89162-01-SQ.
MICROLOG 91-00371 3 fiche

The Waite Amulet tailings area, 20 km north of Noranda, ceased operation in 1962, leaving 5.9 million tonnes of reactive sulphide tailings in an elevated 41 ha dam and tailings spills in a lower area. This hydrogeochemical study was undertaken as part of the Mine Environment Neutral Drainage program to understand the geochemical processes controlling sulphide oxidation and subsequent pore water evolution. This final report presents the results of studies conducted from 1985-88. The report discusses the influence of various factors (gaseous oxygen and carbon dioxide concentrations, temperature, bacteria, sulphide content and pH) on acid generation, the geochemistry of unsaturated and saturated zone pore water, tailings hydrogeology, surface hydrology, and the evaluation of acidic pore waters at the tailings site. Results of simulations of pore water flow by a 2-dimensional steady state finite element model are also given.

**Genetic characteristics of healthy and
declining sugar maple *Acer saccharum*
Marsh. in Ontario : final report**

by P. Knowles and D.J. Perry. Toronto : Environment Ontario, Research and Technology Branch, 1990. 20 p. Bibliogr. ISBN 0-7729-7330-X
MICROLOG 91-02534 1 fiche

Among the declining forest species in Canada evoking the greatest concern is the sugar maple. While air pollution is blamed, previous research has provided reason to believe that genetic differences may exist between healthy and deteriorating individuals. This study determined whether possible genetic differences between healthy and declining sugar maple within the same sites are discernable at the allozyme level. At each of 4 sites, bud tissue was collected from 24 trees previously classed as healthy and from 24 trees which had been classed as declining. Bud tissue was prepared, and starch-gel electrophoresis was carried out. A total of 9 enzymes were assayed. Only variable loci (11 in total) were considered and although Sod-2 was found to have low level variability in earlier studies, it was invariant in the presently sampled trees and they were therefore excluded from further analysis.

Geochemical assessment of subaqueous tailings disposal in Buttle Lake, British Columbia

Rescan Environmental Services Limited.
Victoria : British Columbia Acid Mine Drainage Task Force, 1990. vii, 160 p. : ill. Bibliogr.
MICROLOG 91-00488 2 fiche

Limited evidence suggests that the chemical reactivity of tailings is in fact inhibited by storage underwater, and that such storage may be a preferred long-term disposal option. To assess the long-term environmental feasibility of subaqueous disposal of mine tailings, this report examines the waters and sediments of the south basin of Buttle Lake, B.C. (the site of an inactive submerged tailings deposit). The copper, zinc and lead-rich mine tailings were deposited in the lake via a submerged outfall from 1966-84. The tailings are widespread across the basin and are being covered by a thin veneer of natural sediments. The report presents a detailed study of the distributions of metals in both the solid phases and interstitial waters of the sediments, and in the overlying surface waters.

The Geochemistry of Westmin Resources Ltd., Myra Creek mine tailings : after thirty months exposure of subaerial tailings

by L.M. Broughton and K.D. Ferguson.
Ottawa : Environmental Protection Service, Pacific and Yukon Region, 1990. iv, 89 p. : ill., maps. Bibliogr. (Regional program report ; 90-04)
MICROLOG 91-00670 2 fiche

Westmin Resources Ltd. operate a 3000 tonnes/day copper-lead-zinc mine 93 km by highway south-southwest of Campbell River in Strathcona Provincial Park, beginning in 1966. Tailings were discharged directly to the bottom of Buttle Lake until June 1984, when an on-land tailings disposal facility was commissioned in the Myra Creek Valley. Tailings are now deposited by the subaerial method behind a berm constructed parallel to Myra Creek. A series of studies were conducted to evaluate the potential for, and progression of, acid generation and contaminant migration in the subaerial tailings mass, and to evaluate the structural integrity of the facility. This report describes a detailed study conducted in 1988 after 30 months exposure of the subaerial tailings, summarizes the previous studies of the impoundment, and makes recommendations for future studies.

Geographic Information System Cadastral Database report

by R. Sussman, G. Bloom and B. Pilkington.
Scarborough, Ont. : The City, 1990. 44 p. : ill.
MICROLOG 91-00048 1 fiche

From September 1987 to December 1989 studies and projects were undertaken to examine the feasibility, practicality and potential extent to which a geographic information system (GIS) could be used within the City of Scarborough. Data requirements, technology appropriateness, management requirements and staffing requirements were all examined. The first part of the project to be addressed was the Cadastral database, including compilation of all information previously collected on Cadastral user needs to create a list of data required; definition of entity relationship models of data elements within the Cadastral database and incorporation into the global conceptual model previously created; review of the proposed Metropolitan Toronto information system (MTIS-II), comparing it to the City of Scarborough's data model and evaluating the suitability of Metro's model to Scarborough's requirements; and recommending a strategy for the use of MTIS-II without alteration.

Geographic Information Systems (GIS) : a review of activities in government : paper

by J.J. Chandra. Fredericton : Dept. of Commerce and Technology, Science and Technology Secretariat, 1988. vii, 73 p.
MICROLOG 91-00565 1 fiche

This paper promotes the development of Geographic Information Systems (GIS) technology to better manage information on the region's resources as well as to create a viable service industry in geographic information. Following an introduction outlining the importance and market potential of this technology, the report discusses types of geographic-referenced information in the N.B. government with an analysis of pertinent government departments. Final summary, concerns, and recommendations complete the report. Appendices provide background information on local initiatives and activities in GIS and information technology in the province.

Geographical distribution of air pollutants over the southern Ontario region

by M. Niewiadomski and K.S. Yoshiki-Gravelsins.
Toronto : Ontario Hydro, Research Division, 1990. i, 20 p. : maps. Bibliogr. (Report ; no. 90-137-K)
MICROLOG 91-00806 1 fiche

An integral part of Ontario Hydro's transmission line refurbishment program is the investigation of atmospheric corrosion of ACSR transmission line conductors and the assembly of a complete environmental database for the southern Ontario region. To enable future, comprehensive correlation studies between degree of corrosion and air pollutant levels, as a first step toward preparing the pollution climatology of southern Ontario, an environmental database was assembled from meteorological, air quality, precipitation chemistry and emissions data. An analysis of these data, focusing on geographical distribution of pollutant levels, was performed using NCAR contouring software. This report discusses the details of the environmental database, results of the analysis, and the importance of various environmental factors in atmospheric corrosion of transmission line conductors.

Description of the geology of the New Denmark-Salmon River area of Victoria County, northwestern N.B. to provide detailed geological data for a superficially mapped area of the County, and to stimulate mineral exploration. Data obtained from the field mapping program was compiled at a scale of 1:20,000. More than a thousand outcrops were examined over a 1250 sq km area during two field seasons. From these outcrops studies were carried out

on 140 thin sections of representative rock samples; 20 large samples of fossiliferous rocks for identification and age determination; 31 samples of volcanic rocks for major and trace elements; and multi-element analysis of 28 samples, mainly of volcanic rocks, for mineral potential evaluation.

The Geology of the mid Mannville subgroup in the west-central Lloydminster heavy oil trend, Alberta

by S.C. O'Connell and G.W. Benns. Edmonton : Alberta Research Council, Alberta Geological Survey, 1988. 39 p. : ill., fold. ill. Bibliogr. (Open file report ; no. 1988-01) *Fold. maps not filmed.* ISSN 0835-3530
MICROLOG 91-02480 2 fiche

This study developed from an examination of the reservoir and associated units in the Viking-Kinsella field area. Production in this field is from the Sparky unit. This unit is poorly understood and little work has been done to relate it to the overall development of the

Mannville Group within which it occurs. This report provides a thorough description of the mid Mannville subgroup in west-central Lloydminster, relating the sequences in this area to mid Mannville sequences in east and south Lloydminster, and providing an environmental reconstruction during the time of its deposition. The local geology of the Viking-Kinsella field area, the distribution of hydrocarbons and the trapping mechanisms are described and their development is related to regional geological trends. A total of 20 townships are included in the study, with 609 wells being examined. Cores from 23 wells were examined as well as 7 wells from the central Lloydminster region.

Geophysical studies of the Ackley intrusive suite and the northeastern Gander Zone, Newfoundland

by H.G. Miller. St. John's : Dept. of Mines and Energy, Geological Survey Branch, 1988. xi, 44 p. : ill., maps. Bibliogr. (Report ; 88-3) ISSN 0843-8972 ISBN 0-920769-43-8
MICROLOG 91-02821 1 fiche

This report presents an interpretation of the gravity, magnetic and geochemical data for the Ackley intrusive suite of southern Newfoundland and for the northeastern Gander Zone. New gravity data were collected in both areas, combined with existing gravity data, and analyzed in conjunction with digitized and filtered aeromagnetic and geochemical data to produce interpretations of the subsurface geology. The interpretation of the Ackley intrusive suite data was accomplished by developing a 3-D gravity inversion technique utilizing vertical prisms. The density and magnetic susceptibility data were used as constraints for modelling, by examining the variation of these properties throughout the study area. A new technique was also developed to examine the correlation between the gravity and the lithochemical spatial distribution patterns.

The Georgia and Johnstone Straits herring bait fishery in 1986 : results of a questionnaire survey

by J.F. Schweigert and M. Linekin. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1990. iv, 44 p. : maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1721) ISSN 0706-6457
MICROLOG 91-01195 1 fiche

The herring bait fishery in Georgia and Johnstone straits has become an increasingly important component of the total utilization of B.C. herring resource as the demand for and price of live bait continues to rise. This increase in both catch and demand for bait herring, particularly in the Campbell River area, has generated concern about the impacts of possible reductions in local herring populations on the salmon sport fishery and salmon stocks throughout the straits. The adult herring populations targeted by the bait fishery probably represent non-migratory stocks of fish not sampled or assessed as part of the routine monitoring of the major adult migratory populations harvested in Georgia Strait by the roe fishery. The questionnaire results reported in this paper collate information from the bait fishermen on the scope and magnitude of the fishery. In addition, a crude estimate was derived of the potential impact of this fishery on the herring resource in these areas.

Geotechnical testing of oilsands

Calgary, Alta. : Petro-Canada, 1990. 2 v. : ill. Bibliogr. CANMET contract: 23440-9-9264-01-SC
MICROLOG 91-02584 4 fiche

Petro-Canada Inc. is using cyclic steam stimulation at the PCEJ Hangingstone Pilot to extract bitumen from the McMurray formation. Due to the immobility of the highly viscous bitumen, the oil sands must be hydraulically fractured to provide paths for the steam to travel from the injection well out into the reservoir. This report documents a combined laboratory and simulation study aimed at estimating the amount of dilation to be used in the reservoir model to predict fracture growth and production performance. The purpose of laboratory testing was to acquire geomechanical and permeability data required by the fracture design model.

Glassification and leachability of hazardous wastes and hazardous waste residues

Whiteshell Laboratories. Toronto : Environment Ontario, Research and Technology Branch, 1991. 145 p. Bibliogr. On cover: Environmental research. ISBN 0-7729-8413-1

MICROLOG 91-05932 2 fiche

This report presents an initial assessment of the benefits, if any, to be obtained from incorporating hazardous wastes or hazardous waste residues into glassy wasteforms. A simulated waste was made containing 14 heavy metals, including those listed in Ontario Regulation No. 309, Schedule 4 (Leachate Quality Criteria). The waste was calcined to 1400C, with partial melting, to simulate an incinerator slag, and was also incorporated into soda-lime glass wasteforms at levels of 10 percent and 40 percent by weight. Chemical analysis of the starting materials, the calcined waste, and the glassy wasteforms was conducted. A long-term dissolution experiment at 10C was performed to simulate extended release under conditions of in-ground disposal.

The Government and politics of the Alberta Metis settlements

by T.C. Pocklington. Regina : University of Regina, Canadian Plains Research Center, 1991. xv, 162 p. Bibliogr. (Canadian plains studies ; 20) ISSN 0317-6290 ISBN 0-88977-060-3
MICROLOG 91-05589 2 fiche (Available on fiche only)

This document begins by recounting some of the main historical events, especially the proximate events, that led to the formation of the Alberta Metis settlements. It discusses the legal status of the settlements, and examines the government and politics of the settlements from a perspective that takes account of extralegal political realities. It also focuses on the composition, organization, and activities of the local governments of the settlements, and the settlement council. It examines the structure and functioning of the government agency with which the settlement councils and the FMSA have had the most frequent dealings, the MDB of the Alberta Dept. of Municipal Affairs. Through extensive interviews conducted on two of the settlements, it reveals something of the political attitudes, opinions, and activities of settlers. It addresses the issue of self-government, and provides a description of the complex discussions and negotiations that have taken place between Metis and government officials.

Gravity concentration of a niobium ore sample

submitted by Cominco, B.C. ; by M. Cristovici...et al. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, Minerals Research Program, 1984. v, 161 p. : ill. (Report ; MRP/MSL 84-10(CR))
MICROLOG 91-04929 2 fiche

In 1983, at the request of Cominco in BC, an investigation was initiated to evaluate the possibility of niobium extraction from an ore sample supplied by the company. The investigation consisted mainly in determining the chemical composition of the sample, examining the ore mineralogy and carrying out testwork to upgrade the ore by gravity concentration methods. A target of minimum 15% Nb2O5 was set for the final product. This report covers the results of the chemical analysis and gravity concentration tests, with the mineralogical analysis presented separately.

The Grieving reaction : a multivariate analysis of the impact of care using a disutility index

by L.L. Cuddihy, M. Gaudry and R. Laferrière. Montréal : Université de Montréal, Centre de recherche sur les transports, 1991. 21 p. : ill. Bibliogr. (Publication ; no. 737) (Cahier ; 9106)
MICROLOG 91-02932 1 fiche

The study describes a multivariate analysis that enables the identification of a number of factors that explain variations of the grieving reaction, notably the effect of the level of accompaniment care and of palliative care. The multivariate analysis distinguishes these care elements from other factors such as interviewer's bias, subject's relationship to the deceased, etc. The data, the grieving reaction model, and the distinctive features of the model are described, followed by the statistical and main measurement results obtained with the model.

Grillage corrosion surveys using the tower leg integrity monitor, 1989 results

by A. Vorauer. Toronto : Ontario Hydro, Research Division, 1990. i, 131 p. : ill. Bibliogr. (Report ; no. 90-88-K)

CSI 56125.203.
MICROLOG 91-00807 2 fiche

A corrosion survey of grillage footings was conducted as part of the transmission line refurbishment program. A total of 500 tower sites were examined during this survey, representing approximately 20 per cent of the steel structures along 15 separate transmission lines. Most of the grillages examined were from 60-80 year old towers in western and central regions. The survey included corrosion potential and corrosion current measurements by means of a tower leg integrity monitor, visual inspections of grillage steel just below ground line and occasional detailed inspections down to the grillage pad.

Groenland : présentation du marché

Canada. Secteur de l'expansion du commerce extérieur. Ottawa : le Secteur, 1990. 15, 14 p. *Bilingue (Greenland : an introduction...).*
MICROLOG 91-00579 1 fiche

Bien que sa population soit réduite, l'opulence relative et le haut niveau d'importation que connaît le Groenland en font un marché d'un bon potentiel pour de nombreuses entreprises canadiennes. En septembre 1989, Affaires extérieures et Commerce extérieur Canada a organisé une exposition commerciale à Nuuk, au Groenland. Cet événement avait pour objet de présenter les exportateurs canadiens aux représentants du marché du Groenland et d'attirer l'attention des habitants du Groenland sur les produits canadiens. Le ministère des Affaires extérieures et du Commerce extérieur a élaboré cette brochure dans le but de guider les entreprises canadiennes intéressées par la recherche de débouchés au Groenland.

Gros Morne National Park interpretive surveys : final report, 1989

by L.D. Logan. Ottawa : Environment Canada, Canadian Parks Service, Atlantic Region, Policy Planning and Research Division, Socio-Economic Analysis, 1990. iv, 58 p. : ill. Bibliogr.
MICROLOG 91-03738 1 fiche

This report presents the results of an exit survey of Gros Morne visitor reception centre users; a handback survey of those attending the evening interpretive program held in the visitor reception centre; and an assessment of camper's use of and demand for interpretive facilities and services. The exit survey provided basic profile data on the facility and also determined the reasons visitors use the centre as well as the areas they use; the evening interpretive program survey focused on evaluation of the program and the theatre; and the camper survey assessed demand for additional interpretive programs and services, including open or enclosed theatres at the respondent's campgrounds.

**Groundfish stock assessments for
the west coast of Canada in 1990
and recommended yield options for
1991**

J. Fargo and B.M. Leaman, editors. Nanaimo,
B.C. : Dept. of Fisheries and Oceans,
Biological Sciences Branch, Pacific Biological
Station, 1991. v, 320 p. : ill., maps.
(Canadian technical report of fisheries and
aquatic sciences ; no. 1778) CSI 21105.043.
ISSN 0706-6457
MICROLOG 91-04410 4 fiche

Stock assessments and yield options are
developed for the Pacific coast of Canada for
lingcod, Pacific cod, petrale sole, Dover sole,
rock sole, English sole, sablefish, Pacific hake,
spiny dogfish, walleye pollock, Pacific ocean
perch, yellowmouth rockfish, rougheye rockfish,
redstripe rockfish, silvergray rockfish, yellowtail
rockfish, canary rockfish, quillback rockfish,
copper rockfish, and hagfish. A number of
analytical methods have been employed in these
assessments, surplus production analysis, virtual
population analysis, and dynamic pool models.
Biological factors are the only consideration for
these assessments and yield options. Yield
options are recommendations to the fishery
managers of the Offshore Division on catch
limitations and other fishery management
procedures. Alternative options allow the
managers to consider high risk and low risk
yields in relation to a stock's potential
productivity.

**Groundwater study at Nanticoke ash
lagoon, part 2 : chemical analysis of
local groundwaters**

by A. Vorauer. Toronto : Ontario Hydro,
Research Division, 1990. i, 49 p. : ill. Bibliogr.
(Report ; no. 90-214-K)
MICROLOG 91-03159 1 fiche

The objective of this study was to determine
the environmental impact of fly ash disposal at
the Nanticoke Thermal Generating Station on
the local groundwater regime. Specifically, the
research tried to clarify the extent of
movement of ash leachate constituents from the
disposal lagoon into the underlying clay
overburden and bedrock. This report provides
the chemical analysis results for groundwaters
sampled from piezometers and for pore waters
squeezed from soil samples. The analyses of
soils for selected trace elements are also
reported.

**Growth and yield of black spruce
ecosystems in the Ontario Clay Belt :
implications for forest management**

by T.W. Whyntot and M. Penner. Chalk River,
Ont. : Government of Canada, Canadian
Forestry Service, Petawawa National Forestry
Institute, 1990. v, 81 p. : ill. Bibliogr.

(Information report ; PI-X-99) ISSN 0706-
1854 ISBN 0-662-18210-3
MICROLOG 91-03252 1 fiche

This report analyzes 50 years of permanent
sample plot growth information from the Clay
Belt Region of Northern Ontario. Operational
groups (OGs) defined by the forest ecosystem
classification (FEC) system for the Clay Belt
were compared for productivity and grouped
into broad classes. An alternate approach,
comparing the OGs for site index curve shape,
was not pursued. Local black spruce volume
tables and stand volume curves were then
developed based on these classes. Cut-origin
stands were compared to fire-origin stands for
species and volume. Two noncommercially
thinned old growth stands at age 80 (about 40
years after treatment) were also examined for
thinning benefits.

**Growth response of several
vegetation species to herbicides and
manual cutting treatments in the
Vancouver Forest Region**

by B. D'Anjou. Victoria : Forest Resource
Development Agreement, 1990. v, 8 p.
Bibliogr. (FRDA report ; 135) ISSN 0835-
0752 ISBN 0-7726-1203-X
MICROLOG 91-01690 1 fiche

Non-crop vegetation can compete with young
conifers, potentially reducing conifer survival
and growth rates. Since 1985, several
research trials have been conducted to
document the effect of herbicides (both
registered and unregistered) and manual cutting
on vegetation growth. This interim report
summarizes the growth response of various
vegetation species 1-5 growing seasons after
treatment with glyphosate, hexazinone, triclopyr
ester, sulfometuron methyl, and metsulfuron
methyl. Background information on each
herbicide is also presented, including
registration status, trade name, manufacturer,
formulation tested, and route of plant uptake.
The potential importance of each herbicide in a
vegetation management program is briefly
discussed, focusing on its effectiveness in
controlling the growth of those species sampled
in these trials.

**Growth, feeding and fecundity of fish
in Gleniffer Lake, Dickson Dam
Reservoir**

by J.W. Moore. Vegreville, Alta. : Alberta
Environmental Centre, 1990. ix, 40 p. : ill.
Bibliogr.
MICROLOG 91-06232 1 fiche

Fish were collected by gill net and beach seine
from a newly formed reservoir (Gleniffer Lake,
Alberta) from 1984-87. The reservoir is
located west of the City of Red Deer on the
Red Deer River. Collections were made in the
reservoir at standard sites and times
throughout the study. Length, weight and age
were determined for mountain whitefish,
northern pike, burbot, white sucker, and
longnose sucker. In addition, stomach content
analysis was completed on mountain whitefish,
rainbow trout, northern pike and burbot; and
fecundity was determined for rainbow trout,
northern pike, burbot, white sucker and
longnose sucker.

Ce guide se veut un document de travail. On y trouve des renseignements utiles sur la façon d'instaurer un programme efficace de gestion de l'énergie et sur la façon de modifier les techniques d'entretien du matériel afin d'économiser l'énergie. Il renseigne sur les différentes technologies pouvant aider à épargner sur les coûts de l'énergie. Il examine les points suivants: l'élaboration et la mise en oeuvre d'un programme efficace de gestion de l'énergie; le chauffage, l'aération, la climatisation et la structure du bâtiment; l'isolation; l'éclairage; les systèmes électriques; la combustion et les combustibles; les générateurs de vapeur en les centrales; le matériel chauffé à la vapeur; l'instrumentation et les appareils de contrôle; les compresseurs et les commandes; les réseaux industriels de distribution d'eau; la réfrigération; le matériel de production à feu direct et indirect; les appareils de contrôle automatique programmables; et, les questions d'ordre architectural.

Guide pour obtenir son propre divorce au Nouveau-Brunswick

par G. Thériault. Fredericton : Conseil consultatif sur la condition de la femme du Nouveau-Brunswick ; Fondation pour l'avancement du droit au Nouveau-Brunswick, 1990. 61 p. *L'éd. anglaise (Guide to obtaining...)* : 91-01904/1. ISBN 1-55048-339-0
MICROLOG 91-01905 1 fiche

Un divorce est la fin du contrat juridique appelé le mariage. En général, les époux divorcés n'ont plus aucun droit et aucune obligation l'un envers l'autre. Toutefois, le droit à une pension alimentaire est l'exception à la règle mais elle n'est accordée que lorsque l'époux qui en fait la demande peut démontrer que la rupture du mariage le place dans une situation de difficultés économiques. Ce document étudie la question en profondeur, et

se penche sur les points suivants : la demande de divorce ; les motifs de divorce tels la séparation, l'adultère, la cruauté mentale ou physique et l'absence de collusion, de connivence et de pardon ; les sujets accessoires tels la garde, la pension alimentaire, l'entente de séparation, etc. ; et, la façon dont on peut obtenir son propre divorce (les documents, le titre de l'instance et les affidavits). Le document se termine en donnant quelques étapes à suivre pour mieux obtenir son divorce.

Guide sur les résultats de recherches en sciences sociales sur les effets de la pornographie

par B. Leighton et A. Brannigan. Ottawa : Ministère de la justice, Sous-direction de la recherche et du développement, Section de la recherche, 1990. viii, 103 p. Bibliogr. (Document de travail ; WD1990-8b). L'éd. anglaise (*A Guide to the social science...*) : 91-04509/2. Contient: *Partie I* / Barry Leighton -- *Partie II* / Augustine Brannigan. MICROLOG 91-04508 2 fiche

Ce rapport a un double objectif: présenter brièvement les résultats, en sciences sociales, de certains travaux de recherche empirique qui traitent du lien entre la pornographie et ses effets nocifs possibles, et en faire une synthèse partielle. Il porte principalement sur l'effet de la pornographie sur les hommes adultes, particulièrement en ce qui concerne l'agression sexuelle de femmes adultes. La partie principale du rapport se divise en trois sections portant l'une sur les effets de la pornographie non violente, une autres sur les effets de la pornographie violente et une troisième sur le matériel violent par opposition au matériel sexuel. Chaque section décrit la recherche expérimentale sur le comportement, la recherche non expérimentale sur le comportement, les études expérimentales sur les attitudes et les études non expérimentales sur les attitudes.

A Guide to aerial cone collection equipment and techniques in British Columbia

by W.G. Camenzind. Victoria : Ministry of Forests, Silviculture Branch, 1990. vii, 30 p. : ill. Bibliogr. MICROLOG 91-00014 1 fiche

While aerial cone collection using helicopters can be a very efficient way of collecting cones, it can also be very expensive and less practical than ground methods if all factors are not taken into consideration. This guide assists the cone collection planner in choosing the most suitable collection method as well as presenting information on the operation and relative advantages and limitations of the three main aerial methods (raking, clipping or sawing, and topping). Information and data for the guide were collected by reviewing the literature and consulting with users and manufacturers of cone collection equipment. Contact persons and safety measures are also included.

A Guide to the design, construction, and operation of a bivalve shellfish depuration facility for British Columbia

by Cerebral Marine Research ; under contract to the British Columbia Shellfish Growers Association. Victoria : Ministry of Agriculture and Fisheries, Aquaculture and Commercial Fisheries Branch, 1990. 84 p. : ill. Bibliogr. (Aquaculture industry development report ; no. 90-10) ISSN 1183-0352 ISBN 0-7718-8990-9
MICROLOG 91-03887 1 fiche

Bivalve molluscs are filter feeders and therefore commercially harvested species found near centres of human activity are often found to contain impurities which can cause disease

in humans. Shellfish purification or depuration is the process of reducing the levels of such contaminants in shellfish before releasing them to markets. This manual is confined to the depuration of bivalve shellfish contaminated by exposure to sewage effluent, providing guidelines for the design, construction and operation of a modern depuration facility in BC. Industry members were interviewed to ascertain the demand for such a facility, and to determine plant capacities required to meet the needs of the small, medium, and large shellfish producer. The manual also discusses the economics of the facility, including construction and operating costs.

Guidelines for minimizing entrainment and impingement of aquatic organisms at marine intakes in British Columbia

by A.Y. Fedorenko. Vancouver, B.C. : Dept. of Fisheries and Oceans, Habitat Management Division, 1991. vii, 86 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2098) ISSN 0706-6473

MICROLOG 91-04239 1 fiche

Entrainment and impingement of fish and other aquatic organisms, such as macroinvertebrates and fish eggs and larvae, at water intake structures may create potentially serious losses of these organisms. Recent proposals in BC for industrial and mariculture facilities requiring seawater intakes indicate an urgent need for suitable guidelines to protect marine resources; the main concern is to minimize the incidental capture of aquatic organisms at the intakes. This document presents guidelines and criteria for the siting and design of marine intakes.

Guidelines for the preparation of an Environmental Impact Statement

Canada. Environmental Assessment Panel Reviewing the Nuclear Fuel Waste Management and Disposal Concept. Ottawa : The Panel, 1991. iii, 41 p. French ed. (*Directive pour la préparation d'une...*) on the same fiche.

MICROLOG 91-05062 2 fiche

In September 1988, Atomic Energy of Canada Ltd. (AECL) submitted its concept for the deep geological burial of nuclear fuel wastes in the Canadian Shield for public review. A Panel was appointed in October 1989 to examine the safety and acceptability of the AECL concept, along with a broad range of nuclear fuel waste management issues. The Panel held public scoping meetings in 14 cities during October and November 1990 to identify issues which should be addressed by the proponent in their environmental impact statement (EIS). This document contains draft guidelines for the preparation of that EIS, identifying the issues to be addressed by AECL. These include a summary of the document and its findings, including its origin and nature, current methods of management, risk to human and environmental health, and the need for long-term management; the concept, including the site, construction, and transportation; a baseline study of the environment; impacts of the concept on the environment; alternatives to irretrievable burial; and the site selection process.

Guidelines for the preparation of hazardous material spill contingency plans

by D.C. Tilden and H.E. Westermann. Ottawa : Environmental Protection Service, Western and Northern Region, 1990. i, 18 p. Bibliogr. (Report ; CP(EP) WNR90-91-4) MICROLOG 91-02762 1 fiche

Any person, organization or company that has control or custody of significant volumes of hazardous materials has a legal and moral responsibility to prevent pollution of the environment. Responsible parties must institute spill prevention measures and provide the capability to respond to spills to minimize environmental damage. This document provides basic guidelines for the development of hazardous material spill contingency plans. It identifies the factors that should be considered in the development of contingency plans and the information that should be incorporated into a comprehensive contingency plan. The guidelines are intended to apply to all operations, activities and/or facilities in the Northwest Territories that involve the production, use, storage, transportation, treatment and/or disposal of hazardous materials. Legal requirements are also included. • CA EV NO SC

Guidelines for the protection of fish and fish habitat during bridge maintenance operations in British Columbia

by S.C. Samis, M.D. Nassichuk and B.J. Reid. Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, Habitat Management Division, 1991. vii, 64 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1692) ISSN 0706-6457 MICROLOG 91-02497 1 fiche

This report examines the potential impacts on fish and fish habitat from bridge cleaning and painting operations in British Columbia. Guidelines in the report are designed to ensure the protection of aquatic life during routine bridge maintenance operations. Included are abatement techniques that minimize losses of paints and abrasives into fish habitat. Toxicity of bridge maintenance products are reviewed and bioassay test procedures are recommended. A referral procedure is outlined to facilitate review of bridge maintenance proposals near fish habitat. • BC CA CF FI PW SC

the change that the proposed government legislation would make. It also analyzes some of the reactions to the changes proposed in 1989. CA CI JU

Gun control legislation in Canada, the United Kingdom and the United States

by W.C. Bartlett. Ottawa : Library of Parliament, Research Branch, 1990. 40, 48 p. Bibliogr. (Background paper ; BP-233E) French ed. (Le Contrôle des armes...les lois...) on the same fiche. ISBN 0-660-13655-4 MICROLOG 91-01135 1 fiche

Extensive gun control was adopted in Canada in 1977, and critics are now calling for even more restrictions. Various proposals for extended control in the U.S. are now at different stages of the legislative process. This study summarizes and provides some analysis of the gun control laws of selected countries. It examines the laws of Canada, the U.K., and the U.S., and where appropriate, it contrasts the provisions in the other countries with those in force in Canada. CA CI JU

Gypsum in the Murchyville area (11D/14D), Halifax County

by G.C. Adams. S.I. : Canada-Nova Scotia Mineral Development Agreement, 1990. iii, 51 p. : maps. (Open file report ; 90-022) Fold. maps not filmed. MICROLOG 91-05156 1 fiche

The Murchyville gypsum area is located 3 km east of the Village of Elderbank, Halifax County. Using physical data and background knowledge, 12 areas were selected from a total of 189 gypsum-anhydrite occurrence areas identified in the Province. Murchyville was the first area selected for more detailed study. Drillhole data taken from 3 holes completed by Getty Mines Ltd. between 1974 and 1976 provided the only subsurface information, therefore a small drilling program was carried out beginning in mid-July 1990 to determine the gypsum resource potential. A total of 18 HQ sized holes were collared in a rough grid pattern extending 3000 m along the local geological strike. • AP CA NR PR PS SC

The report also describes the susceptibility of the forest and the negative and positive effects of defoliation on both evergreen and deciduous trees. • CA FO SC

Habitat Management Section : annual general meeting

British Columbia Wildlife Branch. Habitat Management Section. Victoria : BC Environment, Wildlife Branch ; Recreational Fisheries Branch, 1990. vii, 100 p. : ill. (Wildlife working report ; WR-46) ISSN 0831-4330 MICROLOG 91-06334 2 fiche

The Habitat Protections Sections within the BC Wildlife Branch were formed 15 years ago and have greatly improved the level of understanding and knowledge of the impacts of human development on fish and wildlife resources. This document reports on the 1989 annual general meeting, identifying the issues

and summarizing the decisions and strategies put forward. The main issue is that of integrated resource management and sustainable development, its application to forestry and streamside management, and the use of geographic information systems. Reports on regional technical issues are also included, as well as reports on activities in the various regions and the Habitat Think Tank. BC EV LS PR SC

Habitat suitability criteria for walleye spawning and egg incubation in Saskatchewan

by W.K. Liaw. Saskatoon, Sask. : Saskatchewan Parks, and Renewable Resources, Saskatchewan Fisheries Laboratory, 1991. viii, 24 p. : ill. Bibliogr. (Fisheries technical report ; 91-1) MICROLOG 91-05947 1 fiche

The lower reaches of the Puskwakau River is one of the best known walleye spawning habitats in Saskatchewan. This study developed walleye spawning and egg incubation habitat preference curves for water depth, velocity and substrate in this river. The information provides a basis from which walleye spawning habitat in Saskatchewan can be evaluated for stream rehabilitation and environmental impact assessments. FI MS PR SC

Habitat use and activity patterns of marbled murrelets at inland and at-sea sites in the Queen Charlotte Islands, British Columbia

by M.S. Rodway, J.-P.L. Savard and H.M. Regehr. Delta, B.C. : Canadian Wildlife Service, Pacific and Yukon region, 1991. xi, 151 p. : ill., maps. Bibliogr. (Technical report series ; no. 122) ISSN 0831-6481 ISBN 0-662-18659-1 MICROLOG 91-06001 2 fiche

The marbled murrelet is widely distributed in nearshore waters of BC, nesting in old-growth forest. Conservation problems posed by the rapid removal of such forest by logging, as well as at-sea mortality from oil spills and gill net fisheries, highlight the need to define distribution and nesting habitat requirements. This study monitored daily, seasonal and geographic variability in marbled murrelet activity patterns at inland and adjacent at-sea sites; evaluated the effects of weather on inland activity; compared the level of marbled murrelet activity in alpine, old-growth forest at high elevation, old-growth forest at low elevation, and second-growth forest (40-60 years old); and conducted a census of marbled murrelet activity in as many inland locations as time permitted. The study was conducted on the Queen Charlotte Islands, mainly on Graham Island, between April 22 and August 23, 1990. • BC CA EV LS SC

Hagersville : l'incendie survenu dans un dépôt de pneus

par H. Morrison et J.-L. Bourdages. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 22, 19 p. Bibliogr. (Etude générale ; BP-232F) L'éd. anglaise (The

Hagersville tire...) sur la même fiche. ISBN 0-660-93009-9 MICROLOG 91-01134 1 fiche

Au début de 1990, un incendie survenu à proximité de Hagersville, en Ontario, dans un dépôt privé d'une superficie de 2,3 hectares et contenant quelque 14 millions de pneus usés a provoqué une importante émission de substances chimiques toxiques dans l'air, dans le sol et dans la nappe phréatique. La première partie de ce document traite des incidences que l'incendie risque d'avoir sur l'environnement et sur la santé des personnes vivant près du dépôt. Des renseignements obtenus à partir de quelques incendies de pneus survenus durant les années 1980, particulièrement aux États-Unis, se révèlent utiles pour cette analyse. La deuxième partie décrit les lois fédérales et provinciales qui permettent de faire face à des situations de ce genre. La troisième partie aborde la question de l'indemnisation pécuniaire pour les dommages causés par l'incendie et celle de la responsabilité des coûts de nettoyage. CA EV MU ON SC

The Hagersville tire fire

by H. Morrison and J.-L. Bourdages. Ottawa : Library of Parliament, Research Branch, 1990. 19, 22 p. Bibliogr. (Background paper ; BP-232E) French ed. (Hagersville : l'incendie...) on the same fiche. ISBN 0-660-13654-6 MICROLOG 91-01134 1 fiche

Early in 1990, a fire at a privately-owned storage depot for used tires near Hagersville, Ontario, caused significant discharge of toxic chemicals into the air, soil and possibly the groundwater. This paper addresses the probable impacts of the Hagersville fire on the environment and on the health of persons living near the depot; describes federal and provincial safety and emergency legislation for dealing with emergencies of this sort; and discusses the question of financial compensation for the damages caused by the fire and responsibility for the clean-up costs. Background information is also included on similar fires in the U.S. from 1983-87. CA CI EV MU ON SC

Haldimand-Norfolk regional review : a reappraisal of the regional government structure

Haldimand-Norfolk Board of Review (Ont.). S.I. : The Board, 1989. v, 330 p. Bibliogr. CSI 55115 203. MICROLOG 91-04673 4 fiche

This report begins with a brief account of the Board of Review's procedures. It presents an account of the existing regional government structure, and describes the various suggestions for a possible alternative to the existing local government structure. It also appraises the chosen alternative against the existing local government structure. Finally, it provides recommendations. MU ON PA PR ST

Hanging wall response to mining of Denison-Potacan, phase III : final report

Denison-Potacan Potash Company. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. 180 p. : ill., maps. (Report ; MRL 90-145) On cover: Potash Mining Project Fold. maps not filmed. CANMET contract: 89041-01-SQ.
MICROLOG 91-04859 2 fiche

The Denison-Potacan Potash Co. mine site is located southwest of Sussex, NB. As a follow-up to work done in Phases I and II, a study was conducted to assess the hanging wall response to mining, based on concern that the overburden rocks may be capable of storing a large magnitude of strain energy such that sudden brittle failure of that sequence would result in significant seismic activity. A microseismic system was installed to determine if hanging wall deformation occurring in response to mining was accompanied by seismic activity, and geomechanical codes GEOROC and VISCOT were verified by comparison of output with in-situ closure and stress measurements.

Hardness prediction for the repair welding of 2.25 Cr-1Mo pressure vessels

by A.S. Oddy and R.S. Chandel. Ottawa : Canada Centre for Mineral and Energy Technology, Metals Technology Laboratories, 1990. ii, 7 p. Bibliogr. (Report ; MTL 90-42(TR))
MICROLOG 91-01013 1 fiche

Reactor vessels used for the hydrotreating of heavy oils and tar sand bitumen are frequently made of 2.25Cr-1Mo steel in thicknesses of 150-300mm. For practical reasons, post-weld heat treatment of the repair welds is undesirable, leading to continued effort to develop techniques that do not involve such treatment. Repair welding attempts to fill the defect with successive weld passes so as to normalize and temper previous passes and thus reduce the hardness to required values. Alberly

developed a set of empirical rules predicting the hardness after each pass, then incorporated them in an algorithm which predicts the number of layers required to achieve the desired hardness. This report modifies Alberly's tempering algorithm and demonstrates a mathematically correct method for calculation of the tempering occurring in an anisothermal cycle. Since the rules used to relate the softening that occurs during tempering are heuristic, separate rules are proposed for the kinetics of softening depending on the peak temperature.

The Hardwood processing sector in British Columbia

H.A. Simons (International) Ltd. Strategic Services Division. S.I. : The Division, 1991. xv, 126 p. : ill. Bibliogr. Jointly funded by Western Economic Diversification Canada and the British Columbia Ministry of Development, Trade and Tourism. CSI 37128.200.
MICROLOG 91-06930 2 fiche

Study of the issues and constraints facing the BC hardwoods industry and the key success variables. The study was limited to wood product options that could be manufactured from the coastal alder resource and the interior birch resource. All known BC (both currently operating and shut down) and some Albertan hardwood users were contacted, either by phone, questionnaire, or by personal visit. In addition, over 40 questionnaires were sent to professional foresters to determine the status of the current inventory. The US Pacific Northwest industry was used to compare the two industries.

Harp seals, man and ice

by D.E. Sergeant. Ottawa : Dept. of Fisheries and Oceans, 1991. x, 153 p. : ill., maps. Bibliogr. (Canadian special publication of fisheries and aquatic sciences ; 114) ISSN 0706-6481 ISBN 0-660-14052-7
MICROLOG 91-05452 2 fiche

Harp seals are one of the most abundant of the world's hair seals and have long been an important resource for peoples living on seasonally ice-bound coasts of the North Atlantic Ocean. This book reviews the biology and population dynamics of the harp seal *Phoca groenlandica* Erxleben, the history of its hunting over several centuries, and its eventual conservation. The author treats the biology of the species as a whole, not only on the coasts of eastern Canada, but also of Greenland and northern Europe, and the history of the hunt in all these regions. Knowledge of the behaviour of pack ice on these coasts gives a background to both the ecology of the seals and the economics of the hunt.

by J. Vance. Ottawa : Library of Parliament, Research Branch, 1990. 17 p. Bibliogr. (Current issue review : 88-6E) French ed. (*La Politique en matière de...*) on the same fiche. Revised November 23, 1990. ISBN 0-660-13953-7
MICROLOG 91-04807 1 fiche

Responsibility for all matters related to the health status of Canadians is shared between the federal and provincial governments. Health policy can be divided into two categories: sickness care and preventive health; and health promotion. Most improvements in the health status of Canadians in the past have been attributed to measures in the first category. Certain demographic trends, however, suggest that hope for further improvements in the health of Canadians may lie in the second. This paper focuses on government responsibility for health, financing the Canadian Health System, and the health policy.

Healthy community indicators : lessons from the social indicator movement

by S.M. Willms and L. Gilbert. Vancouver, B.C. : University of British Columbia, Centre for Human Settlements, 1991. 11 p. Bibliogr.

(CHS research bulletin) ISSN 0843-7882
MICROLOG 91-02618 1 fiche (Available on fiche only)

Interest in social indicators has expanded and contracted in the last thirty years. There was a peak of activity in the late sixties which tapered off in the 1970s with a brief revival in the late 1980s. This paper reviews the social indicators' literature as a possible source of enlightenment in the new search for healthy community indicators. It explores from several perspectives the potential of the social indicators' literature to inform the quest: first, to examine the definitions of social indicators and their relationship to health indicators; second, to extrapolate the lessons learned from the social indicators movement; third, to provide examples of current sets of health and social indicators; and finally, to indicate implications for healthy community planners.

Heat capacity results for ammonium nitrate and phase stabilized ammonium nitrate from DSC measurements

by D.E.G. Jones and P.P. Lee. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. iv, 241 p. : ill. Bibliogr. (Report ; MRL 90-111(TR))
MICROLOG 91-01593 3 fiche

Ammonium nitrate (AN) is the base material for most commercial explosives and is also used as the oxidizer in propellants. AN undergoes phase transitions during thermal events, accompanied by large volume changes which deleteriously affect the mechanical properties of AN in a pyrotechnic mixture. Use of additives to 'phase stabilize' AN alter the phase transitions and thermal patterns quite dramatically. Heat capacity measurements are very sensitive to phase transitions. This report presents heat capacity results measured by a differential scanning calorimeter (DSC) whose performance was tested with sapphire and benzoic acid standards. The heat capacity was determined for AN and AN phase stabilized with KNO₃, CuO and NiO. Heat capacity results were then compared with literature results and those for the phase stabilized AN were compared with earlier DSC results. Phase transition results for AN and the AN composites are also discussed.

Heat pump/thermal storage combinations for enhancing passive solar heating of Canadian houses

Allen Associates. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. ix, 81 p. : ill. Bibliogr. CANMET contract: 23283-7-6219-01-SZ. ISBN 0-662-18034-8
MICROLOG 91-01214 2 fiche

This study examines 5 residential-scale heat pump/thermal storage combinations designed to increase passive solar gain utilization and economic feasibility. Using a modified version of the detailed hour-by-hour computer program ENERPASS, these systems were modelled for thermal performance. Thermal storage modelling included a large hot water tank, a reversible airflow rock store, and ice phase-change storage, both as an indoor tank and an exterior ground storage. The house used for modelling is a 200 sq m two-storey dwelling. South-glazing-to-interior-floor-area ratios (GFR) of 7%-20% were examined. The thermal envelopes defined were a house insulated at the National Building Code levels; an energy-efficient house with higher insulation levels, significantly improved windows and basement slab insulation; and a super-energy-efficient house with a further increase in insulation levels, RSI 1.25 windows and an attached sunspace located on the first floor of the south facade and constituting 50% of the south-facing glazing.

Heavy metal removal from gold mine tailings by indigenous plants (Oldham phase II) : final report

P. Lane and Associates Limited. Ottawa : Canada Centre for Mineral and Energy Technology, 1990. x, 34 p. : ill. Bibliogr. CANMET contract: 89260-01-SQ.
MICROLOG 91-00741 1 fiche

Mobilization of heavy metals from mine tailings into surface and groundwaters is a persistent environmental problem at both active and abandoned mines, with gold mines frequently having additional contamination problems because of the use of mercury or cyanide during the extraction process. A biotechnology approach, in which indigenous species of plants are cultured on-site to bioaccumulate metals from surface and ground waters and reduce erosive loss of contaminated soils and tailings is used in many areas around the world. A two-phase study of an abandoned gold mine site near Oldham, N.S. was initiated in 1988 to determine the feasibility of using indigenous plants as biological filters for mercury, arsenic and other heavy metals. This report gives an overview of Phase I in which plants were selected, and describes Phase II, in which 3 laboratory experiments and one field experiment were conducted using some of the dominant plants found at the site. The experiments used

7 plant species and 4 grass species.

Heavy vehicle performance on grade and climbing lane criteria

by A.M. Khan, J.Y. Wong and M. Rastogi.
 Toronto : Ministry of Transportation, Research and Development Branch, 1990. x, 78 p. : ill.
 Bibliogr.
 MICROLOG 91-02853 1 fiche

This study assessed the estimates of heavy vehicle performance on grade in existing Ministry of Transportation (MTO) and other speed-distance curves, developed metric speed distance curves, and reviewed MTO warrants for climbing lanes based on realistic speed-distance performance and on cost-effectiveness. Weight-power information was compiled for a representative set of heavy vehicles and two simulation models were developed to obtain speed-distance curves. Model I simulates vehicle motion in detail. Model II is less detailed and is based on empirical functions recommended by the American Society of Automotive Engineers. Climbing lane warrants were reviewed and recommendations made, based on speed loss on grade, a drop in the level of service and cost-effectiveness. The use of speed-distance curves and warrants is illustrated.

Helicopter radar report : final draft

by R.T. Lowry ; for Transportation Development Centre, Policy and Coordination Group, Transport Canada. Calgary, Alta. : Intera Technologies Ltd., 1990. xiii, 44 p. : ill.
 Bibliogr.
 MICROLOG 91-02512 1 fiche

To support the operation of Canadian Coast Guard icebreaker ships, it is proposed to put reconnaissance systems on the helicopter and to telemeter the data back to the ship. This study evaluates the optimum type of active sensor to place on a helicopter. The project studied a synthetic aperture radar (SAR), a real aperture side looking airborne radar (SLAR) and a rotating antenna radar (PPI). The study was based on simulations using fine resolution SAR data collected using the INTERA STAR-1 system, flown at 9000 metre altitude. To do this, a model of ice reflectivity was evolved based on a combination of published data and a single trial data set that had been collected with STAR-1 flown at 15,000 metres. Imagery was simulated for altitudes of 300, 1000 and 3000 metres.

Hepatic mono-oxygenase activities in American plaice *Hippoglossoides platessoides* from the Miramichi estuary, N.B.

by R.F. Addison, P.-D. Hansen and E.C. Wright. Dartmouth, N.S. : Bedford Institute of Oceanography, Dept. of Fisheries and Oceans, Scotia-Fundy Region, Physical and Chemical Sciences Branch, 1991. iv, 14 p.
 Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1800)
 ISSN 0706-6457
 MICROLOG 91-05070 1 fiche

The lower part of the Miramichi River and its estuary are moderately populated and industrialised, leading many local residents to believe that the water is polluted, contributing to declines in the Miramichi salmon population. Measurements of fish hepatic mono-oxygenase activity in resident flatfish are a good indicator of the presence and effects of certain organic chemicals, including polynuclear aromatic hydrocarbons (PAH), some PCBs and some chlorinated dibenzofurans and dibenzodioxins. As these chemicals are among those expected to contaminate the Miramichi estuary, local fish were examined for hepatic mono-oxygenase to define the impact zone of any contamination by

the chemicals. American plaice were trawled at 4 sites between Newcastle and Burnt Church in August 1990 and liver samples were analyzed immediately for indices of mono-oxygenase induction. This report presents the results of that examination.

Heritage language programs in Canadian school boards

Toronto : Canadian Education Association, 1991. 64 p. French ed. (Les Programmes d'enseignement des langues...) : 91-02370/1. ISBN 0-920315-46-1
 MICROLOG 91-02538 1 fiche (Available on fiche only)

The report, based on a survey of 120 schools boards across Canada, begins with an overview of provincial legislation, regulations, policy, and funding for heritage language instruction. A province-by-province look at local school board programs examines scheduling, teacher certification, professional development, community involvement, transportation, cultural components, and pupil, teacher and parent satisfaction with the programs. An outline of teacher training in heritage languages is included, as are sample policies and curriculum guidelines received from the boards polled.

Heritage resource management

Ottawa : Ottawa Dept. of Planning and

Development, Community Planning Branch, 1990. 51, 55 p. (Policy report ; 3.11) Bilingual (Gestion des ressources...). MICROLOG 91-01794 2 fiche

This policy report outlines a plan to ensure the continuing success of heritage conservation planning in the nation's capital. The key issues that influence policy are reviewed, and a conceptual view of the role of Ottawa's past in its future as the capital of Canada is presented. Goals, objectives, and policies are proposed as well as a process for implementation and monitoring.

Heterojunction silicon solar cells, development towards industrial production

Amorphous Silicon Research Group. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1991. xvii, 86 p. : ill. Bibliogr. CANMET contract: 23283-7-6084. ISBN 0-662-18744-X MICROLOG 91-04534 2 fiche

This report describes the design and development of single junction photovoltaic (PV) cells with a novel structure, formed by depositing doped silicon (aSi) thin films on top of an oppositely doped silicon (cSi) water (classified as heterojunction aSi/cSi solar cells (HJ-cells)). The investigation was conducted to increase the efficiencies of HJ-cells; to explore ways of reducing the cost of production especially by replacing the expensive single crystal wafers with cheaper, lower quality material; and to address the manufacturing potential of this process.

A High Arctic Summer Expedition

by R.J. Oszcewski. Ottawa : Defence Research Establishment Ottawa, 1991. v, 32 p. : ill. Bibliogr. (Report ; no. 1068) MICROLOG 91-03402 1 fiche

The 1989 High Arctic Expedition of the Canada-China Dinosaur Project travelled to Bylot and Ellesmere Islands during July because of the recent discovery of dinosaur fossils on Bylot Island and because of historical references to the existence of large fossilized bones near Ellesmere Island south of the Bay Fiord. The report emphasizes the interactions of daily activities, weather and the clothing being trialled, as well as subjective impressions of the Arctic summer in these locations. The performance of the equipment being trialled and results of measurements of the effect of the low-angle sun on comfort are summarized separately.

High temperature fermentation of straw : technical/final report

by D.E. Caldwell. Regina : Saskatchewan Agriculture, Agriculture Development Fund, 1990. 22 p. : ill. Bibliogr. ISSN 0829-9455 MICROLOG 91-01769 1 fiche

Report of research to determine the value of extreme thermophiles in the fermentation and saccharification of cellulose. A total of 73 thermophiles were isolated from steam-heated,

cellulose-amended soil. These strains were preserved by freezing at minus 20C in 50% (w/w) glycerol. The isolates were cultivated using a minimal salts medium containing carboxymethyl cellulose and a small amount of yeast extract, which provided unknown substances necessary for growth. Of the strains isolated, 28 were selected for detailed study. The effect of temperature on each of the isolates was determined and from each plot the cardinal temperatures were determined. Each of the 28 strains was tested for substrate utilization at its optimum temperature. The fermentation end products ethanol, acetone, acetate, butanol, butyrate, crotonate, and lactate were assayed and ethanol was determined both by gas chromatography and enzymatically.

High temperature uniaxial and triaxial compression tests on URL rock samples from borehole

by J.S.O. Lau and B. Gorski. Ottawa : Canada Centre for Mineral and Energy Technology Mining Research Laboratories, 1990. vi, 49 p. : ill. Bibliogr. (Report ; MRL 90-139(TR)) MICROLOG 91-04786 1 fiche

As part of the Canadian nuclear fuel waste management program concerned with the assessment of the feasibility and safety of the long-term disposal of high level nuclear wastes in vaults located at depth in plutonic rocks, AECL Research has constructed an underground research laboratory (URL) in the Lac du Bonnet batholith in southeastern Manitoba. Twelve sets of tests were carried out at 21C-23C, 100C and 200C and confining pressures of 0, 3.5, 17 and 35 MPa to study the thermo-mechanical properties of the grey granite. Tests were conducted for failure deviator stress, axial strain at failure, tangent Young's modulus, pseudo Young's modulus and strength properties. This report discusses the results of those tests and compares them to the results obtained at the 240 and 420 levels of the URL. The tests used samples obtained during the construction phase.

Homesharing : a manual for homesharing programs in Alberta

prepared for the Society for the Retired and Semi-Retired ; by Sintra Group Inc. Edmonton : Alberta Municipal Affairs, 1989. iii, 105 p. : ill. Bibliogr. ISBN 0-88654-262-6
MICROLOG 91-00334 2 fiche

There is a growing interest in developing ways to foster the residential well-being of seniors. This interest includes the extended independent living of seniors in their homes and good supportive housing for those with limited resources. There is increased need to find economical approaches to the provision of such housing and support services and a corresponding need to explore alternative approaches. One such approach, referred to as homesharing, involves homesharing providers offering to share the use of their homes with another unrelated person in need of housing. This manual includes information on planning and designing a program, staffing, operational procedures, education and marketing, program evaluation, and funding and sponsorship. Each section provides detailed information on key elements for new homesharing programs.

Hopping synthesizer controller

by R. Addison. Ottawa : Defence Research Establishment Ottawa, 1990. ix, 76 p. : ill. Bibliogr. (Technical note ; no. 90-17)
MICROLOG 91-03505 1 fiche

For the Extremely High Frequency Satellite Communications (EHF SATCOM) project, industrial contractors are building a ground based advanced development model of an EHF frequency hopped satellite communications system. To support this contract, in-house work is being done on some of the critical areas such as synchronization. Any work in this area requires a frequency hopping synthesizer for each end of the link that is under control of the synchronization controller. The Comstron FS2000 synthesizer takes a frequency word from an external port and switches to this frequency. This report describes a hopping synthesizer controller which generates the frequency word at the appropriate time and responds to the commands of the synchronization controller.

Household energy surveys in Third World cities : some methodological issues

by S. Tyler. Ottawa : International Development Research Centre, 1990. 34 p. Bibliogr. (Manuscript report ; 262e)
MICROLOG 91-00165 1 fiche (Available on fiche only)

Accurate data about fuel used, costs, sources, appliances and consumer behaviour requires field surveys of developing countries' urban households. Methodological considerations crucial in such household energy surveys are good social science methodology and statistical requirements for data validity, technical and behavioural issues specific to household energy utilization, and the particular difficulties of conducting surveys in culturally diverse urban areas in developing countries. This paper reviews the principal issues in each of the categories by outlining requirements at each stage of the survey research effort. The discussion begins with the identification of data needs, and includes survey sampling, data collection issues and questionnaire design, interview procedures and interviewer training, and concludes with a brief discussion of data coding, cleaning and analysis.

Housing effects on growth of young horses : final report

by N.F. Cymbaluk. Regina : Saskatchewan Agriculture Development Fund, 1990. 29 p. Bibliogr. ISSN 0829-9455
MICROLOG 91-01883 1 fiche

Cold weather increases maintenance energy demand for other livestock and this would be expected in horses. Yet, virtually no data is available on the effects of winter on energy demands of horses and the 1989 National Research Council (NRC) requirements do not modify energy intakes for horses exposed to cold weather. This study assessed the effects of housing temperature on growth, skeletal development and feed utilization of overwintered, young horses. Twelve 7-month Standardbred colts were assigned to either warm (10C) or cold (mean temperature -5.2C) housing for 22 weeks, beginning in late November. Colts were fed sufficient diet to supply the nutrient needs for moderate growth of 7-month-old horses expected to mature at 500 kg body weight according to 1989 NRC requirements. Feeds and feces were analyzed for moisture, gross energy, crude protein, acid-detergent fiber, neutral-detergent fiber, calcium and phosphorus content. All horses were regularly evaluated for musculoskeletal abnormality.

Housing expenditures : a look at how demographic factors influence them

by H. Bartel, W.L. Marr and D.J. McCready. Ottawa : Canada Mortgage and Housing Corporation, 1990. iv, 161 p. Bibliogr. CSI 22118.200
MICROLOG 91-03975 2 fiche

This study examines the relationship between demography and householder's spending on shelter in Canada from the perspective of two questions: Do different demographic groups allocate different amounts of total household consumer spending or of total household income before taxes to shelter? and, if they do, are these differences caused by non-demographic variables such as place of residence, education, or income, or are they caused by the demographic differences themselves?

Housing Help/Aide Logement : a case study

by N. Gnaedinger. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1990. v, 82 p.
MICROLOG 91-06241 2 fiche

Housing Help/Aide Logement is a community-based service operating in the Regional Municipality of Ottawa-Carleton. It provides information, referral, and direct assistance to people who have trouble finding affordable housing, or to people who require information about their rights and obligations as tenants and landlords. This report discusses the genesis of Housing Help/Aide Logement and its struggle to find funding. It contains a detailed description of Housing Help/Aide Logement, profiles of three services in Ontario fashioned after Housing Help/Aide Logement, and a list of suggestions addressed to groups which may be considering establishing a service like Housing Help/Aide Logement.

Housing in Nigeria's new capital at Abuja : achievements and problems

by E.U. Morah. Vancouver, B.C. : University of British Columbia, School of Community and Regional Planning, 1990. 24 p. Bibliogr. (Comparative urban and regional studies ; no. 23) ISSN 0828-2412
MICROLOG 91-00562 1 fiche (Available on fiche only)

In February 1976, the Nigerian government announced the decision to move its capital from the coastal metropolis of Lagos to Abuja, a vast underdeveloped region in the spatial heartland of the country. This paper determines how far the new capital has come in its implementation since being promulgated fourteen years ago, and whether equitable access has been provided for all Nigerians as was originally intended. It relies on the

analysis of housing development in the city to achieve these ends.

How does the Goods and Services Tax affect the non-industrial private forest sector in the Maritimes?

by G. Savage. Fredericton : Forestry Canada - Maritimes Region, 1991. 34 p. (Information report ; M-X-179E) French ed. (*Incidence de la Taxe sur les produits...*) : 91-05854/1. ISSN 0834-406X ISBN 0-662-18930-2
MICROLOG 91-05855 1 fiche

The federal Goods and Services Tax (GST) came into effect January 1, 1991 and applies to most goods and services, including property, purchased in Canada. There are a variety of operators in the private woodlot sector, including provincial and federal government officials involved in delivering forestry-targeted financial assistance programs who are affected by the tax. This document supplies answers to some of the common questions on the impact of the GST on harvesting and forest products, forest management activities/programs, forest land transactions, and other general questions. An appendix presents flow diagrams illustrating how the delivery mechanism for providing government financial assistance for forest management activities affects the application of the GST.

How shall we govern the governor? A critique of the governance of the Bank of Canada

by D.E.W. Laidler. Toronto : C.D. Howe Institute, 1991. vi, 38 p. Bibliogr. (The Canada Round ; no. 1) ISSN 1183-6253 ISBN 0-8806-278-8
MICROLOG 91-04395 1 fiche

This document describes the key features of the Bank's mandate and governance as they stand at present. It argues that the outdated vagueness of its mandate makes the Bank's degree of accountability for its performance difficult to assess. It offers suggestions for reform, namely, that the Bank's mandate should be updated and clarified to take account of the special powers of monetary policy over medium-term price-level behavior; and that the make-up and role of the Bank's board of directors should be changed so as to strengthen its influence over monetary policy and to ensure that regional interests are visibly represented when policy is designed.

The HSG wood supply model : description and user's manual

by T.G.E. Moore and C.G. Lockwood. Chalk River, Ont. : Forestry Canada, Petawawa National Forestry Institute, 1990. v, 31 p. : ill. Bibliogr. (Information report ; PI-X-98) French ed. (*Description et guide d'utilisation du programme...*) : 91-05856/1. ISSN 0706-1854 ISBN 0-662-18051-8
MICROLOG 91-00353 1 fiche

This document briefly describes a planning system prepared to assist in the design and evaluation of long-range timber harvest schedules. The central component of this planning system is a wood supply model that operates by tracking the development of individual stands through time. The model retains the spatial identity of all stands through all forecasts and thus eliminates forecasting errors caused by aggregation. In areas where geography is an important factor in the design of feasible harvest schedules, the spatially-dependent rules in the harvest scheduling algorithm may substantially improve the feasibility of the computer generated forecasts. The first part of the report describes the features of the model, and the second part provides instructions on how to prepare datasets and operate the software.

Humanitarian ceasefires : an examination of their potential contribution to the resolution of conflict

by R. Hay. Ottawa : Canadian Institute for International Peace and Security, 1990. 52 p. Bibliogr. (Working paper ; no. 28) ISBN 0-662-18140-9
MICROLOG 91-00838 1 fiche

Conflicts are fought for different reasons, interests or needs, therefore their resolution may be best achieved using different but compatible approaches. One such approach is the 'humanitarian ceasefire' which is defined as a finite halt in the conduct of an armed conflict so that a particular need of the population in the war zone may be addressed. This paper examines three such humanitarian ceasefires and argues that such peacebuilding enterprises are worthwhile as gestures of peace. It also associates the humanitarian ceasefire process with established theories on conflict resolution. It concludes with an exploration of the ways in which peacekeeping forces and the humanitarian ceasefire process might be used to complement each other and further the cause of peace.

An Ice jam flood study for Simonds, phase II : summary document

Sub Surface Surveys. Fredericton : Dept. of Municipal Affairs and Environment, 1989. 46 p. : ill., maps. Bibliogr. *Bilingual executive summary (9, 9 p.) laid in. Fold. maps not filmed*.
MICROLOG 91-03080 1 fiche

From April 1-4, 1986, an ice jam formed on the Saint John River at the upstream end of Upper Becaguimec Island, causing record flooding at Simonds, N.B. As a result of this flooding and 1987 ice jam flooding at Perth-Andover, a working group and review committee were appointed to undertake a study of the problem. This report presents the results of Phase II of the study, which identified various feasible structural and non-structural flood damage reduction measures, and estimated the costs and, where possible, the benefits of each. The study area included the Saint John River Valley from the Lower Presque Isle Island to the Upper Becaguimec Island, below the 1986 flood level.

Ice propeller interaction forces

by A.J. Keinonen, R.P. Browne ; for Transportation Development Centre, Policy and Coordination Group, Transport Canada. Calgary, Alta. : AKAC Inc., 1990. 2 v. : ill. Bibliogr. Contents: Vol. 1 : Main report -- vol. 2 : Appendices.
MICROLOG 91-02503 3 fiche

Ice loading on open vs. ducted propellers has been discussed for several years, although there is a lack of facts to support a clear comparison of the systems. This report systematically evaluated the influence of ice thickness, ice strength, ice block size, amount of ice fed to the propeller, propeller revolutions, propeller pitch and vessel speed on the ice loading of propulsion systems by the use of model test series in an ice model basin. Influences were established for basic hydrodynamic load with no ice, ice-induced hydrodynamic load and direct ice contact load. Model test results were correlated with full-scale data. Ice load formulas are given for a range of propeller ice condition combinations.

Ice strength indexer, phase III

for Transportation Development Centre, Policy and Coordination Group, Transport Canada ; by D.N. Baker. Ottawa : Melville Shipping Ltd., 1990. xvi, 79 p. : ill. Bibliogr.
MICROLOG 91-07097 2 fiche

The ice strength Indexer, designed by Melville Shipping Ltd., is a device used to measure the mechanical properties of model ice. The Indexer consists of three instrumented plates and a water jet system. The three plates are used to break the ice in flexural, shear and crushing modes. A computer program was developed that is used to analyze the force time histories from the plates and convert them to ice strength values. This report describes the new Indexer configuration and a series of preliminary tests which demonstrated that the Indexer output may be correlated with conventional manual strength measurements and confirmed the validity of the indexer concept.

Identification des populations de poissons d'intérêt économique en situation précaire dans le réseau du St-Laurent et sélection des espèces pour des interventions immédiates

par J.A. Robitaille, L. Choinière et Y. Vigneault.
Québec : Ministère des pêches et des océans, Direction de la gestion des pêches et de l'habitat, Division de l'habitat du poisson, 1991. ix, 24 p. : ill. Bibliogr. (Rapport technique canadien des sciences halieutiques et aquatiques ; no 1810) ISSN 0706-6570
MICROLOG 91-06203 1 fiche

Ce document suggère un ordre de priorité dans les interventions de restauration d'habitats et de reconstitution des stocks de treize espèces de poisson dont certaines populations sont actuellement en situation précaire dans le réseau du Saint-Laurent. Cette classification des espèces, établie à l'aide d'une grille d'évaluation, vise à identifier les espèces les plus susceptibles de répondre significativement à des actions de restauration par une augmentation de leur abondance et par des retombées économiques perceptibles à courts termes. Dix-sept critères ont été retenus pour réaliser l'évaluation du potentiel de restauration de chaque espèce et ce document en fournit l'analyse.

Identification of corrosion products and corrosion processes of ACSR conductors

by K.S. Yoshiki-Gravelsins and H. Leung.
Toronto : Ontario Hydro, Research Division, 1990. iii, 36 p. : ill. Bibliogr. (Report ; no. 90-113-K)
MICROLOG 91-00809 1 fiche

A test procedure involving x-ray diffraction analysis, scanning electron microscopy with energy dispersive x-ray analysis facilities, and other spectroscopic techniques (x-ray fluorescence, Auger spectroscopy) has been used in the identification of corrosion products of ACSR transmission line conductors from various rural and industrial sites. The results reported here support a corrosion mechanism in which oxide-covered aluminum adsorbs reactive anions and undergoes localized pitting. Zinc, on the other hand, is readily oxidized to zinc hydroxide, and mixed salt hydrozincites in the presence of CO₂. Further reaction with

pollutant constituents, under changing acidic conditions, results in product dissolution and precipitation of other zinc salts.

Identification of relatively undisturbed areas in the south Okanagan and Similkameen Valleys, British Columbia

by K. Redpath. Delta, B.C. : Canadian Wildlife Service, Pacific and Yukon Region, 1990. vi, 9 p. Bibliogr. (Technical report series ; no. 108) ISSN 0831-6481 ISBN 0-662-18204-9
MICROLOG 91-01944 1 fiche

The south Okanagan region of B.C. contains habitats that are unique to Canada. These habitats are under threat from a variety of land-use pressures. This survey identifies those areas remaining in a relatively natural state. Using 1981 land-use mapping, the category 'no perceived activity' was selected to identify relatively undisturbed areas. The information was updated by interpreting 1988 black and white air photos and field checking was conducted in 1989 and 1990 to confirm the interpretation and verify boundaries. This report outlines the methodology used and presents the study results.

Identification of small-scale hydro sites in mainland Nova Scotia

Monenco Maritimes Limited. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. iv, 110 p. : ill., maps. Bibliogr. CANMET contract: 12SC.23216-5-7286. ISBN 0-662-18126-3
MICROLOG 91-04544 2 fiche

This report identifies potential small-scale (less than 20 MW) hydro sites in mainland NS capable of supporting an installed capacity in excess of 500 kW. A preliminary cost estimate is provided for each site and brief case histories are given on 5 existing small-scale hydroelectric developments, ranging from 5-500 kW. Potential sites were identified from available mapping and were first screened on the basis of head and drainage area necessary to meet the study objectives. The inventory excluded rivers with existing hydroelectric and active water supply developments and watersheds in national and provincial parks. Sites were not screened for environmental impacts, although sites with known environmental constraints are noted and a brief environmental overview is presented. Costs were estimated using a further development of the SHYDRO program, using IBM PCs or compatibles.

Illicit smoking on aircraft : safety recommendations

Ottawa : Transportation Safety Board of Canada, 1990. 8 p.
MICROLOG 91-01146 1 fiche

Following the introduction of measures to phase out smoking in Canadian aircraft, there were received reports of a new problem, namely, that significant numbers of aircraft occupants

are now smoking in the washrooms. They are, in some cases, disabling smoke detectors and otherwise misusing washroom equipment. If smoking materials are disposed of in waste bins they increase the risk of an in-flight fire. This document includes aviation safety recommendations to address this problem by proposing the modification of existing aircraft smoke detection systems, the development of a public awareness programs to sensitize aircraft occupants to the hazards of smoking in aircraft lavatories, and the collection of information related to incidents of willful decommissioning of smoke detectors.

Immigrants in the Canadian labour force : their role in structural change

by S.B. Seward and M. Tremblay. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1989. xviii, 71 p. (Discussion paper ; 89.B.2) *CSI 99545.204*. MICROLOG 91-01525 1 fiche

The purpose of this paper is to assess the extent to which the structural change model of immigrant adaptation is applicable to immigrants in the labour force at the time of the 1986 Census. It addresses the following questions: Are immigrants concentrated and over-represented in industries where employment grew relatively quickly or slowly between 1971 and 1981? Are immigrants over-represented in industries with relatively low or high unemployment rates? And are there differences among different groups of immigrants, depending on sex, place of birth, or length of time in Canada? To address these issues, the paper is organized into four parts. Part one briefly reviews immigration trends since World War II. Part two describes the characteristics of immigrants in the labour force. Part three analyzes the role immigrants play in the Canadian industrial structure and endeavours to answer the questions posed above regarding the extent to which immigrants respond to labour needs. Part four summarizes the major findings of the paper and suggests broad implications for public policy.

The Impact of policy change on decisions in the mineral industry : the case of exploration in Manitoba, 1969-77

by B.E. Owen and W.J. Kops. Kingston, Ont. : Queen's University, Centre for Resource Studies, 1979. xvi, 116 p. : ill., maps. (Monographs ; 11) ISBN 0-88757-015-1
MICROLOG 91-04829 2 fiche (Available on fiche only)

Increased government involvement in business is one of the most significant developments in Canada recently, creating problems of strategy formulation and implementation for managers in both private and government organizations. This study involves a detailed examination of base metal exploration in Manitoba and how it has been affected by specific changes in government policy between 1969 and 1977. The structure of mineral exploration decisions

is described and examined both before and after the policy changes, and analyzed for changes brought about by the new policies to determine whether there was any real shift in the balance of decision-making responsibility from the private to the public sector. Individual exploration decisions of 5 companies were examined before, during and after the major policy changes.

The impact of saline waters upon freshwater biota : a literature review and bibliography

by K. Machniak. Edmonton : Alberta Oil Sands Environmental Research Program, Aquatic Fauna Technical Research Committee, 1977. xi, 258 p. Bibliogr. (AOSERP report ; 8) MICROLOG 91-03407 3 fiche

Test pits excavated in the Alberta Oil Sands Environmental Research Program study area indicate that a significant inflow of groundwater can be expected in surface mining operations in the oil sands area. To prevent this accumulation of groundwater, the local water table must be lowered by pumping and by controlling and removing groundwater seepage to the pit. The disposal of this groundwater may present a problem because of its salinity. This literature review and bibliography provides a review of the effects of saline water on biota, including the effects of saline water in general on major groups of organisms such as aquatic plants, aquatic invertebrates, fish, birds and mammals; and toxicity summaries for individual ions. The report also contains an extensive bibliography of scientific references on the impact of saline waters upon freshwater biota.

Impacts of forestry practices on a coastal stream ecosystem, Carnation Creek, British Columbia

by G.F. Hartman and J.C. Scrivener. Ottawa : Dept. of Fisheries and Oceans, 1990. viii, 148 p. : ill., maps. Bibliogr. (Canadian bulletin of fisheries and aquatic sciences ; no. 223) Contribution no. 150 to the Carnation Creek Watershed Project. ISSN 0706-6503 ISBN 0-660-13631-7 MICROLOG 91-00559 2 fiche

Results from the first 17 years of a multi-disciplinary study about the effects of logging activities on a small stream ecosystem in the coastal rainforest of British Columbia are reviewed. The main hydrological, fluvial-geomorphological, thermal, and production relationships are integrated in four schematic illustrations. Long-term case studies such as this reveal ecosystem processes permitting researchers to partition climatic variability from man-induced impacts. Applications of results to land use planning are also discussed.

Impacts of glyphosate application on grizzly bear forage production in the Coastal western hemlock zone

by A.N. Hamilton, C.A. Bryden and C.J. Clement. Victoria : Forest Resource Development Agreement, 1991. vii, 49 p. : ill. Bibliogr. (FRDA report ; 165) ISSN 0835-0752 ISBN 0-7726-1340-0 MICROLOG 91-06869 1 fiche

Investigation of the impacts of glyphosate on grizzly bear forage availability in coastal BC, emphasizing floodplain ecosystems. Impacts were examined at the regional (occupied grizzly bear habitat in the Coastal Western Hemlock zone), local (one watershed representative of operational use), and site-specific (plots in 22 cutbacks) levels. Changes in percent cover and fruit production of bear forage species were monitored following foliar and individual stem treatments. A simple efficacy trial was also conducted.

Impacts of low-level jet fighter training on caribou populations in Labrador and northern Quebec -- Rev.

by F.H. Harrington and A.M. Veitch. St. John's : Newfoundland-Labrador Wildlife Division, 1990. vii, 139 p. : ill. Bibliogr. MICROLOG 91-02962 2 fiche

Since low-level jet training activities in Labrador and northern Quebec are proposed to increase three-fold by 1996, and further expansion of military training has been proposed through the establishment of a NATO base at Goose Bay, Labrador, a study was undertaken to investigate the potential short- and long-term effects on caribou inhabiting the low-level training area. Short-term effects were assessed by observations of the reactions of caribou to low-level overflights, and by determining the relationship between an animal's daily exposure to low-level flying activity and its daily movement and activity level. Long-term effects were assessed by determining the relationship between an animal's total seasonal exposure to low-level flying and its corresponding calf survival and habitat use patterns.

Impacts of the operation of existing hydroelectric developments on fishery resources in British Columbia, vol. I : anadromous salmon

by S.M. Hirst. Vancouver, B.C. : Dept. of Fisheries and Oceans, Pacific Region, Habitat Management Division, 1991. ix, 144 p. : ill., maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 2093) ISSN 0706-6457 MICROLOG 91-04847 2 fiche

BC Hydro operates 25 dams and diversions on 16 rivers which support anadromous salmon. Impacts on salmon vary according to the degree of flow regulation, the operating mode of the plants and the extent of downstream habitats and populations. This report reviews the status of hydroelectric developments operated by BC Hydro and their impacts on anadromous salmon resources and the adequacy of existing flow regimes for maintaining downstream salmon habitats and populations; determines the potential for improving anadromous salmon habitats and populations in BC Hydro-regulated river systems; and provides recommendations on how the existing situation in general and for specific installations might be improved. The review mainly addresses impacts of sockeye, coho and chum salmon.

Impacts of two stumping operations on site productivity in interior British Columbia

by R.B. Smith and E.F. Wass. Victoria : Forestry Canada, Pacific and Yukon Region, Pacific Forestry Centre, 1991. vi, 43 p. : ill. Bibliogr. (Information report ; BC-X-327) ISSN 0830-0453 ISBN 0-662-18576-5 MICROLOG 91-06215 1 fiche

Two clearcut sites in the southern interior of BC, stumped to control root disease in 1980, were studied along with adjacent unlogged and logged but non-stumped portions to determine whether the stumping affected seedling growth, particularly through changes in soil properties. Ground surveys were conducted to determine the type, depth, extent and cause of soil disturbance on stumped and non-stumped portions of the cutovers. Soils associated with major soil disturbance categories were tested for penetrability, bulk density, pH, total nitrogen and organic carbon and these measures were compared with 'undisturbed' soils, those with humus intact. Plantations of Douglas-fir and lodgepole pine were established at Gates Creek and Douglas-fir and western larch at Phoenix. Trees were thinned after 5 years and a final measurement of heights and diameters made on the residual trees after 8 years. Other measures taken on or around randomly selected trees included plant moisture stress, foliage nutrient content, soil moisture, top and root weights, and vegetative composition and cover. Results were described by area disturbed by each treatment, soil physical and chemical properties and seedling performance.

Implantations parallèles d'un algorithme de séparation et évaluation progressive pour résoudre le problème de localisation avec équilibre

par B. Gendron. Montréal : Université de Montréal, Centre de recherche sur les transports, 1991. x, 111 p. : ill. Bibliogr.

(Publication : no. 761)

MICROLOG 91-02934 2 fiche

Le but de cette étude est de réaliser des implantations parallèles, sur les Transputers, de l'algorithme de séparation et évaluation progressive développé pour résoudre le problème de localisation avec équilibrage. Cet ouvrage s'ouvre par un chapitre d'introduction au parallélisme, qui vise à donner une vue d'ensemble du domaine. Le chapitre 2 décrit les ressources matérielles et logicielles utilisées dans le cadre de ce travail. Le problème de localisation avec équilibrage et le modèle auquel il donne lieu, sont présentés au chapitre 3. Le chapitre 4 rappelle la méthode générale de séparation et évaluation progressive et l'adaptation qui en a été faite pour résoudre le problème de localisation avec équilibrage. Dans le chapitre 5, on fait d'abord un survol de la littérature sur les algorithmes parallèles de séparation et évaluation progressive. Par la suite, on décrit les implantations parallèles de l'algorithme de séparation et évaluation progressive développé pour résoudre le problème de localisation avec équilibrage. Les résultats numériques obtenus par ces implantations font l'objet du chapitre 6. En terminant, on tire des conclusions générales de cette étude et on identifie quelques avenues de recherche.

Implementation of an algorithm to estimate regional evapotranspiration using satellite data

by N. Bussi res and P.Y.T. Louie. Downsview, Ont. : Environment Canada, Hydrometeorology and Marine Division, Canadian Climate Centre, Atmospheric Environment Service, 1989. v. 26 p. : maps. Bibliogr.

MICROLOG 91-04378 1 fiche

This report describes the implementation of a simple scheme to estimate evapotranspiration from satellite radiance measurements, in cloud free situations. Although the primary objective was to estimate the evapotranspiration field, the methodology also required the derivation of such intermediate fields as albedo, surface temperature and net radiation. The scheme uses visible and infrared channels from GOES, plus air temperature and upper air soundings of temperature and moisture. Data requirements and processing are discussed in detail and validation and error assessment of intermediate data fields are made.

Implementation of FFT and pulse compression routines on the SPT frequency domain array processor

by V. Behroozi and A. Damini. Ottawa : Defence Research Establishment Ottawa, 1990. x, 52 p. : ill. Bibliogr. (Report : no. 1041)

MICROLOG 91-01784 1 fiche

State-of-the-art synthetic aperture radars (SAR) transmit high bandwidth pulses and therefore require extremely high sampling rates and high processing rates. The advances in board level products for high-speed standard busses has reached the point where it may be possible to replace current processors with ones occupying much smaller volumes, such as would be used in aircraft. This report examines the use of one such card for application to a subset of operations required in such processors. The study examines the frequency domain array processor (FDAP), a VME compatible circuit board based upon Signal Processing Technologies' DASP/PAC chip set, reviews the various system architectures which can be built around it, the board and its associated development system; and the implementation ease of typical radar signal processing functions on the board. Fast Fourier Transform and pulse compression routines are implemented via a supplied user interface as well as a high level language. The results are

examined and comments are made.

The Importance of groundwater to fish habitat : base flow characteristics for three Gulf Region rivers

by D. Caissie. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Fish Habitat and Enhancement Division, 1991. v, 25 p. : ill. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 814) ISSN 0706-6465
MICROLOG 91-02614 1 fiche

Fish habitat and the productive capacity of streams are influenced by many hydrological phenomena, particularly by groundwater flow (or base flow), which stabilizes stream discharge and reduces extreme water temperatures by providing a warmer temperature regime during winter and cooler temperatures during summer. This study presents the results of groundwater flow data calculated for the Wilmot River in P.E.I., the Kouchibouguac River in N.B., and the Ste. Genevieve River in Newfoundland, using daily discharge hydrographs. Calculations are included for the base flow recession constant, an indication of groundwater discharge during periods of no precipitation; estimates of groundwater discharge (base flow) using the graphical hydrograph separation technique; and monthly base flow and the ratio of base flow to total flow, also using the graphical hydrograph technique.

Improve canola meal feed value and produce food-grade protein by ultrafiltration technology : technical research report

by S.M. McCurdy and P. Fedec. Regina : Saskatchewan Agriculture, Agriculture Development Fund, 1987. 23 p. : ill. Bibliogr. ISSN 0829-9455
MICROLOG 91-01727 1 fiche

Results of a project to upgrade the feed value of canola meal by extracting the antinutrients (phytate, sinapine, and glucosinolates) and to recover the simultaneously solubilized protein by separating the protein and antinutrients in the extract via ultrafiltration. A literature review was conducted to identify solvents used by other investigators for solubilizing the protein and antinutrients in the meal. A laboratory study was then conducted using response surface methodology to determine the optimum levels of pH, ethylenediaminetetraacetic acid (EDTA) and sodium chloride (NaCl) for extracting the components of interest from the meal. Twenty solvents containing various levels of these extraction aids were used to extract commercial meal at an extraction ratio of 1:8 (meal:solvent) for 30 minutes. After centrifugation of the slurry, the residual levels of protein, phytate, sinapic acid, and glucosinolates were determined. After statistical analysis of the laboratory data, an extractant composition was chosen for use in the pilot scale work.

Improvement of production efficiency of livestock by vaccination against somatostatin : technical/final report

Regina : Saskatchewan Agriculture Development Fund, 1989. 20 p. : ill. Bibliogr. ISSN 0829-9455
MICROLOG 91-01755 1 fiche

Somatostatin is a peptide hormone consisting of 14 amino acids, secreted from the hypothalamus, which strongly inhibits growth hormone secretion from the pituitary gland. Increasing the rate of secretion of growth hormone is desirable because higher levels of growth hormone in the blood result in higher average daily gains, leaner carcasses, better feed efficiency and increased milk production. This research is being conducted to develop a method which will neutralize the somatostatin, achieved by immunizing the animal against itself. The immunization technique consists of injecting a somatostatin-ovalbumin conjugate in the presence of an adjuvant. This report evaluates several commercially available adjuvants in somatostatin immunization in swine, sheep and rats.

Improvement of the prediction of wind velocities acting on buildings

G.K. Yuill and Associates. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. iii, 128 p. : ill. Bibliogr. CANMET contract: 03SQ.23216-6-6324-08. ISBN 0-662-18148-4
MICROLOG 91-01216 2 fiche

The transformation of wind speed data from station measurements to a building site is difficult because of the lack of a systematic method to account for small scale terrain effects. This project analyzed the wind speed predictions from the LBL model, the AIM-2 model, the ASHRAE model and the Log Profile model by comparing them with the actual measured wind speed data, and from the wind data measured at the Edmonton International Airport, Edmonton Municipal Airport, Namao Airport, Eilerslie climate station and Stone Plain climate station. The Alberta home heating research facility (AHHRF) was the experimental site. Each wind correction model estimated the wind speed at the AHHRF from the data measured at each of the 5 nearby measuring sites, all in rural terrain. Terrain coefficients were assigned according to the upwind obstruction. Estimated wind speed was compared to actual and the percent error and its standard deviation was calculated.

In situ monitoring and computer modeling of a cemented still mat and confines during a tertiary stage pillar recovery

Falconbridge Limited. Sudbury, Ont. : The Company, 1989. v, 68 p. : ill. Bibliogr. Appendices (116 p.) laid in. CANMET contract: OSQ-85-00292.
MICROLOG 91-00728 3 fiche

This report outlines a diamond drilling technique, developed to extract relatively undisturbed core samples of weekly consolidated hydraulic mill tailings backfill, together with results from in situ and laboratory material quality tests. Work using a numerical model for simulation of an underground backfill structure is also reported. Backfill coring techniques were developed at Falconbridge's Lockerby Mine. Material quality determinations were then done on the backfill core samples to obtain the value for dry bulk density, moisture content, cohesive strength, angle of shearing resistance, uniaxial compressive strength and modulus. The resulting drillholes were then used to accommodate soil extensometers, geophones and Giotz cells, which were then used to monitor the backfill's behaviour as mining progressed adjacent to the fill. An ultrasonic measuring device was also used to help profile the fill failure that resulted. The data obtained from the material quality determinations and in situ instrumentation was used to numerically model the backfill behaviour when subjected to loading due to adjacent mining.

In vivo thermal conductivity of the human forearm tissues

by M.B. Ducharme and P. Tikuisis. Ottawa : Defence and Civil Institute of Environmental Medicine, 1991. 6 p. : ill. Bibliogr. In Journal of Applied Physiology : vol. 70, no. 6, 1991.
MICROLOG 91-05921 1 fiche

This study investigated the effect of a range of water temperatures on the effective thermal conductivity of the forearm tissues and the relative contribution of the forearm muscle tissue to the forearm tissue insulation. Tissue temperature was monitored by a calibrated multicouple probe during a 3-hour immersion of the resting forearm in water from 15C-36C. Skin temperature, heat loss, and blood flow of the forearm, as well as rectal temperature and arterial blood temperature at the brachial artery were measured during the experiments.

In-flight load measurements of the ROBOT-X canards (U)

by S. Penzes. Ralson, Alta. : Defence Research Establishment Suffield, 1988. vii, 59 p. : ill. Bibliogr. (Suffield memorandum ; no. 1191)
MICROLOG 91-00142 1 fiche

ROBOT-X is a rocket-boosted aerial target designed to simulate a variety of air threats for use in exercising air defence weapon systems. The ROBOT-X airframe is unique for both aerodynamic configuration and structural design. This memorandum describes the strain gauge system implemented in one of the ROBOT-X canards to measure lift, drag and torque. The description includes design considerations, calibration procedures and data reduction techniques. Data are presented from an early ROBOT-X flight test.

In-situ determination of dewatered tailings fill properties in Ontario mines : final report -- Rev.

by D. Thibodeau. S.I. : Canada-Ontario Mineral Development Agreement, 1990. 2 v. : ill. Contents: Vol. 1 : Report -- vol. 2 : Appendices. CANMET contract: OSQ85-00297.
MICROLOG 91-04709 4 fiche

As a result of INCO's initial test work with high density fill, a project was begun to encompass the in situ determination of dewatered tailings

fill properties in Ontario mines. The project outlined and developed a quantitative understanding of the in situ support and fill properties of a high density dewatered sand paste fill; related laboratory determined fill properties to those observed in-situ; and provided CANMET with two 3-inch diameter holes through the in situ fill which could be used to test and monitor the fill with a pressuremeter. A suitable workplace was selected at Levack Mine and in April 1986 two slices on the 900 level were chosen. The cut to be filled was mined out and instrumentation was installed to monitor ground movement and pressure in the fill. The workplace was then filled with pumped paste fill and the material properties were determined. The filled area was undercut and in situ samples were collected for property determination. This report gives laboratory results from test cylinders, monitoring results from in situ instrumentation, and results from in situ sampling of the fill.

An Incentive learning approach to decision making

by T.R.H. Cutmore and R.J. Beninger. North York, Ont. : Defence and Civil Institute of Environmental Medicine, 1991. i, 15 p. Bibliogr. (Interim research report ; DCIEM no. 91-13)

MICROLOG 91-03650 1 fiche

While existing computer models address general principles to describe the acquisition of planning and decision making skills, there remains a need to describe and implement a specific mechanism for the acquisition of these skills. This report describes an approach to understanding adaptation to a complex and dynamic environment by taking advantage of recent advances in the neurosciences that provide detailed descriptions of the neuronal mechanisms and molecular events underlying various forms of learning in a variety of species. The report describes some of the steps already taken towards the development of a computational model of incentive learning (IL); presents the model being developed for the implementation of IL; and examines the nature of the decision making process and the application of the IL approach.

Incidence and possible causes of fires within coal mines of the Nova Scotia coal fields and on measures that can be taken to prevent such fires

Northwest Resource Consultants. S.I. : The Consultants, 1990. 3 v. : ill., fold. map. Bibliogr. Contents: Vol. 1 : Stage 1, socio-economic impact of mine fires -- vol. 2 : Stage 2 -- vol. 3 : Stage 3. CANMET contract: 79192-01-SQ.

MICROLOG 91-00734 7 fiche

Results of a 3-stage project detailing the incidence and possible causes of fires within Nova Scotia coal mines. Stage 1 of the project reviewed the history of 6 major fire incidents from 1973-88 in the Sydney coalfield. Minor incidents which occurred between April 1985 and April 1988 were also examined. The costs of lost production and equipment were estimated directly, as well as the social costs for deaths, lay-offs, local taxes and other social costs at local, provincial and federal levels. Stage 2 reviewed the causes, prevention and detection, and means of combating the fires. The particular problems and conditions of the Sydney coalfield mines are examined, along with the fire protection programs currently in place. Recommendations are made to reduce fire incidence, risk and losses. Stage 3 addressed selected items from the recommendations and provided capital and operating cost estimates to implement them.

L'Incidence de l'informatisation sur les emplois et les ressources humaines à la ville de Joliette

par R. Andrews, J. Archambault et S. Roy. Laval, Québec : Ministère des communications, Centre canadien de recherche sur l'informatisation du travail, Direction de la recherche organisationnelle, 1990. iii, 103 p. : ill. Bibliogr. ISBN 0-662-96317-2

MICROLOG 91-02004 2 fiche

Le programme global de recherche élaboré en 1987 vise à évaluer les incidences de l'informatisation sur les organisations et les emplois des milieux de la fonction publique, de l'enseignement, et des organismes parapublics. Les auteurs de ce document ont volontairement choisi une municipalité de taille moyenne pour couvrir le secteur de la fonction publique municipale en raison de la transférabilité des résultats. Les travaux de recherche à Joliette portent sur les dimensions suivantes: les structures organisationnelles; les modes de gestion et de fonctionnement; le contenu des tâches; l'évaluation des emplois; les critères d'embauche, de recrutement, de mutation, de promotion et de sélection; et le climat organisationnel et la satisfaction au travail. Chacune de ces dimensions fait l'objet d'un chapitre, à l'exception des structures organisationnelles et des modes de gestion et de fonctionnement qui sont regroupés sous un seul chapitre compte tenu de leur similitude.

Incidence of 1:29 Robertsonian translocation in Canadian beef cattle

by M. Pasitschniak-Arts and G. Kraay. Saskatoon, Sask. : Saskatchewan Research Council, 1991. iii, 7 p. : ill. Bibliogr. (SRC technical report ; no. 231) (SRC publication ; no. S-803-11-B-91)

MICROLOG 91-07198 1 fiche

Centric fusion or Robertsonian translocation results from the joining of two acrocentric chromosomes at or around the centromere, forming a large metacentric or submetacentric chromosome and reducing the number of chromosomes by one. The 1:29 translocation is reported in many breeds of cattle worldwide, but primarily in European continental beef breeds and Scandinavian dairy breeds, although rarely in British beef breeds and the Holstein Friesian cattle. This report presents the results from 75 purebred cattle (66 males and 9 females) from Canadian beef producers which were karyotyped. A literature review was also conducted on the Robertsonian translocation and the results are discussed.

Incidence of translocations in beef bulls : final report

by S.M. Schmutz. Regina : Saskatchewan

Agriculture Development Fund, 1990. 11 p. ISSN 0829-9455

MICROLOG 91-01870 1 fiche

A Robertsonian translocation, the fusion of two chromosomes into one larger one, is a problem which reduces fertility in both sexes. It leaves the animal with an uneven number of chromosomes (59 instead of 60), which pose no problems until the animal reproduces. Since the risk of this translocation is predicted to be higher in subfertile animals than those of normal fertility and since bulls are used more extensively than individual females, the primary focus of this study was beef bulls rather than cows. The first part of the study in 1988 focused on beef bulls with some sign of subfertility. The second part, reported here, focused on beef bulls predicted to have normal fertility. The project determined if chromosome abnormalities are carried by Saskatchewan beef cattle, and made recommendations to individual owners on the testing of relatives of such translocation carrying animals to assist in eradication. Eighty-three bulls from 10 breeds were studied.

Income maintenance, work effort, and the Canadian Mincome experiment

by D. Hum and W. Simpson. Ottawa : Economic Council of Canada, 1991. xvi, 103 p. Bibliogr. ISBN 0-660-13827-1

MICROLOG 91-06054 2 fiche

Public interest in welfare reform peaked in the 1960s, leading to extensive research and five large-scale social experiments designed to assess the consequences of a guaranteed annual income or a negative income tax program. Of special importance was the issue of individual work incentives under such a program. But despite a clear theoretical understanding of the problem, wide availability of numerous data sets of high quality, and impressive econometric analyses of the question, the effects of alternative income maintenance programs on labour supply remain controversial. This study addresses this controversy in two ways: first, it surveys labour supply research to date in the U.S. and Canada; and second, it examines labour supply behaviour in the Canadian experiment.

Increases in risk and the demand for insurance

by Y. Alarie, G. Dionne and L. Eeckhoudt. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 19 p. Bibliogr. (Publication ; no. 710) (Cahier ; 9021)
MICROLOG 91-01573 1 fiche

Many people anticipate that a risk averse agent faced with an exogenous mean preserving increase in risk will demand more insurance. This widespread belief does not always turn out to be true in the insurance market. This negative result has prompted many theoretical investigations in order to obtain intuitively acceptable results. Some authors have searched for conditions on the utility function, others have presented subclasses of mean preserving increases in risk, while a third group has considered the two kinds of restrictions jointly. None of these contributions have applied their analysis to the insurance problem. The object of this article is to fill this gap in literature. By examining the study of the coinsurance coverage, it shows that one of its specifications, namely the linearity of the payoff in the decision variable and in the random element, does not preclude the applicability of well known theorems to the demand for insurance.

Increasing the utilization level of British Columbia's timber harvest

Nawitka Renewable Resource Consultants Ltd.

Victoria : Forest Resource Development Agreement, 1990. iii, 117 p. Bibliogr. (FRDA report ; 121) *Subcontractors: R.J. Hyslop and Associates Ltd. [and] Philip Musgrave.* ISSN 0835-0752
MICROLOG 91-00306 2 fiche

This study explores the economic prospects of using a higher fraction of the forest resources which are felled each year, and of harvesting a wider range of stands within the production forest. The report does not deal in detail with mill residues, although there is a brief analysis and comment. The report describes what fraction of forest residues and underutilized areas have high potential for use and gives estimates on the quantity and quality of the component. It discusses extraction costs, technical raw material requirements, the economics of the industry and the potential for improvements. Both improved and new products are proposed along with market implications and government policy implications. Several business case scenarios are shown and strategic and policy recommendations are then made that support implementation.

Incremental test protocol, recovery mode and the individual anaerobic threshold

by T.M. McLellan, K.S.Y. Cheung and I. Jacobs. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1991. 6 p. Bibliogr. *In International Journal of Sports Medicine ; vol. 12, 1991.*
MICROLOG 91-06760 1 fiche

The individual anaerobic threshold (IAT) is defined as the highest metabolic rate at which blood lactate (LA) concentrations are maintained at a steady-state during prolonged exercise. This study compared the effects of active and passive recovery on the determination of IAT following both a submaximal or maximal incremental exercise test. Seven males did two submaximal, incremental cycle exercise tests and two maximal incremental tests. Blood was sampled repeatedly during exercise and for 12 min during the subsequent recovery period, which was passive for one submaximal and one maximal test and active during the other tests. An IAT metabolic rate and power output were calculated for the submax-passive, max-passive, submax-active, and max-active protocols. At weekly intervals, the subjects exercised for 30 min at one of the four IAT metabolic rates.

MICROLOG 91-04856 1 fiche

The issue of Indian self-government has risen to a position of particular prominence among aboriginal concerns over the last 10 years. The federal government has acknowledged that the Indian Act does not provide an adequate measure of self-government and that new legislation is required to meet the different needs and aspirations of Indian people across the country. This paper presents background information on self-government issues, and discusses the Indian Act, the special committee

on Indian self-government, legislative initiatives to recognize aboriginal self-government, and policy issues and initiatives.

Indicators of the primary impacts of transportation improvements

by B.L. Allen. Downsview, Ont. : Ministry of Transportation, Research and Development Branch, 1991. iv, 42 p. Bibliogr.
MICROLOG 91-04088 1 fiche

Travel cost indicators focus on direct user benefits, sometimes in a rather limited way. This study was conducted to develop more broadly based indicators which would more fully reflect the concerns of those who make decisions about transportation investments. The report is a summary of a literature review on measures or indicators of transportation infrastructure effects on the social and economic conditions of society, including private investment, revitalizing depressed areas, rebuilding central cities, strengthening peripheral economies, reducing general unemployment, expanding the local tax base, and redirecting urban growth. Also considered are the travel cost impacts of transportation investments, the effects of transportation investments on accessibility, and the impact of transportation system infrastructure on business profitability and competitiveness.

Indoor air quality test protocol for highrise residential buildings : final report

Buchan, Lawton, Parent Ltd. Ottawa : Canada Mortgage and Housing Corporation, Project Implementation Division, 1990. 49 p.
MICROLOG 91-06253 1 fiche

This manual provides a protocol for the assessment of air quality in highrise residential buildings based on a three-stage process consisting of a preliminary assessment, simple contaminant measurements, and, where

warranted, complex measurements. The preliminary assessment is mainly site inspections and occupant surveys. The second stage involves simple, usually inexpensive, contaminant measurements which identify the majority of problems. The final stage is required only when careful evaluation during the first two stages has not identified both the causes and probable solutions to any detected problems. Checklists and measurement techniques are also included.

Industrial natural gas demand

by M. Heggelund. Calgary, Alta. : Canadian Energy Research Institute, 1989. xxi, 288 p. : ill. Bibliogr. (Study ; no. 30) Executive summary (ix, 44 p.) laid in. ISBN 0-920522-55-6
MICROLOG 91-01742 4 fiche (Available on fiche only)

The industrial sector represents the largest end-use market for natural gas in Canada, providing a large and stable baseload demand for producers and distributors. This study examines the energy use patterns of major industrial consumers to assess how future production technologies are likely to impact on energy demand and the magnitude of those effects on natural gas demand. The study consists mainly of a detailed exposition of industrial processes, describing where and how energy is used in each of the energy-intensive industries. Detailed process analyses are provided for the pulp and paper, iron and steel, petroleum refining, petrochemical, inorganic chemical and fertilizer industries. In addition, specific scenarios for cement production and aluminum smelting are developed. The analysis used the University of Waterloo's socio-economic framework (SERF) model's input-output structure to reflect a likely scenario of the impact of new production technologies in each industry and to generate internally consistent production paths for each industry.

Inference of particle size distribution function of aerosol clouds from light scattering measurements (U)

by E. Yee. Ralston, Alta. : Defence Research Establishment Suffield, 1988. 32 p. : ill. Bibliogr. (Suffield memorandum ; no. 1239)
MICROLOG 91-00143 1 fiche

The most efficient method for inferring the particle size distribution function (PSDF) of aerosol clouds from remote light scattering measurements is the constrained linear inversion procedure of Philips and Twomey. However, conventional numerical implementations of this procedure are subject to the choice of appropriate discrete approximation for the PSDF, and of efficiency in computing the solution and selecting a proper value for the Lagrange multiplier (smoothing parameter). Adequate recovery of the PSDF is usually achieved only after tedious preliminary

exploratory analysis. This paper presents an alternative implementation of the constrained linear inversion procedure which overcomes the problems associated with the conventional implementation by developing an explicit analytical (continuous) representation for the solution of the constrained linear inversion procedure and using an objective procedure for the selection of the proper value of the Lagrange multiplier. Numerical examples of PSDF inversions, obtained using the proposed automatic retrieval algorithm, are presented for synthetic aerosol optical extinction and scattering data.

Influence of a new vapour protective clothing layer on physical work tolerance times at 40°C ambient temperature

by T.M. McLellan, P. Meunier and S. Livingstone. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1991. 28 p. : ill. Bibliogr. (DCIEM research report ; no. 91-RR-35)
MICROLOG 91-05933 1 fiche

Canadian Forces personnel must be able to sustain operations in an environment contaminated with nuclear, biological and/or chemical (NBC) agents. While clothing has been designed which protects from such hostile environments, it also impairs body heat loss due to its insulative qualities. A new vapour protective clothing ensemble is under development which is thinner and closer-fitting. This study examined the influence of this new vapour protective clothing on physical work performance in a hot climate. Eleven males exercised at either light, intermittent or heavy continuous metabolic rates at 40°C and 25 percent relative humidity. Subjects were tested wearing either the present protective clothing over combat clothing, present protective clothing with no clothing, or the new vapour protective clothing. Work was done until body temperature increased to 39.3°C (normal 37°C), heart rate was at 95 percent of maximum, dizziness or nausea precluded further exercise, or 3 hours had elapsed.

Influence of specimen size on fatigue crack initiation of welded HY100 steel

by W. Kreuzer. Dartmouth, N.S. : National Defence, Research and Development Branch, Defence Research Establishment Atlantic, 1988. vii, 66 p. : ill. Bibliogr. (DREA technical memorandum ; 88-201)
MICROLOG 91-00155 1 fiche

The statistical theory of the size effect has been used successfully to describe the fatigue crack initiation behaviour of homogenous materials. This report presents the results of an investigation of the specimen size effect on fatigue crack initiation behaviour in SMAW weldments of HY 100 plates. Experiments were designed by the boundary technique in the

range of finite endurance. Using the theory of statistical size effect, the scatter of the number of cycles to crack initiation on a certain stress level, as well as the allowable stress amplitudes for a given number of cycles, can be explained and predicted for plates of different sizes.

Information technology architecture plan : final report

Halifax : Management Board, 1991. viii, 155 p.
MICROLOG 91-06933 2 fiche

In the spring of 1990, a study was initiated to evaluate new planning approaches for information technology (IT), one of whose recommendations was to define IT architectural requirements. This project was begun in December 1990 by establishing an interdepartmental working group to begin architecture planning and provide the necessary training frameworks and approaches; to conduct an assessment of existing technology architectures and inventory; to update knowledge of key industry developments and directions, including both leading vendors and open systems capabilities; to develop an initial conceptual architecture to meet cross-departmental needs and provide effective integration for both internal and external requirements; to identify areas where standards and guidelines are required, such as networking, data base, common services, user interfaces, development environments, operating systems and technology patterns; and to develop a plan for building work organization, application and information architectures for key opportunities. The project did not address the specific costs and financial benefits of implementing the recommended architecture.

An Initial assessment of controls on coal quality variation in the Cadomin-Luscar coalfield

by W. Langenberg...et al. Edmonton : Alberta Research Council, Geological Survey Dept., 1988. ii, 115 p. : ill., maps. Bibliogr. (Open file report ; no. 1988-06)
MICROLOG 91-02473 2 fiche

Interim report of a study to document coal quality variations in the Cadomin-Luscar coalfield to establish procedures for the assessment of coal quality and to allow comparison between coal quality data from different areas of mountains and foothills. This report describes progress on the documentation of the coal quality variations; discusses the application of some geological models; and gives predictions of coal quality variables.

Initial environmental evaluation : commercial trucking on the Kootenay Parkway -- Draft.

by B.L. Beswick. Ottawa : Environment Canada, Parks Service, 1990. vi, 57 p. : maps. Bibliogr.
MICROLOG 91-03737 1 fiche

The Kootenay Parkway stretches the length of Kootenay National Park, linking Alberta and the Columbia Valley in B.C. The parkway was originally constructed as a park road and transportation link, but since the 1960s has been used by industry for commercial transport. This initial environmental evaluation (IEE) was prepared to examine the environmental implications of increased commercial transportation along the Kootenay Parkway. The report describes the project; park policy and national park values; existing environment and environmental impact, including the climate, geology and geomorphology, soils, hydrology, vegetation, and wildlife; the human

use of the natural environment; and mitigating measures. Methods of public participation, and a list of knowledge deficiencies and outstanding issues are also included

Initial selection for salt tolerance in Rocky Mountain accessions of slender wheatgrass and alpine bluegrass

by R. Hermesh...et al. Edmonton : Alberta Land Conservation and Reclamation Council, Reclamation Research Technical Advisory Committee, 1990. x, 40 p. Bibliogr. (Report ; RRTAC 90-2)
MICROLOG 91-04565 1 fiche

Increasing natural and man-caused salinization of productive range and wildlands is becoming a major concern in the Rocky Mountains and foothills of southern Alberta. In 1987-88, slender wheatgrass and alpine bluegrass collections were first screened for salt tolerance. This project determined if there was adequate genetic variability in salt tolerance among available accessions of these two grasses to ensure the success of the breeding program. The study modified a screening method; screened existing collections for their ability to emerge in a salinized medium; determined if the plant's tolerance to one salt also indicates tolerance to other common salts; and determined if heritability of salt tolerance in slender wheatgrass is sufficient to justify a breeding program.

Initial study of a coal gasification waste site, Brockville, Ontario

Trow, Dames & Moore. Toronto : Ministry of the Environment, Waste Management Branch, 1991. 82 p. : ill., maps. ISBN 0-7729-6198-0
MICROLOG 91-06227 1 fiche

Study to evaluate if coal gasification plant wastes are present on the site, their distribution, storage, and impact on human health and/or the environment. Site information was reviewed and a detailed visual, olfactory, and geophysical search of the site and immediate vicinity was conducted to locate any buried wastes, or structures possibly containing wastes. Background air quality measurements at the site were conducted, specifically to establish levels of benzene, toluene, and xylene in the ambient air. Test drilling was done, including soil and groundwater sampling, to establish if there are any coal tar wastes and if they are moving off site. A temporary monitoring well was installed in selected boreholes and samples of sewer water and sediments were collected upstream and downstream of the site. Soil samples were analyzed for benzene, toluene, xylene, and PAHs.

Les Initiatives de développement durable au Canada : activités en cours

Ottawa : Environnement Canada, Développement durable/Direction de l'état de l'environnement, 1990. iv, 32 p. L'éd. anglaise (Sustainable development...) sur la même fiche. ISBN 0-662-96397-0
MICROLOG 91-02021 1 fiche

Ce rapport a pour principal objet non seulement de décrire sommairement les initiatives de développement durable adoptées par le gouvernement fédéral, mais également de mettre en lumière les initiatives prises par des organismes provinciaux, municipaux et privés. C'est ainsi qu'il aborde les progrès réalisés dans le cadre des tables rondes, le Plan vert canadien, les mesures mises de l'avant par Environnement Canada en matière de développement durable et, à une échelle plus globale, les initiatives du gouvernement

fédéral dans son ensemble. Enfin, le rapport documente certaines mesures importantes de développement durable, amorcées par les provinces et les municipalités ainsi que par le milieu canadien des affaires, les universitaires et les organismes non gouvernementaux.

The Innovative society : competitiveness in the 1990s

by B.B. Purchase. Toronto : C.D. Howe Institute, 1991. vi, 109 p. : ill. Bibliogr. (Policy review and outlook) ISSN 0826-9939
ISBN 0-88806-272-9
MICROLOG 91-02806 2 fiche

Competitiveness is presently a popular notion in the business community, but its specific meaning for policy analysis is unclear. This document argues that competitiveness is about the growth in output per employed person; that it is about continuously raising the real incomes of Canadians; and that it is about continued structural reform of the Canadian economy. It also argues that both the private sector and governments must put competitiveness on its agenda, and examines this need in the context of intergovernmental fiscal relations, the provision of health care and education, and mechanisms for reducing the excess burden of government social regulation.

An Inquiry into tariff anomalies

Ottawa : Canadian International Trade Tribunal, 1990. xvi, 112, xviii, 122 p. : ill. *Bilingual (Une Enquête concernant...)*. ISBN 0-662-57831-7
MICROLOG 91-00820 3 fiche

The Minister of Finance asked the Tribunal to examine the effects on Canadian businesses of certain anomalies in the phase-out schedule of tariffs under the Canada-United States Free Trade Agreement and to advise on how to deal with these anomalies. This report provides the findings and recommendations from the Tribunal's four-month inquiry into five finished product industries: air cleaners, disposable diapers, detergents and household cleaners, pressure vessels, and furniture. Each industry review includes an identification of the finished and input products under consideration and a report on the survey coverage. The evidence of the finished product industry is then summarized, followed by the evidence of the input producing firms. Each is concluded with an assessment of the evidence and the Tribunal's recommendations.

Institutional arrangements and environmental information needs : theme paper four

by S. Nishioka and Y. Moriguchi. Ottawa : Environment Canada, 1991. iv, 32, iii, 33 p. Bibliogr. Bilingual (Besoins au niveau des arrangements...). At head of title: *Environmental Information for the Twenty-first Century : international forum.*
MICROLOG 91-06692 1 fiche

In 1989, the Group of Seven (G7) summit leaders agreed on the importance of environmental information and requested the Organization for Economic Co-operation and Development to examine how selected environmental indicators could be developed to improve the integration of environmental and economic decision-making and to measure progress towards sustainable development. At the 1990 G7 summit, the Prime Minister of Canada proposed that environmental information be improved on a world-wide basis, and announced that Canada would organize the International Forum on Environmental Information for the Twenty-first Century. This theme paper reviews international institutional arrangements on environmental information and discusses how these can be improved to respond to emerging environmental issues. The paper defines institutional arrangements, outlines the criteria for evaluating them, reviews the ongoing activities of various organizations, programmes and supporting institutions, and identifies issues to be resolved and questions to be discussed.

Integrated Information System for Fish Habitat Management (IISFHM) in the Quebec region : status of system after the first phase of development

by Y. Vigneault. Québec : Dept. of Fisheries and Oceans, Fisheries and Habitat Management Branch, Fish Habitat Division, Champlain Harbour Station, 1990. ix, 34 p. : maps. (Canadian technical report of fisheries and aquatic sciences ; no. 1744) ISSN 0706-6457
MICROLOG 91-06814 1 fiche

The Integrated Information System for Fish Habitat Management (IISFHM) in the Quebec Region was developed to maintain an inventory of all relevant information on the physical and chemical characteristics of coastal habitat and on distribution of the major marine species found in the Quebec Region's maritime areas. This report describes IISFHM status as of March 31, 1990, at the end of the first phase of development. It covers the basic structure of the system, its components and various data bases, examples of the various textual and cartographic reports produced, and improvements projected for the second phase of the development.

L'intégration des savoirs au secondaire : au coeur de la réussite éducative

avis au Ministre de l'éducation et à l'enseignement supérieur et de la science. Québec : Conseil supérieur de l'éducation, 1991. 57 p. Bibliogr. ISBN 2-550-15606-4
MICROLOG 91-04407 1 fiche

Cet avis comprend trois chapitres. Le premier montre que l'intégration des savoirs, se situant au coeur de l'acte d'apprendre de l'élève et favorisant son adaptation à une société en mutation, constitue un enjeu éducatif fondamental. Le deuxième constate le peu de place faite à l'intégration des savoirs dans le curriculum, les programmes, le matériel didactique, les pratiques pédagogiques, l'évaluation et l'ensemble de l'organisation scolaire. Le troisième propose des trajectoires d'avenir qui visent une meilleure intégration des savoirs, soit tracer un profil de sortie de l'école secondaire, recentrer les contenus sur l'essentiel, pratiquer une pédagogie axée sur l'acte d'apprendre et créer un environnement éducatif adéquat.

Intégration économique de l'agriculture dans les Maritimes : rapport

par les ministres de l'agriculture des provinces Maritimes ; au Conseil des premiers ministres des Maritimes ; pour le Forum des cabinets des Maritimes. Halifax : Conseil des premiers ministres des Maritimes, 1991. 25 p. *Bilingue* (Economic integration of Maritime agriculture). MICROLOG 91-06384 1 fiche

L'agriculture dans les provinces Maritimes fait partie d'un vaste système économique. Il est possible d'accroître la collaboration économique entre les secteurs agricoles provinciaux en vue d'élaborer et de mettre en oeuvre une stratégie de développement plus efficace dans les provinces Maritimes. Face à ce défi, le Conseil des Premiers ministres des Maritimes a souligné le besoin de l'intégration économique au sein de la région. Ce rapport, présenté au Forum des cabinets des Maritimes, explique une méthode qui pourrait accroître la coopération économique des Maritimes.

An Interactive graphic approach for the integrated design of intercity transportation timetables and vehicle operations

by C. Lardinois, T.G. Crainic and J. Dion. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. 28 p. : ill. Bibliogr. (Publication ; no. 762)
MICROLOG 91-04080 1 fiche

The planning and management of the services offered by any intercity passenger transportation company involve two key levels of concern, characterized as the strategic 'market-oriented' level which is mainly concerned with the design of an efficient timetable that best suits traveller's expectations, but with little consideration for operational and feasibility issues; and the operational level, where one mainly addresses such issues as routing and scheduling of vehicles to the detriment of marketing considerations. This paper presents a decision support system which aims at reconciling both levels of concern within an integrated interactive-graphic framework. The paper describes the main components of the computer system, its database structure, the underlying algorithmic methods, and experimental results.

Interannual variability of oceanographic conditions in the southeastern Beaufort Sea

by D.B. Fissel and H. Melling. Sidney, B.C. : Dept. of Fisheries and Oceans, Institute of Ocean Sciences, 1990. xiv, 102 p. : ill., maps. Bibliogr. (Canadian contractor report of hydrography and ocean sciences ; no. 35) ISSN 0711-6748
MICROLOG 91-01831 2 fiche

An extended set of oceanographic data is available for the southeastern Beaufort Sea, where systematic data collection began in 1950, but comparatively little effort has been directed at examining the longer period variability of the Beaufort Sea, particularly on a year-to-year basis or longer. This study examined variations in Beaufort Sea oceanographic conditions over periods of one year or longer, and compared these variations with measureable changes in external factors which may be important, including surface winds, sea-ice concentrations and Mackenzie River discharge volumes. All sets of available oceanographic data were acquired and processed then displayed in a uniform and consistent manner. Heat and freshwater content values were displayed as contours on maps and averaged over selected sub-areas of the study region to simplify the study of changes occurring over many years.

Intercomparison of current measurements from the Georges Bank Frontal Study

by J.W. Loder, R.G. Pettipas and D.J. Belliveau. Dartmouth, N.S. : Bedford Institute of Oceanography, 1990. vi, 75 p. : ill. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 127) ISSN 0711-6774
MICROLOG 91-00366 1 fiche

From June-October 1988 and July 1989, a field study was conducted of currents and mixing at a tidal front on Georges Bank. As part of this study, current measurements were obtained from moored instruments at 6 sites and from a ship-mounted (Ametek Straza) acoustic Doppler current profiler (ACDP) operated nearly continuously during two principal survey periods. The moored instruments were Aanderaa (paddle-wheel version) current meters deployed at 3-5 depths at each site, a bottom-mounted (RD instruments) ACDP deployed at one of the sites, and two InterOcean S4 electromagnetic current meters deployed on one of the RCM moorings. The Ametek measurements included current profiles in the vicinity of the mooring sites while the research vessel was at anchor obtaining repeated turbulence profiles. This report presents the results of an intercomparison of currents measured with the different types of instrumentation.

Interim acid deposition critical loadings for western and northern Canada

Western and Northern Canada Interim Acid Deposition Critical Loadings Task Group. S.I. : Technical Committee, Western and Northern Canada Long Range Transport of Atmospheric Pollutants, 1990. v, 31 p. : maps. Bibliogr.
MICROLOG 91-03311 1 fiche

Recognizing the importance of the acid deposition issue, the governments of B.C., Alberta, Saskatchewan, Manitoba, the Northwest Territories, and Canada held joint consultations in 1980 to review the available information on air pollution from western and northern Canada. While target loadings have been established for moderately sensitive ecosystems in eastern Canada, there is no national standard for the protection of highly sensitive environments. A task group was set up to develop and recommend interim critical loadings for highly and moderately sensitive aquatic and soil systems in western and northern Canada. This interim report gives background information on the development of standards, and describes the progress made so far on the recommended process and the measurement methods.

Interim report on an intensive study of the fish fauna of the Muskeg River watershed of northeastern Alberta

by W.A. Bond and K. Machniak. Edmonton : Alberta Oil Sands Environmental Research Program, Aquatic Fauna Technical Research Committee, 1977. xx, 137 p. : ill., maps. Bibliogr. (AOSERP report ; 26)
MICROLOG 91-03676 2 fiche

The proposed development of the Athabasca oil sands is expected to introduce large scale disturbances to the lake and river systems of the lower Athabasca River drainage. To minimize its adverse effects on the fish populations, the Alberta Oil Sands Environmental Research Program initiated an integrated series of projects to assess the baseline state of the fish resources of the area. The work involves a broadly based fisheries investigation downstream from Fort McMurray, as well as a site-intensive study of selected tributaries. This report presents preliminary results of work done in 1976 on the Muskeg River, a medium-sized watershed on the east side of the Athabasca River. The report describes the baseline states of the fish resources of the Muskeg River watershed and provides a quantitative estimate of the significance of the watershed to the fisheries of the Athabasca River system.

International refugee pressures and the Canadian public policy response

by A. Nash. Ottawa : Institute for Research on Public Policy, Studies in Social Policy, 1989. xii, 128 p. Bibliogr. (Discussion paper ; 89.B.1) CSI 99545.205

MICROLOG 91-01541 2 fiche

The purpose of this paper is to provide information upon which discussion of refugee policy can be based and to offer an informed critique of Canada's current refugee policy. To do this, it examines the international and Canadian dimensions of the problem, contains a full discussion of the developments of Canadian refugee policy and the 1988 legislation, examines the problems posed by that legislation, and concludes with a series of recommendations for change.

Interprovincial comparisons of university financing, tenth report

Tripartite Committee on Interprovincial Comparisons (Ont.). Toronto : Ministry of Colleges and Universities ; Council of Ontario Universities ; Ontario Council on University Affairs, 1991. 37 p. CSI 56175.002

MICROLOG 91-02879 1 fiche

The Tripartite Committee on Interprovincial Comparisons was established in 1977 to examine university financing in various provincial jurisdictions with the aim of developing a framework for making inter-provincial comparisons. This annual report describes the current approach of the Committee, eight financial indicators chosen and the values of these indicators for the period 1974-75 to 1987-88. The indicators are designed to answer

how much financial support is provided to universities, how university financing fits into each government's priorities and what proportion of provincial resources are directed towards university financing.

Intertidal clam resources on the west coast of Vancouver Island : surveys of intertidal clam stocks on the west coast of Vancouver Island in areas 23 to 25, 1981 to 1987

by B.E. Adkins and R.M. Harbo. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Pacific Region, Fisheries Branch, 1991. ix, 89 p. : ill., maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2070) ISSN 0706-6473
MICROLOG 91-05896 2 fiche

The commercial intertidal clam fishery on the west coast of Vancouver Island is unique in its history of harvesting and the remoteness of many of the small isolated clam beaches. Since the early 1980s, commercial landings of native littleneck and manila clams have been at record levels, raising concerns of over-harvesting and stock depletion. From 1981-87, 20 commercial clam beaches on the west coast of Vancouver Island were surveyed to examine stock composition and abundance and monitor changes relative to an escalation in effort and landings. Several beaches were surveyed periodically or annually while others were surveyed only once. Mean densities and length frequency distributions for native littleneck, manila and butter clams are presented for each survey at each location. Management concerns are also presented and some recommendations for future management are made.

An inventory of land, lots and servicing capacity for selected Alberta urban municipalities, 1988

Edmonton : Alberta Municipal Affairs, Planning Services Division, Research and Development Branch, 1989. 72 p. CSI 34112.014.

MICROLOG 91-05403 1 fiche

A survey of all Alberta cities, towns and villages with populations of less than 50,000 was conducted during the summer of 1988 to determine the size of inventories of vacant lots and lands which are being held for future urban development. A similar survey was conducted in 1987, and a report produced in May 1988. This report summarizes the 1988 survey information. Surveys were sent to 242 municipalities and completed replies were received from 188. Information received was analyzed by residential, commercial and industrial type, and land absorption of residential land and raw and residential land absorption was calculated.

Investigation of stripping of volatile organic contaminants in municipal wastewater treatment systems, phase II

by D. Thompson... et al. Toronto : Environment Ontario, 1990. xiv, 218 p. : ill. Bibliogr. ISBN 0-7729-7504-3
MICROLOG 91-02541 3 fiche

Volatile organic contaminants (VOCs) are the largest group of compounds on the effluent monitoring priority pollutant list and are among the most frequently detected in raw wastewater. Their removal by treatment facilities is a major concern in Ontario's Municipal Industrial Strategy for Abatement (MISA) program. In 1987 an investigation of VOC stripping at water pollution control plants was begun. Phase I concluded that many VOCs are stripped from wastewater treatment plants. Phase II was conducted from January 1988 to April 1989 and consisted of a validation of the accuracy of sampling and analytical protocols used in Phase I; a determination of the relative importance of stripping, biological removal and sorption on to secondary sludge from activated sludge aeration basins; and an examination of the impact of the diffuser type (fine or coarse bubble diffusers), airflow rate and solids retention time on VOC stripping. An experimental design was developed using tap water dosed with 10 candidate VOCs as the aeration basin influent; Burlington Skyway wastewater; and Toronto Highland Creek wastewater.

by J.A. Stegemann and P.L. Côté ; conducted with the cooperation and support of Environment Canada, the United States Environmental Protection Agency, and Alberta Environment. Ottawa : Environment Canada, Environmental Protection Service, 1991. xx, 116 p. : ill. Bibliogr. (Report ; EPS 3/HA/8)
ISBN 0-662-18280-4
MICROLOG 91-05858 2 fiche

A study was undertaken by Environment Canada, in conjunction with the US Environmental Protection Agency (EPA), Alberta Environment and 15 industrial participants involved in developing or marketing solidification technology, to develop and validate 16 laboratory test methods for evaluating the physical and chemical properties of solidified wastes. Environment Canada and the US EPA

provided the 15 industrial participants with 5 untreated hazardous wastes, which were then treated with their proprietary processes and returned as solidified products to 4 laboratories in Canada and the US for testing. Seven physical tests, 5 leaching tests, and 4 micromorphological characterization methods were applied to the solidified products.

Investigation of the Chegoggin Point, Lake George, Yarmouth County, silica and garnet deposit

by R.H. MacDonald. Halifax : Dept. of Mines and Energy, 1990. iii, 69 p. : ill., maps. Bibliogr. (Open file report ; OFR 90-009) MICROLOG 91-02789 1 fiche

High purity silica deposits have always been sought for such traditional uses as silica brick manufacture, glass making and sandblasting. In recent years, many new specialty uses for silica have been found and although the overall market is not very large on a volume or dollar basis, there are some attractive niche applications. The N.S. Dept. of Mines and Energy had under closure 76 claims controlling the known and assumed outcropping of the previously mined high grade silica deposit at Chegoggin Point, Yarmouth County. This provided an opportunity to conduct an exploration program to better understand the orientation and extent of the deposit and to provide additional data on the grade and potential reserves available. The program included geological mapping, geophysical surveying and diamond drilling. Drill logs and assay results are also included.

Investigations géomécaniques et propriétés des matériaux rocheux à la mine Lucien C. Béliveau

par D. Labrie, S. Dufresne, et Y.C. Lizotte. Ottawa : Centre canadien de la technologie des minéraux et de l'énergie, Laboratoires de recherche minière, 1991. vi, 309 p. : ill. Bibliogr. (Rapport ; LRM 91-10(TR)) MICROLOG 91-04542 4 fiche

Ce rapport présente les principaux résultats obtenus. Dans un premier temps, quelques considérations d'ordre général permettent de situer le contexte de l'étude et d'en définir les principaux objectifs. Une brève revue de la géologie de la région et de celle du gisement constitue le deuxième chapitre. Le troisième chapitre permet d'introduire les sites investigués et les paramètres de l'investigation, et d'en présenter les résultats. Quatrièmement, les essais en laboratoire sont introduits rapidement, et les résultats présentés brièvement. La majorité de ceux-ci ayant déjà fait l'objet d'un rapport antérieur, l'emphase est mise plutôt sur leur interprétation et leur extrapolation à l'échelle du massif rocheux. Les facteurs d'échelle calculés ou évalués sont également présentés. Ils composent le cinquième chapitre. Quelques notes relatives à l'utilisation des résultats et leur application éventuelle ont été ajoutées et concluent le rapport.

Investing in children : new directions in child treatment and child and family intervention : a consultation paper

Toronto : Ministry of Community and Social Services, 1988. ix, 114 p. : ill. Bibliogr. MICROLOG 91-03563 2 fiche

The purpose of this document is to stimulate the development and delivery of services to children and the families of children with social, emotional, behavioural, and psychiatric problems. It provides perspective on the environment in which these services operate, and sets out a series of strategic directions designed to promote the development of the services. These directions are oriented towards

developing services at three levels: the level of children and their families; the level of program design and target populations; and the level of local planning for services.

Joint Secretariat. Fisheries Joint Management Committee : Annual report 1986-87

Inuvik, NWT : The Committee, 1987. 20 p. : ill. CSI 97983.001.
MICROLOG 91-03816 1 fiche

The Committee was established in 1986 to provide advice to the Inuvialuit and the Department of Fisheries and Oceans on fisheries management and relevant issues. This report provides a summary of the Committee's activities and projects for the fiscal year starting April 1986 and ending March 1987. Activities include control of fishing on Inuvialuit lands, regulatory amendments, bowhead whales, beluga management and scientific test fishery permits. Programs include harvest data collection and beluga hunt monitoring. Research/assessment projects include Pacific herring, Arctic char, and broad whitefish for different areas. A budget for the year is included.

MICROLOG 91-03374 1 fiche

The Fisheries Joint Management Committee was established in 1986 under the terms of the Inuvialuit Final Agreement to provide advice to the Inuvialuit and the federal Dept. of Fisheries and Oceans on fisheries management and relevant issues. This annual report provides a summary of the Committee's activities and projects from April 1987 to March 1989. The report includes a short summary of the organization and responsibilities of the Committee; summaries of the meetings held each year; the control of fishing on Inuvialuit lands; regulatory amendments; measures taken regarding bowhead and beluga whale management; scientific licenses approved; and the Beaufort Sea fishery strategy. Programs on harvest data collection and beluga hunt monitoring are reported, as well as research assessment projects on Arctic char, beluga whales, ringed seals, and broad whitefish. Financial data is included.

Joist enhancer

by J. Janosik. Ottawa : Canada Mortgage and Housing Corporation, Project Implementation Division, 1990. iii, 68 p. : ill.
MICROLOG 91-06251 1 fiche

Examination of a new approach to reinforcing wood joists and existing wood flooring systems, using specially formed sheet metal plates which are fastened to the bottom of wood joists to enhance their stiffness and load carrying ability through composite action. In this study, a mathematical model was developed to predict the behaviour of the reinforced joist (DUO-JOIST) based on the widely used non-homogenous beam analysis. Mathematical models were used to obtain an optimum shape and size of sheet metal plate, the most effective position of the joist enhancer in relation to the wood joist, and the effect of the joist enhancer on different sizes of wood joist. Prototypes were constructed and tested to

confirm the results of the model.

A Kalman filter integrated navigation design for the IAR Twin Otter Atmospheric Research Aircraft

by B.W. Leach. Ottawa : National Research Council Canada, Institute for Aerospace

Research, 1991. xii, 100 p. : ill. Bibliogr. (Aeronautical note ; IAR-AN-72) MICROLOG 91-04736 2 fiche (Available on fiche only)

The IAR Twin Otter atmospheric research aircraft requires more accurate, inertially-based navigation data for both track recovery and the calculation of wind gust components. This report describes the Kalman filter integrated navigation design, based on the optimal blending of data from an LTN-90-100 strapdown inertial reference system, a Decca type 72 Doppler velocity sensing system and an ARNAV R-40 airborne Loran-C receiver-sensor, available on the Twin Otter at the present. The report describes the mathematical nomenclature and the fundamental equations used to formulate a linear, discrete-time Kalman filter, as well as the subroutines used; the application of Kalman filtering to the general problem of integrated airborne navigation; complete details of the design of the system; and two sets of real flight test data acquired specifically to assess filter performance under typical aircraft operational conditions.

Kelly Lake Substation to Cheekye Substation second 500kV transmission line : environmental impact assessment report, volume 2 : atlas

Vancouver, B.C. : B.C. Hydro, 1991. xvii, 193 p. : maps. Bibliogr. MICROLOG 91-07213 4 fiche

BC Hydro is proposing to construct a second 500 kV single circuit transmission line between Kelly Lake Substation near Clinton, and Cheekye Substation near Squamish, BC., to be completed in the fall of 1996. This environmental study and impact assessment and the resource information in the atlas combine the original studies done in 1981 and 1984 with further studies done in 1989 and 1990 which covered the expanded route network. The atlas contains six map series which describe the terrain, land use and agriculture, vegetation and forestry, fish and wildlife, recreation and aesthetics, and heritage. Ten base map sheets at 1:100,000 scale are used to include all of the route alternatives.

Kelly Lake to Cheekye Substation second 500 kV transmission line : project justification

Vancouver, B.C. : B.C. Hydro, System Transmission Planning Dept., System Planning Division, System Development Group, 1991. 75 p. : ill., maps. ISBN 0-7726-1251-X. MICROLOG 91-06872 1 fiche

BC Hydro is proposing to construct a second 500 kV single circuit transmission line between Kelly Lake Substation near Clinton, and Cheekye Substation near Squamish, BC., to be completed in the fall of 1996. This report summarizes the technical and economic justification for the line, including the nature of the transfer capability restrictions and the voltage instability threat facing the Lower

Mainland and Vancouver Island transmission system; the existing major transmission system, particularly the Interior to Lower Mainland part; the expected load growth; and the generation resource development plan used here. The report also deals with planning criteria; the technical, economic and strategic aspects of the voltage stability problem; the selection of reinforcement alternatives for the Interior to Lower Mainland transmission system; the technical results of the transmission system simulation studies which confirm the system's vulnerability to voltage instability and determine the relative merits of the alternatives taken one at a time and in different combinations or sequences. A physical description and cost summary of the second transmission line project; the benefits and costs of the line; and the recommendations for reinforcing the Interior to Lower Mainland transmission system over the next 10 years, conclude the report.

Kipling Complex, new analytical chemistry laboratory (Building KJ) in situ stress measurement project for C14 well (borehole KJ)

Toronto : Ontario Hydro, Research Division, 1991. ii, 76 p. : ill. (Report ; no. 90-162-K) MICROLOG 91-07164 1 fiche

A series of in situ stress measurements were made on the proposed site of building KJ at Ontario Hydro's Research Complex on Kipling Avenue, Toronto, during November 1989 to measure the existing rock stresses in borehole KJ as part of the foundations design. Laboratory tests were performed on three rock cores from this borehole to determine Young's modulus of elasticity, Poisson's ratio and the ultimate compressive strength.

Kitimat-Skeena 287kV transmission line project : recreation and visual assessment : final report

Durante and Partners. Vancouver, B.C. : B.C. Hydro, Environmental Resources, 1990. 70 p. : ill., maps. Bibliogr. Fold. map not filmed. ISBN 0-7726-1287-0 MICROLOG 91-05133 1 fiche

This report provides a recreational and visual assessment of two alternate routes to be constructed for an additional 287 kV transmission line between Terrace and Kitimat, BC. The report identifies the potential impacts of the new line on the visual and recreation resources of the corridor and immediately adjacent areas. The study conducted a reconnaissance level survey to identify sensitive areas, as well as site-specific evaluations of more sensitive locations, and evaluated route alternatives.

A Knowledge based interpretation system of dynaflect data

by B. Lefebvre...et al. Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 18 p. Bibliogr. (Publication ; no. 724) MICROLOG 91-00968 1 fiche

Nondestructive testing for structural evaluation of pavements is a commonly used technique conducted in a short period of time with such devices as the Dynaflect. This paper presents a methodology which has been used to set up the knowledge base of an expert system to help in the on-the-spot interpretation of the results produced by Dynaflect machines. A quantitative, well known and widely used system is combined with a qualitative method which makes use of past experiments, on site visual information and knowledge techniques. The method derives, in the cases where the preceding method fails to give accurate results, a set of possible configurations of the road structure and then a global structural evaluation of the pavement which can be seen as a summary of all these configurations.

Kutcho Creek Project : acid generation testwork, phase II

Rescan Environmental Services Limited. Victoria : British Columbia Acid Mine Drainage Task Force, 1990. iv, 67 p. : ill. Bibliogr. MICROLOG 91-00489 1 fiche

The Kutcho Creek Property, located 100 km east of Dease Lake, consists of a copper-zinc-silver-gold massive sulphide deposit. A 1986 stage II environmental impact study was inadequate in several areas, delaying project approval. This acid generation testwork attempts to resolve the outstanding issues through development of a comprehensive acid mine drainage plan to prevent acidic drainage both during active mining and after reclamation and abandonment of the mine site. The first phase of 3 involved a general reconnaissance survey of the Sumac exploration adit for evidence of acid generation and sampling of rock inside the adit. This report covers Phase II testing, involving the construction and implementation of 2-tonne field test plots to examine whether blending acid-generating footwall wastes with acid-consuming wastes would prevent acid generation from occurring in field scale waste dumps. Humidity cell testwork was also completed in the laboratory on 6 samples blended with the same ratio of acid-generating, acid-consuming rock as those ongoing in the field. As well, acid base accounting tests were performed on an additional 50 core samples selected in the field representing lithologies in the Kutcho project area. Results of these tests are also reported here.

Laboratory culture of triploid grass carp

by J.W. Moore...et al. Vegreville, Alta. : Alberta Environmental Centre, 1991. vi, 82 p. Bibliogr. ISBN 0-7732-0545-4 MICROLOG 91-06669 1 fiche

In 1987, the government of Alberta began a major program to use grass carp as agents of control of aquatic weeds in irrigation canals, although the surface water temperatures are too low to allow spawning and the development of fry. It was therefore necessary to develop techniques for the laboratory culture and transport of carp. This report describes the source, transport, and receipt of carp; physico-chemical maintenance conditions; feed; growth; spinal deformities; and disease diagnosis. Two

methods were also developed and implemented for the determination of ploidy in carp.

Laboratory evaluation of a prototype vision system for automated rail profile measurement

by D. Leung. Toronto : Ministry of Transportation, Transportation Technology and Energy Branch, Rail and Advanced Transportation Systems Office, 1991. iv, 47 p. : ill.
MICROLOG 91-02969 1 fiche

Currently, two machine vision systems are commercially available for the monitoring of rail wear, but these are mainly designed for use on freight rail. While two major railroads and one transit property have installed these systems, there are concerns as to their accuracy, reliability, and effectiveness, particularly for transit operations. To address some of these concerns, a test program was initiated in spring 1988. In this program, a prototype rail profile measurement system called RIMS (Rail Inspection and Measurement System), which had originally been designed for demonstration use in a stationary indoor environment, was adapted for operation on tracks and subjected to a series of track tests. This report reviews the capabilities of the RIMS, presents the findings of the test program, and provides suggestions for improvement in the technology and recommendations for further work.

A Laboratory evaluation of silica sand from Golden, British Columbia

by P.R.A. Andrews. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, Minerals Research Program, 1985. ii, 9 p. (Report ; MRP/MSL 85-7(CR))
MICROLOG 91-04932 1 fiche

Mountain Minerals Co. Ltd., Lethbridge, Alberta, has an extensive high grade deposit of sandstone and quartzite near Golden, BC. The majority of the deposit is composed of a hard, dense quartzite, while the remainder is comprised of a friable sandstone. While processing and washing produce a silica sand which meets 'flint' grade glass sand specifications, the company is interested in establishing processes by which it can reduce the total impurities, particularly Fe₂O₃, to make it available for higher grade markets. This report presents the results of a mineralogical study conducted to determine the form of the iron oxide and the identification of the other impurities. Following this, a brief beneficiation study, including flotation and magnetic separation, was conducted. Samples of the products from the various beneficiation methods were submitted for leaching evaluation and the leached products sent for detailed chemical analysis.

Laboratory measurements of the hydrofracturing tensile strength of two large URL rock samples

by J.S.O. Lau, R. Jackson and B. Gorski. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1991. v, 48 p. : ill. Bibliogr. (Report ; MRL 91-35(TR))
MICROLOG 91-05461 1 fiche

AECL Research is conducting geotechnical research at its Underground Research Laboratory in the Lac du Bonnet batholith as part of the Canadian Nuclear Fuel Waste Management Program to assess the concept of nuclear fuel waste disposal in a vault deep in the plutonic rock mass. In support of the hydrofracturing testing program for the measurement of in situ stresses, an experiment was designed and conducted to determine the large-scale laboratory hydrofracturing tensile strength of two 600-mm diameter core samples of Lac du Bonnet grey granite obtained from the 240 level of the laboratory. A subvertical hydrofracture was created in one specimen which had microcracks parallel to the core axis. A subhorizontal hydrofracture was created in the other specimen which had microcracks perpendicular to the core axis. This report describes the laboratory hydrofracturing test apparatus and procedure developed, and presents and discusses the results obtained from the tests.

Labour market : recent developments -- Rev.

by K. Kerr. Ottawa : Library of Parliament, Research Branch, 1990. 18 p. Bibliogr. (Current issue review ; 89-1E) French ed. (*Le Marché du travail...*) on the same fiche. Revised 26 October 1990. ISBN 0-660-13898-0
MICROLOG 91-04858 1 fiche

Labour is exchanged in a market best described as being in a constant state of flux. Recent estimates suggest that more than four million people secure employment each year, while a similar number become unemployed or leave the labour market. Conditions in this market throughout the 1980s were influenced by a number of factors, which include the devastating 1981-82 recession, the disproportionate growth in regional employment during the recovery, and an increase in the incidence of long duration unemployment. This review focuses on these subjects.

Labrador current variability study : current meter observations, October 1985 to January 1986

by R.R. Lively and B. Petrie. Dartmouth, N.S. : Bedford Institute of Oceanography, 1990. v, 146 p. : ill., maps. Bibliogr. (Canadian technical report of hydrography and ocean sciences : no. 91) ISBN 0711-6774 MICROLOG 91-03290 2 fiche

The Labrador current variability study was a joint project of Petro-Canada, Mobil, Esso, and the Husky/Bow Valley petroleum companies and the federal government to obtain basic measurements of currents on the eastern slope

of the Grand Bank which is swept by the Labrador current and to determine how the currents on the adjacent shelf are influenced by the Labrador Current. In total, 15 current meter moorings and 14 guard buoy moorings were set at 9 separate sites in Flemish Pass, of which 10 current meters and 12 of the guard buoy moorings were lost due to fishing activity. This report presents statistics of current speed and direction, temperature, salinity and pressure. The data includes means, extrema, and standard deviations of the basic and low-pass filtered data series. Time series plots of all variables, progressive vector diagrams, joint distribution diagrams of the velocity components and of temperature and salinity are also included. In addition, tidal analysis of currents, temperature, salinity and density are presented.

Lancaster Sound Region : a coastal atlas for environmental protection

by D.F. Dickens...et al. Yellowknife : Environment Canada, Environmental Protection, 1990. v, 339 p. : maps. Bibliogr. ISBN 0-921623-08-9 MICROLOG 91-03624 4 fiche

This atlas is designed for planning and implementing year-round oil spill countermeasures in both the coastal and offshore areas of the Lancaster Sound region. A sensitivity ranking system is included based on the human use, biological resources, and physical environment of the study area, providing users with a tool to make critical oil spill cleanup decisions either on site in the event of a spill or in a planning and training situation. The study area includes Lancaster Sound, Barrow Strait, Navy Board Inlet, Admiralty Inlet, Prince Regent Inlet south to

Bellet Strait, the eastern entrance to Viscount Melville Sound as far west as Bridport Inlet on Melville Island, and Byam Martin Channel between Bathurst and Melville Islands. Information is organized by map scale, moving from summary to regional to operational. Summary information is given on areas of extreme and high sensitivity, special status areas, winter ice zones and March ice edges, ice drift, ice break-up, open water season, mean tide contours, currents, and ice freeze-up.

This report presents the results of an experiment in several schools in Toronto during 1988-89 on the use of laptop computers as effective aids to students who have poorer than average fine motor control and are thus disadvantaged in the physical act of writing. Portable computers were loaned to be used freely at school and at home. Samples of computer-written and hand-written works were collected over an 8-month period to evaluate the success of the experiment.

Laser treatment of Al-bronze : final report

by G. Palumbo, R.T. Lassau and T. Kilp. Mississauga, Ont. : ORTECH International, 1989. 131 p. : ill. Contractor: Ontario Research Foundation. Metals Technology Laboratories, Engineering Performance Section, report no. 57-10908A. CANMET contract: 79219-01-SQ.
MICROLOG 91-04711 2 fiche

This final report provides a comprehensive summary and evaluation of the results derived from earlier reports on the laser surface modification program and current results of the refinement and optimization of laser processing parameters and the corrosion and mechanical properties of laser treated Al-bronze specimens. Both vapour and electrochemical deposition techniques were investigated as means for the application of Fe-layers.

Leaching of 2-(thiocyanomethylthio)benzothiazole (TCMTB) from surface treated lumber

by P.K. Krahn. Ottawa : Environment Canada, Conservation and Protection, Environmental Protection Service, Pacific and Yukon Region, 1990. xv, 88 p. : ill. Bibliogr. (Regional program report ; 90-06)
MICROLOG 91-04385 2 fiche

The chemical 2-(thiocyanomethylthio)benzothiazole (TCMTB) is a fungicide registered for use as an antisapstain chemical to protect dimensioned lumber during transport to export markets. It is highly toxic to fish in both fresh and seawater. The leaching of this chemical was monitored during rainfall at a sawmill located on the tidally influenced section of the North Arm of the Fraser River from October 1989 to January 1990. The study determined the concentrations of TCMTB and its degradation products in rainwater leachate from surface treated lumber and in the Fraser River adjacent to storm water outfalls, which drain TCMTB treated lumber storage yards. Samples were collected of rainwater, leachate dripping directly from treated lumber, and runoff discharging from the treated lumber storage yard. Fraser River water was sampled at various locations and depths adjacent to the discharge during rainfall. The samples were collected as half hour or one hour composites and analyzed by high performance liquid chromatography for the presence of TCMTB, 2-(Methylmercapto)benzothiazole (MMBT), 2-Mercaptobenzothiazole (MBT), and benzothiazole (BT).

Leak rate experiments for through-wall artificial cracks

by J.M. Boag, M.T. Flaman and B.E. Mills. Toronto : Ontario Hydro, Research Division, 1991. ii, 31 p. : ill. Bibliogr. (Report ; no. 90-289-K) MICROLOG 91-07173 1 fiche

The possibility of a sudden and complete rupture of large diameter piping in nuclear power plants represents a serious concern because of its impact upon the public and the severe and costly damage which could result in the reactor buildings and equipment. Ontario Hydro employs the leak-before-break (LBB) approach to demonstrate that sudden, catastrophic failure of critical nuclear heat transport piping will not occur. The concept relies on the application of elastic-plastic fracture mechanics and the concept that pipe deterioration would be progressive, not a sudden occurrence. This report describes an extensive experimental leak rate testing

program which supports analytical efforts regarding use of the LBB concept. It presents details of the test fixture and measurement techniques, some experimental leak rate results, and a comparison between experimental results and a leak rate predictive computer model.

La Législation agricole fédérale jusque'en 1988 -- Rev.

Ottawa : Agriculture Canada, 1989. 45 p. L'éd. anglaise (Federal agricultural legislation...) : 91-01075/1. ISBN 0-662-95528-5 MICROLOG 91-03963 1 fiche

Pendant plusieurs années, Agriculture Canada a distribué une publication préparée par les Services juridiques du ministère et intitulée 'Législation agricole fédérale jusqu'à 1985', qui remplaçait une publication antérieure sur la législation agricole fédérale jusqu'à 1977. Les deux brochures donnaient un aperçu des lois fédérales administrées par le ministre de l'Agriculture et touchant le secteur agricole. A la suite de différents changements, la publication nécessitait une nouvelle mise à jour et avait besoin de sérieuses modifications. La version que présente ce document résume donc la teneur des lois adoptées jusqu'au 31 décembre 1988.

Lexique MRN

Toronto : Ministère des richesses naturelles, 1990. xi, 461 p. Bibliogr. *Bilingue (MNR lexicon)*. ISBN 0-7729-6936-1
MICROLOG 91-00027 5 fiche

Ce document présente la première édition du Lexique des richesses naturelles. Il constitue une compilation de termes, expressions et titres couramment utilisés dans les diverses communications du Ministère des richesses naturelles de l'Ontario et s'adresse tout particulièrement aux traducteurs et rédacteurs de langue française. De plus, il couvre la foresterie, la géographie, l'exploitation minière, la cartographie, la gestion de la faune, la navigation, la chasse, les pêches, les parcs, les terres et les eaux, l'aviation et la gestion des incendies, ainsi que les ressources en agrégats.

La Libéralisation des échanges et l'intégration socio-économique nord-américaine : points de vue des Etats-Unis

éditeur, P.P. Proulx. Ottawa : Institut de recherches politiques, 1990. x, 182 p. Bibliogr. *Résumé détaillé des textes présentés au colloque de l'Association québécoise des études américaines. Bilingue (Canada-United States trade...)*. ISBN 0-88645-102-7
MICROLOG 91-02582 3 fiche

Le colloque avait pour but de faire connaître les perceptions qu'ont nos voisins du Sud de divers aspects de la libéralisation bilatérale du commerce entre le Canada et les Etats-Unis. Les conférenciers ont traité des questions suivantes, portant toutes sur la libéralisation des échanges: aspects historiques; processus législatifs, administratifs et politiques tant du point de vue national que régional; le dossier culturel; la réaction des multinationales américaines en termes d'investissement direct étranger au Canada; et, l'impact de la politique de la défense américaine sur le commerce et le développement industriel et régional. Ce document présente le point de vue des Etats-Unis.

La Liberté de circulation et d'établissement, l'union économique et la constitution

par M. Dunsmuir. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 27, 25 p. Bibliogr. (Etude générale ; BP-224F) *L'éd. anglaise (Mobility rights...)* sur la même fiche. ISBN 0-660-93001-3
MICROLOG 91-01127 1 fiche

Bien que l'union économique et le libre-échange interprovincial ont été deux des principales justifications de la Confédération canadienne, les dispositions de la Constitution ne permettaient pas d'en assurer la réalisation. Au début des années 1980, des voix se sont élevées pour réclamer un renforcement de l'union économique canadienne. Diverses modifications constitutionnelles ont été proposées, la plus profonde visant à élargir la portée de l'article 212 de la Loi constitutionnelle de 1867 interdisant la perception de droits de douane interprovinciaux, dans le but de l'appliquer à toutes les barrières au commerce interprovincial. Ce document se penche sur cette question.

A Lichenometric study of Holocene rock glaciers and neoglacial moraines, Frances Lake map area, southeastern Yukon and Northwest Territories

by A.S. Dyke. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1990. 33 p. : ill., maps. Bibliogr. (Bulletin ; 394) ISBN 0-660-13739-9
MICROLOG 91-01862 1 fiche

The Frances Lake map area of the northeastern Canadian Cordillera is crossed by northwest-southeast trending ranges of the Selwyn Mountains. Rock glaciers and neoglacial moraines were mapped during general surficial geological mapping in 1981 and selected features were studied in detail in 1983 from 6 fly camps in the northeastern part of the study area. Lichenometric ages are thought to pertain to time elapsed since stabilization of substrate, roughly corresponding to time elapsed since deposition of moraines and since initial flow of a rock glacier lobe or tread off from its parent apron. The ages of rock glaciers and moraines were assessed through lichenometry, the only dating technique that can be applied to nearly all substrates. This report discusses the lichenometric method used and presents the results from the 6 study areas as well as a regional summary and correlation.

The Lieutenant-Governor's Conference : celebrating Alberta's families : conference report

Edmonton : Alberta, 1990. 42 p. Bibliogr. Appendix (110 p.) laid in.
MICROLOG 91-00331 2 fiche

The conference began a process of discussions with Albertans throughout the province, to explore strategies for strengthening all families. Delegates from across the province who attended the conference identified a series of priority issues that are critical to ensuring a nourishing and supportive environment for Alberta families. This document is a record of the conference and it is also a discussion document for Albertans. It describes the Agenda for Action for the Premier's Council in Support of Alberta Families, whose mandate is to probe the issues further with people throughout the province. It also describes the most critical issues facing Alberta families today, as seen by conference attendees.

Life history patterns and population fluctuations of snow crab *Chionoecetes opilio* in the fjord of Bonne Bay on the west coast of Newfoundland, Canada, from 1983 to 1990

by M. Comeau...et al. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Region, Science Branch, 1991. ix, 73 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1817) ISSN 0706-6457
MICROLOG 91-07094 1 fiche

Benthic stages of snow crab resident in Bonne Bay, Newfoundland, are isolated from the rest of the Gulf of St. Lawrence by a 50 m deep sill at the entrance of the fjord, thus facilitating long-term studies. The reproductive behaviour of snow crab has been studied in Bonne Bay since 1982, mainly by diving during the summer and year-round monitoring. This study examined the factors influencing recruitment to early benthic stages, the terminal molt to morphometric maturity as defined by Conan and Comeau (1986) in males and females, and the synchronization of its life cycle (growth and reproduction) with the seasonal fluctuation of the environment.

Life-history data on alewife and blueback herring, Mactaquac Dam, 1982-88

by B.M. Jessop and W.E. Anderson. Halifax : Dept. of Fisheries and Oceans, Biological Sciences Branch, Freshwater and Anadromous Division, 1991. vii, 42 p. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 829) ISSN 0706-6465
MICROLOG 91-04511 1 fiche

Creation of a large headpond on the Saint John River, NB, by the completion of the Mactaquac Dam in 1967 led to the rapid development of major stocks of alewives and blueback herring, collectively termed gaspereau. In 1973, a study was begun of the life history and population dynamics of the gaspereau to establish if the populations are homogeneous within the river or form distinct local populations; evaluate the influence of the commercial fishery and hydroelectric development on the populations; and provide a data base for the establishment and evaluation of management programs. This report presents tabulations of the life-history data collected annually between 1982-88, including species, sex, length, weight, age, maturity and spawning history.

Lignes directrices du Conseil de recherches médicales du Canada : recherche sur la thérapie génique somatique chez les humains

Conseil de recherches médicales (Canada).
Ottawa : le Conseil, 1990. 48 p. : ill. Bibliogr.
L'éd. anglaise (*Medical Research...*) : 91-03497/1. ISBN 0-662-95990-6
MICROLOG 91-03496 1 fiche

Des progrès récents dans les domaines de la génétique et de la biologie moléculaire offrent un espoir de traitement pour certaines de ces graves maladies génétiques. Souvent appelée thérapie génique somatique, cette approche comporte l'insertion, dans les cellules corporelles du sujet atteint, d'un matériel génétique nouveau chargé de remplir des fonctions que les gènes hérités fautifs sont incapables d'exécuter. Le but de ce document est de : décrire les fondements scientifiques et médicaux de la recherche dans ce domaine; décrire les risques et les avantages possibles pour les patients, leur parenté et la société en général; définir les préoccupations éthiques qui doivent être résolues avant que l'on procède à la recherche sur la thérapie génique somatique chez des patients; et, proposer des modalités de réglementation pour garantir une prise de décision responsable et prudente dans ce domaine.

Limitations of estimating ice loads from the dynamic response of a massive bridge pier

by G. Van Der Vinne. Edmonton : Alberta Research Council, Resource Technologies Dept., 1988. vi, 54 p. : ill. Bibliogr. (Open file report ; no. 1988-12)
MICROLOG 91-02464 1 fiche

Although field measurements of ice forces against bridge structures in cold regions have been attempted since the late 1800s, the amount of data available is still quite small and of questionable quality. A numerical model which originally used Fourier transforms to calculate ice forces from measurements of bridge pier accelerations was modified because it did not work well for data sets longer than one second. The modified model uses a double integration technique to solve the single-degree-of-freedom system which was used to describe a massive pier near Hondo, Alberta. This report evaluates the effectiveness of using this modified model to calculate ice forces for long duration crushing events. When the double integration model was developed, the major concerns were integration accuracy, baseline determination, and data precision. Five events, with durations ranging from 2-5 seconds, were analyzed using the optimized model. This report evaluates the results from the recalculated model.

Liquefaction potential of dense backfill in Ontario mines

Placer Dome Inc. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1986. 100 p. : ill. Bibliogr. (Report ; MRL 86-162(COMDA))
CANMET contract: 23440-6-9039-01-SQ.
MICROLOG 91-06278 2 fiche

Mill tailings have been used for underground backfill in Ontario mines since the late 1940s. The tailings were processed to remove a large part of the ultra-fine solids (up to 70 percent) because of the possibility of liquefaction of this fine material. The fines then had to be disposed of on the surface. The Dome Mine operation of Placer Dome Inc. in South Porcupine, Ontario, has developed a mine backfill system based on the utilization of 100 percent of the mill tailings in the stope. This report details the work conducted by Dome Mines to investigate the liquefaction potential of densified fine grained tailings backfill. The work program consisted of a state-of-the-art review of the liquefaction potential of backfill and soils; laboratory and in situ tests to determine the behaviour of paste fills and index their properties; and specific blasting tests carried out to simulate the impact of seismicity on the grained, dewatered tailings backfill, commonly termed paste backfill.

Liste des poissons du Canada

Don E. McAllister ; traduction: Jacqueline Lanteigne et Michèle Bélanger Steigerwald ; révision Denise Campillo-Cerf. Ottawa : Musées nationaux du Canada, Musée national des sciences naturelles, 1990. 310 p. : ill. Bibliogr. (Syllogeus ; no 64). *Bilingue* (*A List of fishes...*). ISSN 0706-576X ISBN 0-660-13055-6
MICROLOG 91-02485 4 fiche

Cet ouvrage présente toutes les espèces connues de poissons vivant dans les eaux douces, saumâtres et marines du Canada. Les espèces sont classées par familles, ordres et classes, et parfois par sous-taxons, et pour chacune apparaissent les noms vernaculaires anglais et français et le nom latin avec l'auteur et la date de la description. On y trouve aussi des détails sur l'habitat ou le mode de vie de chaque espèce (marine, anadrome, catadrome, euryhaline ou dulçaquicole) et sur l'océan ou le bassin versant dans lequel l'espèce apparaît au Canada (Pacifique, Arctique, golfe du Mexique, Atlantique). Les sous-espèces reconnues ou bien établies sont indiquées. Les notes précisent les espèces nouvellement ajoutées à l'ichtyofaune canadienne, les modifications récentes de la taxonomie ou

de la nomenclature et les extensions de l'aire de répartition des espèces.

Literature review for biological monitoring of heavy metals in aquatic environments

E.V.S. Consultants. Victoria : British Columbia Acid Mine Drainage Task Force, 1990. xi, 127 p. Bibliogr.

MICROLOG 91-00490 2 fiche

Low pH and high levels of toxic heavy metals in acid mine drainage (AMD) are a serious threat to aquatic life, even at very dilute concentrations. Decisions regarding the selection of appropriate testing require compromise between the short time span and sensitivity of proactive techniques such as biochemical indicators and the ecological relevance and importance of reactive technology such as community health assessment. This literature review developed a list of the most promising and proven biomonitoring techniques to measure impacts of dilute AMD or treated AMD on the aquatic environment, assist in confirming that permitted release of treated AMD, and available dilutions, are in fact protecting downstream aquatic resources, and assist in confirming that water quality objectives set for receiving waters are low enough to achieve the designated use to be protected. The review summarizes the available literature on aquatic biomonitoring techniques, with a focus on effects of low pH and elevations of heavy metal concentrations.

A Literature review of bird use of farmland habitats in the Great Lakes, St. Lawrence region

by K. Freemark, H. Dewar and J. Saltman. Edmonton : Canadian Wildlife Service, 1991. ii, 200 p. Bibliogr. (Technical report series ; no. 114) *Bilingual (Une Etude bibliographique...)*. ISSN 0831-6481 ISBN 0-662-18398-3

MICROLOG 91-04443 3 fiche

The Canadian Wildlife Service is currently responsible for advising on risks to wildlife and their habitats associated with the new or continuing use of pesticides in Canada. To facilitate the development of exposure scenarios for risk assessment and the design of field studies, databases and supporting documentation were developed on the extent and bird use of farmland habitat in the mixed-wood plain (MWP) ecozone in the Great Lakes-St. Lawrence region. Data was abstracted from scientific publications, graduate theses and government reports since 1950 for studies conducted in Canada and the US with agricultural practices similar to those in the MWP. Bird use data (37 percent from Canadian study locations) was tabulated for 56 farmland habitats (including 35 crops) by species, month, activity (e.g., feeding, nesting), and intensity of use. This report presents the results of that study, including data on land use by type of crop, bird use by crop, and an annotated bibliography.

A Literature review of site preparation and conifer release treatments using 2,4-D, glyphosate or hexazinone herbicides, part A : timing of application

by M.E. Carruthers and W.D. Towill. Thunder Bay, Ont. : Ministry of Natural Resources, Northwestern Ontario Forest Technology Development Unit, 1988. 15 p. : ill. Bibliogr. (Technical report ; no. 18)

MICROLOG 91-00054 1 fiche

Knowledge of the appropriate time period (the stage of growth or point in season) for herbicide treatments on cutover sites in the boreal forest is important for achieving optimum control of the competing species and minimizing physical damage to the conifer crop trees. This paper reviews suggested application times for 2,4-D, glyphosate (Vision) and hexazinone (Velpar L, Pronone) as documented in the literature. Emphasis was placed on those results relevant to boreal conditions. Maritime studies and others are discussed separately, since climate and species with potential for competition with conifers are different than in the boreal forest of northern Ontario.

Literature review on the greenhouse effect and global warming

[by] M. English, R.K.W. Wong and B. Kochtubajda ; for Alberta Dept. of Energy...et al. Edmonton : Alberta Energy, 1990. 52 p.

MICROLOG 91-07008 1 fiche

This project developed a bibliography of references from 1980-90 containing 1557

citations, along with a review of 501 publications from 1988-90 on computer modelling of world climate, monitoring of the atmosphere and climate, potential impacts of climate change, potential strategies for responding to climate change, and technological solutions. For each of the review publications, a questionnaire which addressed the key concerns of government and industry was completed and analyzed to produce the data that show the degree to which scientific consensus exists on the various topics. Both the bibliography and the reviewed papers are computerized and accessible online. This document describes the methodology involved in producing the bibliography, the review, the questionnaire, and the analysis of the questionnaire. It then discusses the results of the review.

Living downtown in Toronto : consultant's study

Berridge Lewinberg Greenberg Ltd. ; in association with Dettlef Mertins. Toronto : Toronto Planning and Development Dept., 1990. 2 v. : ill., maps. Bibliogr. On cover: *Cityplan '91, 21. Contents: Vol. 1 : Report -- vol. 2 : Appendices*.
MICROLOG 91-05049 4 fiche

As part of the Cityplan process, it is the mandate of this study to review the current Official Plan regulations governing residential

development in the downtown, specifically in the mixed-use zones, and to make recommendations for a new set of regulations which would govern mixed-use developments in downtown Toronto. This paper begins with an explanation of how the regulatory system has evolved. It then discusses the issue of regulation in the downtown area, and analyzes the principles and realities of developing housing within a mixed-use context. It also provides a detailed study of the built form issues to be dealt with in Toronto and in six other North American cities. It discusses land use, the issues of open space and recreation, social objectives, and bonusing.

MICROLOG 91-02543 1 fiche

Local school teams (LST) are multidisciplinary teams for the assessment of students' learning problems, the development of plans for intervention, and the monitoring and evaluation of the effectiveness of interventions. This report presents the results of a survey of Toronto Board schools on local school teams. The survey sought information about: 1) the composition and functions of local school teams, 2) the characteristics of students referred to the team, 3) team members' experiences with their team, and 4) the evaluation of the team and the personal importance attributed to LST goals.

A Local seismic survey at Denison Mine

by M. Plouffe. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. iv, 34 p. : ill. Bibliogr. (Report ; MRL 91-18(TR))
MICROLOG 91-03595 1 fiche

The monitoring and subsequent analysis of the mining induced seismic activity in Northern Ontario became a mandate of CANMET in 1984 when the Canada/Ontario/Industry Rockburst Project was initiated. In order to carry out local seismic activity surveys in the epicentral distance range not covered by two existing networks, CANMET acquired, in 1989, a state-of-the-art portable seismograph. Denison Mine was chosen as a test site for this seismograph. During the survey, conducted in the spring of 1990, 370 events were recorded, analyzed and compared with data from other Northern Ontario mines.

Localized corrosion initiation on magnesium alloys

by R.J. Brigham. Ottawa : Canada Centre for Mineral and Energy Technology, Metals Technology Laboratories, 1990. v, 10 p. Bibliogr. (Report ; MTL 90-51(TR))
MICROLOG 91-02421 1 fiche

The initiation of localized corrosion (pitting and crevice corrosion) has been studied extensively with alloys exhibiting passive behaviour, first with austenitic stainless steels and then with martensitic stainless steel and nickel. In all cases, a go/no-go corrosion initiation threshold existed as a function of temperature. A theoretical approach was developed to explain the stability boundary as the environment became more aggressive due to an increase in temperature or chloride concentration or a decrease in pH. Because magnesium and magnesium alloys are known to show passive behaviour at high pH, it was decided to expand this approach to investigate the stability of the passive state in magnesium alloys as a function of temperature, chloride concentration and pH. The ranking of alloys by this go/no-go methodology addresses only the resistance to the initiation of localized corrosion and not the subsequent kinetics of attack.

Locating corrosion on operating transmission lines with an infrared camera : a feasibility study

by P.G. Buchan. Toronto : Ontario Hydro, Research Division, 1990. 4 p. (Report ; no. 90-64-K)
MICROLOG 91-00810 1 fiche

Experiments with a high resolution infrared camera were marginally successful in detecting localized zinc loss from the core wire of an operating ACSR conductor under ideal laboratory conditions. Tests with a corroded core wire were not attempted, but indications are that small patches of severe corrosion or

broken strands should be detectable with special effort. Uniform corrosion, no matter how severe, would not provide enough contrast between the hot and cold parts of the conductor to insure a positive indication of corrosion. As a means of locating and quantifying corrosion on ACSR conductors, the method does not look practical with current technology.

Location of facilities on a network with edge failures

by H.A. Eiselt, M. Gendreau and G. Laporte. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. ii, 27 p. : ill. Bibliogr. (Publication ; no. 755)
MICROLOG 91-02546 1 fiche

This paper analyzes a location problem on a network with possible edge failures. It is assumed that every edge has a probability of failure, and that failures can never occur on two edges simultaneously. The problem consists of locating facilities on the network so that the total expected demand disconnected from the facilities is minimized. This problem occurs naturally in the fields of computer and telecommunications networks. The paper describes an exact algorithm for the problem and provides a numerical example.

LOGPLAN II : a model for planning logging and regeneration activities

by R.M. Newnham. Chalk River, Ont. : Forestry Canada, Petawawa National Forestry Institute, 1991. v, 38 p. : ill. Bibliogr. (Information report ; PI-X-102) ISSN 0706-1854 ISBN 0-662-18661-3
MICROLOG 91-04223 1 fiche

LOGPLAN II is a linear-programming based model that can be used as a tool in formulating a forest company's annual operating plan. Given the resources of wood, equipment, and planting stock that are available, the model schedules harvesting and regeneration activities in such a way that the cost of meeting mill demands is minimized. The model can also be

used to test a number of different planning strategies to ensure that the most effective is selected. This report outlines the development of the model since the 1970s; gives formulae for the objective function and the constraints that may be imposed on the harvesting system; illustrates the method of constructing a flowchart for the system; describes the procedure for running the different programs to complete an analysis; and gives examples of input tables and output reports.

La Loi sur la faillite : les révisions proposées -- Rév.

par H. Morrison et M. Smith. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 27 p. Bibliogr. (Bulletin d'actualité ; 88-16F) *L'éd. anglaise (The Bankruptcy Act : proposed...) sur la même fiche.* Révisé le 27 novembre 1990. ISBN 0-660-93197-4
MICROLOG 91-04801 1 fiche

La Loi sur la faillite est une loi commerciale qui prévoit la répartition ordonnée et équitable de l'actif d'une personne insolvable entre ses créanciers. Elle offre également à un débiteur la possibilité d'éviter la faillite en réorganisant ses dettes, avec l'autorisation de ses créanciers. La Loi actuelle date de 1949 et a grand besoin d'une révision. Six projets de loi de réforme omnibus ont été déposés au Parlement entre 1975 et 1984, mais aucun d'eux n'a été adopté. Ce document présente les dernières propositions du gouvernement visant à réviser la Loi sur la faillite.

Long-lived radioactive dust characterization in uranium mill operations

by J. Bigu. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. ii, 30 p. : ill. Bibliogr. (Report ; MRL 90-34(TR))
MICROLOG 91-04538 1 fiche

Little information is available on the long-term health effects of worker's exposure to long-lived radioactive dust (LLRD) produced in underground uranium mine and uranium mill operations, nor is such data available on either LLRD chemical make-up or size distributions in uranium mines and mills. This paper presents experimental data collected in a uranium mill, where LLRD is generated in the course of mechanical and physico-chemical unit operations carried out in the separation and refining processes of uranium, or uranium chemical compounds from uranium ores. The data pertains to the main mechanical and physico-chemical milling operations, including ore transportation by conveyor belt, crushing, grinding, screening, acid leaching, counter-current decantation, solvent extraction, yellowcake precipitation, yellowcake drying and yellowcake packaging. Measurements were conducted of LLRD and radon progeny associated with dust in the 1-30um size range, and radon progeny in the submicron size range. A variety of other dust and

radioactivity measurements were also carried out.

Long-lived radioactivity associated with dust samples from Denison Mines Ltd.

by J. Bigu. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. iv, 48 p. : ill. Bibliogr. (Report ; MRL 90-99(TR)) MICROLOG 91-00381 1 fiche

Because radionuclides are contained in uranium ores, and hence in dust particles produced in the course of unit mining and milling operations, it has been suggested that there might be a relationship between dust collected on filters and the radioactivity associated with the dust. This suggestion was partly confirmed when radioactivity (alpha particle) measurements were carried out on a number of air samples (taken from underground uranium mines and uranium mills) on which total dust and silica dust mass measurements had previously been made as part of a routine program conducted for a uranium mining company. The air samples measured and analyzed in this study corresponded to samples collected from 1987-90.

Long-range planning of power distribution systems : primary networks

by M. Carneiro, P.M. França and P.D. Silveira. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. ii, 25 p. : ill. Bibliogr. (Publication ; no. 791) MICROLOG 91-06347 1 fiche

This paper deals with the expansion planning of power distribution systems. An optimization model that considers substation location and sizing, primary feeder routing and reconductoring simultaneously is used to design expansion plans. The model considers the fixed and variable costs for all new elements and also for the existing ones when expansion is taken into account. The feeder network is modeled as a network flow problem where each feeder section can be represented independently.

Long-range planning of power distribution systems : secondary networks

by M. Carneiro, P.M. França and P.D. Silveira. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. ii, 24 p. : ill. Bibliogr. (Publication ; no. 792) MICROLOG 91-06346 1 fiche

The paper presents an optimization-based methodology for low-voltage distribution network design. The system is composed of mathematical models for a distribution transformer location, secondary feeder routing and transformer sizing, and primary-transformer interconnection. An heuristic solution approach is used which tests the actual installation cost for an increasing number of transformers until the point of minimum cost solution that meets the forecast demand and problem constraints can be identified. Results are compared with those obtained by using an empirical approach.

Long-term creep assessment of candidate metals for high level nuclear waste disposal containers : interim report

by B. Teper. Toronto : Ontario Hydro, Research Division, 1990. iii, 21 p. : ill. Bibliogr. (Report ; no. 90-241-K) MICROLOG 91-05279 1 fiche

Several alternative containers are being developed for disposal of used fuel bundles from CANDU nuclear power stations. The outer shell of the containers will be made of titanium or copper and one design has a steel cask supporting the outer shell. To prevent container failure, strain on the outer shell and the steel cask cannot exceed safety limits. As part of the long-term assessment program for the container, 500-year creep is estimated in high-purity oxygen-free copper, commercially pure titanium and mild steel at a temperature of about 125°C. Tests were conducted to measure creep in steel and titanium and creep in copper was estimated using available literature.

Long-term monitoring and database development for applied anaerobic digestion technology in Canada : Annual report

Canviro Consultants Ltd. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. ix, 71 p. : ill. Bibliogr. CANMET contract: 51SZ 23216-5-7131. CSI 22109.013. ISBN 0-662-17646-4 MICROLOG 91-01229 1 fiche

The objectives of this project were to develop a computerized database to contain engineering process design information from anaerobic facilities treating agricultural and industrial wastes in Canada, to develop a digester process monitoring and data collection program, to update the database with operational data and to develop a computer conferencing system for information exchange. This annual report summarizes the activities of the database and

computer conferencing system and the monitoring program for 1986. A discussion on current and future trends in anaerobic digestion technology in Canada, the U.S. and Europe is also presented along with a state-of-the-art review of anaerobic digestion systems. The data presented in this report were obtained either from system operators or from the analysis of samples obtained from the various sites.

Looking up at the region : regional issues from a community development perspective

by P. Boothroyd. Vancouver, B.C. : University of British Columbia, School of Community and Regional Planning, 1991. 26 p. Bibliogr. (Canadian planning issues ; no. 29) ISSN 0828-2390
MICROLOG 91-04788 1 fiche (Available on fiche only)

This paper argues that with the decline of the welfare state and the revival of the community as a social force, regional planning theorists will have to turn their attention to a new set of social issues. Without neglecting their responsibility to informal state policy on regions, their new supplemental mission will be to provide theoretical support for community planners creating regional processes and institutions from the bottom up. The paper is written from a Canadian perspective and most of the examples and references given are Canadian.

Low temperature thermal degradation studies of styrene cross-linked vinyl ester and polyester resins

by J.A. Hiltz. Dartmouth, N.S. : National Defence, Research and Development Branch, Defence Research Establishment Atlantic, 1988. iv, 32 p. : ill. Bibliogr. (DREA technical memorandum ; 88-211)
MICROLOG 91-00148 1 fiche

This paper describes an analytical method for the identification of the volatiles produced by the thermal and thermo-oxidative degradation of polymeric materials at temperatures up to 400C in both an inert (He) and a reactive (air) atmosphere. The method utilizes a concentrator unit coupled to a capillary GC/MS system. The concentrator includes a thermal desorption unit where the sample is heated and the degradation occurs, and traps to adsorb the degradation products. The capillary GC/MS with data system separates, detects, and facilitates identification of the volatiles produced by the plastic under study. The data obtained provides useful information on the potential hazards involved with the introduction of various plastics on naval vessels.

Main achievements and perspectives of research into the early sea life period of Kamchatkan salmon species

by V.I. Karpenko. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1990. 11 p. (Canadian translation of fisheries and aquatic sciences ; no. 5494) Originally published in Russian. Paper presented at the Meeting of Soviet and Canadian Scientists on Joint Research in the North Pacific. ISSN 0704-3716
MICROLOG 91-01001 1 fiche

Research into the early sea life of Kamchatkan salmon is centred in the inshore waters of the Sea of Okhotsk and the Bering Sea. This study assessed the abundance of year classes and of the conditions which determine it. The paper determines the causes and assesses the extent of mortality of juveniles in estuaries and coastal waters in the main fishery regions, which produce over 90% of the total catch of salmon in Kamchatka. Investigations were begun in Avachynskaya Bay in 1974, and in 1975 in Karaginskaya Bay of the Bering Sea. The basic features of the biology of juveniles of salmon species are described, including seasons of feeding, offshore migration, growth, feeding, nutrient requirements and food links, as well as biocoenotic relationships.

Major gold producers in Canada

by K. Mailhot. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1991. 82 p. (Report ; MSL 91-49(LS))
MICROLOG 91-04796 1 fiche

Report identifying major gold producers in Canada; collating data on annual production for major producers; and identifying principal technical and operational contact people. The report is limited to companies which had a gold output over 50,000 oz. in 1989. Data were collected by consulting several handbooks, reports and journal articles and date from 1988. For each company, the global gold production is estimated by summing, over all mines owned by the company, the product of mine production by the percent of shares owned by the company.

Major primary timber processing facilities in British Columbia, 1990

Victoria : Ministry of Forests, Industry Development Branch, 1991. 33 p. CSI 37107.007.
MICROLOG 91-06148 1 fiche

Annual report on the operating timber processing facilities in the province which used logs as their main source of wood material. Coverage of the industry does not include re-manufacturing plants, with the exception of pulp and paper mills. Information was taken from survey forms submitted by the mills, not all of which responded. Other sources include trade publications, directories and corporate annual reports. Categories include chip mills, log home mills, lumber mills, pole and post mills, pulp and paper mills, shake and shingle mills, and veneer, plywood and panel mills. For each mill, information is given on location,

product, timber supply unit, 8-hour output and annual output.

Major transgressive-regressive cycles in Middle to Late Visean rocks of Nova Scotia

by P.S. Giles : a joint project with the Canada Dept. of Regional Economic Expansion [and] Nova Scotia Dept. of Mines and Energy. Halifax : Dept. of Mines and Energy, 1991. 27 p. : ill. Bibliogr. (Paper ; 81-2)
MICROLOG 91-01950 1 fiche

The Windsor Group of Middle to Late Visean age is characterized by marine evaporites including gypsum, anhydrite, halite and minor potash; by nonmarine to marginal marine, fine grained terrigenous rocks; and by fossiliferous marine limestone and dolostone. Widely distributed throughout central and northern Nova Scotia, rocks of the Windsor Group contribute substantially to the mineral industry in the province, primarily through the provision of large reserves of gypsum and halite. This paper describes the lithostratigraphy and major transgressive-regressive cycles of the area, the time significance of the major cycles, and the origin of the cycles.

This report analyzes the potential for Canadian companies to provide goods and service to the defence sector in Malaysia. Information provided includes: background on the Malaysian Armed Forces, future plans, local capabilities, procurement, product promotion and support, Canadian involvement in the 1990 Defence Services Asia Exhibition, and Malaysian knowledge of Canadian defence industry capabilities. Appendices provide a description of the procurement system of the Malaysian Ministry of Defence, defence agents in Malaysia, and a bibliography. CA EX PA

The Mammals of British Columbia : a taxonomic catalogue

by D. Nagorsen. Victoria : Royal British Columbia Museum ; Ministry of Environment, Wildlife Branch, 1990. v, 140 p. : maps. Bibliogr. (Royal British Columbia Museum memoir ; no. 4) ISSN 0843-5383 ISBN 0-7718-8917-8 MICROLOG 91-02227 2 fiche

Technical reference to taxonomy and nomenclature of B.C. mammals, based on the most recent findings. The catalogue employs 5 hierarchical taxonomic categories (order, family, genus, species, and subspecies) listed in that order, with the arrangement of orders following Jones et al. (1986). Families within an order, genera within a family, species of a genus, and subspecies of a species are all arranged alphabetically. For each genus, information is given on its common name, its population dispersion, synonyms used, other common names, and subspecies. Subspecies include the original description, the type locality, the type specimen, and the range. BC EV LS PR SC

Man-Made Mineral Fibres : a workshop

Man-Made Mineral Fibres. Workshop (1989 : Hamilton, Ont.). Hamilton, Ont. : Canadian Centre for Occupational Health and Safety, 1990. 48 p. ISBN 0-660-13560-4 MICROLOG 91-01099 1 fiche

Report of a workshop on man-made mineral fibres, requested by a regulator faced with the problem of substituting man-made mineral fibres for asbestos when there were no standards regulating the man-made product, resulting in the workers refusing to handle it. The presenting panel covered concerns of a regulator, a labour union, and the ceramics industry; human studies on fibrous glass and other man-made mineral fibres; the asbestos

experience; and assessing health effects. Discussion was conducted on defining the situation, the information available and needed, and decisions to be made for handling the material. Reports and recommendations came from labour, management, professionals and government. • CA HE LA

The Management of airport noise : project summary and guidelines for managers

by D.W. Gillen, T.J. Levesque and T.N. Smith. Montreal : Transport Canada, Policy and Coordination Group, Transportation Development Centre, 1990. xii, 35 p. : ill. Bibliogr. MICROLOG 91-02509 1 fiche

As higher demand for air transport services leads to more runways and terminals, there is an increase in the annoyance effects of noise pollution, air pollution, ground traffic congestion, and incompatible land use mixes. This project summary and manager's guide discusses the nature and significance of airport externalities which present potential obstacles to the flexible management of an airport's resources; identifies the main players and reviews their interests; defines a noise management technology based on several aspects of airport noise; and characterizes the potential benefits and costs of each strategy. The Management of perchloroethylene

Regina : Saskatchewan Human Resources, Labour and Employment, Occupational Health and Safety Branch, 1990. 5 p. MICROLOG 91-00867 1 fiche

Perchloroethylene (tetrachloroethylene) has been used for 40 years as a solvent in dry cleaning operations. This document offers recommendations to employers on potential worker exposure from leaks in the cleaning plant, improper maintenance procedures and handling garments containing residual vapours.

Topics include: workplace and storage design, ventilation, plant operation, spill clean-up measures, and first aid. EV LA MS PR SC

Management of weanling pigs to minimize environmental and social stress : technical/final report

Regina : Saskatchewan Agriculture, Agriculture Development Fund, 1986. 15 p. ISSN 0829-9455 MICROLOG 91-02573 1 fiche

This report describes the findings of two sub-projects on the management of weanling pigs to minimize environmental and social stress: 1) space utilization by pigs in conventional weaner decks; and 2) the effect of fresh feed on intake of weanling pigs. Each project is offered in both summary and technical form. AG MS PR SC

Management plan for nitrogen oxides (NOx) and volatile organic compounds (VOCs), phase I

Ottawa : Canadian Council of Ministers of the Environment, 1990. xxvi, 233 p. : ill., maps. Bibliogr. Summary (vi, 22 p.) laid in. ISBN 0-91074-70-7 MICROLOG 91-04491 4 fiche

This Council is the major inter-governmental forum in Canada for discussion and joint action on environmental issues of national, international and global concern. In recognition of the seriousness of the ground-level ozone problem, the Council decided in October 1988 to develop a management plan for the control of NOx and VOCs. This summary report outlines the main features of the Phase I plan, the first phase of a 3-phase control program aimed at fully resolving ground-level ozone problems in Canada by 2005. Phase I consists of a national prevention program based on application of the best available control technology economically achievable; interim (1995 and 2000) NOx and VOC emission reduction targets for the designated ozone non-attainment areas of the Lower Fraser Valley, the Windsor-Quebec corridor, and the Saint John area; and a program of studies and investigations aimed at providing the information needed to set final emission targets for 2000 and 2005. • CA EV SC

A Management-oriented model for assessing early stand establishment

by B. Payandeh and R.A. Haig. Sault Ste. Marie, Ont. : Forestry Canada, Ontario Region, 1991. 4 p. : ill. Bibliogr. (Technical note ; no. 5) At head of title: Frontline : forestry research applications. ISSN 1183-2762 ISBN 0-662-18830-6 MICROLOG 91-05423 1 fiche

Research to develop a model for artificial regeneration systems in Ontario began in 1985. The latest result of this work is PLANT-PC, a management-oriented model that simulates the growth and survival of seedlings through the regeneration process from seed source selection through nursery production and outplanting to a fully established stand. This technical note describes the development of the model, the collection of data, and its applications. CA FO ON SC

Manitoba. Dyking Commissioner : Annual report 1990

Winnipeg : The Commissioner, 1991. 37 p.
CSI 41119.004.
MICROLOG 91-05401 1 fiche

The Diking Authority Act D110, passed in 1952, is meant to ensure that the dykes and pumping stations constructed subsequent to the 1950 flood are maintained in a state of readiness to combat future floods. Authority and control over dykes and pumping stations invested with the city or rural municipality in which they are situated, but provision has been made for the appointment of a Diking Commissioner with powers to inspect dykes and pumping stations and to order work to be undertaken to maintain an integrated system of flood defences as well as to establish the location of the line of defence. The annual report reviews general mandate and its changes, current issues, current action on issues, inspection of facilities, reports by the City of Winnipeg and the University of Manitoba, operation of pumping states and gates, additional works constructed and recommendations.

Manitoba migration statistics, 1979-89

Winnipeg : Manitoba Bureau of Statistics, 1991. 47 p. : ill. CSI 42108.212.
MICROLOG 91-04671 1 fiche

Migration is the most volatile component of population growth in Manitoba, and has had the greatest impact on the year-to-year change in the population of the province and its eight economic regions over the last 10 years. This report presents information on migration for the ten year period 1979-80 through 1988-89. Comparisons are made throughout the report between the first 5 year and the second 5 year periods. The migration data was obtained from Statistics Canada's Small Area and Administrative Data Division and was derived from change of address on personal income tax forms filed with Revenue Canada Taxation. This report concentrates on levels of migration to Manitoba and its eight economic regions by type, age of migrant, and origin.

Manitoba pay equity consultations : executive summary

Winnipeg : Manitoba Labour, Pay Equity Bureau, 1990. 29 p. MICROLOG 91-03084 1 fiche

In November of 1988 the Manitoba government held pay equity consultations to discuss the key issues involved in developing workable implementation models for the sectors not covered by the Pay Equity Act. The focus of the consultation was to seek input from those key employee and employer groups that might be involved in any future implementation efforts. Fifteen meetings were held in Winnipeg during mid-December 1988 and early January 1989. A total of 61 groups participated in the meetings. At the meetings the organizations were encouraged to submit written responses. This report summarizes these responses.

Manitoba's threatened and endangered grassland birds project : 1990 update

by K.D. De Smet. Winnipeg : Manitoba Natural Resources, Wildlife Branch, 1991. iv, 47 p. Bibliogr. (Manuscript report ; no. 91-09)
MICROLOG 91-07011 1 fiche

Many rare, threatened or endangered grassland species have their provincial distribution restricted to grasslands of the extreme southwestern part of Manitoba. The Burrowing Owl, the Ferruginous Hawk, the Loggerhead Shrike, and Baird's Sparrow are all threatened and endangered species in this area which are being depleted through loss of habitat. This report describes continued monitoring and management efforts in 1990 which focused on the collection of trend and baseline data to determine the current status of these species, assessing limiting factors and productivity, gaining a better understanding of movements, winter range and non-nesting mortality rates through additional banding of juveniles and some adults, public education and landowner success, protection of critical sites, Burrowing Owl reintroductions from Saskatchewan, and installation and monitoring of Ferruginous Hawk nesting structures.

Manitoba's tree improvement strategy

by J. Dojack. Winnipeg : Manitoba Natural Resources, 1991. vii, 79 p. : ill.
MICROLOG 91-05780 1 fiche

Manitoba's tree improvement program aims to increase the yield and quality of wood produced from plantations through the development of genetically improved planting stock. The program is being implemented by establishing operational tree improvement programs as cooperative efforts with Forestry Canada and industry, and by increasing the involvement of forestry staff. It was therefore imperative that a strategy be prepared to describe and direct program development from its onset. This document details the interim measures; breeding alternatives and rationale for the recommended approach; and the recommended implementation schedule, based on current capabilities, for the primary species of black spruce, white spruce, and jack pine.

Manual on public involvement in environmental assessment : planning and implementing public involvement programs

Ottawa : Federal Environmental Assessment Review Office, 1990. 248 p. : ill. Bibliogr. French ed. (*Manuel relatif à la participation...*) : 91-01179/4. Executive overview (13 p.) laid in.
MICROLOG 91-01178 3 fiche

Reference manual for those planning the implementation of public involvement programs as part of the environmental assessment and review process requirements. The manual focuses on the early screening and scoping stages of the process and is oriented mainly to small and medium sized projects that may not undergo formal public reviews. The manual is presented in 4 volumes, one of which is an executive overview. Vol. 1 assists senior and line managers to determine when public involvements may be required and how it should be established within the agency. Vol. 2 directs those line managers and practitioners who will actually be responsible for designing and implementing a public involvement program. Vol. 3 is a dictionary of possible methods and strategies which can be used by the practitioner. Methods are identified along with the processes to implement them, and their advantages and disadvantages are presented.

Manuel d'exploitation forestière des terres de la Couronne

Fredericton : Ministère des ressources naturelles et de l'énergie, 1991. iv, 102 p. : ill. ISBN 0-55048-367-6
MICROLOG 91-06175 2 fiche

Le plan de fonctionnement décrit toutes les activités proposées relativement à un permis. Il constitue le document de mise en oeuvre du plan d'exploitation. Il est dressé tous les ans par le titulaire d'un permis de coupe en consultation avec les titulaires de sous-permis, et il doit couvrir une période d'une année. Ce document se penche sur cette question et examine: le contenu du plan de fonctionnement; l'approbation et la mise en oeuvre du plan; et, le rapport annuel.

Manufacture of corrugated waveboard (Waveboard TM)

by L. Bach. Edmonton : Alberta Research Council, Industrial Technologies Dept., 1988. iii, 14 p. : ill. (Open file report ; no. 1988-05)
MICROLOG 91-02466 1 fiche

Waveboard is a fourth-generation engineered wood composite panel which has evolved from particleboard, waferboard and oriented strandboard. This paper gives an overview of the initial work on corrugated waveboard, including designing a prototype apparatus for manufacturing; the development of a mathematical model for theoretical predictions of the structural stiffness and strength of various potential profiles; the development of a manufacturing process suitable for laboratory manufacture of panels of 2' x 3'; and the manufacture and testing of waveboard with aspen wood strands, resin content and panel density comparable to that of OSB presently being produced in Alberta.

Le Marché du travail : son évolution récente -- Rév.

par K. Kerr. Ottawa : Bibliothèque du Parlement, Service de recherche, 1990. 20 p. Bibliogr. (Bulletin d'actualité ; 89-1F) L'éd. anglaise (*Labour market : recent...*) sur la même fiche. Révisé le 26 octobre 1990. ISBN 0-660-93198-2
MICROLOG 91-04858 1 fiche

La main-d'oeuvre, le facteur de production le plus couramment utilisé et le plus coûteux, fait l'objet d'échanges sur un marché caractérisé par un état de flux constant. Pendant les années 80, la conjoncture sur ce marché a subi l'influence d'un certain nombre de facteurs dont les principaux ont été la dévastatrice récession de 1981-1982, la croissance extrêmement inégale du nombre d'emplois dans les régions pendant la reprise, et l'augmentation de l'incidence du chômage de longue durée. Ce sont ces facteurs, et d'autres tendances qui se sont dessinées depuis le début de la dernière décennie, qui font l'objet de ce bulletin.

Le Mari violent : une approche de l'intervention

par D.W. Currie. Ottawa : Santé et bien-être social Canada, Centre national d'information sur la violence dans la famille, 1987. 60 p. Bibliogr.
MICROLOG 91-01947 1 fiche

C'est au cours des quinze dernières années que la violence dans la famille a été de plus en plus reconnue comme un grave problème social. Si, dans notre esprit romanesque, nous avons toujours voulu voir la famille nucléaire comme un havre de chaleur et de sécurité propice à la croissance et au développement, nous savons par contre trop bien que la violence et les menaces de violence font partie du quotidien pour bien des femmes et des enfants. Ce manuel est destiné aux personnes qui assurent un service à l'intention des maris violents. Il a un triple but, à savoir: éclairer et orienter la conception et la mise en oeuvre d'un programme d'intervention pour les maris violents qui insiste sur la sécurité et la protection de la femme; décrire un ensemble d'instruments d'évaluation et de recherche qui permettront d'avoir des renseignements au sujet de l'homme violent; et, énoncer des principes au sujet de la variété de cadres de travail et d'interventions observés actuellement dans ce domaine afin d'accroître l'efficacité du travail et

d'aider ainsi à enrayer la violence faite aux femmes et aux enfants.

Mariculture research and development in Japan : an evolutionary review

by F.B. Davy. Ottawa : International Development Research Centre, 1991. vi, 97 p. : ill. Bibliogr. (Manuscript report ; 298e) MICROLOG 91-06177 2 fiche (Available on fiche only)

Mariculture is a subset of aquaculture, involving the husbandry of aquatic organisms in marine waters, and Japan is likely the most advanced nation in this area. This report presents the evolution of Japanese mariculture and its relation to technology development, particularly in terms of future policy direction. The report reviews the research and technology transfer system of the major species (yellowtail, red sea bream, oyster, Kuruma prawn, and the seaweed nori) leading to these production increases. The results are then applied to developing countries and their coastal fishing industries. Information was taken mainly from published literature, mostly in English, site visits, and interviews with key Japanese personnel involved in mariculture R and D. CA FI SC

Marine Ecosystem Studies in Hudson Strait : proceedings of a workshop

editor, J.A. Percy. Ste-Anne-de-Bellevue, Que. : Dept. of Fisheries and Oceans, Arctic Biological Station, 1990. xiv, 175 p. : ill., maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1770) Bilingual (Etudes de l'écosystème marin...). ISSN 0706-6457 MICROLOG 91-02005 2 fiche

This report presents the results of a workshop sponsored by the Quebec region of the Dept. of Fisheries and Oceans on the marine ecosystem of Hudson Strait. The objectives of the workshop were to review the information available about the structure and functioning of the Hudson Strait marine ecosystem, and to pinpoint significant gaps in scientific knowledge and promising directions for future research. The report contains comprehensive reviews of the environment and biota of the region as well as the abstracts of papers presented at the workshop. Also included are the summary reports of several working groups and the recommendations of the Steering Committee regarding the further development of a program of marine ecosystem studies in Hudson Strait. • CA CF FI NO SC

Marine environmental quality review near the MacMillan Bloedel pulp mill, Powell River, B.C.

by A.G. Colodey. Ottawa : Environment Canada, Conservation and Protection, Environmental Protection Service, Pacific and Yukon Region, 1987. iii, 47 p. : maps. Bibliogr. (Regional program report ; 87-23) MICROLOG 91-02761 1 fiche

This report evaluates the condition of the receiving environment in the vicinity of the MacMillan Bloedel pulp and paper mill at Powell River, 100 km northwest of Vancouver. This information, along with present production levels, will be used to estimate potential impacts associated with mill expansion and production increases. Recommendations will be made for improvements to the mill's monitoring program. The review is based on Environmental Protection reports, consultant reports and previously unpublished oceanographic data collected in November 1983, Pisces IV submersible observations from April 1987 and intertidal data gathered in September 1987. • BC CA EV FO SC

Marine tourism in British Columbia : opportunity analysis

A.R.A. Consultants. Ottawa : Industry, Science and Technology Canada, Victoria : Ministry of Tourism ; Ministry of Regional and Economic Development, 1991. 239 p. : ill., maps. Summary report (42 p.) laid in ISBN 0-7726-1260-9 MICROLOG 91-05113 3 fiche

Significant growth in the marine tourism sector which is dependent on the saltwater resources has occurred in the last five years, led largely by increases in lodge and resort developments offering sportfishing products. However, the scope and contribution of the marine tourism industry has not been fully documented. The Ministry of Tourism thus commissioned this study to prepare a detailed profile of the industry and identify growth opportunities. This document contains the key findings of the study. Market-based approaches to managing air emissions in Alberta

Ottawa : Canadian Petroleum Association ; Edmonton : Alberta Energy ; Alberta Environment, 1991. 18 p.
MICROLOG 91-06344 1 fiche

In 1990, the Government of Alberta initiated a public consultation process designed to spur broad discussion of Alberta's air-quality issues, to help define the most pressing problems, and to decide how best to control them. As part of that process, the Clean Air Strategy is exploring opportunities for using market-based approaches in managing emissions more effectively and at lower cost. This paper was developed to explain tradable emission permits and emission charges or taxes. The paper begins with concepts and prior experiences, then applies them to acid deposition related to emissions of SO₂ and NO_x and to global warming and emissions of CO₂. The study of acid deposition develops and evaluates a market-based approach to controlling SO₂ (and possibly NO_x) emissions that Alberta could adopt and implement quite quickly. In the case of CO₂, the debate is at an earlier stage and means of achieving them is uncertain.

Mathematical modelling of fluidized bed coal combustion, I : hydrodynamics

by H.A. Becker, R.K. Code and P.E.G. Gogolek. Ottawa : Canada Centre for Mineral and Energy Technology, 1989. vii, 40 p. : ill. Bibliogr. (Technical report ; QFBC.TR.89.2) CANMET contract: OST84-00512.
MICROLOG 91-01583 1 fiche

Modelling hydrodynamics is the first step in modelling fluidized bed combustion. This report identifies regions of characteristic hydrodynamics and delimits them according to the particle concentration profile as a basis for the three zone model. This model consists of the dense bed, the splash zone and the freeboard and also includes the effect of the presence of tubes on the extents of the zones. The two-phase flow of gas in the dense bed is examined in some detail and the flow of particles between zones and in the freeboard is discussed. Appendices give modelling details and supporting evidence for some modelling decisions.

Mauvais traitement à l'égard des enfants : document de travail

par A. Wachtel. Ottawa : Centre national d'information sur la violence dans la famille, 1989. iii, 49 p. Bibliogr. Préparé pour la conférence nationale sur la violence familiale, Main dans la main.
MICROLOG 91-01956 1 fiche

L'enfance maltraitée est nocive et pernicieuse comme une mauvaise herbe. Plusieurs des problèmes qui lui sont associés demeurent récalcitrants et la société doit les subir bon an mal an. Ce document étudie cette question et est divisé en plusieurs sections. La première partie décrit de façon implicite certains des thèmes en les replaçant dans le contexte 'historique' de l'aide à l'enfance maltraitée. La deuxième partie étudie plus explicitement les propositions mentionnées ci-dessus, dans la mesure où ils semblent intéresser le domaine actuellement. Par ailleurs, différentes notes se rapportant à des points importants de l'étude sont traitées en annexe.

Les Mauvais traitements infligés aux personnes âgées : document de travail

par N. Gnaedinger. Ottawa : Centre national d'information sur la violence dans la famille, 1989. ii, 58 p. Bibliogr. Préparé pour la conférence nationale sur la violence familiale, Main dans la main.
MICROLOG 91-01955 1 fiche

Au cours des deux dernières décennies, le mythe de la famille comme havre de paix a, maintes et maintes fois, volé en éclats. On a d'abord identifié les mauvais traitements envers les enfants, ensuite le cas des femmes battues et maintenant les mauvais traitements aux personnes âgées comme problèmes sociaux et de santé faisant partie du problème plus général de la violence familiale. Ce document se penche sur cette question en examinant principalement les points suivants: la prise de conscience, l'éducation et la formation; le dépistage; le signalement obligatoire et la législation protectrice; l'intervention et le traitement; la prévention; la recherche; les mesures adoptées par le Canada; et, les commentaires finaux.

Maximizing conception rate in dairy cows, 1 : heat detection

by B.B. Murray. Toronto : Ministry of Agriculture and Food, 1984. 4 p. : ill. (Factsheet) ISSN 0225-7882
MICROLOG 91-00590 1 fiche

The factsheet deals with two of the three parts of a successful reproductive management program for a dairy herd. It presents goals for reproductive performance and a heat detection system which will ensure that missed heats and failures to detect heat signs, the number one reason for long calving intervals, are minimized. The factsheet describes the estrous cycle, the signs of heat, and heat detection aids. The need for accurate records is also important and a records system is described.

Maximizing soil production : final report

by E. De Jong. Regina : Saskatchewan Agriculture Development Fund, 1990. 27 p. Bibliogr. ISSN 0829-9455
MICROLOG 91-05727 1 fiche

Project to increase water and fertilizer use efficiency in dryland agriculture through snow capture in stubble sculpturing and documenting evaporation losses in fall and spring. The project continued for 3 years and focused on stubble sculpturing with the clipper attachment for swathers. The possibility of seed-placing higher than recommended rates of urea with discers and air seeders was also explored for soils high in clay and/or organic matter and the response to P fertilizer was tested. A model predicting probable crop yield as a function of spring available soil water, growing season rainfall probabilities and (soil³ fertilizer)-N was developed. Maps of probable precipitation were also constructed using data on daily climatic rainfall and temperature from 30 stations over 70 years.

Maximum entropy criteria applied to signal recovery

by R.F. MacKinnon and M.J. Wilmut. Victoria : Defence Research Establishment Pacific, 1988. 25 p. : ill. Bibliogr. (DREP technical memorandum ; 88-09)
MICROLOG 91-00146 1 fiche

A common problem of data analysis is the reconstruction of a signal from noisy data to obtain as true a representation as possible without having exact knowledge of the event giving rise to the signal or its consequences. This paper describes a method of signal reconstruction which evokes the principle of minimum cross-entropy and incorporates prior knowledge in the form of constraints on the solutions to minimization problems. The method uses the finite Fourier transform and constraints may be applied in either the spatial or frequency domain. Solutions were obtained using a general purpose minimization routine and were restricted to one-dimensional data.

For two-dimensional data, a faster special-purpose routine was developed based on the same principles. In discussing the method, reference is made to image processing since it was this application for which it was envisioned. CA EX PS SC

Measurement and computer simulation of heat transfer in glazing systems

University of Waterloo. Dept. of Mechanical Engineering. Advanced Glazing System Laboratory. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1991. ix, 254 p. : ill. Bibliogr. CANMET contract: 23280-6-6122. ISBN 0-662-18969-8
MICROLOG 91-06136 3 fiche

Existing methods can be used to calculate heat loss through glazing systems and window frames with reasonable accuracy but they do not account for the top-to-bottom differences in heat transfer caused by fill gas motion and they cannot be expected to predict the minimum indoor pane temperature that governs the onset of condensation on windows exposed to low outdoor temperature. This research was undertaken to establish that the minimum indoor pane temperature is not a function of edge-seal conduction alone but also depends upon fill gas convection. A numerical model for predicting heat flux and temperature distributions in glazing systems was developed which allows for the detailed 2-D simulation of conductive, radiative and convective heat transfer. Simulation results were directly compared with measurements (taken using a guarded heater plate apparatus) at every stage of the investigation.

Measurement of HTO permeation rates through various candidate disposable plastic suit materials

by J.P. Krasznai and B.D. Aucoin. Toronto : Ontario Hydro, Research Division, 1990. 28 p. : ill. Bibliogr. (Report ; no. 90-232-K)
MICROLOG 91-03163 1 fiche

This study investigated the protection factor for tritiated water exposure afforded by various disposable plastic suit materials. The suits currently in use in Ontario Hydro generating stations are made of polyvinyl chloride (PVC). The study researched alternative materials to PVC which would not only meet or exceed the tritium protection capability of PVC but be compatible with incineration as a disposal option. Results of simple permeation tests using tritiated water to identify candidate materials are given here.

Measurement of tank gun dynamics in support of a Dynamic Muzzle Referencing System

by J.S. Bird. Ottawa : Defence Research Establishment Ottawa, 1990. xi, 28 p. : ill.

Bibliogr. (Report ; no. 1053)
MICROLOG 91-01995 1 fiche

A dynamic muzzle reference system is a proposed system of sensors, electronics and signal processing that will be used to measure and compensate for the high frequency, low amplitude motions of the stabilized gun of a main battle tank as the vehicle is driven on rough, uneven terrain. This report describes a series of 3 data collection experiments conducted from October 1988 to May 1990 on a moving Leopard tank with a 105mm gun to characterize the angular motions and deflections of the stabilized gun. The measurements were made with externally mounted, rate-sensing gyroscopes on either end of the gun barrel, with other gyros and accelerometers mounted on both the turret and the gun. Most of the sensors were aligned to measure motions in the pitch (elevation) plan. The signals were digitally recorded on-board the tank and later analyzed.

Measuring the value of renewable resources : the case of wetlands

by E. Manning, M.J. Bardecki and W.K. Bond. Ottawa : Environment Canada, 1990. 14 p. Bibliogr. Presented at the Common Property Conference.
MICROLOG 91-02056 1 fiche

This paper is based on the 'Wetlands are not wastelands' project and pilot studies, to develop better procedures and methods for indicating the true value of renewable resources to decision-makers. The project adapted existing methods and/or established new methods for evaluating the full socio-economic and environmental values of wetlands to society; undertook pilot studies to test the selected methods against alternate uses to demonstrate the specific values of selected Canadian wetlands; produced a reference guide to a set of desired screening procedures and methods for the evaluation of wetland areas in relation to proposed changes; and ensured the initiation of an effective on-going consultative process with a wide spectrum of involved groups. This paper reviews the progress of the project, documents the evolution of concepts and approaches due to the workshops and the completion of the four pilot studies and suggests the nature of future initiatives.

Mediation, Environmental Assessment, and Bill C-78 : from provisions to practice : background materials and highlights from a workshop

by J. Solway. Ottawa : Federal Environmental Assessment Review Office, 1990. 53 p. Bibliogr.
MICROLOG 91-06665 1 fiche

This document reports on discussion at a workshop which brought together Canadian and American participants with experience in environmental assessment and dispute settlement to discuss proposals in Bill C-78, currently before a parliamentary committee. The proposals include provision for a mediation mechanism in the federal environmental assessment (EA) process, a mechanism which is not currently part of the EA review process. Bill C-78 identifies mediation as an alternative to review panels, and envisions mediation as a dispute settlement tool that will be used in certain prescribed circumstances. The workshop explored the concept of mediation and the manner in which it is framed in Bill C-78, and analyzed the policy and institutional options for implementing this approach. The background information provided to the participants in advance of the workshop is included, as well as suggested changes to the text of Bill C-78.

Mental health in northern Alberta : addressing the issues : position paper

Peace River, Alta. : Northern Alberta Development Council, 1991. 13 p. : ill.
MICROLOG 91-03297 1 fiche

This report summarizes the research findings of the Working Committee into the quality and quantity of mental health services in northern Alberta. The objectives of the research were: 1) to review existing mental health services and outline service gaps; 2) to examine service impediments (i.e. staff recruitment and retention); 3) to examine existing and proposed coordination activities and innovative programs; 4) to make recommendations on the preceding points; and 5) to propose implementation strategies and recommendations to address the research findings.

Mergers and monopolies : legal aspects -- Rev.

by M. Smith. Ottawa : Library of Parliament, Research Branch, 1990. 21 p. Bibliogr. (Current issue review ; 81-5E) French ed. (*Les Fusionnements et monopoles...*) on the same fiche. ISBN 0-660-13718-6
MICROLOG 91-02006 1 fiche

With the increased concentration of power in the Canadian economy in recent years, competition policy to deal with mergers and monopolies has once again become of prime importance. This current issues paper considers the limited effectiveness of the Combines Investigation Act in dealing with mergers and monopolies detrimental to the economy, and its replacement by the Competition Act. Topics include: policy considerations; the Combines Investigation Act; proposals for reform; Competition Tribunal Act; Competition Act; and parliamentary action. A chronology of developments and a bibliography conclude the report.
CA CI CO

by M. Smith. Ottawa : Library of Parliament, Research Branch, 1990. 22 p. Bibliogr. (Current issue review ; 81-5E) French ed. (*Les Fusionnements et monopoles...*) on the same fiche. Revised October 23, 1990. ISBN 0-660-13854-9
MICROLOG 91-04874 1 fiche

Between 1945 and 1949, there were fewer than 60 mergers per year in Canada. Between July 1986 and March 1990 over 3,600 mergers took place. This paper discusses policy considerations in mergers, the Combines Investigation Act, proposals for reform, the Competition Tribunal Act, the Competition Act, and the operation of the law.

Mesozoic stratigraphy, sedimentary evolution, and petroleum potential of the Jeanne d'Arc Basin, Grand Banks of Newfoundland

by K.D. McAlpine. Ottawa : Energy, Mines and Resources Canada, Geological Survey of Canada, 1990. 50 p. : ill., maps. Bibliogr. (Paper : 89-17) ISSN 0068-7650 ISBN 0-660-13725-9
MICROLOG 91-00864 1 fiche

The Jeanne d'Arc Basin, located at the northeastern part of the Grand Banks of Newfoundland, is a Mesozoic failed-rift basin containing more than 22 km of sedimentary fill. Despite vigorous exploration activity initiated by the discovery of the giant-class Hibernia oil field in 1979, the lithostratigraphic nomenclature is not yet standard. This has led to a plethora of lithostratigraphies used by various industry groups, government agencies, and academia, a situation that has caused communication problems. A new lithostratigraphic nomenclature is proposed for the Mesozoic rocks older than the Late Cretaceous Dawson Canyon formation, consisting of 17 formations (14 new), 3 members (new) and 2 markers (new).

Metabolic profiles and hormone responses of growing horses reared in the cold : final report

by N.F. Cymbaluk. Regina : Saskatchewan Agriculture Development Fund, 1990. 19 p. : ill. Bibliogr. ISSN 0829-9455
MICROLOG 91-01877 1 fiche

Metabolic effects of chronic cold exposure are poorly documented in horses. This study compared the chronic biochemical changes and hormonal responses to stimulation with thyrotropin releasing hormone of colts reared in cold and warm barns during a typical prairie winter. Twelve, 7-month-old Standardbred colts were assigned to warm (10C) or cold (mean temperature -5.2C) housing for 22 weeks, beginning in late November. Clinical biochemistry was measured at 4- and 5-week intervals. Thyrotropin-releasing hormone (TRH) stimulation tests were conducted at weeks 10 (mid-February) and 21 (late April). This report provides the results of the tests.

Methane-air explosion tests in the 20-L vessel

by K.J. Mintz. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. iv, 39 p. : ill. Bibliogr. (Report ; MRL 90-102(TR))
MICROLOG 91-03585 1 fiche

In order to be able to properly calibrate an explosion vessel, including the separation of the effect of turbulence, it is beneficial to use a well-known gas system such as methane-air to study explosions in that vessel. Hertzberg et al. studied the effect of igniter strength on the lower flammability limit using quiescent methane-air mixtures in the 20-L vessel. This study was undertaken to reproduce the work by Hertzberg on quiescent methane-air mixtures and extend it to turbulent methane-air mixtures produced in a similar way as the dust tests.

Method of measuring the diarrhetic shellfish toxicity of scallops and comparative examination of the virulence values

by A. Furukawa...et al. Ottawa : National Research Council, Canada Institute for Scientific and Technical Information, 1990. 20 p. : ill. Bibliogr. (Canadian translation of fisheries and aquatic sciences ; no. 5519) Originally published in Japanese. ISSN 0704-3716
MICROLOG 91-01292 1 fiche

To measure the diarrhetic shellfish poison of scallops, mice are usually used as experimental animals. This method, however, presents problems of sensitivity detection and precision, as well as the impossibility of measuring shellfish poison components separately. This paper compares the virulence values of the components causing diarrhetic shellfish poisons using high-performance liquid chromatography, epidemiological enzymes and mouse testing. The paper also examines the effect of the free fatty acids at low virulence time.

A Method to measure sediment-water trace metal fluxes : a field evaluation in Halifax Harbour

by B.T. Hargrave and S. MacKnight. Dartmouth, N.S. : Environment Canada, Conservation and Protection, Environmental Protection, Marine Environment Branch, 1990. vi, 42 p. : ill. Bibliogr. (Ocean dumping report ; 7) ISBN 0-662-18271-5
MICROLOG 91-01641 1 fiche

This study assessed a technique for determining the trace metal fluxes between sediments and overlying seawater. The technique consisted of the BIO Benthic Chamber modified to include two Seastar in-situ water sampling units (pump, filter and resin column). This report documents the results of the experiments undertaken in 1989 using two sites in Halifax Harbour as test sites. The study consisted of experiments which tested the BIO Benthic Chamber to determine if leached metals would be a source of contamination; compared the flux of metals as dissolved species occurring at an 'impacted' versus an 'unimpacted' site; compared the change in the dissolved metal flux by altering the oxidation of the surface sediments and the overlying waters at the more contaminated experimental site; and tested the column elution efficiencies and elution protocol.

Méthodes de base pour l'évaluation sensorielle des aliments

par B.M. Watts...et al. Ottawa : Centre de recherches pour le développement international, 1989. x, 145 p. : ill. Bibliogr. (Rapport manuscrit ; 277f) ISBN 0-88936-569-5
MICROLOG 91-06225 2 fiche (Available on fiche only)

Ce manuel a été préparé pour répondre à la nécessité de lignes directrices pour la réalisation de tests sensoriels de produits agricoles de base dans les laboratoires dont le personnel n'a que peu ou pas d'expérience en analyse sensorielle. On y trouvera des discussions des principes de l'analyse sensorielle, des descriptions des installations et des procédures pour réaliser cette analyse et des exemples du traitement statistique des données des tests sensoriels. Les exemples proviennent d'études sur les caractéristiques sensorielles et l'acceptabilité des fèves noires. Ces études ont été réalisées dans le cadre d'un réseau de travaux de recherche financés pour augmenter la disponibilité, la consommation et la valeur nutritive des fèves, un aliment de base important en Amérique latine. Les principes présentés s'appliquent toutefois à l'évaluation de nombreux autres types d'aliments et les méthodes décrites peuvent servir à mesurer et à comparer les caractéristiques sensorielles à la fois des produits agricoles et des produits transformés.

A Methodology for grizzly bear habitat assessment in British Columbia

by B.L. Fuhr and D.A. Demarchie. Victoria : Ministry of Environment, Wildlife Branch, 1990. viii, 28 p. : ill. Bibliogr. (Wildlife bulletin ; no. B-67) ISSN 0829-9560 ISBN 0-7726-1171-8
MICROLOG 91-00131 1 fiche

This methodology provides a means of mapping the extent and quality of grizzly bear habitat in

B.C., based on knowledge gained during 2 pilot projects. Habitat quality is defined in terms of its rank on a provincial scale and its carrying capacity. The methodology is intended for the reconnaissance level of inventory, that is for broad scale mapping (1:50,000 or smaller) with a minimum of field checking. Habitat units are delineated through a progressive stratification of ecoregions, biogeoclimatic zonation, and biophysical habitat units with successional stages. The methods presented here are similar to those used in mapping ungulate habitat and for calculating ungulate carrying capacity, with the addition of grizzly bear habitat carrying capacity estimates. No interspecies competition between grizzly and black bears is assumed.

A Micro-computer program for estimation of detonator overlap probability

by Y.C. Lizotte. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1990. iii, 16 p. : ill. Bibliogr. (Report ; MRL 90-136(TR)) MICROLOG 91-02415 1 fiche

It is generally recognized that detonator caps used for initiating explosives for rock blasting do not fire at precisely the times stipulated by the detonator manufacturer. This is called 'delay variability' or 'cap scatter' and can significantly affect the results of multi-detonator blasts. This report describes the use of a microcomputer program for estimating detonator overlap probability. The report briefly reviews the problem of detonator firing time variations; defines the terminology for quantifying variations; illustrates the use of the program, its limitations and the effects of variations on overlap probability by examples; and discusses the influence of cap scatter on fragmentation. An annotated listing of the program is appended.

Microbial exoenzyme activity at the Heron Island dumpsite (Bay of Chaleur) : 10 years after the disposal of dredged sediment from Dalhousie, New Brunswick

by K. Lee...et al. Dartmouth, N.S. : Environment Canada, Conservation and Protection, Environmental Protection, Marine Environment Branch, 1990. iii, 82 p. : ill., maps. (Ocean dumping report ; 5) ISBN 0-662-17628-6 MICROLOG 91-01150 1 fiche

Dalhousie Harbour, Bay of Chaleur, N.B. is dredged on a regular basis because of high siltation rates. Harbour sediments are anoxic due to the continual input of organic material and cadmium from a lead/zinc ore-loading

facility. Beginning in 1972, sediments dredged from the harbour were dumped 15 km away at an open-water site near Heron Island and by 1978 cadmium concentrations were higher than allowed by the Ocean Dumping Control Act allowable limit and the site was closed. This study used fluorogenic substrates specific for the enzymes cellulase, phosphatase and protease to evaluate the impact of contaminated sediments on biogeochemical processes at the dumpsite. Toxicity tests with Dalhousie Harbour sediments were conducted using new procedures based on the measurement of microbial exoenzyme activity.

Microbiological and organic geochemical studies in reclaimed coal mine backfill at a mountain and a prairie minesite in Alberta

by P.M. Wallis, M.E. Van Zinderen Bakker and J.M. Buchanan. Edmonton : Alberta Environment, Research Management Division, 1983. xvii, 206 p. : ill. Bibliogr. (Report ; L-81)
MICROLOG 91-03060 3 fiche

One of the problems associated with the development of coal resources is the degradation of surface and groundwater quality, particularly at strip mine sites. This is often of greatest importance on the prairies where surface water supplies are short and coal seams may be the best groundwater aquifers in the area. The report discusses the relationship between the organic geochemistry, microbiology, and inorganic geochemistry of ground and surface waters associated with strip mining for coal in Alberta. It covers the influence of spoil material on the organic chemistry of surface and groundwaters, the aqueous organic chemistry of undisturbed coal aquifers, the significant difference (if any) in groundwaters found in reclaimed mine sites between the mountain and prairie regions, and the effect of Revert on organic water analyses. The study looked at a prairie site at Wabamun, mining subbituminous C coal, and a mountain coal mine mining a higher grade of bituminous coal at Canmore.

MICROLOG 91-00301 1 fiche

Analysis using the beam-column (cubic-linear) element with 6 degrees-of-freedom. The concept of numerical integration is used with a new numerical integration scheme suggested for the evaluation of elastic-plastic stiffness matrix of the element. In order to account for the large deformation effect, a total Lagrangian approach is employed. A trilinear material model is also included to account for material nonlinearities due to yielding and strain hardening. The nonlinear analysis is performed using the Newton-Raphson method and is automated to the point of peak load with the help of a load-controller algorithm, described here.

A Microcomputer finite element software for the design of steel support systems with special reference to the Donkin Morien project, phase II report : computer program

submitted by F.P. Hassani and H.S. Mitri ; to Dept. of Energy, Mines and Resources, CANMET - CRL Division, Cape Breton Coal Research Laboratory, Montreal : McGill University, Dept. of Mining and Metallurgical Engineering, 1989. v, 136 p. : ill. Bibliogr. CANMET contract: 79054-01-SQ.
MICROLOG 91-00302 2 fiche

The Donkin-Morien project was conducted to access the Harbour coal seam located under the Atlantic Ocean about 3.5 km offshore of Cape Breton Island. A finite element program called S4 (steel set support systems) was developed. This phase II report provides the necessary information for the use of the program in the design and analysis of tunnel steel supports from open steel I or H sections under various loading conditions. The report is divided into a user's manual and a report of the results of a comprehensive variation of parameter study. The information in part 2 may be used directly for design purposes when the site conditions (tunnel geometry, loading, section size) match with those cited in the parametric study. The program is written in FORTRAN and runs on personal computers like IBM AT, PS/2 and compatibles. It comprises a main program and 32 sub-routines which amount to some 1900 statements of code. A computer listing of the source code is provided and the functions of all subroutines are described.

A Microcomputer finite element software for the design of steel support systems with special reference to the Donkin Morien project, phase III report : geotechnical assessment of the no. 2 tunnel of the Donkin Morien project, Sydney, Nova Scotia

submitted by F.P. Hassani and H.S. Mitri ; to Dept. of Energy, Mines and Resources, CANMET - CRL Division, Cape Breton Coal Research Laboratory, Montreal : McGill University, Dept. of Mining and Metallurgical Engineering, 1989. xiii, 182 p. : ill. Bibliogr. CANMET contract: 79054-01-SQ.
MICROLOG 91-00303 2 fiche

The Donkin-Morien project was conducted to access the Harbour coal seam located under the Atlantic Ocean about 3.5 km offshore of Cape Breton Island. Two parallel tunnels were driven in 1984-86 by different methods, in the identical strata, providing an excellent opportunity to compare the results. This study emphasizes Tunnel no. 2, undertaking a detailed parametric study using the finite element nonlinear model S4 (steel set support systems) to generate design charts to evaluate the structural performance of various support

systems; a simulation of the steel support system used in Tunnel no. 2; an evaluation of ground response around the steel support by means of a variety of linear finite element models; and a combination of results from points 2 and 3 with in-situ geological data to assess the reliability of the existing support system, not only to the present project, but also to future mining conditions.

Microfisheries of small water bodies in Africa : an annotated bibliography

compiler, Chris Gordon. Ottawa : International Development Research Centre, 1991. iii, 56 p. (Manuscript report ; 292e)
MICROLOG 91-06179 1 fiche (Available on fiche only)

Microfisheries have in the past been bypassed by fisheries development programs in Africa, with most R and D effort in inland fisheries being expended on large lakes, floodplains, reservoirs and coastal lagoons. Many of these macrofisheries are now approaching full exploitation and new opportunities must be identified for increasing fish production. This annotated bibliography was prepared to provide fisheries researchers and administrators with better access to the available literature. The bibliography is divided into publications relating to small rivers and floodplains, small dams, small natural lakes, small coastal lagoons, and other water bodies, as well as general references.

Microhabitat requirements and movements of juvenile coho and chinook salmon at three streamflows in Kloiya Creek, B.C.

by B.A. Bravender and C.S. Shirvell. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1990. vii, 115 p. : ill. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 802) ISSN 0706-6465
MICROLOG 91-04547 2 fiche

Although there are many dams in BC constructed on salmon rearing streams, there is little knowledge of how the juvenile fish deal with these sudden alterations of flow. This project was conducted in 1985 on a small stream on the north coast of BC in which all 5 species of Pacific salmon spawn. The study areas consisted of 5 separate pools about 800 m downstream from the dam at the outlet of Prudhomme Reservoir. Seventy-seven juvenile salmon (40 coho and 37 chinook) were tagged and the direction and distance they moved in response to the altered flows were determined by underwater observation. Measurements of depth, velocity, light intensity and the type of substrate were taken at each fish's location for each streamflow level.

Microwaves and minerals

by Atomic Energy Canada Limited and Voss Associates Engineering Ltd. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, Mineral Development and Lands Branch, 1990. iv, 77 p. : ill. Bibliogr. (Industrial mineral background paper ; 14) ISSN 0228-7811 ISBN 0-7729-6584-6 MICROLOG 91-01096 1 fiche

Review of the microwave heating and dielectric literature on minerals, rocks, ceramics and related materials. Ores are only considered with reference to mineral constituents or mineral processing. Microwave heating studies reported in the literature were confined to 2.45 GHz; no data were found at 915 MHz. Testing methods are discussed and both the real and imaginary components of the dielectric constant were measured as a function of temperature for serpentine, nepheline syenite, illite clay, kaolin, vermiculite, magnetite, talc and talc plus 5 percent binder (sodium silicate), supplied by the Ontario Ministry of Northern Development and Mines. The technology review includes a review of industrial microwave heating applications, applications related to minerals and electromagnetically similar materials, microwave heating of solids, microwave heating studies on rocks and minerals, dielectric data on minerals, and high temperature dielectric measurement techniques.

Midnapore 2 : area structure plan and supporting information -- Rev. draft.

Calgary, Alta. : City of Calgary Planning and Building Dept., 1990. 32 p. : maps. MICROLOG 91-00452 1 fiche

The role of the area structure plan is to provide a framework for the future subdivision and development of an area usually covering between one and four sections of land. This plan is an update of the original plan approved in April 1979 and incorporates all amendments. This plan summarizes the development that has already occurred and provides the basis for making planning decisions on the remaining undeveloped lands, including policies for residential, commercial and industrial areas; open space; school sites; a pathway system; transportation; utility services; and historical resources. The phasing of each of these is also included.

Migration of northern fur seals

Callorhinus ursinus off western North America

by M.A. Bigg. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1990. iv, 64 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1764) ISSN 0706-6457 MICROLOG 91-01658 1 fiche

The northern fur seal inhabits the subarctic offshore and coastal waters of the North Pacific, Sea of Okhotsk and Bering Sea. This report concentrates on one of the 3 main stocks. The Pribilof Islands stock ranges from the Pribilof Islands along the west coast of North America to the California-Mexico border. Knowledge on the migration of this stock is based largely on accounts from the late 1800s from sealers and by crews from U.S. patrol vessels. To improve knowledge of these seal's lives and migration, the U.S. and Canada undertook extensive studies at sea from 1958-74. This report describes migration for seals of each sex, age and reproductive condition, based on the data collected during 1958-74, as well as two unpublished data sets on the relative abundance of these seals in the eastern North Pacific collected in 1969. The study considers age-specific migration for females from 1-5 years or over and males from 1-4 years and over, as well as pregnant and nonpregnant females aged 5 years or over.

Mimico Creek dry weather outfall survey

Canviro Consultants Ltd. Toronto : Toronto Area Watershed Management Strategy Steering Committee, 1987. vii, 99 p. : ill., maps. Bibliogr. (Technical report ; no. 12) MICROLOG 91-03277 2 fiche

During the fall of 1984, a dry weather outfall survey was conducted on the sections of Mimico Creek within the City of Etobicoke boundaries as part of the ongoing Toronto area watershed management strategy study. The survey inventoried and documented all existing outfalls on Mimico Creek within the City of Etobicoke; assessed the loadings and concentrations of selected contaminants discharged in dry weather from the existing outfalls to Mimico Creek; and identified and prioritized, through observations, outfalls discharging contaminants in concentrations in excess of modified municipal sewer-use bylaws. The field program was conducted both through the use of provincial and municipal historic data and two consecutive screening runs during which outfalls were selected for more intensive sampling for selected parameters. Outfalls were then classified to assist in establishing priorities for action.

MINE DESIGNER : an automated graphical data generation program integrating numerical modelling with the mine design process, SUN version 1.0

by Numerical Modelling Group, Mining Research Laboratories, and S.A. Thomson. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1991. iii, 32 p. : ill. (Report ; MRL 91-31(TR)) MICROLOG 91-07098 1 fiche

MINE DESIGNER is a data generation program for use with the three-dimensional boundary element analysis program BEAP. MD allows the user to graphically define a mining problem using advanced computer aided design techniques from various stages along the mine design process. The major aspects of mine design included in MD are drill hole visualization, ore body definition and visualization, piping (shafts, drifts and raises) definition and visualization, and slope definition and visualization. This user manual covers starting the program and using various aspects of it, including views, drill holes, ore body definition, planes, piping definition, and slope face definition. Technical definitions and examples are also included.

Mine reclamation funds : a mechanism for environmental protection : discussion paper

Victoria : Ministry of Energy, Mines and Petroleum Resources, 1991. 31 p. MICROLOG 91-03023 1 fiche

In B.C., the satisfactory reclamation of mine sites has been an integral part of mine planning, permitting and monitoring since 1969. However, the standard forms of reclamation security, such as bonds and irrevocable letters of credit, are not practical in situations where there is significant ongoing cost and where the company responsible does not, once the mine has closed, have sufficient other assets or

income to fund the work. It is for these situations that the 1990 Mines Act provided for a mine reclamation fund. This technical paper sets out a proposal for the administration of such funds, describing the objectives, the fund structure and the fund size determination through asset mix, forecasts of future discount rates, probability distribution of future costs, calculations of the initial MCV, simulation of fund performance and results, and examples of two cost scenarios.

Mineralogical investigation of three ferrosilicon samples from Chromasco, Haley, Ontario

by J.M.D. Wilson and W. Petruk. Ottawa : Canada Centre for Mineral and Energy Technology, Mineral Sciences Laboratories, 1986. 9 p. : ill. (Report ; MSL 86-8(CR))
MICROLOG 91-05505 1 fiche

Chromasco operates a plant at Haley, Ontario which produces magnesium metal by the Pidgeon process. Ferrosilicon is used in the process as a source of silicon, which acts as a reducing agent in the production of magnesium. Recently the recoveries of magnesium metal have dropped below acceptable levels. As part of a general investigation to determine the source of this problem, Chromasco is investigating the chemical and physical nature of the ferrosilicon. Three samples of ferrosilicon were received from Chromasco, graded good, poor and fair. Each sample was examined by the SEM and a full mineralogical examination was conducted to identify all phases present, the composition of the phases, the quantities of the phases and the size distribution of the ferrosilicon and silicon. This report presents the results of the investigation.

MICROLOG 91-00093 1 fiche

Ce rapport a pour but d'illustrer, dans une perspective reflétant l'année 1982, les différentes phases du système d'approvisionnement en minéraux au Canada (de l'exploration aux probabilités de production), tout en indiquant l'orientation que prennent les probabilités de production. Cette étude traite de huit métaux et d'un minéral industriel : le cuivre, le zinc, le plomb, le nickel, le molybdène, l'argent, l'or, le fer et l'amiant.

Les Mines au Canada : tour d'horizon, à partir de 1989 : production, réserves, mise en valeur, exploration

par A. Lemieux...et al. Ottawa : Energie, mines et ressources Canada, 1990. vii, 48, vi, 46 p. : ill. Bibliogr. (Bulletin minéral ; MR 225) Bilingue (Canadian mines : perspective...). CSI 21110.010. ISBN 0-660-56242-1
MICROLOG 91-01015 2 fiche

Ce rapport est une évaluation, fondée en grande partie sur les données disponibles en 1989, de la capacité d'approvisionnement future en certains des principaux produits minéraux extraits du sol canadien. Il vise à déterminer si les ressources sont exploitées à des taux de production suffisants pour que le Canada demeure un important fournisseur de produits minéraux. Sept métaux (le cuivre, le nickel, le plomb, le zinc, le molybdène, l'argent et l'or) et un minéral non métallique (l'amiant) sont traités en détail ; quelques autres produits sont abordés plus brièvement.

Mines et usines de traitement de minéraux au Canada, 1990

Ottawa : Energie, mines et ressources Canada, 1991. iii, 83, iii, 71 p. (Bulletin minéral ; MR 227) Bilingue (Mining and mineral...). CSI 21110.020. ISBN 0-660-56465-3
MICROLOG 91-03807 2 fiche

Ce rapport est une compilation des données concernant les mines et les installations de traitement au Canada. On y donne des renseignements qui concernent les mines et usines de traitement de métaux, les mines et usines de traitement de minéraux industriels et les producteurs de chaux au pays. Ces renseignements comprennent le nom des exploitants, l'emplacement de la mine ou de l'usine, sa capacité de production, les procédés utilisés, les produits et les autres détails qui revêtent un intérêt particulier. Le rapport donne aussi la liste des principales usines métallurgiques au Canada dans lesquelles on procède au traitement de minerais et de concentrés de métaux non ferreux et précieux.

Minimize peatland site damage with careful harvest planning

by A. Groot and R.A. Haig. Sault Ste. Marie, Ont. : Forestry Canada, Ontario Region, 1991. 4 p. : ill. Bibliogr. (Technical note ; no. 2)

At head of title: *Frontline : forestry research applications*. ISSN 1183-2762 ISBN 0-662-18827-6
MICROLOG 91-05426 1 fiche

Timber harvesting operations, particularly those caused by wheeled skidders and heavy slash cover, can damage peatland forest sites and make them difficult to regenerate. From 1982-84, an experiment was conducted near Kapuskasing, Ontario, in uncut peatland black spruce stands scheduled for harvesting. The stands supported an understorey well stocked with black spruce advance growth and were scheduled for harvesting by three different methods. This technical note describes the cutting, analyses the data collected, and discusses the results.

Minimum ignition temperature : an alternative small-scale flammability test for conveyor belting

by K.J. Mintz and K.V. Inglis. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1991. iv, 26 p. Bibliogr. (Report ; MRL 90-138(TR))
MICROLOG 91-04539 1 fiche

This report presents the results of minimum ignition temperature (MIT) tests carried out on 10 different conveyor beltings to determine if this test is useful for assessing the fire-resistance of belting. Nine of the samples had been tested by the US Bureau of Mines, in addition to oxygen index tests. The tests were conducted using a Seichkin furnace, usually used to test the flammability of plastics. The study also compared the results with other flammability data.

Mining and mineral processing operations in Canada, 1980

Ottawa : Energy, Mines and Resources Canada, 1982. iii, 93 p. (Mineral bulletin ; MR 195) ISBN 0-660-11172-1
MICROLOG 91-00095 1 fiche

Compilation of information obtained primarily from a questionnaire sent to all companies concerned. Part 1 covers metal and industrial mineral mines and processing plants, giving information on metal mines and processing plants, industrial mineral mines and processing plants, and lime producers. Information includes the name of the operator, location of the facility, its capacity, processes and products. Part 2 covers nonferrous and precious metals metallurgical works that treat these ores and concentrates. Not listed are those companies that basically refine scrap and other secondary metals, foundries, base-bullion gold refineries associated with mines, and fabricating plants. Part 3 covers primary iron and steel metallurgical works, listing the facilities, productive capacities, and products. There are also separate sections on the steel pipe and tube industry and the iron powder and ferrite industry. All information is current as of December 31, 1981.

Minister's Forum on Special Education : proceedings : together today for our children tomorrow

Minister's Forum on Special Education (1991 : Edmonton, Alta.). Edmonton : Alberta Education, 1991. ii, 37 p. : ill.
MICROLOG 91-06157 1 fiche

This report outlines the proceedings of a forum on special Education held in Alberta on May 10-11th, 1991. The purpose of the forum was to

(1) share ideas and make suggestions regarding special education (ie. mainstreaming/integration of children with special needs into the classroom setting), (2) present a preliminary position for Alberta Education on special education and integration, (3) review concerns raised in the Special Education Review Plan & to solicit feedback from participants and (4) to provide the Minister of Education with information and ideas to develop policies in special education. The addresses of participants, as well as panelists, and the Minister of Education (Alberta) are briefly summarized; in addition, the proposed ideas and possible solutions to the questions under discussion conclude the report.

A Model which predicts Pacific herring *Clupea harengus pallasi* egg deposition on giant kelp *Macrocystis* sp. plants from underwater observations

by C.W. Haegele and J.F. Schweigert. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, Pacific Biological Station, 1990. iii, 17 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 2056) ISSN 0706-6473 MICROLOG 91-00876 1 fiche

Pacific herring spawn is routinely surveyed to estimate escapement. When spawn is deposited on the giant kelp, SCUBA divers make observations on the number of egg layers, the height of the kelp plants, and the number of fronds per kelp plant. A multiple regression model that predicts eggs per plant from these observations was developed from data collected for 167 plants between 1981 and 1987. Total herring egg deposition on giant kelp is estimated using this model in conjunction with estimates of plant density and spawning bed area.

Modelling methodology for estimating forage yield potential in Canada

by A. Bootsma and J.B. Boisvert. Ottawa : Agriculture Canada, Research Branch, 1991. 30 p. : ill. Bibliogr. (Technical bulletin ; 1991-6E) (LRRRC contribution ; no. 90-50) French ed. (*Méthode de modélisation relative...*) on the same fiche. ISBN 0-662-18569-2
MICROLOG 91-05499 1 fiche

This bulletin describes the modelling methodology developed to estimate average potential (constraint-free) and anticipated (rainfed) forage yields in Canada. A revised general crop growth model used to estimate production potentials of annual crops in Canada was selected as a basis for the forage model (FORYLD). Subroutines were developed and validated with field data to simulate normal growth periods and cutting schedules for alfalfa and for grasses (timothy, brome grass, wheatgrass). Each growth period was then treated as a full season for annual crops in the FAO model. Comparison of model yield estimates with yields observed in field trials at various locations across Canada were made for calibration and validation.

Les Modes de vie de la population de Place-Royale entre 1820 et 1859 : synthèse

par J. Provencher. Québec : Gouvernement

de Québec, Ministère des affaires culturelles, 1990. xix, 315 p. : ill. Bibliogr. (Collection dossiers ; no 66) ISBN 2-551-14150-8
MICROLOG 91-04640 4 fiche

Cette étude sur les modes de vie de la population à Place-Royale entre 1820 et 1859 s'appuie sur l'analyse des données historiques et archéologiques. Elle est d'abord une synthèse articulée autour de cinq parties, de longueurs très inégales, dont la plus importante concerne la vie domestique, c'est-à-dire la vie à la maison. On y montre comment les habitants de ce microcosme se chauffaient, s'éclairaient, se meublaient et décoraient leur intérieur, comment ils mangeaient, se vêtaient et se soignaient, quels étaient leurs loisirs et comment ils se déplaçaient. Les deuxième et troisième parties décrivent les endroits publics, l'auberge, le magasin et la boutique ainsi que le marché et les quais, tandis que la quatrième partie donne un aperçu du rythme de vie à Place-Royale selon le rythme des saisons.

by D.E.W. Laidler and W.B.P. Robson.
Toronto : C.D. Howe Institute, 1991. 16 p. : ill. Bibliogr. (Commentary ; no. 26) At head of title: *Monetary policy*. ISSN 0824-8001 ISBN 0-88806-273-7 MICROLOG 91-01743 1 fiche

Canada is in the midst of a major monetary policy experiment. Within the mainstream of Canadian economic analysis, it is possible to discern two distinct views about its likely outcome. One, a structural-eclectic view, sees a protracted recession and significant 'cost-push' inflation, stemming from the GST, oil prices, and wage pressure. The other, a monetarist view, sees signs that the recession may be short, and, more importantly, anticipates a substantial decline in inflation. This document argues that an analysis of bank lending patterns and changes in the monetary aggregates in Canada lends some support to the monetarist view that the behaviour of money is important.

Monitored performance of the solar-heated ventilation system at McDonnell-Douglas Canada

Enermodal Engineering Ltd. Ottawa : Canada Centre for Mineral and Energy Technology, Efficiency and Alternative Energy Technology Branch, 1990. v. 25 p. : ill. CANMET contract: 23216-9-9097-01-SZ. ISBN 0-662-18173-5 MICROLOG 91-01223 1 fiche

One of the best applications for solar heating is the preheating of building ventilation air. To reduce the cost of solar preheated ventilation systems, an unglazed version of a collector was developed in which the south wall of a building is painted a dark colour and an air intake is installed at the top of the wall. Incident solar radiation warms the air near the wall, which rises up the wall by natural convection to be pulled into the building by the intake. A section of wall was tested at the National Solar Test Facility and showed efficiencies of up to 50 percent under low wind speed and high air flow. This report presents the results of performance monitoring of an unglazed solar-preheated ventilation system at the McDonnell-Douglas plant in Toronto. The monitoring quantified the energy savings of the system and identified any potential improvements in system design.

Monitoring and data management technology for environmental assessment : theme paper two

by H. Croze and V. Vandeweerdt. Ottawa : Environment Canada, 1991. ii, 44, ii, 34 p. Bilingual (La Surveillance et les techniques...). At head of title: *Environmental Information for the Twenty-first Century : international forum*. MICROLOG 91-06690 1 fiche

In 1989, the Group of Seven (G7) summit leaders agreed on the importance of environmental information and requested the Organization for Economic Co-operation and Development to examine how selected environmental indicators could be developed to improve the integration of environmental and economic decision-making and to measure progress towards sustainable development. At

the 1990 G7 summit, the Prime Minister of Canada proposed that environmental information be improved on a world-wide basis, and announced that Canada would organize the International Forum on Environmental Information for the Twenty-first Century. This theme paper outlines the major issues associated with the acquisition, storage, management and communication of environmental data and information. It focuses on the tools and techniques used; presents some examples of successful existing monitoring and assessment programmes; highlights some of the global responses; and reviews the major issues addressed.

Monitoring and predictive capability for evaluating impacts from in-situ oil sand/heavy oil subsurface disposal practices

Stanley Associates Engineering. Saskatoon, Sask. : Environment Canada, Ground Water Division, National Hydrology Research Institute, 1990. iii, 207 p. : ill., fold. maps. Bibliogr. (NHRI contribution ; no. 90025) ISSN 0838-1992 MICROLOG 91-04135 3 fiche

This study was undertaken to evaluate the considerable body of data which already exists from injection well monitoring requirements in Alberta and to use them, if possible, to validate the Alberta Research Council model, developed in 1987. The study collected and evaluated pressure-volume data of 60 waste injection wells in the Cold Lake area of east-central Alberta; predicted the pressure-volume relationship in selected waste injection wells using a computer model and evaluated the model by comparing measured pressures to predicted pressure data; evaluated the use of existing wells within the study area to monitor the effects of waste injection on the subsurface environment; and selected suitable sites for construction of monitoring facilities based on the evaluation of existing monitoring and predictive capabilities.

Monitoring of consolidation of waste salt backfill : final report

Rio Algom Ltd. Potash Company of America Division. S.I. : The Division, 1990. iii, 69 p. : ill. On cover: *Potash Mining Project, Mineral and Energy Technology, Mining Research Laboratories*. CANMET contract: 88239-01-SQ. MICROLOG 91-00374 1 fiche

Potash Co. of America operates a cut-and-fill potash mine at Sussex, N.B. which uses salt waste from the mill to fill stopes up to 30 m wide and 120 m high. For economical and safe design of stopes it is necessary that the

post-placement behaviour of the backfill is known with some accuracy. Instrumentation for remote measurement of the consolidation and pressure in backfill has long been available for use in civil engineering soil mechanics, but these instruments are generally not suitable for mines because permanent access is difficult or impossible to maintain, conditions are more aggressive because of the mining cycle that must occur between fill cycles, and settlements are often more extreme. This report describes the specific instruments designed for measuring the properties and behaviour of salt backfill and describes the testing of the prototypes.

Monitoring of marsh vegetation response to a jet-fuel spill at Vancouver International Airport

by A.I. Moody. Hull, Que. : Environment Canada, Conservation and Protection, Environmental Protection, 1990. 45 p. : ill. Bibliogr. (Regional manuscript report ; MS90-04) MICROLOG 91-03069 1 fiche

On March 23, 1988, an area of marsh by the Middle Arm of the Fraser River, adjacent to the Vancouver International Airport was affected by a spill of jet A fuel. This study was undertaken to identify the impacts associated with the spill and to gather information which could be used for future environmental planning, since little background data was available. A literature review was conducted to establish background data on the properties of hydrocarbon fuels, their impacts on vegetation, the physiological response of the vegetation, the substrate and seasonal effects, and recovery. An initial site visit was undertaken on April 3, 1988 to select monitoring stations for heavily and lightly affected areas and a control area. Vegetation and core samples were taken at all sites in April, July and September and analyses were done to establish the effects of the hydrocarbons on the sediments and vegetation.

Moose age and sex survey : Game Hunting Area 8, 1988-89

by D.W. Cross. Winnipeg : Manitoba Natural Resources, Wildlife Branch, 1990. iv, 19 p. : ill., maps. (Manuscript report ; no. 90-13) CSI 41119.207.
MICROLOG 91-00362 1 fiche

Results of a survey which reported on calf survival to 6 months and age and sex composition of the moose population in game hunting area 8, using a Cessna 206 fixed wing aircraft with two observers. The majority of the survey was flown in the lower portion of the area, and moose were also classified while enroute to population survey blocks in the upper area north of the Moose Lake road. Moose were classified as adult males, adult females, or calves. Adult males with antlers were further classified as yearling or teenager, class I; medium or sub-prime, class II; and large or prime, class III. Whenever possible, antlerless males were also classified using body size, coloration, and bell size.

Moose population estimates for Game Hunting Area 8, 1988-89

by D.W. Cross. Winnipeg : Manitoba Natural Resources, Wildlife Branch, 1990. iii, 11 p. : ill. Bibliogr. (Manuscript report ; no. 90-14) CSI 41119.206.
MICROLOG 91-00363 1 fiche

Game hunting area 8, east of The Pas, is a prime moose habitat. A decline of the moose population was documented in aerial surveys conducted in 1976, 1977, and 1981, largely attributed to an over harvest of moose by licensed and native hunters. A January 1986 aerial survey showed a continuing decline in the population, making it necessary to repeat the survey in 1989. This report presents the results of that survey. Survey methods followed those used in previous surveys and the boundaries and locations of the 4 strata remained the same also.

Motion model for the correction of point-source distortion in radiographs of honeycomb

by J.E. Boyd. Victoria : Defence Research

Establishment Pacific, 1988. iv, 15 p. : ill. (DREP technical memorandum ; 88-14)

MICROLOG 91-00063 1 fiche

One difficulty in the X-ray radiography of any object stems from the nature of the point source of the radiation used. The point source dictates that the radiation passing through the object of interest is not parallel, consequently problems arise with honeycomb images. This paper proposes a numerical method which compensates for distortion in honeycomb radiography due to point-source radiation. The method is based on a model which assumes that the radiation source is parallel, and that the distortion is caused by motion during the integration of the radiograph.

Motor use and overall end use of electricity by Ontario industry

by B.G. Woods. Toronto : Ontario Hydro, Research Division, 1991. 23 p. : ill. Bibliogr. (Report ; no. 90-246-K)

MICROLOG 91-07181 1 fiche

Investigation into the total electricity consumption for various types of loads throughout Ontario industry. The study identified the loads associated with a number of different motor uses as well as the lighting, heating and electrolysis loads. The information will be used to identify and prioritize projects according to their potential to reduce the demand for electricity in industry. Data for the study was mainly taken from a 1979 Drexel report on energy consumption in 108 industries, weighted according to electricity consumption for the respective industry in Ontario. Ontario electricity consumption data came from a 1984 Statistics Canada study, or if this was not available, the average load breakdown in related industries, using the SIC classification.

Multichannel doppler processing for an experimental low-angle tracking system

by E. Bossé and R.M. Turner. Ottawa : Defence Research Establishment Ottawa, 1990. vii, 50 p. : ill. Bibliogr. (Report ; no. 1039)
MICROLOG 91-00293 1 fiche

This report presents an analysis of the performance requirements for a multichannel Doppler-processing unit (MDPU) which is part of the experimental low-angle tracking (ELAT) radar system. This Doppler processing unit must perform the functions of data reduction, signal-to-noise ratio improvement, sea-clutter rejection and correction for systematic errors. Before establishing the Doppler processing requirements, the characteristics of the sea-clutter are analyzed as a function of the ELAT radar parameters. General guidelines are then presented for the design of the MDPU, with emphasis on a new method to compensate for systematic errors. Finally, the effects of block sampling are considered on both target detection and target height estimation.

Multiculturalism and the economic agenda in Australia : adult E.S.L., overseas skills recognition and anti-racist strategies

by D.K. Stasiulis. Ottawa : Multiculturalism and Citizenship, Multiculturalism Sector, Policy and Research, 1990. iii, 112 p. Bibliogr.
MICROLOG 91-06684 2 fiche

This report examines initiatives to increase English language training, to introduce new processes for recognising overseas qualifications, and to fight prejudice and racism, which were outlined in the National Agenda for a Multicultural Australia. It focuses on directions taken in English as a Second Language policies for adult immigrants, the obstacles faced by migrants in gaining recognition within Australia of their overseas qualifications, and recent reforms in processes for recognising migrant professional and trades skills. It also discusses two national campaigns directed at dealing with racist violence and community relations, and explores the current involvement of Australian unions in anti-racist issues.

A Multilateral investment accord : issues, models and options

Strategic Inc. Ottawa : Investment Canada, 1991. i, 38 p. Bibliogr. (Working paper ; no. 8)
MICROLOG 91-05847 1 fiche

Over the past decade a number of commentators have spoken of the need for a new multilateral accord on international investment. This report reviews current informed opinion on shaping a new multilateral investment accord, first describing the predominant features of today's international investment environment and relevant policy issues. It looks at the status and efficacy of existing multilateral instruments for addressing investment issues, and examines the Canada-U.S. FTA as one model for a new international investment accord. Finally, it defines the range of possible options for a multilateral investment accord.

ISBN 0-660-13887-5
MICROLOG 91-04812 1 fiche

In September 1986 ministers representing the then 92 member nations of the General Agreement on Tariffs and Trade (GATT) met in Punta del Este, Uruguay, to discuss reforms to the international trading system. Agreement was reached for the formal launching of an eight round of multilateral trade negotiations (MIN). These negotiations are the most complex and difficult ever attempted, and many believe the very survival of an open trade system could be at stake. The success of the current MIN is especially important to Canada, given that it has a relatively small, resource-based economy with a high exposure to international trade flows. Previous trade liberalization rounds have stimulated growth and competitiveness, and Canada stands to gain from the strengthening of GATT rules. This review examines the threats to the GATT system, the major negotiating issues in the Uruguay round, and the Canadian position in these negotiations.

Muscle fibre area, fibre type and capillarization in male and female body builders

by D.G. Bell and I. Jacobs. Ottawa : Defence and Civil Institute of Environmental Medicine, 1990. 5 p. Bibliogr. (DCIEM publication ; 90-P-10) In *Canadian Journal of Sports Science* : vol. 15, no. 2, 1990.
MICROLOG 91-00075 1 fiche

This study compared selected skeletal muscle morphological characteristics (fibre area, muscle fibre capillarization and fibre type distribution) in both male and female body builders with control subjects. Nine of the subjects (5 males and 4 females) were body builders who had been training specifically for body building over the past 2-10 years. The 10 control subjects (4 males and 6 females) had no previous strength-training experience. Muscle fibre area, percentage fibre type, and capillary supply were compared between the body builders and the controls, as well as between males and females, with a 2-way analysis of variance design.

National Core French Study : a synthesis

by R. LeBlanc. Ottawa : Canadian Association of Second Language Teachers, 1990. 115 p. Bibliogr. French ed. (Etude nationale sur les...) : 91-03565/2. ISBN 0-921238-08-8
MICROLOG 91-03566 2 fiche (Available on fiche only)

The Study examined policies, programs, and activities in Core French; pooled ideas, experience and research on the planning, organization, curriculum development, teaching approaches, teacher education, and professional development; and identified ways and means to substantially strengthen Core French. This document includes a short review of the justification for the syllabuses, and the results obtained by the syllabus task force. It also raises questions relating to integration, evaluation, and professional development.
● CA CI ED

National Core French Study : the communicative/experiential syllabus

by R. Tremblay, M. Duplantic and D. Huot. Ottawa : Canadian Association of Second Language Teachers, 1990. xvi, 102 p. Bibliogr. ISBN 0-921238-12-6
MICROLOG 91-03570 2 fiche (Available on fiche only)

In the early 80's, H.H. Stern expressed serious misgivings about the value of developing language courses from a purely linguistic base. He claimed that the learning environment provided by such courses inevitably leads to low levels of communicative ability and contributes little to a learner's general education. He proposed instead a multidimensional curriculum containing four syllabuses, each contributing in its own way to the enrichment of the second language learning environment. These syllabuses are language, culture, general language education and communicative activities. This document sheds light on the nature of Stern's communicative activities syllabus and its impact on the teaching and learning situation.
● CA CI ED

National Core French Study : the evaluation syllabus

by B. Harley, A. D'Anglejan and S.M. Shapson. Ottawa : Canadian Association of Second Language Teachers, 1990. 156 p. Bibliogr. ISBN 0-921238-18-5
MICROLOG 91-03569 2 fiche (Available on fiche only)

In addition to being an essential component of program evaluation, student evaluation of a systematic nature is considered to be an integral part of language teaching methodology. The purpose of this document is to provide a brief review of some options in student evaluation, and to consider their relevance for monitoring student learning and perceptions in the context of a multidimensional curriculum for core French programs. It examines some important basic concepts in evaluation and considers evaluation methods in three general categories: language tests, observation and record-keeping, and self-report evaluation techniques.

National Forestry Forum on Sustainable Development and Forest Management : proceedings

National Forestry Forum on Sustainable Development and Forest Management (1990 : Halifax, N.S.). Ottawa : Canadian Council of Forest Ministers, 1990. ii, 50, ii, 55 p. *Bibliogr. Bilingual (Colloque national sur le...)*. MICROLOG 91-00177 2 fiche

In 1985, federal, provincial and territorial ministers of forestry joined together to form the Canadian Council of Forest Ministers (CCFM) to stimulate the development of policies and programs to strengthen the forestry sector, including the forest resource and its utilization. This forum was conducted to build a consensus on what sustainable development means for forest management in Canada. The forum was concerned with identifying future fibre supply, forestry practices and forest research; the types of changes in decision-making structures or processes by governments, industry and landowners that will be required; and what actions need to be taken, when, and by whom, if sustainable development in forest management is to be achieved.

National health expenditures in Canada, 1975-87

Ottawa : Health and Welfare Canada, 1990. xiv, 195 p. : ill. CSI 21112.215. ISBN 0-662-17957-9 MICROLOG 91-02384 3 fiche

This report measures all spending on health in Canada during the period 1975 to 1987 and provides some comparable data for the United States. It emphasizes the reconcilability with public documents, particularly with public accounts. The data are presented by sector, category, and province. The sectors are federal, provincial, and local governments, workers' compensation boards, and the private sector. The categories are: institutional and related care services, professional services, drugs and other health expenses.

The Natural rate of unemployment : a regionally disaggregated approach

by A. Burns. Ottawa : Economic Council of Canada, 1990. xi, 105 p. : ill. Bibliogr. (Working paper ; no. 2) CSI 22215.223. MICROLOG 91-01567 2 fiche (Available on fiche only)

The paper presents quarterly estimates of the natural rate of unemployment for each of the ten Canadian provinces over the period 1963-86. It models unemployment rates for each of the ten provinces in a reduced form against cyclical, structural, policy and terms of trade variables using SUR methodology. It models the turmoil generated by the oil shocks of the seventies by the relative price of energy. It also uses relative export prices for commodities important to individual provinces as proxies for changes in the terms of trade. Minimum wages legislation and unemployment insurance are among the government policies whose influence is accounted for.

Near-surface moored current meter intercomparisons

by M.J. Woodward, W.S. Huggett and R.E. Thomson. Sidney, B.C. : Dept. of Fisheries and Oceans, Institute of Ocean Sciences, 1990. xii, 65 p. : ill., maps. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 125) ISSN 0711-6774 MICROLOG 91-01832 1 fiche

Three experiments to evaluate the performance of near-surface moored current meters were conducted from May 1982-September 1983 at sites in coastal waters off B.C. The instruments used were the standard Aanderaa RCM4 plus one RCM4 fitted with an experimental paddle-wheel rotor, the Geodyne 850 modified by Applied Microsystems Ltd. to record one sample per second, the Dumas

Neyrpic model CMDR modified for recording on magnetic tape, the Endeco type 174, the EG&G VMCM model 630, the Marsh-McBirney 585, the Neil Brown ACM2, the Sea Data 620 and the Simrad UCM model 37. The current meters were deployed within 10 metres of the surface except for two deeper subsurface moorings with instruments at 50 and 100 metres. The emphasis was on comparison of instruments mounted as close together as possible on the same mooring. • BC CA CF NR PS SC

Nectar trees, shrubs, and herbs of Ontario

by H. Cedric Larsson and Reg Shuel ; editor, Cynthia D. Scott-Dupree. Toronto : Ministry of Agriculture and Food, 1990. 15 p. ISBN 0-7729-7466-7 MICROLOG 91-03894 1 fiche

Publication to acquaint commercial and hobby beekeepers of the actual and potential nectar trees, shrubs, and herbs capable of growing in a variety of habitats in the 8 climatic zones of Ontario. Information is given on the utility, climatic zone suitability, botanical features, site features, honey plant rating and honey characteristics of each species. AG ON PR SC

A Needs analysis study of the residential energy conservation industry, vol. 1 : report

Goss, Gilroy & Associates Ltd. Ottawa : Energy, Mines and Resources Canada, Industry and Technology Group, 1987. 52 p. MICROLOG 91-02793 1 fiche

This study focuses on home renovation contractors, siding and roofing contractors, and heating and refrigeration contractors. The study developed an industry situation analysis to provide a profile (sales, number of employees, geographic location) for establishments within specific sub-sectors; identified distribution channels used for products and/or services; and profiled the application of energy conservation technology within relevant sub-sectors. The study also provided a baseline description of the level of technical knowledge that currently exists within each of the sub-sectors and a description of existing and future demand for technical training. Information was collected through telephone surveys with 100 firms in each sub-sector. • CA EN PL SC

Negotiated working conditions, 1991

Victoria : Ministry of Labour and Consumer Services, Policy and Legislation Branch, 1991. 344 p. CSI 37113.004. ISSN 0703-0665 MICROLOG 91-02994 4 fiche

This edition provides current information on the content of major collective agreements (excluding wage rates) covering workers in British Columbia. For this survey the sample of collective agreements included consists of a selection of major contracts covering 100 or more employees and includes 130 agreements which protect an estimated quarter million employees. The survey includes Negotiated Working Conditions on 169 clauses in collective agreements which are analyzed by 7 major industry divisions, which are as follows: mining; manufacturing; transportation, communication and other utilities; trade and finance, insurance and real estate; public service (health and education); private services (business and personal); and public administration. A listing of all agreements is included in the survey by industry and sector. BC LA PR ST

Negotiating pay equity

Winnipeg : Manitoba Labour, Pay Equity Bureau, 1991. 50 p. Bibliogr. (Pay equity, equality at work ; 4) MICROLOG 91-06156 1 fiche

Pay equity or equal pay for work of equal value is founded on the premise that certain types of jobs traditionally done by women may be undervalued and underpaid simply because they are considered to be 'women's jobs.' The principle of pay equity is that the wage for a job should be based on the value of a job, not the gender of the worker. The purpose of this document is to assist employer and employee representatives who are negotiating pay equity, either under the terms of legislation, through following a defined policy framework, or through a joint agreement. Neotectonic investigations in southern Ontario : Prince Edward County, phase I

by G.H. McFall and A. Allam. Ottawa : Atomic Energy Control Board, 1989. v, 67 p. : ill., maps. Bibliogr. (Research report ; INFO-0343) MICROLOG 91-00315 1 fiche

Summary of the preliminary results of geological and geophysical investigations of possible neotectonic features in Prince Edward County, southern Ontario, made by the Ontario Geological Survey in 1988. Low magnitude seismic events indicative of contemporary stress relief occurred during 1987-88 near Salmon Point and Consecon, proximal to a major regional fault system crossing Lake Ontario. Detailed observations were made of regional jointing orientations, erosion of surficial deposits adjacent to open fractures, a local fault displacement (post-glacially), dome structures located at Point Pelee, and dissolution or karst terrains in the eastern part of the study area. Excavations were done of 4 pop-up structures and detailed refraction seismic and resistivity surveys were conducted on them and on fault features. Level transects were conducted across complex structures in the eastern part of the study area and overturned and upright folds in the Consecon Quarry located outside of the primary research area were documented.

Nesting common loon monitoring survey, Fundy National Park

by J. Rossiter and D. Simkins. Ottawa : Parks Canada, 1990. iv, 14 p. : maps. Bibliogr. MICROLOG 91-02040 1 fiche

Loons are indicators of the quality of wilderness country, as they are at the top of their freshwater food chain for 6-7 months, they reflect water quality and conditions. A loon nest re-establishment program was initiated in Fundy National Park in the spring of 1990, with monitoring conducted on Wolfe, Bennett and Tracey Lakes. Loons were observed from June 11-August 31, 4-6 times per week, with an average observation length of 60 minutes. Monitoring for behaviour, weather conditions and human activities (boating and swimming, etc.) were recorded.

Neural and optical neural networks

by K.L. Sala. Ottawa : Government of Canada, Dept. of Communications, Communications Research Centre, 1991. viii, 74 p. : ill. Bibliogr. (CRC report ; no. 1434) MICROLOG 91-03503 1 fiche

This report presents an overview of neural and optical neural network technologies. It includes detailed descriptions of some of the more important paradigms, such as single- and multi-layer perceptrons, backpropagation, Hopfield networks, associative memories, and stochastic learning. Optical neural networks are discussed from the point of view of implementations based upon the use of linear or nonlinear, two-dimensional optical elements such as spatial light modulators or bistable etalon arrays and those based upon the use of holographic elements. General conclusions regarding the present and future directions for neural and optical neural network research are presented along with specific recommendations for the conduct of an intramural/extramural research program into optical neural networks.

Neural networks for automated vehicle dispatching

by J.-Y. Potvin, Y. Shen and J.-M. Rousseau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. 17 p. : ill. Bibliogr. (Publication ; no. 790) MICROLOG 91-06348 1 fiche

Decision-making for the dynamic dispatching of transportation vehicles is still mainly done by experienced people, making it very difficult to explicitly model that expertise using a symbolic approach. This paper proposes an alternative neural network model as a sub-symbolic and empirical alternative for modelling the decision process of expert dispatchers. The paper reports the preliminary results about the ability of the network to reproduce various decision rules.

Neutron dosimeters and survey meters in accelerators, reactors and other neutron environments

SENE Consultants Limited. Ottawa : Atomic Energy Control Board, 1989. xi, 124 p. : ill. Bibliogr. (Research report ; INFO-0307) MICROLOG 91-03308 2 fiche

Many of the facilities licensed by the Atomic Energy Control Board (AECB) produce neutron radiation fields in occupationally accessible areas. The accurate measurement of these fields and the reliability of personal neutron monitoring systems with necessary energy response, sensitivity and accuracy are of concern to the AECB. This study determined which type of neutron dosimeters for personal dose assessments and survey meters for radiation exposure control are 'best suited' for use at certain nuclear facilities (mainly particle accelerators) and in some applications involving radioisotopes where measurable neutron doses can be received by workers. In addition, ease of calibration, accuracy and reliability of each instrument are assessed in this work.

New directions for regulating contaminated sites : a discussion paper

by W. Braul. Victoria : Ministry of Environment, Environmental Protection Division, 1991. ii, 40 p. Bibliogr.

MICROLOG 91-02959 1 fiche

The past focus of pollution control legislation in B.C. has been on end-of-pipe discharges. This orientation has resulted in a lack of legislation addressing contamination left by historic activities. Although the province has entered into a joint federal-provincial program to remedy 'orphan high risk contaminated sites', there is still a need for provincial measures. This discussion paper serves as a basis for

consultation with parties which might be affected by law reform. The paper addresses legislative needs for dealing with contaminated sites, describes law reform solutions already under active consideration, and highlights the main principles which would guide specific legislative provisions to facilitate discussion on whether the directions of reform are appropriate.

New faces in the crowd : economic and social impacts of immigration : a statement

Economic Council of Canada. Ottawa : The Council, 1991. x, 41 p. : ill. French ed. (Le Nouveau visage du Canada...) : 91-03229/1. *CSI 22215.225.* ISBN 0-660-13766-6

MICROLOG 91-03230 1 fiche

This publication summarizes findings on the effects of immigration on the per-capita income of the host population and on unemployment. It also reviews the political effects, in terms of Canada's weight in the international community and of the size and distribution of population among the provinces and among the country's three largest metropolitan areas, under three different immigration scenarios. It examines how well the immigrants themselves do in Canada and reviews the issues involved in processing refugees. It also examines the social implications of immigration from two points of view: prejudice and tolerance, and the management of diversity. It concludes with 11 recommendations regarding the level of immigration over the next 25 years, the successful integration of immigrants into Canadian society, and the desirable distribution of immigrants across the three main categories: family class, refugees, and independents.

New insertion and post-optimization procedures for the traveling salesman problem

by M. Gendreau, A. Hertz and G. Laporte.
Montreal : Université de Montréal, Centre de recherche sur les transports, 1990. 20 p. : ill. Bibliogr. (Publication ; no. 708)
MICROLOG 91-00317 1 fiche

The traveling salesman problem (TSP) is one of the most widely studied problems in combinatorial optimization, its most common interpretation being that of a salesman seeking to determine the shortest Hamiltonian circuit through a number of cities. Recently, new TSP applications have been described in several other fields such as drilling of printed circuit boards or sequencing of punch operations in a flexible manufacturing cell. Several of these applications are large-scale and can rarely be tackled by means of exact algorithms, requiring fast, low complexity heuristic routines for their solution. This paper describes such a heuristic approach which outperforms previously published methods on test problems. It includes an improved insertion procedure and a new post-optimization routine which can also be used in conjunction with other algorithms.

New London Bay Complex : watershed activities

prepared by Environment Canada, Inland Waters Directorate, Atlantic Region [and] P.E.I. Dept. of the Environment, Fish and Wildlife Branch. Ottawa : The Region ; Charlottetown : The Branch, 1990. ix, 29 p. : ill. Bibliogr. At head of title: The Canada-Prince Edward Island Water Management Agreement, Surface Water Program.
MICROLOG 91-00643 1 fiche

This report was produced as part of the Watershed Inventory Project under the Canada-Prince Edward Island Water Management Agreement. The research was initiated to gain a better understanding of the activities which may impact on the quality and quantity of surface waters drained by the Hope, French, Stanley and Southwest Rivers into New London Bay. Topics covered include: general characteristics of the New London Bay watershed complex, agricultural operations, fish and wildlife resources, recreational activities, fisheries operations, industrial operations, alterations of natural features of waterways, wetlands, and additional activities affecting the watershed.

A New optimization formulation of the variational inequality problem with application to the network equilibrium problem

by J.H. Wu, M. Florian and P. Marcotte.

Montreal : Université de Montréal, Centre de recherche sur les transports, 1991. 17 p. Bibliogr. (Publication ; no. 722) (Publication ; no. 760)
MICROLOG 91-04079 1 fiche

This paper develops a general differentiable equivalent optimization formulation for the variational inequality problem and analyses its properties. Descent methods are proposed for its solution and convergence proofs are given even in the case where the Jacobian is the only positive semidefinite on the feasible set. The resulting algorithms are adapted for the network equilibrium problem in the space of path flows.

New reproductive technologies : what price hope?

brief submitted to the Royal Commission on New Reproductive Technologies ; by the New Brunswick Advisory Council on the Status of Women. Moncton, N.B. : The Council, 1990. 12 p. Bibliogr. French ed. (Nouvelles techniques de...) on the same fiche.
MICROLOG 91-01781 1 fiche

This brief begins by examining motherhood in the current social context and defining the role of the new reproductive technologies in this context. The situation of new reproductive technologies in New Brunswick is then discussed. Finally, the brief develops the parameters of what responsible government intervention in this area implies for the greater well-being of women and society as a whole. It includes recommendations.

NITEP, phase IIB : assessment of contaminant leachability from the residues of a mass burning incinerator

by S.E. Sawell and T.W. Constable. Ottawa : Environment Canada, Industrial Programs Branch, 1988. ii, 83 p. : ill. Bibliogr. Cover title: National Incinerator Testing and Evaluation Program : the combustion characterization of mass burning incinerator technology, Quebec City, vol. VI : assessment of contaminant leachability from residues.
MICROLOG 91-02059 1 fiche

The National Incinerator Testing and Evaluation Program was established in 1984 to assess the impact of municipal solid waste (MSW) incinerator emissions on the environment. Laboratory testing was begun to determine the chemical and leaching properties of the residues generated from different Canadian MSW generators. This report describes the results of the third study in the series, which examined 3 different types of ash (bottom, boiler/economizer and electrostatic precipitator), collected under 5 different operating conditions, from the Quebec Urban Community mass burning incinerator facility. Samples were collected during each of the 14 performance test runs under 5 different sets of operating conditions. Representative sub-samples of 1.5 kg of each type of ash from 4 'good' and 2 'poor' operating condition runs were acquired for characterization testing. Tests and analyses were conducted for total and fixed solids content, acid neutralization capacity, and organic and inorganic composition and leachability.

The Nonlinear bilevel programming problem : a general formulation and optimality conditions

by Y. Chen and M. Florian. Montreal : Université de Montréal, Centre de recherche sur les transports ; Département d'informatique et de recherche opérationnelle, 1991. 29 p. Bibliogr. (Publication : no. 794) (Publication : no. 782) MICROLOG 91-06708 1 fiche

The bilevel programming problem (BLPP) is characterized by a sequence of two optimization problems where the constraint region of the first is determined implicitly by the solution to the second. Stated algorithms are limited to special cases of the problem, and necessary optimality conditions have not been stated. This paper presents a general mathematical programming formulation for the BLPP which is based on the marginal (value) function, defined to be the infimum value function of the second level problem, parametrized by the first level variables. The paper investigates the properties of the new formulation in the framework of nondifferentiable optimization and analyses the (generalized) differentiability of the marginal function under general conditions. First order necessary optimality conditions for the BLPP are developed and the cone of the feasible direction is characterized.

NORAD : its history and its new challenges

by M. Rossignol. Ottawa : Library of Parliament, Research Branch, 1990. 45 p. Bibliogr. (Background paper ; BP-238E) French ed. (Le NORAD : historique et...) on the same fiche. ISBN 0-660-13912-X MICROLOG 91-06074 2 fiche

Recent upheavals in the Soviet Union and a significant reduction in East-West tensions have

put the possible withdrawal of Canadian NATO forces from Western Europe at the centre of debate on Canadian foreign and defence policies. Canada's involvement in the North American Aerospace Defence Command (NORAD), one of the most controversial issues in post-war Canadian defence policy, may also be affected by changing perceptions of the Soviet threat as the NORAD Agreement between Canada and the United States comes up for renewal in 1991. This study examines NORAD's origins and the technological and political developments that have led to its present status and considers its future in the changing world.

• CA CI EX

The NORAD renewal issue : report considering the question of renewing in May 1991 the North American Aerospace Defence Agreement

Canada. Parliament. House of Commons. Subcommittee on NORAD. Special Panel. Ottawa : Canadian Institute for International Peace and Security, 1991. iv, 65 p. Bibliogr. (Working paper ; no. 33) ISBN 0-662-694-X MICROLOG 91-04523 1 fiche

The report consists of seven papers written by four authors. The papers consider current strategic developments in the Soviet Union and their possible implications; review trends in continental defence in the United States and consider their possible impacts; and discuss the potential effects of strategic arms control agreements upon the central military balance. It also examines the special issue of aerospace surveillance, and examines Canadian and U.S. national interests and consultative and other relations in the aerospace defence field. It concludes with a presentation of a set of options and a body of principal findings.

North American cultures : values and institutions in Canada and the United States

by S.M. Lipset. Orono, ME : Canadian-American Center, 1990. v, 50 p. Bibliogr. (Borderlands monograph series ; no. 3) ISSN 1040-3264 ISBN 0-9625055-1-X MICROLOG 91-05850 1 fiche (Available on fiche only)

This work focuses on the sources and nature of the cultural and value differences between Canada and the United States. Aspects of North American cultures are interpreted as reflections of the key organizing principles that derive from their varying histories and ecologies. The central argument is that Canada has been a more class-aware, elitist, law-abiding, statist, collectivity-oriented, and particularistic (group-oriented) society than the United States, and that these fundamental distinctions stem in large part from the defining event that gave birth to both countries, the American Revolution, and from the diverse ecologies flowing from the division of British

North America.

North American trade liberalization sector impact analysis

Ottawa : Industry, Science and Technology Canada, 1990. 13 p. MICROLOG 91-02792 1 fiche

Mexico and the United States have agreed in principle to negotiate a comprehensive free trade agreement. Consideration is being given to the possibility of expanding the negotiations to include Canada. This document provides a very preliminary assessment of the potential impact that further trade liberalization might have on a number of individual Canadian sectors. It highlights existing Canada-Mexico sectoral trade patterns and provides an indication of the potential sectoral impacts on Canadian trade and investment interests arising from a bilateral Mexico-United States trade agreement and from a trilateral Mexico-Canada-United States trade agreement.

North Simcoe Waste Management Association landfill environmental assessment joint board decision : an issues analysis

by J. Simon. Toronto : Ministry of the Environment, Environmental Assessment Branch, 1990. 26 p. ISBN 0-7729-7640-6
MICROLOG 91-05296 1 fiche

This report is the second in a series which assesses the environmental assessment (EA) planning implications of recent Board decisions. This report analyzes the EA planning and waste management issues in the Joint Board's decision on the North Simcoe landfill application and discusses how they may impact on EAs and waste management master plans now underway. In addition, the report identifies trends which may be emerging in recent Board decisions and provides guidance on their implications for proponents, consultants and the interested public. The report addresses the issues of consideration of alternatives, the planning process and the undertaking, public consultation, the hearing process, and equity and social justice.

Northern diseased bison : report

Canada. Environmental Assessment Panel. Hull, Quebec : Federal Environmental Assessment Review Office, 1990. 47, 50 p. : ill., maps. (Federal environmental assessment review process ; 35) *Bilingual (Bisons malades...)*.
ISBN 0-662-57726-4
MICROLOG 91-00342 2 fiche

In February 1988, an Environmental Assessment Panel was established to examine all reasonable courses of action to protect domestic livestock, wild wood bison, and human health through control or elimination of contact with hybrid animals carrying tuberculosis and bovine brucellosis; and to recommend a solution while assessing its impacts on the environment, resource conservation, people and the local economy. Key issues and concerns were identified by soliciting written submissions and

holding issue scoping sessions in 9 communities in the vicinity of the Wood Buffalo Park, Yellowknife, NWT and Edmonton, Alberta; by information supplied by federal, provincial and territorial government departments; and by commissioned reports from 6 technical experts. This report presents the results, including a description of the setting and the problem, the review process, and the implementation of the solution recommended.

Northern science for northern society : building economic self-reliance

Ottawa : Science Council of Canada, 1991. 44 p. : ill. Bibliogr. (Report ; 41) ISBN 0-662-18631-1 MICROLOG 91-06055 1 fiche

This report is based on a study begun in 1988 to look into institutional changes needed to help northerners apply science and technology to the economic development of their communities. The study began with consultations in northern and southern Canada with representatives of aboriginal groups, governments, the private and education sectors, and science and technology advisory bodies. As part of the study, case studies were commissioned in Kuujuaq, Quebec; Inuvik, NWT; Haines Junction, Yukon; Nain, Labrador; Waskaganish, Quebec; and St. Paul Island, Alaska to explore the northerner's experience with science and technology-based development. Findings from both these sets of consultations were used to develop a discussion paper, which was then used as the basis for this report.

Northwest Atlantic tuna : identification and size conversion

by D. Clay and T. Hurlbut. Moncton, N.B. : Dept. of Fisheries and Oceans, Gulf Fisheries Centre, 1982. iv, 49 p. : ill., maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1820) ISSN 0706-6473 MICROLOG 91-07106 1 fiche

It is difficult to identify semi-processed Atlantic bluefin tuna, since there are few taxonomic keys available, and the incentive to misreport is strong due to high demand and regulation. This report reviews the literature and analyses historic Canadian data pertinent to the identification of bluefin tuna, especially when sampled in a dressed condition, and provides a more accurate series of size conversion factors from dressed weight to live weight. The report describes the criteria required to identify the various species of tuna fished in the northwest Atlantic and provides factors to convert available measurements to the data needed for stock assessment.

Le Nouveau visage du Canada : incidence économique et sociale de l'immigration : un rapport de synthèse

Conseil économique du Canada. Ottawa : le Conseil, 1991. x, 46 p. : ill. L'éd. anglaise (New faces in the crowd...) : 91-03230/1. CSI 22215.225F. ISBN 0-660-93015-2
MICROLOG 91-03229 1 fiche

Après une brève introduction, le rapport résume les conclusions concernant les effets de l'immigration sur le revenu par habitant de la population d'accueil ainsi que sur le chômage. Il examine ensuite les répercussions sur le plan politique, en évaluant le poids relatif du Canada dans la communauté internationale ainsi que la taille et la répartition de la population dans les différentes provinces et les trois régions métropolitaines les plus importantes du Canada, selon trois scénarios d'immigration différents. Quant aux immigrants eux-mêmes, on examine dans quelle mesure ils se tirent d'affaire au Canada et on aborde les questions concernant l'accueil des réfugiés. Finalement, les répercussions sociales de l'immigration sont examinées sous deux angles différents, soit les préjugés et la tolérance, et la gestion de la diversité.

Fredericton : la Commission, 1990. 14, 14 p. : ill. Bilingue. CSI 46129.001. ISSN 0840-9056 ISBN 1-55048-124-X
MICROLOG 91-02695 1 fiche

La Commission administre toutes les activités liées à l'application de la Loi sur l'hygiène et la sécurité du travail et de ses règlements ainsi que de la Loi sur la Commission de l'hygiène et de la sécurité au travail. Ces lois et règlements stipulent que chaque travailleur du Nouveau-Brunswick a droit à un milieu de travail sûr et salubre, et régissent les activités de la Commission. Ce rapport annuel présente le bilan des activités et des programmes y inclus l'étude de santé à la Fonderie

Brunswick, les ateliers présentés, le projet-pilote d'hygiène et de sécurité à la ferme, et le programme d'éducation à l'intention des petites entreprises. Le document fournit aussi un organigramme, des données statistiques, la répartition des accidents entre les principales catégories industrielles, ainsi que les états financiers.

Nouveaux mécanismes, indépendants du Cabinet, pour la fixation des prix des produits laitiers au Canada

par K. McKinley. Ottawa : Agriculture Canada, Direction générale des politiques, 1990. iii, 61, iii, 50 p. Bibliogr. (Document de travail) Bilingue.
MICROLOG 91-01429 2 fiche

Ce document constitue une tentative de cerner les questions les plus pertinentes, de discuter les expériences appropriées dans d'autres secteurs et dans d'autres pays et d'évaluer la pertinence d'un certain nombre d'options qui ont été envisagées. D'abord, il se penche sur ce qui s'est passé à cet égard au Canada et dans d'autres pays qui sont d'importants producteurs de produits laitiers, et comment les choses s'y déroulent présentement. Ensuite, il expose un choix d'idées pertinentes et de points à examiner, notamment ceux qui ont été mentionnés dans une récente série d'études sur la réglementation au Canada. Enfin, il établit la liste des critères qui serviraient à évaluer trois options fondamentales pour situer les prises de décisions relatives aux prix, à savoir: la réglementation des prix de soutien des produits laitiers dans le cadre des sphères de compétence fédérale; la réglementation des prix de soutien des produits laitiers en dehors du cadre de l'autorité directe du gouvernement fédéral et la déréglementation partielle des prix de soutien des produits laitiers.

Nouvelles images de la vieillesse : une étude de la presse âgée au Québec

par G. Lachance. Québec : Institut québécois de recherche sur la culture, 1990. 167 p. : ill. Bibliogr. (Documents de recherche; no 22) ISSN 0823-0447 ISBN 2-89224-131-6
MICROLOG 91-02971 2 fiche

Après avoir situé le phénomène de la presse âgée au Québec dans son contexte socio-démographique, ce document décrit ce qu'elle est, ceux qui la fabriquent et ceux qui la lisent. Il présente ensuite les résultats les plus significatifs de l'analyse de contenu, une certaine vision de la vieillesse et des personnes âgées, et un profil des valeurs, des rôles et des idéaux tels qu'exprimés par les personnes âgées ou qui leur sont attribués. A cela s'ajoutent des observations sur la référence au temps et la place réservée à l'imaginaire, que ce soit en termes de nostalgie, de rêve ou de vision du monde. On termine par une typologie de la presse âgée, une réflexion sur le genre de développement qu'elle préconise plus ou moins explicitement et quelques hypothèses à propos de la participation de cette presse spécialisée à la production sociale de la vieillesse et à l'édification d'une culture des personnes âgées au Québec.
